Submit Your Bids By Fax | FAX HOTLINE: 214-409-1425

ALL INFORMATION MUST BE COMPLETED AND FORM SIGNED

NAME _____ CLIENT # (if known) _____ BIDDER # _____
ADDRESS _____ E-MAIL ADDRESS _____
CITY/STATE/ZIP _____ CELL PHONE _____
DAYTIME PHONE (_____) _____ EVENING PHONE (_____) _____

Would you like a FAX or e-mail confirming receipt of your bids? If so, please
print your FAX # _____

or e-mail address here: _____

I would like to limit my bidding to a total of \$ _____

at the hammer amount for all lots listed on this bid sheet. I am aware
that by utilizing the Budget Bidding feature all bids on this sheet will be
affected. If I intend to have regular bidding on other lots I will need to
use a separate bid sheet.

Payment by check may result in your property not being released until
purchase funds clear our bank. Checks must be drawn on a U.S. bank.
(Bid in whole dollar amounts only.)

All bids are subject to the applicable Buyer's Premium. See HA.com for details.

Non-Internet bids (including but not limited to, podium, fax, phone and mail
bids) may be submitted at any time and are treated similar to floor bids. These
types of bids must be on-increment or at a half increment (called a cut bid). Any
podium, fax, phone or mail bids that do not conform to a full or half increment
will be rounded up or down to the nearest full or half increment and will be
considered your high bid.

Current Bid	Bid Increment	\$5,000 - \$9,999	\$500
< - \$10	\$1	\$10,000 - \$19,999	\$1,000

7 easy ways to bid

1 Bid By Internet

Simply go to www.HA.com, find the auction you are looking for and click "View Lots" or type your desired Lot # into the "Search" field. Every lot is listed with full descriptions and images. Enter your bid and click "Place Bid." Internet bids will be accepted until 10:00 PM CT the day before the live auction session takes place.

2 Bid By e-Mail

You can also e-mail your bids to us at Bid@HA.com. List lot numbers and bids, and include your name, address, phone, and customer # (if known) as well as a statement of your acceptance of the Terms and Conditions of Sale. Email bids will be accepted up to 24 hours before the live auction.

3 Bid By Postal Mail

Simply complete the Bid Sheet on the reverse side of this page with your bids on the lots you want, sign it and mail it in. If yours is the high bid on any lot, we act as your representative at the auction and buy the lot as cheaply as competition permits.

4 Bid In Person

Come to the auction and view the lots in person and bid live on the floor.

5 Bid By FAX

Follow the instructions for completing your mail bid, but this time FAX it to (214) 409-1425. FAX bids will be accepted until 3:00 p.m. CT the day prior to the auction date.

6 Bid Live By Phone

Call 1-800-872-6467 Ext. 1150 and ask for phone bidding assistance at least 24 hours prior to the auction.

7 Bid Live using Heritage Live!™

Auctions designated as "Heritage Live Enabled" have continuous bidding from the time the auction is posted on our site through the live event. When normal Internet bidding ends, visit HA.com/Live and continue to place Live Proxy bids. When the item hits the auction block, you can continue to bid live against the floor and other live bidders.

Because of the many avenues by which bids may be submitted, there is the real possibility of a tie for the high bid. In the event of a tie, Internet bidders, within their credit limit, will win by default

Dear Bidder:

Welcome to Long Beach! After our history-making Central States event in Illinois with its unprecedented four U.S. Coin lots sold for more than a million dollars each, momentum is on Heritage's side as we move on to California. At over 5700 lots from more than 200 consignors, including a Premier Session more than 600 pieces strong, this promises to be an exciting auction event.

In addition to two continuing named collections, The Teich Family Collection and The Twilight Collection, this auction has a Featured Collection:

The MKJ Collection, Part II

In April 2012 Heritage offered Part I of The MKJ Collection, a cabinet containing dozens of #1-ranked PCGS Registry Sets with particularly impressive results in proof coinage. An 1895 Morgan dollar, PR63 PCGS, is the collection's key-date highlight in our Premier Session, while strength in 20th century material is shown with a series of 1936 – 1942 proof coins, including a 1936 half dollar, PR67 PCGS, and a 1964 Accented Hair Kennedy half dollar, PR68 Deep Cameo PCGS.

Heritage offers seven ways to win at its auctions. Before the event, we accept bids through HA.com, mail, fax, and e-mail. Real-time remote bidding is available over the telephone and on our award-winning online system, Heritage LIVE!® The in-person experience, however, remains the pinnacle of Heritage hospitality. If you are attending the Long Beach Expo, you can visit our booth on the Bourse, hold the coin of your dreams at our live lot viewing, and win it on the auction floor.

Good luck!

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice President

COLONIALS

1652 Small Planchet Pine Tree Shilling, Fine 12 Dramatic Late Die State Noe-16

- 3001** 1652 Pine Tree Shilling, Small Planchet Fine 12 PCGS. Noe-16, W-835, Salmon 2-B, R.2. 64.97 gn. The scarce terminal die state of the variety with prominent breaks beneath the tree and on the lower left branches. The top of the S in MASATHVSETS is lapped away, as struck. Smooth gunmetal fields contrast with cream-gray legends and devices. Listed on page 39 of the 2013 *Guide Book*. PCGS# 24

American Plantations Token, MS63 1/24 Part Real, Newman 4-E Restrike

- 3002** (c. 1828) American Plantations 1/24 Part Real, Restrike MS63 PCGS. Newman 4-E, W-1155, R.5. The lesser seen of the two restrike varieties. Newman 5-D, with a vertical break on FRAN, is more often encountered. The scarcer Newman 4-E was struck from uncracked dies. This is a silver-gray example with moderately prooflike luster and an even strike. No marks are present save for minor field chatter near REAL. Listed on page 41 of the 2013 *Guide Book*. Population: 7 in 63, 0 finer (4/13). PCGS# 52
- 3003** 1723 Rosa Americana Twopence XF45 PCGS. CAC. M. 3.9-E.3, W-1342, R.4. Ex: Ryder, Boyd, Ford. Stop after REX and date. A medium to deep brown twopence with unabraded and lightly granular surfaces. Listed on page 43 of the 2013 *Guide Book*. Ex: William Hesslein, 11/1927, lot 847; F.C.C. Boyd Estate; John J. Ford, Jr. Collection, Part IX (*Stack's*, 5/2005), lot 156. PCGS# 128

1723 Rosa Americana Twopence M. 3.18-E.17, MS63 Brown Ex: John J. Ford, Jr.

- 3004** 1723 Rosa Americana Twopence MS63 Brown PCGS. CAC. M. 3.18-E.17, W-1334, R.5. Ex: Smith, Brand, Ford. Stop after REX, no stop after date. 239.5 gn per its Ford catalog appearance. Olive-green legends accompany steel-gray fields and motifs. The strike is crisp except for blending on the jaw. Unabraded, though we note a spot on the X in REX. Listed on page 43 of the 2013 *Guide Book*. Ex: DeWitt Smith; Virgil Brand; John J. Ford, Jr. Collection, Part IX (*Stack's*, 5/2005), lot 150. PCGS# 128
- 3005** 1723 Hibernia Farthing, DEI GRATIA MS65 Brown PCGS. CAC. M. 2.1-Bc.1, W-12350, R.5. A magnificent and pristine Gem that exhibits a full strike. Golden-brown to medium-brown with no evidence of carbon. An outstanding Hibernia type coin. Listed on page 44 of the 2013 *Guide Book*. PCGS# 176
- 3006** 1740-BB French Colonies Half Sou Marque MS61 PCGS. CAC. Breen-690. A variant of Vlack-325 with no stop after the rowel and a crude, thick appearance to the 1 in the date. Rich pearl-gray centers with peripheral apricot patina on the reverse. The obverse is slightly misaligned toward 7:30, although all legends are intact. Listed on page 53 of the 2013 *Guide Book*. Ex: Troy Wiseman Collection, Part Two (*Heritage*, 1/2007), lot 78, which realized \$862.50. PCGS# 158600
- 3007** 1739-A French Colonies Sou Marque MS64 PCGS. CAC. Breen-390, Vlack-17, R.1. Coruscating luster invigorates the undisturbed surfaces of this exquisite near-Gem. Toned stone-gray, ice-blue, and honey-gold. A magnificent example of this conditionally rare Paris Mint issue. Listed on page 53 of the 2013 *Guide Book*. Population: 4 in 64 (1 in 64+), 0 finer (4/13). PCGS# 158671
- 3008** 1762-BB French Colonies Sou Marque MS64 PCGS. CAC. Breen-634, Vlack-276. Smooth olive-gray fields contrast with gunmetal-gray high points. Struck near the end of the billon sou marqué series, produced between 1738 and 1764. The BB mintmark represents Strasbourg, France. Listed on page 53 of the 2013 *Guide Book*. PCGS# 158657
- 3009** 1766 Pitt Halfpenny, Silvered XF40 PCGS. Betts-519, W-8350, R.3. "The Great Commoner" William Pitt was hailed by merchants on both sides of the Atlantic when he successfully opposed the detested Stamp Act. The present olive-gold example is unabraded and moderately granular with clear types. Listed on page 50 of the 2013 *Guide Book*. PCGS# 239

- 3010 1773 Virginia Halfpenny, Period MS64 Red and Brown PCGS. N. 20-N, W-1540, R.4.** Pumpkin-gold illuminates protected areas, particularly on the reverse, though the fields and high points are brown. Devoid of marks. Minute carbon is scattered but of little import. Ex: *Orlando FUN Signature (Heritage, 1/2007)*, lot 60027, which realized \$977.50. PCGS# 241
- 3011 1773 Virginia Halfpenny, Period MS64 Red and Brown PCGS. N. 24-K, W-1570, R.1.** Orange-red is especially prevalent on the reverse, both sides also display powder-blue and olive-green. Coruscating and nicely struck with a few unimportant small gray spots. Listed on page 45 of the 2013 *Guide Book*. PCGS# 241
- 3012 1760 Hibernia-Voce Populi Halfpenny AU53 PCGS. CAC. N. 15, Z. 3-A, W-1382X, R.4.** A glossy chocolate-brown representative with pleasing surfaces. The high points of the motifs indicate incompleteness of strike. The Voce Populi series was struck in Dublin, Ireland, and examples may have circulated by weight in Colonial America. Listed on page 49 of the 2013 *Guide Book*. PCGS# 262
- 3013 1787 Massachusetts Half Cent AU55 PCGS. Ryder 5-A, W-5960, R.3.** The second M in COMMON is repunched, and a double divider separates the date from the eagle's tail. An ebony-brown commonwealth copper with smooth fields and minor high point wear. Listed on page 59 of the 2013 *Guide Book*. PCGS# 296
- 3014 1787 Massachusetts Half Cent — Scratch — PCGS Genuine. Unc. Details. Ryder 4-C, W-5940, R.2.** A few straight thin marks are noted near the Indian's right (facing) arm. The reverse displays distributed small flan flaws. The steel-brown surfaces display satin luster and show merging of detail on the high points. Listed on page 59 of the 2013 *Guide Book*. PCGS# 296
- 3015 1787 Massachusetts Cent, Arrows in Left Talon AU55 PCGS. Ryder 3-G, W-6090, R.3.** This medium brown Choice AU commonwealth copper has an even strike and minimal marks. A hint of the texture of the flan prior to the strike is seen near 1 o'clock on the obverse and opposite at 5 o'clock on the reverse. A 2% curved clip, as made, is noted at 9:30. Listed on page 59 of the 2013 *Guide Book*. Population: 8 in 55, 11 finer (4/13). Ex: *Boston Signature (Heritage, 8/2010)*, lot 3762. PCGS# 302
- 3016 1785 Connecticut Copper, Bust Right — Environmental Damage — NGC Details. XF. M. 6.3-G.2, W-2410, High R.5.** An uncommonly sharp example of this very scarce Connecticut variety. The ebony-brown surfaces are granular and free from noticeable marks. A late die state with swelling on the reverse near the E in INDE. Listed on page 61 of the 2013 *Guide Book*. PCGS# 316
- 3017 1786 Connecticut Copper, Large Head Right — Environmental Damage — NGC Details. VF. M. 3-D.1, W-2510, High R.5.** A darkly toned example of the very scarce "Scholar's Head" variety. The motifs retain the granular planchet texture while peripheral elements are well struck. A mint-made 3% curved clip is at 6:30 and affects only the top of the Liberty cap. Listed on page 61 of the 2013 *Guide Book*. PCGS# 328

**1787 'Muttonhead' Connecticut Copper
Choice XF, Miller 1.2-C**

- 3018 1787 Connecticut Copper, Muttonhead XF45 PCGS. M. 1.2-C, W-2720, R.3.** A relatively late die state with partially lapped legends. The crudely designed Muttonhead variety is a distinct type within the challenging Connecticut series. The present medium brown example displays glimpses of luster along with moderate granularity and a minor obverse rim mark at 3 o'clock. Listed on page 61 of the 2013 *Guide Book*. PCGS# 343

- 3019 1774 Machin's Mills Halfpenny VF25 PCGS. Vlack 5-74A, W-7760, R.4.** Also known as Vlack 8-74A. The GEORGIUS variety, as is Vlack 3-74A, while Vlack 7-74A has a GEORGIUS legend. The centers are lightly brought up, as usual for a Machin's Mills copper, but the borders are sharp and the surfaces are smooth where well impressed. Listed on page 67 of the 2013 *Guide Book*. PCGS# 454

- 3020 1786 New Jersey Copper, Narrow Shield, Curved Plow Beam XF45 PCGS. M. 24-P, W-4965, R.2.** A satiny chocolate-brown state copper with refreshingly unabraded and verdigris-free surfaces. The reverse exhibits moderate flan striations, as made and usual for the series. Listed on page 69 of the 2013 *Guide Book*. PCGS# 496

- 3021 1787 New Jersey Copper, Outlined Shield XF40 NGC. Maris 34-J, W-5115, R.3.** An ebony-brown state copper with even, light wear and moderately granular surfaces. Smooth aside from a hairline streak beneath the snout. Traces of an unknown undertype are evident within the shield. Listed on page 70 of the 2013 *Guide Book*. PCGS# 503

**1788 Copper, Good 4
Very Rare RR-36
Bust Right, Periods**

- 3022 1788 Vermont Copper, Bust Right Good 4 PCGS. RR-36, Bressett 10-P, W-2180, High R.6.** A very rare die variety within the challenging Vermont series. We are aware of only two other Heritage auction appearances of RR-36, including an NGC Good 6 that brought \$5,750 as lot 3324 in our 2010 Stamford Signature. The present lot has clear legends and a well-outlined bust. The dark brown surfaces are unabraded though moderately granular. Listed on page 72 of the 2013 *Guide Book*. PCGS# 563

- 3023 1788 Vermont Copper, Bust Right XF45 NGC. CAC. RR-25, Bressett 16-U, W-2195, R.3.** A pleasing golden-brown Republic copper with glossy surfaces. The centers are lightly brought up, customary for the variety, though the borders are bold. Smooth save for minor hairlines on the right obverse field. Listed on page 72 of the 2013 *Guide Book*. Ex: *Fourth C-4 Convention, 11/1998*, lot 362. PCGS# 563

3024 1783 Nova Constellatio Copper, Pointed Rays, Large US XF40 PCGS. Crosby 1-A, W-1860, R.4. The sole Large US die variety for 1783. Deep walnut-brown fields contrast with gunmetal-gray high points. Devoid of relevant marks though the planchet texture is evident on portions of the reverse. A few degrees off center toward 7 o'clock. Listed on page 54 of the 2013 *Guide Book*. PCGS# 804

3025 1785 Nova Constellatio Copper, Pointed Rays, Large Date AU53 NGC. Crosby 5-E, W-1915, High R.4. A lightly circulated example with chocolate-brown fields and medium brown high points. Smooth aside from a single thin mark from the left corner of the eye. Listed on page 54 of the 2013 *Guide Book*.
Ex: *Columbus Central States Signature* (Heritage, 4/2006), lot 165, which realized \$1,380. PCGS# 813

**1787 Fugio Cent, VF30, Newman 1-B
Cross After Date, UNITED STATES**

3026 1787 Fugio Cent, UNITED STATES, No Cinquefoils VF30 PCGS. CAC. N. 1-B, W-6600, R.4. The singular Cross After Date obverse die was paired with a more generic UNITED STATES reverse. Toned olive to golden-brown with even wear and minimal marks. On a high quality planchet. Struck several degrees off center toward 5 o'clock. Listed on page 87 of the 2013 *Guide Book*. PCGS# 880

3027 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays VF20 PCGS. N. 9-S, W-6765, R.6. A rare die variety of this popular Federal-authorized type. The golden-brown and russet surfaces exhibit clash marks near the date but are free from abrasions. Listed on page 87 of the 2013 *Guide Book*. PCGS# 883

**1787 Fugio Cent, MS63 Brown
STATES UNITED, Pointed Rays
Newman 8-X, Cinquefoils**

3028 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS63 Brown PCGS. N. 8-X, W-6750, R.3. This smooth chocolate-brown Fugio copper is well struck except on the upper-right reverse margin. The 'X' reverse is often associated with high grade examples from the Bank of New York holdings. As often seen on Newman 8-X, a diagonal die break on the lower obverse affects portions of MIND YOUR BUSINESS. Listed on page 87 of the 2013 *Guide Book*. PCGS# 883

3029 1787 Fugio Cent, UNITED STATES, Cinquefoils VF35 PCGS. CAC. N. 8-B, W-6740, R.3. A pleasing chocolate-brown example with problem-free surfaces. The dies were misaligned, causing an intricate strike on the sun and lower reverse rings while BUSINESS and the upper reverse rings are soft. Listed on page 87 of the 2013 *Guide Book*. PCGS# 889

**1787 Fugio Cent, MS63 Brown
Newman 8-B, UNITED STATES
Pointed Rays, Cinquefoils**

3030 1787 Fugio Cent, UNITED STATES, Cinquefoils MS63 Brown NGC. N. 8-B, W-6740, R.3. A charming and unabraded medium brown representative of this early Federal issue. The strike is mostly sharp though some softness is present on the the obverse exergue and the upper reverse. The reverse is boldly clashed but obverse clash marks are faint. Listed on page 87 of the 2013 *Guide Book*. PCGS# 889

**1787 Fugio Cent, XF45
Rare Raised Rim Newman 19-Z**

3031 1787 Fugio Cent, STATES UNITED, Raised Rim XF45 PCGS. N. 19-Z, W-6975, R.5. The Raised Rim reverse was likely a pattern die as it has a distinct ring lettering style and was formerly paired with the Cross after Date obverse (N. 1-Z). As an economy measure, the die was later paired with two regular obverses (12 and 19). This golden-brown Newman 19-Z representative is nearly unabraded. A vertical flan flaw is on the upper right reverse. The strike is consistent except on the right obverse margin. Listed on page 87 of the 2013 *Guide Book*. PCGS# 895

3032 1787 Fugio Cent, Club Rays, Rounded Ends VG10 PCGS. CAC. N. 3-D, W-6680, R.3. The scarce and conditionally rare Club Rays type. A walnut-brown Fugio copper with well defined borders and substantial wear at the centers. Marks are minor for the grade. Listed on page 88 of the 2013 *Guide Book*. PCGS# 904

3033 1787 Fugio Cent, Club Rays, Rounded Ends VF20 PCGS. N. 3-D, W-6680, R.3. A better Fugio subtype, since the majority of the issue has pointed rays. The present golden-brown representative is unabraded and typically struck with a pronounced wood-grain texture, as made. Listed on page 88 of the 2013 *Guide Book*. PCGS# 904

3034 1787 Fugio Cent, New Haven Restrike, Copper MS63 Brown PCGS. Newman 104-FF, W-17560. The smooth tan-brown surfaces retain glimpses of the initial orange-gold near peripheral design recesses. Evenly struck and satiny. The usual die state with moderate rust on the reverse field. Listed on page 88 of the 2013 *Guide Book*. PCGS# 916

**1787 New Haven Restrike, MS66 Brown
Fugio Design, Newman 104-FF**

- 3035 1787 Fugio Cent, New Haven Restrike, Copper MS66 Brown NGC. Newman-104-FF, W-17560.** This later state piece shows extensive die cracks on the obverse with minor die rust on the reverse. This lovely Premium Gem has mostly olive surfaces, although considerable red brilliance remains. The so-called Restrikes were actually struck from newly created dies in the 1860s at Scoville Manufacturing Company in Waterbury, Connecticut. Listed on page 88 of the 2013 *Guide Book*. Census: 1 in 66 Brown, 0 finer (4/13). PCGS# 916

- 3036 1783 Chalmers Shilling, Long Worm — Graffiti — PCGS Genuine. Fine Details. Breen-1012, W-1790, R.4.** A scarce but collectible variety from this Maryland silversmith. Toned stone-gray and almond-gold. Struck slightly off center toward 5 o'clock. A pair of scratches form a test 'X' mark on the reverse, which shows much greater wear than the obverse. Listed on page 51 of the 2013 *Guide Book*. PCGS# 595

- 3037 1789 Mott Token, Thin Planchet, Engrailed Edge AU55 PCGS. Breen-1025.** The thin planchet, engrailed edge variety is much scarcer than its thick planchet, plain edge counterpart. This early die state example features powder-blue, plum-mauve, and golden-brown patina. Granular in places, as made, and the reverse is misaligned several degrees toward 5 o'clock. Listed on page 74 of the 2013 *Guide Book*. Population: 5 in 55, 9 finer (4/13). PCGS# 607

- 3038 1795 Talbot Allum & Lee Cent MS63 Brown PCGS. CAC. Fuld-1, W-8620, R.1.** Glimpses of fire-red linger within the legends though most of this unabraded representative is medium brown. Crisply struck and spot-free. Listed on page 76 of the 2013 *Guide Book*. PCGS# 640

**1795 Talbot, Allum & Lee Cent
MS64 Red and Brown, Fuld-1**

- 3039 1795 Talbot, Allum & Lee Cent MS64 Red and Brown NGC. Fuld-1, W-8620, R.1.** A well struck Choice example of this well known early American token, distributed in New York but struck in England at Boulton's mint. The margins remain apricot-gold though the open fields have mellowed light brown. One small area of darker toning is relegated to the reverse at 3 o'clock. Listed on page 76 of the 2013 *Guide Book*. PCGS# 641

- 3040 1791 Washington Large Eagle Cent AU55 PCGS. CAC. Baker-15, W-10610, R.2.** A bold chocolate-brown Washington cent with attractive surfaces aside from a pair of faded lines on the left obverse field. A flan flaw is noted on the lower portion of the left (facing) wing. Listed on page 81 of the 2013 *Guide Book*. PCGS# 702

- 3041 1795 Washington Grate Halfpenny, Large Buttons, Reeded Edge MS64 Red and Brown PCGS. CAC. Baker-29B, W-10955, R.1.** Ample moderately faded orange-red fills the legends while the fields and motifs are medium brown. Nicely struck and pristine. The reverse displays faint curved lines retained from the planchet prior to the strike, customary for the variety. Listed on page 83 of the 2013 *Guide Book*. PCGS# 747

**Silver Washington Funeral Urn Medal
Fine 12, Baker-166A**

- 3042 (1800) Washington Funeral Urn, Silver Fine 12 PCGS. Baker-166A, Die Variety 3-C2.** Two large funeral processions were staged in early 1800 for Washington, who had died on December 14, 1799. Baker-165 was made for attendees of the Masonic ceremony on February 11. Baker-166 was struck for the civic procession, which took place on February 22. A small hole at 12 o'clock is characteristic of the issue. A lightly marked cream-white example with deeper shades of gray in protected areas. PCGS# 928

HALF CENTS

- 3043 1793 — Bent — PCGS Genuine. Fine. C-2, B-2, R.3.** A rim mark at 10 o'clock on the reverse causes a mild bend. A granular ebony-brown example of this single year type coin, struck during the initial year of coinage at the First Philadelphia Mint. CENT and LIBERTY are faint but the other legends are clear. Our EAC grade Good 4. NGC ID# 2222, PCGS# 1000

**1793 Half Cent, XF Details
C-2, Single-Year Type**

- 3044 1793 — Improperly Cleaned — NGC Details. XF. C-2, B-2, R.3.** Careful rotation reveals patches of hairlines, particularly on the left obverse and upper reverse, but this medium brown first year half cent is impressively defined and shows minimal granularity. Only four die varieties were struck for this single year type and all are collectible. Our EAC grade Fine 15.

- 3045 1794 VF25 PCGS. C-9, B-9, R.2.** Manley Die State 3.0 with a cud on the reverse at 6:30. This nicely defined medium brown half cent is minimally abraded and moderately granular. Housed in a green label holder. Our EAC grade Fine 12. NGC ID# 2223, PCGS# 1003

1795 Half Cent, XF40, C-6a, B-6a
Traces of TAL Undertype

- 3046** 1795 Plain Edge XF40 PCGS. C-6a, B-6a, R.2. Faint traces of Talbot, Allum & Lee token designs remain visible in the fields, especially at the top of the reverse. This sharply detailed piece has pleasing surfaces for the grade. Both sides have a combination of medium and dark brown with steel highlights. Our EAC grade VF30. Ex: *Dallas Signature* (Heritage, 10/2009), lot 50. NGC ID# 2225, PCGS# 1018

- 3047** 1803 VF35 PCGS. C-1, B-1, R.1. Manley Die State 1.0. A walnut-brown Choice VF half cent with moderate wear and no noticeable marks. The E in CENT is lightly brought up though the remainder of the legends are bold. Our EAC grade VF20. Ex: *Dallas Signature* (Heritage, 10/2009), lot 7022. NGC ID# 222E, PCGS# 1060

- 3048** 1803 AU55 PCGS. C-3, B-3, R.1. Manley Die State 4.0. The die bulge at the 18 identifies this variety in its later die states. This unblemished piece has considerable cartwheel luster with dark chocolate and steel surfaces. Somewhat weak details are noted at the lower obverse and at the top of the wreath. Our EAC grade XF45. NGC ID# 222E, PCGS# 1060

- 3049** 1804 Spiked Chin AU55 NGC. C-8, B-7, R.1. Manley Die State 3.0. The famous Spiked Chin variety was probably caused when a bolt or some other unexpected object was struck into the obverse die. This better grade dark brown example displays ample luster and is free from consequential marks. Our EAC grade VF30. NGC ID# 222G, PCGS# 1075

- 3050** 1828 12 Stars MS63 Brown PCGS. C-2, B-3, R.2. Deep steel-brown surfaces retain considerable luster with hints of iridescence and sharp design feature showing weakness only on a few of the highest points. An outstanding Select Mint State specimen. Our EAC grade AU50. Population: 18 in 63 Brown, 13 finer (4/13). NGC ID# 222W, PCGS# 1150

1835 Half Cent, C-1, Red and Brown Gem

- 3051** 1835 MS65 Red and Brown NGC. CAC. C-1, B-1, R.1. Manley Die State 1.0. A fully struck Gem that boasts booming luster and mark-free surfaces. The borders are orange-red and the centers are steel-gray. A tiny strike-through on the cheekbone provides an identifier. Moderate flecks are noted near AMERICA. The final circulation issue prior to 1849. Our EAC grade MS62. NGC ID# 2233, PCGS# 1169

1853 Red and Brown Half Cent
Glossy MS65 Red and Brown

- 3052** 1853 MS65 Red and Brown PCGS. C-1, B-1, R.1. Orange-red fills the reverse field and the obverse margin. The obverse field and portrait are powder-blue and steel-gray. Both sides are lustrous and the devices are well struck with no carbon and smooth fields. The cheek displays a few faint grazes. Our EAC grade MS63. NGC ID# 26YX, PCGS# 1228

LARGE CENTS

- 3053** 1793 Wreath Cent, Lettered Edge PCGS Genuine. S-11c, B-16c, Low R.3. The less scarce Lettered Edge subvariety is presumed. The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AG specimen that is corroded. This medium brown cent is granular to porous but the types are nicely outlined and a majority of the legends emerge beneath a strong light. Our EAC grade AG3. NGC ID# 223J, PCGS# 1350

1794 Sheldon-63 Cent, VF30
Head of 1794

- 3054** 1794 Head of 1794 VF30 NGC. S-63, B-37, R.2. The awkwardly entered date and the die line beneath the bust tip identify the Sheldon pairing. LIBERTY is lightly brought up, but the remainder of the legends are sharp, and the portrait is richly detailed. Deep lavender-brown toning is consistent across the unabraded and minutely granular surfaces. Our EAC grade VF20. NGC ID# 223P, PCGS# 901374

**1794 Cent, VF30, S-44
Head of 1794**

- 3055 1794 Head of 1794 VF30 PCGS. S-44, B-33, R.1.** The bold radial reverse die crack at 1 o'clock identifies the Sheldon variety. An additional diagonal crack passes through the 17 in the date to the rim. This glossy chocolate-brown midgrade Liberty Cap cent has bold centers and occasional incompleteness of strike near the rims. The obverse displays small ticks and small rim dings are at 3:30 on the obverse and 5:30 on the reverse. Our EAC grade VF20. NGC ID# 223P, PCGS# 901374

**Choice VF 1794 Cent, S-28
Head of 1794**

- 3056 1794 Head of 1794 VF35 NGC. CAC. S-28, B-10, R.2.** A deep golden-brown Liberty Cap cent with attractive surfaces. Wear is even and moderate. Marks are inconsequential aside from a couple of faded lines on the bust near Liberty's shoulder. Granularity is confined to a small spot on the reverse rim at 12 o'clock. Our EAC grade VF25. NGC ID# 223P, PCGS# 901374
- 3057 1795 Plain Edge — Smoothed — PCGS Genuine. XF Details. S-76b, B-4b, R.1.** A richly detailed Liberty Cap type coin with consistent olive-brown toning. A lens reveals moderately granular surfaces, and the right obverse is burnished. Our EAC grade Fine 15. NGC ID# 223T, PCGS# 1380
- 3058 1797 Reverse of 1797, Stems — Corroded, Tooled — ANACS. XF40 Details. S-138, B-20, R.1.** The obverse field has been smoothed to diminish light to moderate corrosion. This lavender-brown cent is richly detailed and is attractive to the unaided eye. Our EAC grade Fine 15. NGC ID# 2242, PCGS# 1422
- 3059 1798 Second Hair Style VF30 PCGS. S-166, B-32, R.1.** The heavy diagonal die crack from the fraction to the E in UNITED distinguishes this collectible Sheldon variety. A couple of thin marks are noted above CENT and spots are on the jaw and the base of the 1 in the date. A pair of small digs are at the IC in AMERICA. Our EAC grade VF20. NGC ID# 2244, PCGS# 1434
- 3060 1798 Second Hair Style XF45 PCGS. S-166, B-32, R.1.** Promptly attributed by the heavy diagonal crack between the fraction and the E in UNITED. A small planchet defect is located atop the E in LIBERTY. Luster emerges from the hair and wreath, and the medium brown toning occasional cedes to tan. A scarce issue in better circulated grades. Our EAC grade VF25. Ex: *Dallas Signature (Heritage, 10/2009)*, lot 79. NGC ID# 2244, PCGS# 1434

- 3061 1799 Good 4 PCGS Genuine. S-189, B-3, R.2.** A deep brown example with mildly to moderately granular surfaces. The right obverse field is tooled with myriad pinscratches and the central reverse displays several thin vertical marks. Key to a date set of Draped Bust cents. Our EAC grade Fair 2. NGC ID# 2246, PCGS# 1443

**1800 Cent, Sharp AU53
'Chips' Variety, S-212**

- 3062 1800 AU53 NGC. S-212, B-20, R.3.** Among the top dozen or so examples of the variety. The S-212 variety is sometimes called the "Chips" variety, named for the die chips at the base of the 00. The appearance is similar to and sometimes confused with S-197, which is known as the "Q" variety. A partly lustrous cent with deep brown toning. The obverse has scattered small ticks, and a few faded marks are noted above CENT. The reverse border is mildly granular. Our EAC grade VF35. Ex: *Collection of a Dallas Gentleman (Heritage, 5/2009)*, lot 66, which realized \$2,300. NGC ID# 2248, PCGS# 1449
- 3063 1802 XF40 ANACS. S-239, B-17, R.3.** The dramatic, diagnostic obverse die break appears from the edge at 3 o'clock to the R in LIBERTY. The other distinguishing diagnostic clash marks on the lower reverse are also visible. This coin has pleasing verdigris-free surfaces with minimal contact marks and a normal amount of wear for the grade. Our EAC grade VF30. Ex: *Long Beach Signature (Heritage, 5/2007)*, lot 86. NGC ID# 224E, PCGS# 1470
- 3064 1802 XF40 PCGS. S-236, B-16, R.1.** The lengthy reverse crack through the E in ONE attributes the variety. A deep brown representative with pleasing sharpness and no mentionable marks. The strike is even save for softness on the F in OF. Mildly and evenly granular. Our EAC grade VF20. NGC ID# 224E, PCGS# 1470
- 3065 1802 AU50 PCGS. S-230, B-3, R.1.** Slender die cracks across LIBERTY and the upper reverse aid attribution. The cheek and forehead display light wear, but this brown-gray Draped Bust cent is pleasing aside from a minute obverse rim nick at 4:30 and a couple of faint lines on the cheek. Our EAC grade VF30. Ex: *Dallas Signature (Heritage, 10/2009)*, lot 81. NGC ID# 224E, PCGS# 1470
- 3066 1802 No Stems XF45 PCGS. S-241, B-20, R.1.** Although the famous "Three Errors" variety is the reverse shared by S-218 and S-219, the S-241 equally deserves the nickname. The stems are absent, there are two fraction bars, and the second S in STATES is widely repunched. The letter M from AMERICA is clashed into the obverse at 4 o'clock. A medium brown cent with luster in Liberty's hair and vein detail on the leaves near the E in ONE. Our EAC grade VF25. Population: 5 in 45, 7 finer (4/13). Ex: *Long Beach Signature (Heritage, 9/2009)*, lot 59. NGC ID# 224F, PCGS# 1476

**1803 S-251, B-8 Cent, AU53
Early Die State**

- 3067** 1803 Small Date, Small Fraction AU53 PCGS. CAC. S-251, B-8, R.2. This early die state S-251 cent has a nearly complete shoulder loop with no evidence of die cracks or clash marks. Both sides of this olive and chestnut specimen exhibit scattered handling marks with a thin scratch from the L to the back of the head. A few other scratches are only visible with a glass. A few darker brown toning splashes are evident with traces of cartwheel luster still visible. Our EAC grade VF35. NGC ID# 224G, PCGS# 1482

**Key Date 1804 Cent, Fine Details
Early Die State S-266a**

- 3068** 1804 Genuine PCGS. S-266a, B-1, R.2. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Fine specimen that has been scratched. A lightly burnished medium brown key date example with a trio of faded pinscratches near the T in CENT and a fourth past the F in OF. Our EAC grade VG7.
- 3069** 1807/6 Large 7 XF40 PCGS. S-273, B-3, R.1. Two 1807/6 die varieties exist but merit separate *Guide Book* listings due to different sizes of the 7. This ebony-brown representative displays prominent clashes beneath Liberty's chin and ribbon. OF AMERICA is softly brought up due to slightly misaligned dies. Faded thin marks are above the bust tip and near MERI. Our EAC grade VF20. NGC ID# 224N, PCGS# 1528

**1810 Cent, AU53, S-284
Conditionally Rare Classic Type**

- 3070** 1810 AU53 PCGS. S-284, B-5, R.3. A nicely detailed example, this 1810 cent has medium brown and steel surfaces with a few splashes of lighter tan inside the obverse border. The surfaces show microscopic hairlines and other trivial handling marks on each side. This piece exhibits the sharpness of XF45. Our EAC grade VF35. NGC ID# 224S, PCGS# 1549

- 3071** 1814 Crosslet 4 VF30 PCGS. CAC. S-294, B-1, R.1. A midgrade lavender-brown representative. No marks are remotely of consequence and the eye appeal is pleasing. The two die varieties of this final year Classic issue receive separate *Guide Book* listings due to different styles of the 4 in the date. Our EAC grade VF20. NGC ID# 224Y, PCGS# 1573

- 3072** 1814 Plain 4 — Obverse Double Struck — Fine 12 ANACS. S-295, B-2, R.1. This Classic cent was struck twice by the dies. The obverse (hammer) die was apparently loose, and rotated a few degrees between strikes, while the reverse (anvil) die remained stationary. The date, stars, and Liberty's profile have a dramatic, doubled appearance. A smooth deep brown piece with uneven wear on OF AMERICA. Our EAC grade VG7. NGC ID# 224Y, PCGS# 1576

**1814 S-295 Cent, Unc Details
Late State Plain 4 Variety**

- 3073** 1814 Plain 4 — Altered Surfaces — PCGS Genuine. Unc Details. S-295, B-2, R.1. We see no reason to describe this lovely piece as having altered surfaces. Both sides of this late die state example show extensive radial flowlines from the borders, with sharp details, lovely dark brown surfaces, and nearly complete cartwheel luster. Faded clash marks are noted with an arcing die crack at the lower right obverse. A lovely Classic Head cent. Our EAC grade AU50. NGC ID# 224Y, PCGS# 1576

- 3074** 1823 Restrike MS65 Brown NGC. N-3, R.2. A middle die state with a bisecting obverse crack but no reverse cracks. Most examples of this circa-1860s out-of-mint issue are from a later state. Coined from rusted and mismatched cent dies sold as scrap by the Mint; the reverse earlier struck S-293. A beautiful lime-green and rose-gold Gem. Our EAC grade MS60. PCGS# 81627

- 3075** 1830 Medium Letters XF40 PCGS. N-6, R.4. The Medium Letters variety of 1830 is an important rarity in the middle date range of large cents. It is also one of the most challenging varieties to grade, as the typical example was bluntly struck. In some cases, even VF or XF coins show little detail. A splendid example, this piece has smooth tan fields with darker brown devices. Our EAC grade VF30. Ex: *Boston Signature* (Heritage, 8/2010), lot 3846. PCGS# 1675

- 3076** 1846 Small Date MS64 Brown PCGS. CAC. N-18, R.1. Grellman Die State c. The portrait and open fields are deep brown while lighter golden-brown accompanies protected areas. This unabraded and glossy near-Gem provides outstanding eye appeal. Our EAC grade MS62. NGC ID# 226C, PCGS# 1865

- 3077** 1849 MS64 Brown PCGS. N-22, R.1. Grellman Die State c. A vertical die line inside the E in CENT attributes the variety. The late die state, formerly known as N-6, usual for the marriage. Smooth golden-brown surfaces with olive-green toning at the borders and shades of lilac on the reverse. Our EAC grade MS60. Ex: *Columbus Central States* (Heritage, 4/2006), lot 318, which realized \$1,035. NGC ID# 226F, PCGS# 1886

- 3078** 1851 MS67 Brown NGC. N-2, R.1. Grellman Die State a. An early die state with a sharp date. A gorgeous dusky fire-red Superb Gem that boasts vibrant luster and pristine fields. One faint graze on the cheek denies perfection. Our EAC grade MS63. NGC ID# 226H, PCGS# 1892

- 3079 1851 MS66 Red and Brown NGC. N-43, Low R.6.** Grellman Die State a. A rare variety omitted in the seminal Newcomb reference. Orange-red outlines design elements though the open fields and motifs are steel-blue. Lustrous and essentially pristine save for contact on the E in CENT. The stars are soft though the remainder of the strike is sharp. Our EAC grade MS63.
Ex: Anaconda Rare Coins (Heritage, 6/2008), lot 67, which realized \$1,380. NGC ID# 226H, PCGS# 1893
- 3080 1853 MS66 Brown NGC. N-17, R.2.** Grellman Die State b. Orange-gold is plentiful on the reverse though the obverse is primarily chocolate-brown. Sharply struck and coruscating. Marks are absent aside from a pair of faint vertical lines on the neck. Our EAC grade MS60. NGC ID# 226K, PCGS# 1901
- 3081 1853 MS63 Red PCGS. N-13, R.1.** *Ex: Eliasberg.* Grellman Die State b. The reverse field rises near STATES, reducing the relief of those letters. A peach-red example with a few minor spots, a mark-free reverse, and a lightly abraded obverse. Certified in a green label holder. Our EAC grade MS63.
Ex: Louis E. Eliasberg, Sr. Collection (Bowers & Merena, 5/1996), lot 595. NGC ID# 226K, PCGS# 1903
- 3082 1855 Upright 5s MS64 Red PCGS. N-4, R.1.** Grellman Die State a. A lustrous orange-gold near-Gem with minimal carbon and smooth fields. The portrait displays only faint grazes. The strike shows incompleteness only on selected star centers. Our EAC grade MS65. NGC ID# 226M, PCGS# 1909
- 3083 1856 Upright 5 MS65 Brown NGC. CAC. N-11, R.1.** The late die state with "the field rising around UNITED STATES OF, strongest at ITED STA," as described by Grellman. A chocolate-brown Gem with glimpses of orange-red in recesses. Pristine save for a line beneath star 5. Our EAC grade MS60. NGC ID# 226N, PCGS# 1919

TWO CENT PIECES

1864 Small Motto Two Cent MS64 Red and Brown

- 3084 1864 Small Motto MS64 Red and Brown NGC. CAC. FS-401.** The ephemeral Small Motto subtype constitutes a slender minority of the large-scale first-year production. The present crisply struck near-Gem has a predominantly sun-gold obverse though the central reverse has lilac toning. Marks are confined to a few ticks northeast of the date. Certified in an early pre-hologram holder. NGC ID# 22N8, PCGS# 3580

Small Motto 1864 Two Cent Piece MS64+ Red and Brown

- 3085 1864 Small Motto MS64+ Red and Brown PCGS. CAC. FS-401.** Butter-gold and autumn-brown fill protected areas while the open fields are gunmetal-blue. Lustrous and virtually void of contact and carbon. The strike is unimprovable and the reverse displays myriad interesting die cracks. The Small Motto subtype constitutes a small minority of 1864 production. NGC ID# 22N8, PCGS# 3580
- 3086 1865 MS66 Red and Brown PCGS. CAC. Fancy 5.** A sharply struck Premium Gem with intermingled peach-gold and steel-gray toning. Spots are absent and marks are confined to wispy contact on the reverse exergue. NGC ID# 22NA, PCGS# 3583
- 3087 1865 MS65 Red PCGS. Fancy 5.** A beautiful sun-gold Gem that boasts a good strike and a virtual absence of contact. A few minute flecks are noted near the denomination. A high mintage date but little saving took place during the tumultuous year of issue. NGC ID# 22NA, PCGS# 3584
- 3088 1872 AU58 NGC.** A lovely near-Mint example, this piece displays an even chocolate-brown color. The design details retain a pleasing level of definition. Only 64,000 circulation strikes were produced and attractive upper-end AU pieces such as this one can be a challenge to locate. Census: 11 in 58, 43 finer (4/13). NGC ID# 22NG, PCGS# 3612

1872 Two Cent Piece, MS63 Brown Low Mintage Date

- 3089 1872 MS63 Brown PCGS. CAC.** The two cent piece was first issued during an era of wartime coin hoarding. By 1872, cents and three cent nickels were commonplace in circulation, and the mintage of the two cent diminished to a mere 64,000 pieces. The present walnut-brown example is nicely struck and minimally abraded. Encapsulated in a green label holder. NGC ID# 22NG, PCGS# 3612

PROOF TWO CENT PIECES

- 3090 1868 PR66 Red and Brown PCGS. CAC.** Peach-orange, violet, magenta, and blue shadings converge on this Red and Brown Premium Gem. Strong reflectivity with only a hint of peripheral carbon near 3 o'clock on the obverse. Population: 9 in 66 Red and Brown, 1 finer (4/13). NGC ID# 274X, PCGS# 3637

- 3091 1869 PR64 Red and Brown PCGS.** One of 600 proofs produced, the present Choice specimen displays ample sun-gold and peach with rose-red and cobalt-blue also present. Well struck, undisturbed, and encapsulated in an old green label holder.
Ex: Philadelphia Signature (Heritage, 8/2012), lot 3104, which realized \$940.
From The MKJ Collection, Part II. NGC ID# 274Y, PCGS# 3640

1873 Two Cent Piece, PR65 Red and Brown Final Proof-Only Issue

- 3092 1873 Closed 3 PR65 Red and Brown PCGS.** The two cent denomination was discontinued after 1873 and no business-strike coins were struck in that year. All original proofs show the Closed 3 in the date, but a later restrike issue was produced with an Open 3. This delightful Gem displays mingled shades of original red and light brown patina on the brightly reflective surfaces. The design elements are sharply detailed throughout and no mentionable surface flaws are evident. Population: 90 in 65 (1 in 65+) Red and Brown, 19 finer (4/13). NGC ID# 2753, PCGS# 3652

1873 Closed 3 Two Cent Piece PR65 Red and Brown

- 3093 1873 Closed 3 PR65 Red and Brown NGC. CAC.** The 1873 Closed 3 is a scarce proof-only issue with an estimated mintage of only 600 pieces. Without looking at the 3 in the date, the Closed 3 is easily discernable from its Open 3 counterpart by the strength and completeness of the horizontal shield lines. The present specimen displays variegated orange-gold and lilac-red. The fields are moderately reflective and the only visible mark is a tick above the T in CENTS.
Ex: Orlando FUN Signature (Heritage, 1/2010), lot 419. NGC ID# 2753, PCGS# 3652

THREE CENT SILVER

- 3094 1851-O MS64 PCGS.** An attractive array of colors appears on this near-Gem example of the only mintmark in the series. The hues include caramel, gold, violet, ice-green, and yellow. The luster adds to the eye appeal. As is often the case with this type, some of the shield details are missing. NGC ID# 22YY, PCGS# 3665
- 3095 1852 MS66 PCGS.** Rich satin luster emanates from both sides of this bright and attractive Premium Gem example. Scattered splashes of light toning are present on both sides. The reverse exhibits a heavy die crack that extends from approximately 10 o'clock to 3 o'clock. PCGS has awarded higher numeric grades to only 14 examples (4/13). NGC ID# 22YZ, PCGS# 3666

- 3096 1861 MS66 NGC.** Some of the surviving examples from the 1861 and 1862 issues exhibit strong frosty luster. Such is the case with this extremely pleasing Premium Gem. The piece remains almost entirely brilliant, with only a few tiny indications of toning. Incompleteness of strike, as is often the case, is noted. Census: 76 in 66, 32 finer (4/13). NGC ID# 22ZA, PCGS# 3679

- 3097 1862 MS65 PCGS. CAC.** Areas of attractive toning appear at the peripheries of this lovely Civil War Gem displaying the typical strike at the centers. The colors include shades of champagne, rose-pink, and teal. NGC ID# 22ZB, PCGS# 3680

- 3098 1862 MS66 PCGS.** This pristine Premium Gem is mostly stone-gray but has a blush of light lavender toning on the reverse and a few rose freckles on the left obverse. The centers are incompletely brought up. Struck from clashed dies, and encapsulated in a green label holder.
Ex: Orlando FUN Signature (Heritage, 1/2008), lot 584, which realized \$1,323.65. NGC ID# 22ZB, PCGS# 3680

- 3099 1871 MS64 NGC.** A nicely preserved representative from this later issue that had a business strike mintage of only 3,400 pieces, this piece retains a pleasing appearance. Semireflective and lightly contrasted, this example remains bright overall with only subtle toning present. Census: 28 in 64, 68 finer (4/13). NGC ID# 22ZM, PCGS# 3692

PROOF THREE CENT SILVER

- 3100 1861 PR65 PCGS. CAC.** Both sides of this Gem display several rich colors; with the surfaces retaining a mirrored appearance, particularly on the reverse. A few as-made lint marks are visible on each side. Population: 22 in 65 (1 in 65+), 8 finer (4/13). NGC ID# 27C8, PCGS# 3710

- 3101 1864 PR66 PCGS.** The design elements display a bold degree of detail on this lovely Premium Gem. Large areas of reflectivity remain visible under pleasing shades of champagne-gold and cerulean-blue patina. The proof mintage was only 470 pieces for this issue. Population: 18 in 66, 5 finer (4/13).
From The MKJ Collection, Part II. NGC ID# 27CA, PCGS# 3714

- 3102 1865 PR65 PCGS.** Darker toning of the obverse field provides the central star design with a pleasing level of contrast that adds to the eye appeal of this Gem. The coin displays champagne color overall with other shades present including jade, emerald, and russet. The reverse includes small splashes of cherry, ice-green, and violet. Population: 26 in 65, 17 finer (4/13).
From The MKJ Collection, Part II. NGC ID# 27CB, PCGS# 3715

- 3103 1866 PR64 NGC. CAC.** Dappled sea-green and rose-red toning adorns this fully struck and nicely mirrored proof near-Gem. The reverse displays traces of lacquer. Encapsulated in a former generation holder. NGC ID# 27CC, PCGS# 3716

- 3104 1866 PR65 PCGS.** This Gem, from a tiny proof mintage of 725 pieces, exhibits boldly detailed design elements. Toning is present on both sides, with a particularly attractive array of colors evident on the obverse when viewed using magnification. Among the hues are orange, cherry, electric-blue, aquamarine, and violet. The surfaces remain reflective beneath the toning. Population: 27 in 65, 20 finer (4/13).
From The MKJ Collection, Part II. NGC ID# 27CC, PCGS# 3716

- 3105 1867 PR66 PCGS.** This Premium Gem exhibits tremendous eye appeal due to a crisp strike, mirrored surfaces, and appealing toning. The colors include lovely light shades of green, champagne, sea-green, electric-blue, plum, and violet. A few as-made lint marks and die lines are present. Population: 21 in 66, 1 finer (4/13). NGC ID# 27CD, PCGS# 3717

3106 1867 PR66 Cameo NGC. A total of 625 three cent silver proofs were struck in 1867 and examples with a Cameo effect are seldom encountered. The untoned surfaces of this beautifully preserved Premium Gem display pronounced field-motif contrast and the design elements exhibit a bold level of detail. Census: 9 in 66 Cameo, 4 finer (4/13).
From The MKJ Collection, Part II. PCGS# 83717

3107 1868 PR65 PCGS Secure. Champagne-gold, peach, jade, and teal colors cover both sides of this Gem. The surfaces retain a high degree of reflectivity. The designs exhibit a strong level of detail overall. Only 600 pieces were produced in proof format to complement the 3,500 business strikes. Population: 50 in 65 (1 in 65+), 12 finer (4/13).
From The MKJ Collection, Part II. NGC ID# 27CE, PCGS# 3718

3108 1868 PR65 Cameo PCGS. An attractive Gem, this piece displays light champagne color overall with a few scattered hints of orange. A few small cream-gray streaks appear on the obverse. The reverse exhibits a few as-made strike-throughs. Population: 8 in 65 Cameo, 7 finer (4/13). PCGS# 83718

3109 1869 PR63 PCGS. Rich blue-to-violet patina with glimmers of green visiting the margins. This modestly hairlined Select proof is one of just 600 proofs struck for its later-date three cent silver issue. Certified in an old green label holder. NGC ID# 22ZR, PCGS# 3719

3110 1869 PR65 NGC. CAC. Toning in a variety of intermingled colors provides both sides of this Gem with a lovely appearance. The primary color on the obverse is an attractive copper-gold, with accents of red, electric-blue, champagne, and sea-green adding to the eye appeal. Census: 42 in 65, 26 finer (4/13). NGC ID# 22ZR, PCGS# 3719

1870 Trime, PR66 Generous Mintage, Low Survival Rate

3111 1870 PR66 NGC. CAC. According to Mint records, 1,000 proof three cent silver pieces were struck in 1870, but some examples undoubtedly went unsold and were melted after the end of the year. This attractive Premium Gem displays a cameo-like effect. The fields are a glassy aquamarine, and the design features are sharply impressed. Census: 28 in 66, 5 finer (4/13). NGC ID# 27CF, PCGS# 3721

3112 1871 PR64 NGC. CAC. Splashes of golden-brown and olive-green toning appear on both sides of this lovely near-Gem proof. The piece exhibits a sharp strike and the surfaces retain reflectivity. The 960 proofs struck for this late-date three cent silver issue have a superior survival rate compared to the 3,400 business strikes coined. NGC ID# 27CG, PCGS# 3722

1872 Trime, PR64 Deep Cameo Finest Certified at PCGS

3113 1872 PR64 Deep Cameo PCGS. This highly reflective silver proof shows a tiny planchet lamination on the obverse just below the AT in STATES, and a loupe also locates a few minuscule ticks that define the grade. The silver-white, gold-ringed surfaces offer plenty of glittering appeal, along with a bold strike. Population: 1 in 64 Deep Cameo, 0 finer (4/13).
From The MKJ Collection, Part II. PCGS# 93723

1873 Three Cent Silver, PR66 Proof-Only Date, A Mere 600 Pieces Struck

3114 1873 PR66 PCGS. CAC. The 1873 proof-only three cent silver closed out the series with an emission of only 600 pieces. The date can be found through PR64, however survivors become scarce at the Gem level. This elusive PR66 specimen displays a medley of cobalt-blue, lavender, and gold-orange patina. The design elements are boldly detailed on this well-preserved example exhibiting a strong degree of eye appeal. Population: 10 in 66, 3 finer (4/13).
Ex: FUN Signature (Heritage, 1/2010), lot 432; Long Beach Signature (Heritage, 6/2010), lot 315. NGC ID# 27CJ, PCGS# 3724

3115 1873 PR64 Cameo PCGS. This near-Gem displays modest cameo contrast and light almond-gold toning. The surfaces are reflective and fully struck. The production of this proof-only issue, the last of the silver three cent pieces, consisted of a mere 600 coins. Population: 23 in 64 Cameo, 16 finer (4/13).
Ex: Boston ANA (Heritage, 8/2010), lot 4041. From The MKJ Collection, Part II. PCGS# 83724

THREE CENT NICKELS

3116 1865 MS66 PCGS. A pleasing light champagne patina covers both sides of this Premium Gem. Clash marks appear on both sides, but are more pronounced on the reverse. Several die cracks are also present. This coin displays nice eye appeal on both sides. Population: 38 in 66 (1 in 66+), 2 finer (4/13). NGC ID# 22NJ, PCGS# 3731

3117 1872 MS66 PCGS. CAC. Bright surfaces and rich satin luster provide this Premium Gem with immediate eye appeal. As-made strike-throughs and light clash marks are present. Neither PCGS nor NGC has awarded a higher numeric grade to a single example, with PCGS having awarded the MS66 grade to only 14 pieces (4/13). NGC ID# 2757, PCGS# 3738

3118 1879 MS66 NGC. The 1879 mintage of these coins consisted of only 38,000 business strikes. Scattered areas of light golden-orange toning appear on both sides of this Premium Gem example. Over-polished reverse dies led to incomplete details at the bottom of the wreath as often seen. Census: 20 in 66, 4 finer (4/13). NGC ID# 275B, PCGS# 3747

3119 1885 XF45 PCGS. CAC. At just 1,000 business strikes, the 1885 three cent nickel is notorious for having a lower mintage than its proof counterpart. This Choice XF example has dusky peach and mustard toning over a medium-gray base. Remaining luster is minimal and low-key. Population: 16 in 45, 61 finer (4/13). NGC ID# 275G, PCGS# 3753

1887 Three Cent Nickel, MS66

3120 1887 MS66 PCGS. CAC. The design elements exhibit a bold level of detail and the surfaces are brilliant on this Premium Gem displaying pleasing rich satiny luster. Prominent clash marks appear on both sides. A few tiny freckles are present. Population: 10 in 66, 1 finer (4/13). NGC ID# 22NU, PCGS# 3755

PROOF THREE CENT NICKELS

3121 1866 PR66 NGC. The deeply reflective fields of this impressive Premium Gem are toned in light shades of blue, green, and lavender. The design elements are sharply detailed and eye appeal is terrific, particularly on the reverse. Census: 17 in 66, 1 finer (4/13). NGC ID# 275L, PCGS# 3762

3122 1866 PR65 Cameo NGC. Occasional hints of nickel-blue visit the gleaming surfaces of this second-year Cameo specimen. Pleasingly preserved with a small spot at the right side of the first I in III. PCGS# 83762

3123 1867 PR66 NGC. Mint-green overtones prevail over the left and center on this Premium Gem proof, while the right third on each side has peach hues. A great third-year specimen.
Ex: Long Beach Signature (Heritage, 9/2005), lot 1345; FUN Signature (Heritage, 1/2006), lot 1105. NGC ID# 275M, PCGS# 3763

3124 1867 PR66 Cameo PCGS. Light gold-orange toning covers much of this earlier three cent nickel proof, though elements of nickel-white remain visible at parts of the margins. The obverse includes hints of ice-blue and lemon-yellow. Scattered tiny freckles appear on both sides. This is a lovely example with strong eye appeal. Population: 28 in 66 Cameo, 0 finer (4/13). PCGS# 83763

3125 1869 PR66 Cameo PCGS. CAC. The richly mirrored fields provide pleasing contrast to the frosted devices on this attractive example that remains bright. As-made lint marks and die lines are present. Population: 11 in 66 (1 in 66+) Cameo, 3 finer (4/13). PCGS# 83765

3126 1871 PR66 PCGS. Liberal splashes of golden-yellow toning along with hints of cherry appear on both sides and provide this piece with a high degree of eye appeal. A few small strike-throughs are present, including one at Liberty's nose. Population: 27 in 66, 1 finer (4/13). NGC ID# 275S, PCGS# 3767

3127 1873 Closed 3 PR66 PCGS. Attractive reflectivity and pleasing almond-gold toning lend this Closed 3 example nice eye appeal. A few splashes of orange-gold appear on the reverse. This is a lovely example. Population: 15 in 66 (1 in 66+), 0 finer (4/13). NGC ID# 275U, PCGS# 3769

3128 1873 Closed 3 PR65 Cameo NGC. Brilliant mirrored fields provide a pleasing level of contrast to the frosted devices on this Gem. Splashes of gold and yellow toning appear at portions of the rim on the obverse and on a portion of the wreath on the reverse. A few small freckles are present along with as-made strike-throughs. Census: 32 in 65 Cameo, 21 finer (4/13). PCGS# 83769

3129 1873 Closed 3 PR66 Cameo PCGS. CAC. Approximately 1,100 proof 1873 three cents were struck, all of which feature the Closed 3 in the date. The fields are richly mirrored on this lovely example, providing a nice level of contrast to the frosted devices. The reverse displays a slight counter-clockwise rotation. Population: 13 in 66 (1 in 66+) Cameo, 1 finer (4/13). PCGS# 83769

3130 1874 PR66 Cameo NGC. This lovely piece exhibits tremendous eye appeal on both sides, with flashy mirrored fields contrasting nicely with the devices. The surfaces are essentially untoned, adding to the appeal of this coin. Census: 29 in 66 (1 in 66+) Cameo, 5 finer (4/13). PCGS# 83770

1878 Three Cent Nickel, PR67 Cameo Proof-Only Issue

3131 1878 PR67 Cameo PCGS. CAC. The three cent nickel was only produced in proof format in 1878, with a mintage of just 900 pieces. This magnificent Superb Gem exhibits sharply detailed frosty design elements that contrast boldly with the deeply mirrored fields. The brilliant surfaces are free of mentionable distractions. Population: 18 in 67 (1 in 67+) Cameo, 1 finer (4/13). PCGS# 83774

3132 1879 PR67 PCGS. CAC. A razor-sharp Superb Gem with satiny luster and virtually flawless surfaces. The portrait and wreath exhibit noticeable contrast. Portions of the wreath ribbon are lapped. Certified in an old green label holder. NGC ID# 275Z, PCGS# 3775

3133 1882 PR67 Cameo PCGS. CAC. Only 22,200 business strikes were produced of this date, along with 3,100 proofs. The silver-gray surfaces are pristine on this lustrous Superb Gem and the piece displays excellent contrast. This coin exhibits terrific eye appeal. Population: 64 in 67 (5 in 67+) Cameo, 5 finer (4/13). PCGS# 83778

3134 1883 PR67 NGC. Green-gold, peach, and lavender-blue hues enrich this Superb Gem specimen from late in the series. This date is famous for having a larger proof mintage (6,609 pieces) than business strike output (4,000 coins). NGC ID# 2765, PCGS# 3779

3135 1883 PR67 NGC. A coin with tremendous eye appeal on both sides, this example features rich luster and largely untuned surfaces that include subtle hints of blue-gray color. A few tiny freckles appear on each side. Two small red threads are visible near 8 o'clock on the obverse. Due to the holder, it is difficult to determine whether they are on the surface or are struck into the coin. Census: 80 in 67, 4 finer (4/13). NGC ID# 2765, PCGS# 3779

3136 1884 PR67 PCGS. CAC. Sharply struck with watery fields that show glimmering pink, gold, and nickel-blue overtones. An impressively preserved Superb Gem from an issue in which proofs outnumber business strikes. Housed in an old green label holder. Population: 40 in 67, 1 finer (4/13). NGC ID# 2766, PCGS# 3780

- 3137 1886 PR66 Cameo PCGS. CAC.** This later-date proof three cent nickel has distinct contrast on both sides, stronger on the reverse. Delicate golden tints are strongest around the numeral III. Population: 36 in 66 (1 in 66+) Cameo, 20 finer (4/13). PCGS# 83782
- 3138 1886 PR66 Cameo PCGS. CAC.** Delicately gold-tinted across a pale nickel-white base. The obverse contrast is light for a PCGS Cameo coin, though the reverse has a crisper effect. Population: 36 in 66 (1 in 66+) Cameo, 20 finer (4/13). PCGS# 83782
- 3139 1886 PR67 Cameo PCGS. CAC.** An example with tremendous visual appeal on both sides, this coin displays brilliant, primarily untuned surfaces, with only faint streaks of toning present. A long as-made lint mark appears on Liberty's coronet. Population: 20 in 67 Cameo, 0 finer (4/13). PCGS# 83782
- 3140 1887/(6) PR66 Cameo PCGS.** Designated as 1887/(6) on the PCGS insert since it is the overdate obverse but the dies have been lapped and no trace of the underdigit is present. Lightly toned chestnut-gold with a precise strike and immaculate preservation. PCGS# 83783
- 3141 1888 PR67 ★ NGC. CAC.** The central device on the obverse displays a pleasing degree of mint frost; however, the lack of contrast for the wreath on the reverse likely held this piece from a cameo designation. This piece has a tremendous amount of eye appeal as the star designation indicates. A few tiny as-made breaks in the frost appear near Liberty's cheek. Census: 19 in 67 (1 in 67+), 0 finer (4/13). NGC ID# 276B, PCGS# 3785
- 3142 1888 PR65+ Deep Cameo PCGS. CAC.** An amazing high-end Gem, this piece displays profound cameo contrast between the frosty devices and the deeply mirrored fields. The design elements exhibit needle-sharp definition throughout and the champagne-gold surfaces reveal no mentionable distractions. A translucent spot appears to the right of the D in UNITED. Population: 1 in 65 (1 in 65+) Deep Cameo, 4 finer (4/13).
From The MKJ Collection, Part II. PCGS# 93785

BUST HALF DIMES

1831 Half Dime, Unabraded Gem
V-4, LM-4

- 3143 1831 MS65 PCGS. CAC. V-4, LM-4, R.2.** Golden-brown, gunmetal-gray, and powder-blue shades embrace this coruscating, nicely struck, and essentially immaculate Gem. An exceptional candidate for a high grade Capped Bust type set. Population for all die varieties: 45 in 65, 47 finer (4/13). NGC ID# 232D, PCGS# 4278
- 3144 1832 MS64 PCGS. V-6, LM-13, R.3.** The final three stars are repunched on this moderately scarce die marriage. Richly toned blue-green and lavender with glimpses of peripheral orange-gold. The strike is good though incomplete near the left shield border. NGC ID# 232E, PCGS# 4279
- 3145 1833 MS64 NGC. V-4, LM-3.4, R.2.** Light to medium golden-brown toning dominates though the borders display glimpses of deeper mauve-red and navy-blue. A smooth, well struck example of this later die state with the reverse field swollen near the eagle's beak.
Ex: Lewis M. Reagan Collection (Stack's, 1/1996), lot 399. NGC ID# 232F, PCGS# 4280

- 3146 1833 MS64 PCGS. CAC. V-1, LM-10, R.1.** Dappled sea-green, plum-red, and orange-gold endow this satiny and intricately struck Choice half dime. A pleasing Capped Bust type coin. Die breaks within the second S in STATES, along with various minor cracks, attribute the variety.
Ex: Baltimore Signature (Heritage, 3/2009), lot 707, which realized \$1,092.50. NGC ID# 232F, PCGS# 4280
- 3147 1834 MS63 NGC. V-1, LM-2, R.1.** A "Scarface" variety with a lengthy die crack on the portrait. Multicolor cherry-red, apple-green, and lemon-gold toning invigorates this nicely struck and flashy example. A lens reveals only infrequent minor marks. NGC ID# 232G, PCGS# 4281
- 3148 1836 Small 5C MS64 NGC. V-6, LM-5, R.2.** LM-5 is readily identified by repunching on star 1 and the N in UNITED. This well struck Choice Capped Bust type coin displays rich cobalt-blue and walnut-brown patina. Clashed, satiny, and unabraded. PCGS# 4288
- 3149 1836 3 Over Inverted 3 MS63 PCGS. V-4, LM-3, R.1.** Though undesignated as such by PCGS, this is the 3 over inverted 3 variety listed in the *Guide Book*. The peripheries are splendidly toned cherry-red, apple-green, and peach-gold while the fields and devices are close to brilliant. Marks are trivial save for a thin line beneath the left (facing) wing. PCGS# 94288
- 3150 1837 Small 5C MS63 NGC. V-2, LM-4, R.3.** Dappled orange-gold, ruby-red, and cobalt-blue embrace the borders of this satiny and unabraded final-year Bust type coin. The cheek is mildly granular, as made. The strike is bold save for the top of the left (facing) wing. NGC ID# 232K, PCGS# 4290

SEATED HALF DIMES

- 3151 1837 No Stars, Small Date (Flat Top 1) MS64 PCGS.** A dusky steel-gray and ocean-blue near-Gem of the briefly coined No Stars subtype. Satiny and smooth. A cud above the first A in AMERICA may be of interest to the specialist. Population: 46 in 64 (1 in 64+), 38 finer (4/13).
Ex: Dallas Signature (Heritage, 10/2009), lot 304, which realized \$977.50. NGC ID# 232M, PCGS# 4312

1837 Seated Half Dime, Pristine MS66
Small Date, No Stars

- 3152 1837 No Stars, Small Date (Flat Top 1) MS66 NGC.** A pristine stone-gray example of this introductory and briefly coined design subtype. The strike is crisp aside from the left-side obverse dentils. Die crumbling is noted on the right obverse field near Liberty's knee and elbow. NGC ID# 232M, PCGS# 4312
- 3153 1842 MS65 NGC. CAC.** Light steel-gray toning covers much of this Gem example, with small, scattered splashes of sea-green, orange, light brown, and green-gray color also present. Census: 18 in 65, 7 finer (4/13). NGC ID# 2332, PCGS# 4330
- 3154 1844 MS66 NGC. CAC. FS-301.** A Premium Gem example of this popular variety, the date is repunched both north and south, most noticeably beneath the 8. Both sides of this lovely piece display attractive toning. The colors include shades of ice-blue, sea-green, cherry, and golden brown. Census: 11 in 66, 0 finer (4/13). NGC ID# 2335, PCGS# 4333

**1848 Medium Date Half Dime, MS65
First Generation PCGS Holder**

- 3155 1848 Medium Date MS65 PCGS. CAC.** Housed in a first generation holder, this is a lovely Gem representative of the Medium Date variety. The coin exhibits a long die crack on the reverse that extends from 9 o'clock to approximately 4 o'clock. Toning, in intermingled shades of gray, pale orange, light yellow, and sage-green, is present on both sides. Population: 2 in 65, 1 finer (4/13). NGC ID# 233A, PCGS# 4338

**1851-O Half Dime, MS65
Seldom Seen in High Grades**

- 3156 1851-O MS65 NGC.** Lightly toned in attractive shades of golden-tan, violet, and ice-blue, this delightful Gem displays lustrous well-preserved surfaces, providing exceptional eye appeal. The design elements exhibit sharp detail. A few as-made die lines are present. Certified in a prior generation holder. Census: 10 in 65, 6 finer (4/13). NGC ID# 233J, PCGS# 4348
- 3157 1853 Arrows MS65 PCGS. CAC.** Rich luster emanates from both sides of this attractively-toned Gem. The obverse center is stone-gray, with shades of gold and brown appearing elsewhere. The reverse includes shades of lavender. Minor clash marks are present. Population: 53 in 65, 41 finer (4/13). NGC ID# 233Y, PCGS# 4356
- 3158 1854 Arrows MS65 PCGS. CAC.** Scattered toning in shades of gold, brown, and gray appears on both sides of this Gem, however the coin remains bright overall. Rich satin luster adds to the eye appeal. Population: 45 in 65, 11 finer (4/13). NGC ID# 2342, PCGS# 4358
- 3159 1855 Arrows MS65 NGC.** Gold, amber, and peach toning covers the upper obverse and much of the reverse. Swirling silver luster prevails elsewhere on this Gem Arrows half dime. A great type piece. NGC ID# 2344, PCGS# 4360
- 3160 1857 MS66 PCGS.** Toning, primarily in shades of gold, russet, and sea-green, appears on both sides of this Premium Gem. The colors are darkest near the periphery. Clash marks are present near the top of the obverse. Population: 25 in 66 (5 in 66+), 3 finer (4/13). NGC ID# 233S, PCGS# 4365
- 3161 1858-O MS65 PCGS. CAC.** Gold, orange, and mahogany at the margins with silver interiors. The overall frosty character of the luster is most visible in contrast to the brilliant area around the D in DIME. Population: 15 in 65, 6 finer (4/13). NGC ID# 233V, PCGS# 4369

- 3162 1860 MS66+ NGC.** Pleasing luster emanates from both sides of this appealing high-end Premium Gem example. Toning is present throughout, with the darker colors appearing primarily at the outer edges, including hues of cherry, teal, plum, violet, and orange. Census: 66 in 66 (2 in 66+), 27 finer (4/13). NGC ID# 2347, PCGS# 4377

**1860 Seated Half Dime, MS67
First Year of Legend Obverse**

- 3163 1860 MS67 NGC.** First year of the new Legend Obverse design and a highly collectible coin as such. Both sides of this piece show evidence of die striations, which usually imparts reflectivity, and indeed here the fields are brighter than the devices. The centers are generally free from toning, while the margins display deeper gray-russet and sea-green patina. The design elements are fully stuck in all areas. Census: 22 in 67, 5 finer (4/13). NGC ID# 2347, PCGS# 4377
- 3164 1860-O MS65 PCGS.** The last New Orleans half dime issue, represented by a richly toned and delightful Gem. Peach and rose patina prevails on the interiors, while blue hues are significant around much of the margins. Population: 17 in 65, 12 finer (4/13). NGC ID# 2348, PCGS# 4378
- 3165 1861 MS66 PCGS. CAC.** Frosty silver with just a hint of golden color visiting the margins of otherwise silver surfaces. Detail is distinct and delightful. Housed in an old green label holder. Population: 22 in 66 (1 in 66+), 2 finer (4/13). NGC ID# 2349, PCGS# 4379
- 3166 1862 MS66 PCGS. CAC.** Bold clash marks are present on both sides of this Premium Gem example. Prooflike reflectivity is noted on portions of the coin and the outer edges display areas of dark toning that include shades of orange, cherry, teal, emerald-green, sea-green, and yellow, particularly on the obverse. Population: 65 in 66 (8 in 66+), 36 finer (4/13). NGC ID# 234B, PCGS# 4381
- 3167 1862 MS66 PCGS. CAC.** Several shades of sea-green frame the obverse of this Premium Gem while the center consists of gold and brown colors. The reverse includes champagne, russet, plum, sea-green, and electric-blue tones. Clash marks are visible on both sides. Population: 65 in 66 (8 in 66+), 36 finer (4/13). NGC ID# 234B, PCGS# 4381
- 3168 1862 MS67 NGC.** Intermingled shades of yellow-orange, tan, and sea-green cover much of the surfaces on this pleasing Civil War era representative. Clash marks are visible on the reverse of this Superb Gem. Census: 24 in 67 (1 in 67+), 4 finer (4/13). NGC ID# 234B, PCGS# 4381

1867 Half Dime, MS66 ★
Mintage of 8,000 Pieces

- 3169 1867 MS66 ★ NGC.** A brilliant, moderately prooflike, and high grade example. A pair of faint lines near the D in DIME are from the planchet prior to the strike. At least four sets of clash marks are evident. Only 8,000 pieces were struck, since fractional currency and Gresham's Law combined to drive out silver coin from circulation. As of (5/13), NGC has bestowed a Star designation on only two business strike 1867 half dimes, the present lot and an MS65 example. NGC ID# 234L, PCGS# 4390

- 3170 1871 MS65 PCGS.** A lustrous, well preserved, and sharply struck Gem with delicate straw-gold toning save for a glimpse of steel-gray on the upper reverse margin. Encapsulated in a green label holder. Population: 27 in 65, 24 finer (4/13). NGC ID# 234V, PCGS# 4398

- 3171 1871 MS66+ PCGS. CAC.** The obverse of this Premium Gem is fully brilliant silver-white save for a few handling marks. The reverse is deeply toned with satin luster beneath blue-green and iridescent tones. Population: 23 in 66 (3 in 66+), 1 finer (4/13). NGC ID# 234V, PCGS# 4398

- 3172 1872-S Mintmark Below Bow MS65 PCGS.** With a mintage of 362,000 pieces, the 1872-S Mintmark Below Bow half dime is more difficult to locate than its Mintmark Above Bow counterpart. The surfaces of this piece are brilliant at a glance, with faint streaks of green-gold toning appearing on both sides of this Gem example when closely examined. NGC ID# 2352, PCGS# 4401

- 3173 1872-S Mintmark Below Bow MS66 PCGS.** Rich satin luster with a hint of frost on the obverse provides this Premium Gem with a high degree of eye appeal. The well-preserved piece exhibits a solid strike. Small splashes of golden-brown toning appear on the otherwise untuned surfaces. Minor clash marks appear on the reverse. Population: 53 in 66 (3 in 66+), 8 finer (4/13).
Ex: Long Beach Signature (Heritage, 2/2007), lot 2831, which realized \$1,265. NGC ID# 2352, PCGS# 4401

PROOF SEATED HALF DIMES

1859 Half Dime, Patinated PR66
Single-Year Paquet Subtype

- 3174 1859 PR66 NGC.** The unusual hollow-centered stars obverse subtype, credited to Anthony C. Paquet whose more famous work was on the 1861-S twenty. Fully struck and flashy with rich peach-gold and lilac-gray patina. A scant 800 proofs were struck, and many of those failed to sell and were eventually melted by the Mint. Both sides display a partial wire rim. NGC ID# 235P, PCGS# 4438

1859 Half Dime, Stone-White PR66 Cameo
Ephemeral Paquet Obverse

- 3175 1859 PR66 Cameo NGC.** The date is repunched south, most prominently beneath the 1. The curious hollow-centered stars Paquet obverse subtype seen only on the 1859 and the Judd-233 and Judd-267 transitional patterns. Brilliant and beautiful with a full strike and prominently mirrored fields that contrast with icy motifs and legends. PCGS# 84438

- 3176 1861 PR65 PCGS. CAC.** The fields retain a strongly mirrored appearance on this lovely Gem example. The obverse exhibits a rich golden-orange color overall, with areas of fuchsia, denim-blue, and violet appearing at portions of the periphery. An as-made lint mark is present in the right obverse field. The reverse displays a champagne center framed by golden-orange and hints of red. Population: 8 in 65, 4 finer (4/13). NGC ID# 235W, PCGS# 4444

1861 Half Dime, PR65+ Cameo
Great Obverse Contrast

- 3177 1861 PR65+ Cameo PCGS. CAC.** An eye-catching example that is on the verge of the next highest grade, as suggested by the PCGS Plus designation. The interiors are silver with a touch of yellow, while the margins range from gold to dusky peach, the last color notable at the top right of the reverse. Great mirrors. Population: 6 in 65 (1 in 65+) Cameo, 1 finer (4/13). PCGS# 84444

- 3178 1868 PR64 Cameo NGC. CAC.** The obverse features toning in shades of almond and golden-brown while the reverse remains largely untuned. Minor incompleteness of strike is noted. The level of contrast is pleasing between the reflective fields and frosted devices. Census: 11 in 64 Cameo, 8 finer (4/13). PCGS# 84451

- 3179 1868 PR65 Cameo NGC. CAC.** The fields retain a mirrored appearance beneath the colorful toning on this Gem example. The colors on the obverse include champagne, golden-orange, sea-green, electric-blue, red, and plum. The reverse is primarily champagne-orange with many of the previously named colors appearing at the outer portions. Census: 5 in 65 Cameo, 3 finer (4/13). PCGS# 84451

- 3180 1869 PR65 Cameo NGC. CAC.** Light silver-green, pale and deep blue, and gold hues prevail on the obverse, all but the last making an appearance on the reverse as well. Well-contrasted on both sides, particularly in the wreath area where the toning is light. PCGS# 84452

- 3181 1870 PR66 NGC.** Jade-green, red-brown, plum, champagne, and electric-blue are among the colors found on this Premium Gem example. A number of as-made die lines are present on the obverse. Large portions of the fields retain a reflective appearance. Census: 23 in 66, 7 finer (4/13). NGC ID# 2367, PCGS# 4453

EARLY DIMES

- 3182 1797 16 Stars — Damage — PCGS Genuine. VG Details. JR-1, R.4.** An affordable stone-gray example of this better Small Eagle variety. Two digs at the obverse center create the appearance of an 8, and flatten and slightly bend the corresponding area of the reverse. The right obverse field and bust tip have several scratches. A large die break affects the date though it remains readable. NGC ID# 236C, PCGS# 4462
- 3183 1800 VF20 NGC. JR-1, R.4.** The die break beneath the wingtip at 10 o'clock is the easiest way to distinguish JR-1 from the only other 1800 variety, JR-2. The present example exhibit deeply iridescent cobalt-blue, lilac-red, and apple-green patina. Well defined for the VF level. Generally smooth, though we note one faded pinscratch on the portrait, a small depression near obverse star 8, and an edge mark at 2:30. NGC ID# 236H, PCGS# 4470
- 3184 1805 5 Berries VF20 ANACS. JR-1, R.3.** JR-1, R.3. Powder-blue and chestnut-gold shades visit this well detailed and slightly bright early dime. Smooth aside from a pair of marks on the right obverse field. Housed in an ANA cache holder.
Ex: Cincinnati Central States Signature (Heritage, 4/2009), lot 79, which realized \$1,782.50. PCGS# 4478

BUST DIMES

- 3185 1809 — Improperly Cleaned — NGC Details. AU. JR-1, R.4.** JR-1 is the sole die pairing. Deep steel-gray toning embraces this well defined better date dime. Any hairlines are imperceptible, but we note a roundish mark beneath the eagle's beak.
- 3186 1814 Large Date AU50 NGC. JR-3, R.2.** A pleasing and lightly marked Bust dime with pearl-gray centers and forest-green and autumn-brown margins. The strike is good save for softness on the eagle's right (facing) wing. Struck from rotated dies. NGC ID# 236W, PCGS# 4488
- 3187 1829 Small 10C MS61 NGC. JR-4, R.2.** Rich lavender and forest-green toning encompasses this satiny and fully struck Uncirculated Capped Bust dime. Free from visible marks though faint hairlines emerge beneath a lens. NGC ID# 2378, PCGS# 4511
- 3188 1829 Small 10C MS62 NGC. JR-7, R.1.** Deep lavender toning embraces this satiny and precisely struck dime. A lens reveals only unimportant contact. The 0 in 10 C is from the same punch as the O in OF, a substitution of convenience by the die engraver. NGC ID# 2378, PCGS# 4511
- 3189 1829 Small 10C MS62+ NGC. JR-3, R.4.** Deep apple-green and russet-brown toning embraces this well struck and coruscating representative. The fields are clashed but smooth save for wispy contact near the profile. NGC ID# 2378, PCGS# 4511

Prooflike MS64 1831 Dime, JR-2

- 3190 1831 MS64 Prooflike NGC. CAC. JR-2, R.3.** NGC has certified only three 1831 dimes as Prooflike, one as MS63 and two as MS64 (4/13). JR-2 is most interesting for its reverse. The D in UNITED and the second S in STATES are repunched. The present near-Gem is close to brilliant but has a hint of golden patina at the margins. Precisely struck and splendidly preserved. PCGS# 84520

- 3191 1833 MS63 PCGS Secure. JR-9, R.2.** A lovely silver-gray representative that possesses satin luster and impressively mark-free surfaces. The F in OF is widely repunched, and the second S in STATES is also recut. NGC ID# 237D, PCGS# 4522

SEATED DIMES

- 3192 1838 Large Stars MS64 PCGS. CAC. Fortin-111a.** One of Fortin's Top 100 Varieties due to the dramatic obverse crack between 4:30 and 10:30 through the seated Liberty. Fully struck and satiny with olive-gray centers and fire-red and forest-green borders. Pristine save for a hair-thin mark on the central reverse. NGC ID# 237U, PCGS# 4568

1839 No Drapery Dime, Smooth MS65 Fortin-106 Variety

- 3193 1839 No Drapery MS65 NGC. Fortin-106.** A prominent vertical die crack runs through Liberty's head. The No Drapery, Stars Obverse dime was only produced from 1838 through 1839 and part of 1840. The subtype is thus elusive, especially in high grade. This satiny and unmarked example has dusky walnut-tan and sea-green patina. Sharply struck throughout. Census: 24 in 65 (1 in 65+), 35 finer (4/13).
Ex: Long Beach Signature (Heritage, 2/2010), lot 994. NGC ID# 237X, PCGS# 4571

1840 No Drapery Dime, MS65

- 3194 1840 No Drapery MS65 NGC.** Attractive golden-brown and rose-gold toning is present, along with splashes of teal on this satiny Gem. A sharply struck and exceptional example of the Stars, No Drapery subtype, coined only between 1838 and 1840. Census: 13 in 65, 11 finer (4/13).
Ex: Central States Signature (Heritage, 4/2006), lot 1206. NGC ID# 237Z, PCGS# 4573

- 3195 1841-O Transitional Reverse Small O Good 6 NGC. CAC. Fortin-102, FS-901.** Per Fortin, "the 1841-O Small O Closed Bud variety is considered to be an extremely rare transitional variety with nearly all known examples grading Good through Fine." About half of LIBERTY is legible, and the piece possesses rich lilac, powder-blue, and russet patina.
Ex: Long Beach Signature (Heritage, 2/2008), lot 96, which realized \$2,300. PCGS# 145486

- 3196 1842-O AU58 NGC. Fortin-102a.** Medium O. One of Gerry Fortin's Top 100 Varieties due to several heavy reverse die cracks. The 1842-O has a fairly high mintage but is surprisingly rare in AU or better grades. The obverse is silver-gray while the reverse offers rich gunmetal toning.
Ex: New York Signature (Heritage, 11/2003), lot 5966, which realized \$1,610. NGC ID# 2387, PCGS# 4582

- 3197 1854 Arrows MS65 NGC.** Intermingled shades of gold, orange, and silver appear on both sides of this lustrous Gem representative. Smaller splashes of toning include shades of denim-blue, sea-green, and orange, primarily at the outer portions of the obverse. Census: 19 in 65, 22 finer (4/13). NGC ID# 239A, PCGS# 4605

1860 Seated Liberty Dime, MS67 Single Finest Certified at NGC

- 3198 1860 MS67 NGC.** The 1860 Seated Liberty dime was coined in large numbers, but few survivors can match the quality and appeal of this spectacular Superb Gem. The design elements are sharply detailed and the well-preserved surfaces retain much of their original mint luster, with delicate shades of pale gold toning on both sides. Census: 1 in 67, 0 finer (4/13). NGC ID# 239D, PCGS# 4631

- 3199 1862 MS65 PCGS.** A Gem representative of this Civil War-era issue, this piece displays light toning in shades of champagne and golden-brown. The surfaces are satiny overall, but possess a hint of flash. Population: 16 in 65, 17 finer (4/13). NGC ID# 239H, PCGS# 4635

1865 Seated Dime, MS66 Low-Mintage Civil War Date

- 3200 1865 MS66 NGC.** A vivid pattern of cobalt-blue and golden-brown toning enhances the well-preserved surfaces of this remarkable Premium Gem. The design elements are sharply detailed and satiny mint luster is evident on both sides. From a minuscule business-strike mintage of 10,000 pieces. Census: 7 in 66, 9 finer (4/13). NGC ID# 239P, PCGS# 4641

1871-CC Seated Dime, Good 6 Rare Branch Mint Issue

- 3201 1871-CC Good 6 PCGS.** Only 20,100 Seated Liberty dimes were struck at the Carson City Mint in 1871, making the issue elusive in all grades and conditions. This well-worn example displays a legible date and mintmark, with full rims and major design elements intact in outline, but most interior detail has been effaced. Pleasing gold and violet-gray patina visits the surfaces of both sides. Population: 5 in 6, 34 finer (4/13). NGC ID# 23A5, PCGS# 4654

- 3202 1875-S Mintmark Below Bow MS65 NGC. CAC.** A well preserved and coruscating Gem bathed in dusky caramel-gold and ivory toning. The fields are clashed and unabraded with minor carbon. Certified in a prior generation holder. Census: 32 in 65, 13 finer (4/13). NGC ID# 27DC, PCGS# 4676

1877-S Seated Liberty Dime, MS65

- 3203 1877-S MS65 PCGS.** Type Two Reverse. Attractive toning appears on both sides of this Gem. The intermingled colors include hues of golden-brown, sage-green, and rose-gold. A couple of alloy spots are present on the reverse. Housed in an old green label holder. Population: 9 in 65, 4 finer (4/13). NGC ID# 23AN, PCGS# 4684

**1879 Seated Liberty Dime, MS67 ★
Brilliant Prooflike Surfaces**

3204 1879 MS67 ★ NGC. Only 14,000 Seated Liberty dimes were struck in 1879, and few survivors display the the quality and eye appeal of this magnificent Superb Gem. The design elements are sharply detailed and the prooflike brilliant surfaces show no mentionable signs of contact. Census: 25 in 67, (10 in 67 ★) 3 finer (4/13). NGC ID# 23AS, PCGS# 4687

3205 1882 MS66 PCGS. CAC. Several hues appear on this Premium Gem, including lemon-yellow, emerald-green, lime-green, teal, electric-blue, and golden-brown. The designs display a strong level of detail. This piece exhibits the downward sloping date and the 2 with a broken top. Population: 44 in 66 (3 in 66+), 19 finer (4/13). NGC ID# 23AV, PCGS# 4690

**1882 Seated Dime, MS67
Attractive Toning and Luster**

3206 1882 MS67 PCGS. CAC. The generous mintage of 3.9 million pieces makes the 1882 one of the more obtainable dates from the 1880s, however only a small number of coins have achieved the Superb Gem level. Emerald-green, gray-brown, and golden-orange toning covers large portions of this well-struck example displaying pleasing luster. The reverse includes a few splashes of pink and violet. Population: 19 in 67, 0 finer (4/13). NGC ID# 23AV, PCGS# 4690

3207 1884-S MS64 PCGS. Intermingled toning, in both light and dark shades, covers both sides of this sharply struck Choice example. An array of colors is present, including several hues of green and blue along with splashes of plum and red. Population: 17 in 64 (1 in 64+), 3 finer (4/13). NGC ID# 23AY, PCGS# 4693

3208 1885-S VF35 PCGS. CAC. The overall medium-gray surfaces display areas of gold overtones on this piece exhibiting even wear. This is an appealing Choice VF example of a low-mintage key to the late date Seated Liberty dime series. Population: 10 in 35, 31 finer (4/13). NGC ID# 23B2, PCGS# 4695

3209 1886 MS66 PCGS. A number of different colors are present on this Premium Gem representative, including sea-green, golden-brown, teal, copper, and fuchsia. This piece displays an attractive level of design detail. Population: 32 in 66, 7 finer (4/13). NGC ID# 23B3, PCGS# 4696

3210 1887 MS66 PCGS. Highly lustrous and virtually brilliant, this piece displays a strong degree of eye appeal. The strike is unquestionably above average, and the preservation is exemplary save for a few faint diagonal grazes near the shield. Minor clash marks appear and several small die cracks are present on the reverse. Population: 26 in 66 (1 in 66+), 3 finer (4/13).

Ex: Central States St. Louis Signature (Heritage, 5/2007), lot 336, which realized \$1,150. NGC ID# 23B5, PCGS# 4698

3211 1889 MS65 PCGS. CAC. Olive-green, tan-gold, ocean-blue, and ruby-red endow this sharply struck and lustrous Gem. Devoid of marks though the reverse has distributed flecks. Housed in a first generation holder. Population: 55 in 65, 29 finer (4/13). NGC ID# 23B9, PCGS# 4702

3212 1890 MS66 PCGS. CAC. Rich jade-green and rose-red toning dominates this lustrous and nicely struck Seated type coin. Well preserved despite faint grazes on the right obverse field. Certified in an old green label holder. Population: 42 in 66, 3 finer (4/13). NGC ID# 23BB, PCGS# 4704

3213 1890-S MS65 NGC. Dark, mottled toning covers large portions of this Gem and includes shades of jade-green and plum-gray. The well-struck coin displays a pleasing level of design detail. Census: 16 in 65, 7 finer (4/13). NGC ID# 23BC, PCGS# 4705

3214 1891 MS67 NGC. Other than a few tiny freckles of color, this Superb Gem is brilliant. Numerous thin, wispy die cracks appear on the reverse along the wreath. The strike is incomplete at the outer portions of the designs and legends. Census: 16 in 67, 1 finer (4/13). NGC ID# 23BD, PCGS# 4706

PROOF SEATED DIMES

**1858 Dime, PR66 Cameo
Richly Toned**

3215 1858 PR66 Cameo NGC. Darker toning frames the lighter central devices, providing nice eye appeal for this Premium Gem example. The toning includes shades of orange, red, fuchsia, deep sea-green, electric-blue, and plum. An as-made lint mark appears to the left of the date. Census: 5 in 66 Cameo, 1 finer (4/13). PCGS# 84747

3216 1859 PR64 PCGS. Gold and sea-green colors cover much of both sides of this near-Gem, with a few splashes of other tones also present. The devices display an attractive level of detail. Population: 62 in 64, 47 finer (4/13). NGC ID# 23CD, PCGS# 4748

3217 1859 PR64 PCGS. Distinctly gold-tinted surfaces have varying depths of gray intermixed. Great eye appeal for a Choice proof despite weakness at the star where Liberty stares and a touch of wateriness to the field reflectivity. NGC ID# 23CD, PCGS# 4748

**1859 Seated Dime, Gem Proof
Rich and Elegant Patina**

- 3218 1859 PR65 NGC. CAC.** A glittering 1850s proof dime with Stars obverse and United States of America reverse, the last of its kind. Emerald margins brimming with luster give way to blue interiors, cerulean on the reverse with hints of violet. Sharply struck, carefully preserved, and an all-around delight. NGC ID# 23CD, PCGS# 4748

- 3219 1863 PR64 NGC.** Beautifully patinated orange-gold, aquamarine, and plum-red. A sharply struck, flashy, and moderately hairlined Civil War near-Gem. A scant 460 proofs were issued.
Ex: Richmond Collection, Part II (Heritage, 3/2005), lot 1256, which realizes \$1,150. NGC ID# 23BS, PCGS# 4756

- 3220 1863 PR65 PCGS. CAC.** This richly toned Civil War-era proof Gem dime has green-gold outer toning with fade-through to blue, violet, and rose on each side. The reverse adds skeins of the peripheral color within the wreath as well. Population: 9 in 65, 11 finer (4/13). NGC ID# 23BS, PCGS# 4756

**1863 Seated Dime, PR65 Deep Cameo
Only One Finer Coin at PCGS**

- 3221 1863 PR65 Deep Cameo PCGS.** Jaw-dropping contrast with only the faintest suggestion of golden color against thickly frosted devices and gleaming silver mirrors. Carefully preserved with few post-striking disturbances, though a planchet flake is noted below the word DIME on the reverse. Population: 4 in 65 Deep Cameo, 1 finer (4/13).

From The MKJ Collection, Part II. PCGS# 94756

- 3222 1866 PR64 Cameo PCGS.** Brilliant surfaces and a pleasing level of contrast between the fields and the devices provide this example with nice eye appeal. The reverse is particularly attractive on this piece. The obverse includes a few as-made lint marks. Population: 13 in 64 Cameo, 7 finer (4/13). PCGS# 84759

- 3223 1868 PR65 PCGS.** This precisely struck and lightly toned Gem displays noticeable white-on-black contrast, but as it is certified in a green label holder, no Cameo designation is present. Population: 20 in 65 (1 in 65+), 5 finer (4/13). NGC ID# 23CS, PCGS# 4761

- 3224 1870 PR65 NGC. CAC.** Yellow-gold, sea-green, and golden-orange colors appear on both sides of this example. Areas of reflectivity remain visible and the piece has a nice overall appearance. Census: 20 in 65, 12 finer (4/13). NGC ID# 23CU, PCGS# 4763

- 3225 1872 PR64 Cameo NGC.** A darkly toned, but flashy near-Gem proof, this piece possesses nice eye appeal on both sides. The centers feature rose-red color with hints of orange. Splashes of teal, electric-blue, and plum are among the hues appearing at the outer edges. Census: 4 in 64 Cameo, 17 finer (4/13). PCGS# 84765

**1873 Seated Liberty Dime, PR67
No Arrows, Closed 3**

- 3226 1873 No Arrows, Closed 3 PR67 NGC.** A desirable Superb Gem proof that shows deep russet-gold toning over most of the surfaces, framed with rich teal through the dentils. Beautifully detailed overall with excellent quality for this issue, and with a mintage of just 600 pieces, there are few survivors at this level. The NGC holder is incorrect as it states this is an "Open 3", but this is a Closed 3, as were all the Without Arrows proofs. Census: 6 in 67 (1 in 67+), 1 finer (4/13).

Ex: Palm Beach Signature (Heritage, 3/2006), lot 466; Dallas Signature (Heritage, 10/2010), lot 566. NGC ID# 23CX, PCGS# 4766

- 3227 1873 No Arrows PR66 Cameo NGC.** Areas of light toning appear primarily at the outer edges of this example. The fields display a pleasing degree of reflectivity and the devices exhibit light frost. The design elements are well detailed. Census: 14 in 66 Cameo, 3 finer (4/13). PCGS# 84766

- 3228 1873 Arrows PR64 Cameo NGC.** An attractive near-Gem example, this piece features mirrored fields and traces of gold and red toning that provide pleasing contrast to the frosty devices. Census: 2 in 64 Cameo, 7 finer (4/13). PCGS# 84769

- 3229 1875 PR66 NGC. CAC.** Beautiful orange-gold, fire-red, and aquamarine patina endow this well struck and flashy high grade type coin. One of just 700 proofs issued. Certified in a prior generation holder. NGC ID# 23CY, PCGS# 4772

- 3230 1879 PR66 NGC.** Green-gold toning covers most of the obverse and the margins on the reverse. Deeper blue hues appear in a crescent over Liberty's head and at the reverse interior. A mildly contrasted and strongly appealing Premium Gem proof.
Ex: Dallas Signature (Heritage, 7/2006), lot 638. NGC ID# 23D4, PCGS# 4776

- 3231 1879 PR64 Cameo PCGS. CAC.** Faintly glimmering green-gold on each side with a touch of deeper color over the MER of AMERICA. The obverse fields show numerous planchet flaws, as does the peripheral reverse. Population: 28 in 64 Cameo, 20 finer (4/13). PCGS# 84776

- 3232 1879 PR66 Cameo NGC. CAC.** Gleaming pale silver with frost-white central devices. Only the faintest hint of green-gold at the rims keeps this Cameo Premium Gem from appearing "black-and-white." PCGS# 84776

- 3233 1880 PR66 NGC. CAC.** Glimmering sea-green at the margins with a deepening to blue at the interiors and windows to peach on the obverse. A well-defined Premium Gem proof housed in a prior generation NGC holder. NGC ID# 23D5, PCGS# 4777

- 3234 1880 PR66 Cameo NGC. CAC.** Strongly contrasted through a thin layer of golden patina, the fields still gleaming and the devices elegantly frosted. An impressively preserved specimen from late in the Seated dime series. PCGS# 84777

- 3235 1883 PR65 Cameo PCGS. CAC.** The cameo effect is quite attractive on this Gem example. A few tiny toning spots appear on this otherwise fully bright piece. Population: 17 in 65 Cameo, 15 finer (4/13). PCGS# 84780

**1883 Seated Liberty Dime, PR67
Stunning Cameo Example**

- 3236 1883 PR67 Cameo NGC.** This fully brilliant Superb Gem 1883 dime, from the original proof production of 1,039 pieces, offers light cameo contrast on both sides, slightly stronger on the reverse. Both sides display silver surfaces with no trace of toning, and the fields are deeply mirrored as expected. Census: 12 in 67 Cameo, 2 finer (4/13).
Ex: Dallas Signature (Heritage, 4/2007), lot 548. PCGS# 84780

- 3237 1884 PR66 PCGS.** Large areas of reflectivity remain on this Premium Gem representative that displays large areas of rich toning. The colors include shades of golden-orange, fuchsia, teal, plum, aquamarine, and russet. Population: 33 in 66, 14 finer (4/13). NGC ID# 23D9, PCGS# 4781

- 3238 1884 PR66 PCGS. CAC.** Splashes of copper, cobalt-blue, lavender, golden-brown, sea-green, and plum toning enrich the well-preserved surfaces of this Premium Gem proof. The coin is well-struck overall, save for portions of Liberty's hair. Population: 33 in 66, 14 finer (4/13). NGC ID# 23D9, PCGS# 4781

**1885 Seated Dime, PR67
Vivid Multicolor Toning**

- 3239 1885 PR67 NGC. CAC.** The design elements of this spectacular Superb Gem are well-detailed, as expected for this issue. The deeply mirrored fields display vivid shades of cobalt-blue and pale gold toning in a delightful play of colors. Eye appeal is tremendous. From a proof mintage of 930 pieces. Census: 10 in 67, 2 finer (4/13). NGC ID# 23DA, PCGS# 4782

- 3240 1885 PR65 Cameo NGC. CAC.** This coin remains brilliant overall, with areas of rose-peach toning appearing at portions of the rims. The cameo contrast is readily apparent at even a quick glance and a bold strike imparted well-defined design details. Census: 10 in 65 Cameo, 50 finer (4/13). PCGS# 84782

**1886 Seated Liberty Dime, PR66
Delicately Toned Reflective Fields**

- 3241 1886 PR66 PCGS. CAC.** A nominal proof mintage of 886 Seated Liberty dimes was accomplished in 1886 and this delightful Premium Gem ranks high among the surviving population. Delicate shades of cerulean-blue and pale gold patina enhance the reflective fields and the design elements are sharply detailed throughout. Eye appeal is outstanding. Population: 20 in 66 (1 in 66+), 6 finer (4/13). NGC ID# 23DB, PCGS# 4783

- 3242 1889 PR65 PCGS.** Apple-green and butter-gold shades endow this patinated Gem. The strike is good save for softness on Liberty's head and cap. A scant 711 proofs were coined. Housed in an old green label holder. NGC ID# 23DE, PCGS# 4786

**1889 Seated Dime, PR67 Cameo
Only One Finer Coin at NGC**

- 3243 1889 PR67 Cameo NGC. CAC.** Delightful champagne-gold toning merges with arcs of cobalt-blue at the peripheries of this spectacular Superb Gem. The design elements are sharply detailed and frosty, contrasting boldly with the deeply mirrored fields despite the vivid patina. Census: 5 in 67 Cameo, 1 finer (4/13). PCGS# 84786

- 3244 1890 PR66 PCGS. CAC.** Shimmering mirrored fields on both sides provide this lovely example with a high level of eye appeal. Champagne, sea-green, orange, and plum toning is present. A few as-made lint marks and die lines appear. Population: 20 in 66 (1 in 66+), 6 finer (4/13). NGC ID# 23DF, PCGS# 4787

- 3245 1891 PR65 Cameo PCGS. CAC.** A wide array of colors appear on this Gem example displaying cameo contrast, including shades of yellow, teal, kelly-green, cherry-red, and copper. The piece exhibits a sharp strike overall. Population: 13 in 65 Cameo, 11 finer (4/13). PCGS# 84788

BARBER DIMES

- 3246 1892-O MS65 PCGS. CAC.** Peach overtones on medium-gray surfaces are a touch dusky and influenced by violet on the reverse. This Gem is decently detailed for the date and a condition rarity this fine. Population: 18 in 65, 10 finer (4/13). NGC ID# 23DL, PCGS# 4797

- 3247 1892-S MS64 PCGS.** A lovely near-Gem with a pleasing appearance, this piece displays areas of light toning that include shades of light green, champagne, and orange, with a few splashes of plum present on the reverse. The coin exhibits a sharp strike. Population: 29 in 64, 15 finer (4/13). NGC ID# 23DM, PCGS# 4798

3248 1893-O MS65 PCGS. This is a wonderful representative of a scarce early New Orleans Barber dime that is very elusive at the Gem level and above. The lustrous cream-gray surfaces provide this piece with nice eye appeal along with a well-executed strike. Population: 14 in 65, 9 finer (4/13). NGC ID# 23DR, PCGS# 4801

3249 1893-O MS65 NGC. This second-year issue out of New Orleans had few of its 1.76 million pieces saved at the time of release, and Gems such as this richly toned beauty are condition rarities. The obverse is pink-gray with peach and antique-gold enrichment at the margins, while the reverse has deeper versions of the same colors. Ex: *FUN Signature (Heritage, 1/2005)*, lot 6179; *CSNS Signature (Heritage, 4/2006)*, lot 1287; *Houston Signature (Heritage, 12/2008)*, lot 1126. NGC ID# 23DR, PCGS# 4801

1894 Barber Dime, MS66 Only One Finer at PCGS

3250 1894 MS66 PCGS. From an important date in the Barber dime series, this wonderful Premium Gem has few rivals. This piece displays rich lustrous surfaces and only the faintest hints of toning. The sharply struck piece exhibits boldly defined design details, further adding to the exceptional eye appeal. Population: 8 in 66, 1 finer (4/13). NGC ID# 23DT, PCGS# 4803

3251 1895-O Fine 15 PCGS. Deeply toned rose and violet over a medium-gray base. This moderately worn example has more rub than usual in the headband area but overall detail consistent with the Choice Fine designation. Only 440,000 pieces were struck for the 1895-O dime. NGC ID# 23DW, PCGS# 4807

3252 1895-O VF20 PCGS. Aside from the non-collectible 1894-S, the 1895-O is the unchallenged key to the Barber series. The pewter-gray color provides a pleasing appearance to this example displaying even overall wear. NGC ID# 23DW, PCGS# 4807

3253 1895-O VF20 PCGS. CAC. The obverse of this midrange 1895-O dime has green-gold and blue overtones on a light gray base. The reverse is duskier with amber and brown hues. A great collector coin. NGC ID# 23DW, PCGS# 4807

3254 1897 MS65 PCGS. Gold CAC. This pristine and lustrous Barber type coin offers attractive jade-green, golden-brown, and slate-gray toning. Fully struck, though portions of the wreath are lapped away, as made. Certified in a green label holder. NGC ID# 23000, PCGS# 4812

3255 1898-S MS64 PCGS. Numerous shades of green encircle the champagne-gold centers on both sides of this near-Gem. Splashes of orange and russet are also present. The piece exhibits a sharp strike with areas of as-made strike-throughs appearing on the reverse. Population: 23 in 64, 11 finer (4/13). NGC ID# 2300000000, PCGS# 4817

3256 1903-O MS64 PCGS. This charming Choice example displays strong mint luster and sharply detailed design elements while the pleasing surfaces show only a few minor contact marks. Population: 29 in 64, 16 finer (4/13). NGC ID# 23EN, PCGS# 4831

3257 1907 MS66 PCGS. Splashes of green, brown, red, and gray toning appear on both sides of this Premium Gem. Pleasing luster adds to the eye appeal. Population: 16 in 66 (3 in 66+), 1 finer (4/13). NGC ID# 23F3, PCGS# 4842

Low-Mintage 1909-D Dime, MS65 Beautifully Toned

3258 1909-D MS65 PCGS. CAC. The obverse of this Gem displays intermingled shades of copper, orange, aqua, plum, and cherry-red, creating tremendous eye appeal. The reverse patina consists primarily of golden-brown, with an array of rich colors appearing at the outer edges, with cherry-red, lemon-yellow, and kelly-green among them. Population: 19 in 65, 17 finer (4/13). NGC ID# 23FC, PCGS# 4851

1911 Dime, Superb Gem Fully Struck

3259 1911 MS67 NGC. This crisply struck and well preserved Barber type coin displays potent luster and only a wisp of straw-gold and steel-gray toning. Nearly unimprovable at either service, especially if lightly patinated coins are preferred. Census: 10 in 67, 1 finer as 67 ★, 2 finer as 68 ★ (4/13). NGC ID# 23FJ, PCGS# 4857

1911 Dime, MS67, Ex: Duckor Perfect Coin for Type Purposes

3260 1911 MS67 PCGS. CAC. Ex: Duckor. This issue is an ideal date for the type collector. It ranks 68th by mintage, 71st for Mint State population, and 74th (last) place for Gem population. In every collection, there is one date that holds the position of "most common," and this is the date for Barber dimes. The surfaces have brilliant, frosty luster with sharp design details and faint golden toning. It is an exceptionally attractive Superb Gem example. Population: 14 in 67 (1 in 67+), 2 finer (4/13). Ex: *FUN Signature (Heritage, 1/2006)*, lot 1028, where it brought \$3,450. NGC ID# 23FJ, PCGS# 4857

3261 1912-S MS66 NGC. Bright silver luster whose frostiness is best appreciated in contrast to the tiny window of brilliance at top left on the wreath. A well-defined coin with just a few tiny scrapes precluding a grade finer than Premium Gem. NGC ID# 23FP, PCGS# 4862

PROOF BARBER DIMES

- 3262 1892 PR66+ NGC. CAC.** A two-toned coin, with silver obverse and bands of reddish patina, while the reverse is a deep aqua-gray. A small planchet defect is undoubtedly as made at the Mint, an indentation between D and S at the obverse rim. The obverse only is highly reflective. Census: 51 in 66 (3 in 66+), 16 finer (4/13). NGC ID# 23G2, PCGS# 4875
- 3263 1893 PR64 Cameo NGC.** Appreciable contrast is present between the mirrored fields and the frosted devices on this near-Gem. A trio of hair-thin marks appears on the obverse. Census: 9 in 64 Cameo, 38 finer (4/13). PCGS# 84877
- 3264 1894 PR65 Cameo PCGS. CAC.** Champagne toning appears on both sides of this Gem. Small splashes of other colors are present as well, primarily on the reverse, among them teal and russet. The coin was sharply struck, creating well-defined design details. Population: 21 in 65 Cameo, 18 finer (4/13). PCGS# 84878

1895 Barber Dime, PR67+ Cameo Brilliant Mirrored Fields

- 3265 1895 PR67+ Cameo NGC.** Only 880 silver proof sets were struck in 1895, a date made famous for the proof-only Morgan dollar issue that year. This magnificent high-end Superb Gem displays deeply mirrored brilliant fields that contrast boldly with the frosty sharply detailed design elements. Census: 9 in 67 (1 in 67+) Cameo, 5 finer (4/13). PCGS# 84879
- 3266 1896 PR65 NGC.** Although the color of this Gem proof is dark overall, it has an appealing appearance, due in part to razor-sharp design elements. The toning includes deep ruby-red, cobalt-blue, and gunmetal-gray. Examination under a loupe reveals only minor imperfections. Only 762 proofs were produced. Census: 37 in 65, 62 finer (4/13). NGC ID# 23G9, PCGS# 4880
- 3267 1896 PR66 NGC.** Although several shades of color are present on both sides of this Premium Gem, the predominant color is sea-green and it primarily appears near the outer edges. Areas of champagne, orange, russet, and teal are also present. Census: 46 in 66, 16 finer (4/13). NGC ID# 23G9, PCGS# 4880
- 3268 1896 PR66 PCGS. CAC.** Toning in a variety of deep shades covers both sides of this Premium Gem proof. The colors include golden-orange, teal, electric-blue, and plum. The fields retain a high degree of reflectivity. Population: 37 in 66, 6 finer (4/13). NGC ID# 23G9, PCGS# 4880
- 3269 1897 PR65 Cameo PCGS.** Reflective and pleasing with generous frost on Liberty's portrait. Peripheral green and blue obverse toning has greater coverage on this Gem's attractive reverse. Population: 10 in 65 Cameo, 36 finer (4/13). PCGS# 84881
- 3270 1897 PR66 Cameo PCGS.** Toning that includes hues of champagne, golden-orange, cherry-red, and green further accentuates the attractive cameo contrast of this Premium Gem. The designs display bold definition. Population: 23 in 66 (4 in 66+) Cameo, 13 finer (4/13). PCGS# 84881
- 3271 1900 PR66 PCGS. CAC.** Pink-red and aquamarine shades swirl about this fully struck, pristine, prominently mirrored Premium Gem. Housed in a green label holder. A mere 912 proofs were issued. NGC ID# 23GD, PCGS# 4884

- 3272 1901 PR66 PCGS.** Deeply toned in a range from plum through blue and all the way to sea-green. Watery fields are pleasingly reflective, and the few imperfections visible to the unaided eye are of Mint origin and scarcely distracting in any case. A great turn-of-the-century coin. Population: 29 in 66, 4 finer (4/13). NGC ID# 23GE, PCGS# 4885

1901 Barber Dime, PR67 Intense Multicolor Toning

- 3273 1901 PR67 NGC.** Lushly patinated in ocean-blue, orange-gold, and rose-red. A razor-sharp Superb Gem with undisturbed fields and devices. A marvelous representative that will surely soon grace the cabinet of the toned silver connoisseur. Only 813 proofs were struck. Census: 13 in 67, 2 finer (4/13). NGC ID# 23GE, PCGS# 4885
- 3274 1901 PR65 Cameo PCGS. CAC.** Both sides of this Gem cameo proof display a high degree of visual appeal. The cameo contrast is readily apparent, the designs are sharply defined, and pleasing champagne and golden-brown toning is present. Population: 12 in 65 (1 in 65+) Cameo, 15 finer (4/13). PCGS# 84885
- 3275 1902 PR65 PCGS. CAC.** The design elements of this impressive Gem are sharply detailed throughout and the reflective fields show a few hints of champagne-gold toning. Eye appeal is quite strong. Population: 24 in 65, 22 finer (4/13). NGC ID# 23GF, PCGS# 4886
- 3276 1904 PR65 PCGS.** The surfaces reveal sea-green and gold colors when rotated under a light. The surfaces are pleasing, with a lengthy curved lintmark (as struck) through ED in UNITED. Just 670 proofs were struck. Population: 37 in 65, 34 finer (4/13). NGC ID# 23GH, PCGS# 4888
- 3277 1904 PR65 PCGS.** Darkly patinated in shades of gray and amber, this impressive Gem Barber dime displays sharply detailed design elements and deeply reflective surfaces. Population: 37 in 65, 34 finer (4/13). NGC ID# 23GH, PCGS# 4888
- 3278 1905 PR66 PCGS. CAC.** The reverse is particularly attractive on this example and includes shades of fiery-orange, lemon-yellow, emerald-green, jade, teal, plum, and canary-yellow. The obverse is golden-yellow overall with scattered small splashes of color, primarily at the outer edges. An as-made planchet streak appears on the obverse. Population: 39 in 66, 13 finer (4/13). NGC ID# 23GJ, PCGS# 4889

1905 Barber Dime, PR66 Cameo
Only 727 Examples Struck

3279 1905 PR66 Cameo PCGS. CAC. Mint records indicate only 727 proof Barber dimes were struck in 1905. The design elements of this delightful Premium Gem display an unusually frosty texture which contrasts boldly with the deeply mirrored fields to create a startling cameo effect. A few hints of champagne-gold toning visit the pristine surfaces. Population: 15 in 66 (2 in 66+) Cameo, 3 finer (4/13). PCGS# 84889

3280 1906 PR64 Cameo PCGS. CAC. An impressive Choice Cameo proof, the 1906 and issues of nearby years are rarely seen with any degree of contrast. This specimen has full contrast with satin luster and surrounding mirrored fields. Population: 10 in 64 (1 in 64+) Cameo, 20 finer (4/13). PCGS# 84890

3281 1907 PR66 NGC. Only 575 proof Barber dimes were struck in 1907 and few survivors have attained this grade level or higher. This Premium Gem proof is brilliant overall, with a few small spots of color appearing on the obverse. Census: 26 in 66, 18 finer (4/13). NGC ID# 23GM, PCGS# 4891

3282 1909 PR65 PCGS. Sharply detailed with noticeable cameo contrast visible beneath deep blue-green and iridescent toning. Population: 31 in 65, 47 finer (4/13). NGC ID# 23GP, PCGS# 4893

3283 1910 PR65 Cameo PCGS. Appreciable contrast is present between the fields and devices on this Gem proof representative that has an overall brilliant appearance. Small splashes of gray and tan toning appear on both sides. Population: 12 in 65 (1 in 65+) Cameo, 11 finer (4/13). PCGS# 84894

3284 1911 PR66 Cameo PCGS. CAC. Although toning covers the majority of the surfaces on both sides of this example, the portrait remains brilliant, providing pleasing contrast and wonderful eye appeal. The patina on the reverse is particularly appealing. Population: 12 in 66 (1 in 66+) Cameo, 5 finer (4/13). PCGS# 84895

3285 1912 PR65 NGC. CAC. The reflective surfaces of this delightful proof Barber dime show a few hints of champagne-gold and light blue toning. The design elements are sharply detailed and eye appeal is outstanding. Census: 36 in 65, 30 finer (4/13). NGC ID# 23GT, PCGS# 4896

3286 1914 PR65 PCGS. Traces of gray, champagne-gold, and blue toning visit the reflective surfaces of both sides of this attractive Gem. The design elements are sharply detailed and no mentionable distractions are evident. Population: 26 in 65, 27 finer (4/13). NGC ID# 23GV, PCGS# 4898

3287 1914 PR65 PCGS. CAC. A needle-sharp Gem with noticeable cameo contrast, especially on the obverse, despite moderate golden-brown toning at the borders. Undesignated as cameo, likely due to the age of the green label holder. The lowest mintage proof date of the type. NGC ID# 23GV, PCGS# 4898

3288 1914 PR64 Cameo PCGS. CAC. The frosty design elements of this spectacular Choice specimen contrast boldly with the reflective fields, under shades of greenish-gold and cerulean-blue patina. Population: 8 in 64 Cameo, 12 finer (4/13). PCGS# 84898

TWENTY CENT PIECES

3289 1875-CC XF45 PCGS. A lovely Choice XF representative of the only collectible Carson City twenty cent piece, this example displays dark lilac-gray toning on both sides. The typical strike is present, with weakness at the shield on the obverse and the top of the left facing wing on the reverse. *From The MKJ Collection, Part II.* NGC ID# 23R6, PCGS# 5297

3290 1875-S/S MS62 PCGS. FS-302. The "dollar sign" variety, named for the extra pair of serifs on the repunched mintmark. The top of a 5 is embedded in the dentils beneath the 7 in the date. The dusky golden-brown toning is deepest at the borders. Satiny and nicely struck with some unobtrusive fields marks. NGC ID# 23R7, PCGS# 5298

3291 1875-S MS64 PCGS. Light golden-gray toning enriches the obverse and visits the reverse margin. Lustrous and well preserved. A misplaced digit is visible in the dentils beneath the 7 in the date, but the variety is neither FS-301 or FS-302. NGC ID# 23R7, PCGS# 5298

3292 1875-S MS64+ NGC. FS-301. Undesignated as such by NGC but the top of a misplaced date is obvious beneath the 8 in the date. Rich orange-gold and powder-blue toning graces the margins though the remainder of this lustrous and smooth near-Gem is brilliant. NGC ID# 23R7, PCGS# 5298

3293 1875-S MS64 PCGS. CAC. Powder-blue and golden-brown shades encompass this lustrous, lightly abraded, and nicely struck silver type coin. A rim die break at 2 o'clock on the obverse increases specialist interest. NGC ID# 23R7, PCGS# 5298

1875-S Twenty Cent, MS65
Pleasing Luster

3294 1875-S MS65 NGC. Vibrant satin luster emanates from both sides of this Gem exhibiting light areas of toning that leave this coin with a bright appearance overall. The strike was well-executed at the centers, resulting in sharply detailed design elements; however the legends display areas of incompleteness on the reverse. As-made vertical roller marks cross Liberty. NGC ID# 23R7, PCGS# 5298

**1875-S Twenty Cent Piece, MS65
'Dollar Sign' Variety**

- 3295 1875-S MS65 PCGS. CAC. FS-302.** A lovely Gem example of the "dollar sign" variety, named for the extra pair of serifs on the repunched mintmark. In addition, the top of a 5 is embedded in the dentils beneath the 7 in the date. The piece remains brilliant overall, with small splashes of light toning present on both sides. NGC ID# 23R7, PCGS# 5298

1876 Twenty Cent Piece, Colorful MS64

- 3296 1876 MS64 PCGS.** Golden-brown fields are framed by ruby-red and cobalt-blue borders. Lustrous and precisely struck with only minute contact and minor hairlines. The second and final Philadelphia business issue, limited to 14,600 pieces. Expected Western demand for the denomination never emerged, and complaints were made about confusion with the similar diameter quarter. NGC ID# 23R8, PCGS# 5299

**1876 Twenty Cent Piece, MS64+
Low-Mintage Issue**

- 3297 1876 MS64+ PCGS. CAC.** Areas of light gray, tan-green, and gold toning are present on this high-end near-Gem example displaying nice luster and a well-executed strike. Both sides of this centennial-year piece exhibit areas of as-made strike-throughs. A few small marks appear in the right obverse field. Population: 1 in 64+, 46 finer (4/13). NGC ID# 23R8, PCGS# 5299

EARLY QUARTERS

- 3298 1805 Fine 12 PCGS. CAC. B-1, R.4.** Tompkins Die State 2/1. B-2 and B-3 are the "common" 1805 varieties. B-1 is very scarce overall and nearly uncollectible any better than the present lot. Richly toned cream-gray. The portrait has a few delicate slide marks and a thin mark traverses the eagle's banner. NGC ID# 23RC, PCGS# 5313

1805 Quarter, B-3, Choice VF

- 3299 1805 VF35 PCGS. CAC. B-3, R.1.** Tompkins Die State 5/3. Honey-gold toning overlies steel-gray surfaces. A nicely defined Choice VF type representative. Only the uppermost reverse stars are lightly brought up. Although a few thin field marks emerge beneath a lens, neither side has any obtrusive abrasions. NGC ID# 23RC, PCGS# 5313

- 3300 1806/5 Fine 15 PCGS. CAC. B-1, R.2.** Tompkins Die State 2/3. An obvious overdate with the curve and ball of the 5 evident near the loop of the 6. Rich forest-green and lilac-red toning blankets both sides. Marks are inconsequential aside from a tick on the eagle's head and a couple of wispy marks near the profile. NGC ID# 23RD, PCGS# 5315

- 3301 1806 Fine 12 NGC. B-5, High R.4.** This better variety Bust quarter is deeply patinated lavender-gray and forest-green. A few hair-thin marks on the central reverse and the obverse field require a lens to locate. Certified in a former generation holder. NGC ID# 23RD, PCGS# 5314

- 3302 1806 VF20 NGC. CAC. B-2, R.2.** Tompkins Die State 3/4. Dove-gray, slate, and charcoal toning adorn this VF early quarter. Neither side has any relevant marks, and all of PLURIBUS is clear. NGC ID# 23RD, PCGS# 5314

- 3303 1806 VF25 PCGS. CAC. B-9, R.1.** Tompkins Die State 6/5. A late die state of this interesting Browning variety, noteworthy for a heavy vertical crack through the 1 in the date. Olive-green margins frame lightly abraded stone-gray fields and devices. *Ex: Orlando Signature (Heritage, 1/2008), lot 1088, which realized \$1,610.* NGC ID# 23RD, PCGS# 5314

- 3304 1807 Fine 12 PCGS. B-2, R.3.** A later die state with cracks through the date and the T in UNITED. The medium chestnut-gold and stone-gray surfaces are well defined and free any from distracting marks. NGC ID# 23RF, PCGS# 5316

- 3305 1807 Fine 15 PCGS. B-2, R.3.** Dusky lavender, green, and gold shades embrace this evenly worn and problem-free example. The "collar" clash on Liberty and the radial crack near the T in UNITED are usual for the Browning variety. NGC ID# 23RF, PCGS# 5316

- 3306 1807 XF40 PCGS. B-1, R.3.** Natural medium gray surfaces host traces of mint luster that remain in the protected areas on each side of this pleasing Draped Bust quarter. A few random handling marks on each side limit the grade of this piece. NGC ID# 23RF, PCGS# 5316

BUST QUARTERS

- 3307 1818 VG8 PCGS. CAC. B-9, High R.5.** The spur from the inner point of star 2, and the heavy radial die crack at the N in UNITED, combine to attribute Browning-9, the rarest variety of the date. LIBERTY and all peripheral legends are bold except for URIBUS UNUM. No consequential marks are present. NGC ID# 23RH, PCGS# 5322

- 3308 1818/5 VF35 PCGS. CAC. B-1, R.2.** The fields and devices are stone-gray. All legends are bold and the plumage is nicely detailed. Unabraded aside from faint marks on the right-side stars. *Ex: Los Angeles Signature (Heritage, 8/2009), lot 566, which realized \$1,035.* NGC ID# 23RH, PCGS# 5323

- 3309 1819 Large 9 — Cleaned — ANACS. XF40 Details. B-1, Low R.5.** The E in UNITED is high, one method of identifying the rare Browning-1 variety. This electric-blue and caramel-gold quarter is mildly luminous from cleaning but nonetheless has an attractive appearance. PCGS# 5326
- 3310 1824/2 — Scratch — PCGS Genuine. XF Details. B-1, R.3.** The sole 1824-dated dies. The present cream-gray piece displays a number of faint to moderate obverse pinscratches and is mildly bright from cleaning. The reverse rim has a minor ding at 7 o'clock. NGC ID# 23RR, PCGS# 5335
- 3311 1825/4 VF35 PCGS. CAC. B-2, R.2.** Specialists disagree on the underdigits for the 1825-dated quarters, but B-1 is the very scarce 1825/2 *Guide Book* listing while B-2 and B-3 share the more available 1825/4 entry. Golden-brown borders frame cream-gray centers. Nicely defined and moderately abraded. NGC ID# 23RU, PCGS# 5336
- 3312 1825/4 AU55 NGC. B-2, R.2.** This mildly prooflike and richly detailed Capped Bust quarter displays dusky golden-brown and olive-gray toning. Examination beneath a lens reveals scattered small abrasions. NGC ID# 23RU, PCGS# 5336
- 3313 1825/4 AU55 PCGS. B-2, R.2.** Traces of prior digits are evident within the 5 in the date. A well struck example with golden-brown, aqua, and pearl-gray patina. Light hairlines are present from its brief stint in commerce, but there are no obtrusive abrasions. Ex: *Long Beach Signature (Heritage, 6/2004)*, lot 8190, which realized \$1,265. NGC ID# 23RU, PCGS# 5336
- 3314 1831 Small Letters AU50 PCGS. B-3, R.5.** Splashes of orange-gold and pearl-gray dominate but the margins occasionally offer cobalt-blue toning. A lightly circulated example of this nondescript but rare Browning marriage. Marks are inconsequential though we note a slender strike-through near star 13. NGC ID# 23RW, PCGS# 5348
- 3315 1834 O Over F in OF AU58 PCGS. CAC. B-1, FS-901, R.1.** Designated as RPL (indicating a repunched letter) on the PCGS insert. B-1 also lacks a period after 25 C. Sea-green, dove-gray, and rose-red toning blankets this minimally marked and sharply defined Capped Bust type coin. NGC ID# 23RZ, PCGS# 5353
- 3316 1835 AU58 NGC. B-1, R.1.** Concentric bands of orange-red, lavender, and cobalt-blue endow this lightly circulated, boldly struck, and moderately abraded Capped Bust type coin. Browning-1 is often attributed by the descending die crack on the upper reverse field. NGC ID# 23S2, PCGS# 5354
- 3317 1836 Genuine PCGS. B-5, High R.6.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Fine specimen that has been harshly cleaned. A very rare die variety attributed by an arc-shaped die crack on the upper left reverse border. The present stone-white example is glossy from a thorough cleaning, likely to remove minor surface granularity, though traces remain in protected areas.

SEATED QUARTERS

- 3318 1843-O Large O VG10 PCGS. CAC. FS-501.** Much rarer than its Small O counterpart, the Large O variety is currently unlisted in the *Guide Book* though its eventual inclusion is likely. This example has darkly toned borders and lighter stone-gray centers. Five letters in LIBERTY are present. PCGS# 395927

1845 Repunched Date Quarter, MS64 Large over Small 5, FS-301

- 3319 1845/845 MS64 NGC. FS-301.** The date is repunched, most clearly above the flag of the 5. *Cherrypickers'* opines that the initial logotype punch was undersized for the quarter denomination, and instead "intended for a half dime or dime." This sharply struck dove-gray and tan-gold near-Gem is satiny and minimally abraded with a precise strike. Census: 13 in 64, 7 finer (4/13). NGC ID# 23SV, PCGS# 5408
- 3320 1846 MS63 NGC.** The overall pearl-gray appearance includes several shades of green, yellow, and teal when examined under magnification. Minor clash marks appear on the obverse. The design elements display a strong degree of detail. Census: 7 in 63, 9 finer (4/13). NGC ID# 23SW, PCGS# 5409
- 3321 1847-O VF35 PCGS.** Dusky rose and blue hues swirl across this attractive midrange O-mint Seated quarter. The word LIBERTY is sharp across the shield and the overall detail is close to XF quality, though small digs in the right obverse field and rim bumps at 4 o'clock on the reverse contribute to the grade. Population: 7 in 35, 27 finer (4/13). NGC ID# 23SY, PCGS# 5411

1855 Seated Liberty Quarter, MS64 Short-Lived Arrows Type

- 3322 1855 Arrows MS64 PCGS.** The Arrows motif was a three-year design type, introduced in 1853 to indicate a weight change in most silver denominations. This attractive Choice specimen is well-detailed in most areas, but the date and arrows are lightly impressed. Satiny mint luster shines through shades of golden-tan and lavender toning. Population: 16 in 64 (1 in 64+), 10 finer (4/13). NGC ID# 23U8, PCGS# 5435
- 3323 1855-S Arrows — Stained — NGC Details. Unc.** A fully struck and unmarked example of this conditionally rare Arrows issue, the first half dollar variety struck by the San Francisco Mint. The luster is subdued by dark, blended walnut-brown and forest-green toning. A brief wire-like strike-through (as made) is located near star 7. NGC ID# 23UA, PCGS# 5437

**1856-S Seated Quarter, XF40
Elusive Early S-Mint Issue**

- 3324 1856-S XF40 PCGS. CAC.** The San Francisco Mint struck quarters for just the second time in 1856, with a respectable production of 286,000 pieces. The coins circulated heavily in the regional economy and high-grade examples are seldom encountered today. This lightly worn XF specimen shows only minor abrasions and pleasing dove-gray patina. Population: 3 in 40, 34 finer (4/13). NGC ID# 23TD, PCGS# 5440
- 3325 1857 MS64 PCGS.** A fully struck example of this popular No Motto type issue. Orange-gold toning fills the borders while the centers are pearl-gray. No marks are consequential. Encased in an old green label holder. NGC ID# 23TE, PCGS# 5442
- 3326 1857-O MS61 NGC.** Rich peach-to-pink overtones appear everywhere but the upper left and bottom right reverse, where the color is silver with a hint of blue. Softly swirling luster with few abrasions for the grade assigned. NGC ID# 23TF, PCGS# 5443
- 3327 1858 MS65 NGC.** The 1858 is one of the few No Motto quarters that can be found in a wide variety of Uncirculated grades, even MS65. This is a brightly frosted example whose luster is evident even through the pinkish-rose and gray patina seen on each side. Just a touch of striking softness is noted in the centers. In a former generation holder. NGC ID# 23TH, PCGS# 5445
- 3328 1859-S Fine 12 PCGS. CAC.** From a mintage of 80,000 pieces, the 1859-S Seated Liberty quarter is a scarce issue in all grades. This pleasing gray example retains all letters in LIBERTY, although the L and Y are a little weak. Population: 4 in 12, 45 finer (4/13). NGC ID# 23TN, PCGS# 5450

**1861-S Seated Quarter, XF40
Elusive Civil War Date**

- 3329 1861-S XF40 NGC.** Mint records show only 96,000 Seated Liberty quarters were struck at the San Francisco Mint in 1861, the first year of the Civil War. Most of the mintage circulated heavily in the 19th century and this issue is quite rare today. The present XF specimen is lightly abraded for the grade and shows pleasing lavender-gray and golden-tan toning. Census: 2 in 40, 7 finer (4/13). NGC ID# 23TU, PCGS# 5455

**1862-S Seated Liberty Quarter, MS62
Scarce in Uncirculated**

- 3330 1862-S MS62 NGC.** Unlike the Philadelphia Mint coinage produced during the Civil War, the S-Mint coins were produced in larger quantities. However, nearly all of those coins entered circulation in a commerce starving for small change. The result was an extremely limited survival of high grade pieces. For example, the average grade of the 1862-S barely reaches XF40. This pleasing Mint State piece is an important condition rarity with full satin luster under wispy champagne toning with only a few marks on each side. Census: 6 in 62, 7 finer (4/13). NGC ID# 23TW, PCGS# 5457

**1864 Seated Liberty Quarter, MS64
Low-Mintage Civil War Issue**

- 3331 1864 MS64 PCGS. CAC.** A modest mintage of 93,600 Seated Liberty quarters was accomplished in 1864, at the height of the Civil War. This attractive Choice specimen exhibits sharply detailed design elements with vibrant mint luster and traces of champagne-gold toning. Eye appeal is outstanding. Population: 14 in 64, 20 finer (4/13). NGC ID# 23TY, PCGS# 5459
- 3332 1866 Motto XF40 PCGS.** The 1866 Motto quarter is a low-mintage rarity with only 16,800 pieces produced. Subtle hints of gold and ice-blue are present on this circulated example. This piece is typically abraded for the grade. Population: 2 in 40, 32 finer (4/13). NGC ID# 23UB, PCGS# 5468

**1866 Seated Quarter, XF45
Low-Mintage, First Motto Issue**

- 3333 1866 Motto XF45 PCGS. CAC.** Only 16,800 business-strike Seated Liberty quarters were struck in 1866, the first year with the motto IN GOD WE TRUST. This Choice XF specimen is lightly worn but the centers were softly struck, accounting for some lack of detail. The surfaces are lightly abraded and display attractive gold and bluish-gray toning. Population: 5 in 45, 27 finer (4/13). NGC ID# 23UB, PCGS# 5468

3334 1867 AU55 NGC. Even though the Civil War was over by 1867, silver coins continued to be hoarded due to Federal debt, Gresham's Law, and fractional currency. The 1867 has a mintage of just 20,000 pieces. This is a sharp, mildly bright example that has substantial luster and peripheral rose-red toning but also a number of scattered abrasions. NGC ID# 23UD, PCGS# 5470

3335 1867-S Fine 12 PCGS. The 1867-S Seated Liberty quarter claims a meager mintage of just 48,000 pieces, making the issue scarce-to-rare in all grades. This evenly worn example retains much original design detail and is lightly abraded for the grade. Population: 7 in 12, 36 finer (4/13). NGC ID# 23UE, PCGS# 5471

3336 1876 MS66 PCGS. CAC. Type Two Reverse. A dusting of deep gold and iridescent toning appears on the frosty and fully lustrous silver surfaces of this Premium Gem centennial-year quarter dollar. Population: 24 in 66 (2 in 66+), 7 finer (4/13). NGC ID# 23V2, PCGS# 5501

1877 Seated Quarter, MS66 Partially Prooflike Surfaces

3337 1877 MS66 PCGS. CAC. The 1877 Seated Liberty quarter claims a huge mintage of more than 10.9 million pieces, but examples in MS66 condition are very scarce. This delightful Premium Gem features sharply detailed design elements and partially prooflike fields that show a few hints of pale gold toning. The well-preserved surfaces show no mentionable flaws. Population: 53 in 66 (1 in 66+), 42 finer (4/13). NGC ID# 23V5, PCGS# 5504

1877-CC Quarter, Toned MS65

3338 1877-CC MS65 PCGS. CAC. Small CC. Blended orange-gold and stone-gray toning encompasses this satiny and well preserved silver type coin. Mintages of the denomination at Carson City would end in favor of the Morgan dollar during 1878. Struck from multiply clashed dies. Population: 36 in 65, 21 finer (4/13). NGC ID# 23V6, PCGS# 5505

3339 1877-S MS65 PCGS. CAC. This delightful Gem displays vibrant mint luster and well-detailed design elements under shades of lavender-gray and pale gold patina. Population: 30 in 65, 19 finer (4/13). NGC ID# 23V7, PCGS# 5506

3340 1878-CC MS64 NGC. CAC. Glimmering cartwheel luster rolls around this pale silver near-Gem with just a hint of peach patina. Great eye appeal for the Carson City coinage enthusiast. NGC ID# 23V9, PCGS# 5509

3341 1879 MS64 NGC. Peach and blue overtones enrich slightly satiny surfaces. A warmly lustrous near-Gem with few significant marks and solid eye appeal, from an issue of only 13,600 pieces. NGC ID# 23VB, PCGS# 5511

3342 1881 MS64 PCGS. CAC. Faintly gold-toned overall with greater intensity toward orange at the margins with a touch of brown at the top of the reverse. Satiny with a degree of bluntness on the obverse's outer stars but quality inner detail on the eagle. Population: 35 in 64, 36 finer (4/13). NGC ID# 23VD, PCGS# 5513

3343 1891 MS65 PCGS. An impressive example of the final Seated quarter dollar, this Gem exhibits fully brilliant silver surfaces with frosty mint luster and faint traces of peripheral gold toning. Population: 62 in 65, 28 finer (4/13). NGC ID# 23VR, PCGS# 5524

3344 1891-O XF45 PCGS. CAC. After a gap of 31 years, the New Orleans Mint resumed coinage of Seated dimes and quarters in 1891. The dimes are plentiful due to a mintage of more than 4.5 million pieces, but the quarters are rare, as only 68,000 pieces were struck. Few were set aside since collectors of the day generally ignored mintmarks. This Choice XF piece displays areas of gold, silver, and ice-blue color. Light scratches appear on both sides, but are partially concealed by the toning. Population: 8 in 45, 11 finer (4/13). NGC ID# 23VS, PCGS# 5525

PROOF SEATED QUARTERS

1856 Quarter, PR64 Rare Early Proof Issue, Low Unrecorded Mintage

3345 1856 PR64 PCGS. Moderate cameo contrast is present on this lovely Choice example displaying light gold toning overall with a few splashes of gray present on the reverse. This offering presents a seldom encountered opportunity for the connoisseur of early proof coinage as this is a rare proof striking, made two years before the U.S. Mint broke decades-old traditions and began selling proof coins to the collecting public at large. Housed in a green label PCGS holder. Population: 8 in 64, 2 finer (4/13). Ex: FUN Signature (Heritage, 1/2007), lot 915, which realized \$12,650. NGC ID# 23WH, PCGS# 5552

3346 1864 PR64+ PCGS. This high-end near-Gem representative retains flashy mirrored fields and displays attractive color. The toning includes turquoise, copper, and pale yellow shades. The designs exhibit a bold level of definition. Population: 1 in 64+, 16 finer (4/13). NGC ID# 23WS, PCGS# 5560

**1866 Seated Quarter, PR65 Cameo
First Year With Motto**

3347 1866 Motto PR65 Cameo NGC. The motto IN GOD WE TRUST was introduced on the quarter denomination in 1866 and a modest mintage of 725 proofs was achieved. This sharply detailed Gem displays richly frosted devices that contrast dramatically with the deeply mirrored fields. The brilliant surfaces show just the slightest hint of pale gold toning. Census: 7 in 65 Cameo, 5 finer (4/13). PCGS# 85565

3348 1867 PR64 NGC. The surfaces on both sides of this Choice proof are flashy. Although the peripheries display hues of champagne and rose-gold, the centers exhibit teal, violet, and copper colors. Bold definition of the designs adds to the eye appeal. Census: 34 in 64, 37 finer (4/13). NGC ID# 23WY, PCGS# 5566

3349 1868 PR64 PCGS. Deep forest-green, lavender-gray, and navy-blue patina embraces this needle-sharp and undisturbed near-Gem. A mere 600 proofs were coined. Certified in a green label holder. NGC ID# 23WZ, PCGS# 5567

**1868 Quarter, PR65
Only 600 Pieces Struck**

3350 1868 PR65 PCGS. CAC. Spectacularly toned in shades of cobalt-blue and greenish-gold, this impressive Gem possesses terrific eye appeal. The design elements are sharply detailed and the deeply reflective fields shine through the toning. No mentionable distractions are evident. From a modest proof mintage of 600 pieces. Population: 11 in 65 (1 in 65+), 3 finer (4/13). NGC ID# 23WZ, PCGS# 5567

3351 1868 PR64 Cameo NGC. A well-contrasted postwar proof with just a hint of golden color visiting the fields. A shallow, rounded planchet flaw is visible in the left obverse field but does not affect the technical grade. PCGS# 85567

3352 1872 PR63 NGC. CAC. Boldly defined designs, strongly reflective surfaces, and toning in a variety of attractive tones provide this Select proof with nice eye appeal. The colors include orange, teal, cobalt-blue, fuchsia, cherry-red, and plum. Census: 26 in 63, 91 finer (4/13). NGC ID# 23X5, PCGS# 5571

**1873 Seated Liberty Quarter, PR64 Cameo
Only 540 Examples Struck With Arrows**

3353 1873 Arrows PR64 Cameo PCGS. Only 540 proof Seated Liberty quarters were struck in 1873 with the distinctive Arrows at the date to signify a weight change that was initiated that year. This delightful Choice specimen displays sharply detailed frosty design elements that contrast boldly with the reflective fields. Shades of champagne-gold and lavender toning visit the pleasing surfaces. Population: 14 in 64 Cameo, 5 finer (4/13). PCGS# 85574

3354 1874 Arrows PR63 PCGS. Several shades of color appear on this Select proof example, including rose-peach, gold, cobalt-blue, and sea-green. A translucent spot is present near Liberty's left elbow. NGC ID# 23XS, PCGS# 5575

**1874 Seated Quarter, PR64
Two-Year Arrows Design**

3355 1874 Arrows PR64 NGC. The short-lived Arrows design was introduced in 1873 to signify a weight change in most denominations of U.S. silver coinage. This attractive proof displays reflective fields and sharply detailed design elements under pale gold and gray toning. Only 700 proof Seated Liberty quarters were struck in 1874. Census: 88 in 64, 73 finer (4/13). NGC ID# 23XS, PCGS# 5575

**1874 Seated Quarter, PR64 Cameo
Scarce Arrows Proof Subtype**

3356 1874 Arrows PR64 Cameo PCGS. Even a quick glance at this Choice example easily confirms the cameo designation. The fields remain highly reflective and the coin displays a strong degree of design definition. The piece is brilliant, with only subtle hints of champagne toning present at portions of the dentils. A few small marks appear below Liberty's neck. Population: 11 in 64 (1 in 64+) Cameo, 18 finer (4/13). PCGS# 85575

- 3357 1875 PR62+ Deep Cameo PCGS.** Type One Reverse. The 5 in the date is repunched. Dramatic white-on-black contrast proclaims the eye appeal of this intricately struck proof type coin. Both fields display parallel hairlines. Population: 2 in 62 (1 in 62+) Deep Cameo, 7 finer (4/13). PCGS# 95576

**1880 Quarter, PR67
Delicate Multicolor Patina**

- 3358 1880 PR67 NGC.** Delicate shades of champagne-gold and cerulean-blue toning enhance the pristine surfaces of this delightful Superb Gem. The design elements are well-detailed and the fields are deeply mirrored, with outstanding visual appeal. From a generous proof mintage of 1,355 pieces. Census: 11 in 67, 4 finer (4/13). NGC ID# 23XC, PCGS# 5581

**1881 Seated Liberty Quarter, PR66
Elusive Cameo Example**

- 3359 1881 PR66 Cameo PCGS.** Only a small percentage of 1881 proofs carry the Cameo designation. Stunning contrast arises between crisply impressed, well frosted design elements and the deeply mirrored fields of this impressive Premium Gem. A thin veneer of reddish-tan patina is slightly deeper on the obverse. What appears to be a nearly invisible vertical planchet striation was struck into the right obverse field, and a lint mark appears on Liberty's left (right facing) knee, and a couple of others are noted near the arm and knee. Population: 22 in 66 (3 in 66+) Cameo, 7 finer (4/13). Ex: Dallas Signature (Heritage, 7/2006), lot 2244. PCGS# 85582

1882 Seated Quarter, Partially Toned PR66

- 3360 1882 PR66 PCGS.** The reported mintage of proof Seated Liberty quarters was a generous 1,100 pieces in 1882, but the small business-strike production of 15,200 coins puts strong date collector pressure on the nominal supply of proofs. This well-detailed Premium Gem displays deeply mirrored surfaces under shades of cobalt-blue and golden-brown toning, with more color on the reverse. Population: 19 in 66 (1 in 66+), 9 finer (4/13). NGC ID# 23XE, PCGS# 5583

**1882 Seated Liberty Quarter, PR66
Attractive Multicolor Toning**

- 3361 1882 PR66 PCGS. CAC.** The proof mintage for 1882 proof Seated Liberty quarters was a fairly generous 1,100 pieces, but few examples have survived in Premium Gem condition. This impressive piece exhibits sharply detailed design elements and deeply mirrored fields under attractive shades of cerulean-blue and champagne-gold patina. Population: 19 in 66 (1 in 66+), 9 finer (4/13). NGC ID# 23XE, PCGS# 5583

**1884 Seated Quarter, PR66 Cameo
Vivid Multicolor Toning**

- 3362 1884 PR66 Cameo PCGS. CAC.** A nominal mintage of 875 proof Seated Liberty quarters was produced in 1884 but only a handful have survived with the quality and eye appeal of the present coin. This spectacular Premium Gem displays mottled shades of dark green, gray, and cobalt-blue toning on well-preserved deeply mirrored fields. The sharply detailed frosty devices achieve a bold cameo effect not usually seen on toned specimens. Population: 10 in 66 (1 in 66+) Cameo, 7 finer (4/13). PCGS# 85585

**1885 Seated Quarter, PR66
Vivid Toning on Reverse**

- 3363 1885 PR66 PCGS. CAC.** Mint records indicate 930 proof Seated Liberty quarters were struck in 1885, in an era when business-strike production was uniformly low. This impressive Premium Gem exhibits well-detailed design elements and deeply mirrored fields with mottled shades of gray, blue, and golden-tan toning. More color is evident on the reverse. Population: 19 in 66, 2 finer (4/13). NGC ID# 23XH, PCGS# 5586

- 3364 1887 PR64 PCGS.** Reflective fields and a variety of rich colors are clearly visible without magnification when this near-Gem proof is rotated under a light source. The hues include orange, russet, fuchsia, teal, electric-blue, and plum. Population: 68 in 64, 61 finer (4/13). NGC ID# 23XK, PCGS# 5588

- 3365 1889 PR65 PCGS.** The reflective surfaces of this attractive Gem are blanketed in shades of lime-green and cerulean-blue patina. The design elements are well-detailed and the fields show few signs of contact. Population: 20 in 65, 15 finer (4/13). NGC ID# 23XM, PCGS# 5590

**1889 Seated Liberty Quarter, PR66
Only 711 Pieces Struck**

- 3366 1889 PR66 PCGS.** Gorgeous intermingled shades of light and dark-green vie for attention on each side of this sharply struck Premium Gem, along with splashes of salmon color near the centers. The glassy fields are vibrantly reflective, and the delicate proof surfaces are defect-free. With only 12,000 business strikes produced, the proofs from this year (711 pieces struck) were destined to be a collector favorite. Population: 12 in 66, 3 finer (4/13). NGC ID# 23XM, PCGS# 5590

- 3367 1889 PR63 Cameo PCGS.** Gold-orange and blue outer toning gives way to moderately contrasted and minimally toned interiors. Wispy hairlines in the right obverse field contribute to the grade. Population: 10 in 63 Cameo, 36 finer (4/13). PCGS# 85590

**1890 Seated Quarter, PR65 Deep Cameo
Low Mintage of 590 Pieces**

- 3368 1890 PR65 Deep Cameo PCGS.** The sharply detailed design elements of this delightful Gem exhibit an unusual amount of mint frost, creating profound cameo contrast with the deeply mirrored fields. A few hints of champagne-gold toning visit the well-preserved surfaces. Only 590 proof Seated Liberty quarters were struck in 1890. Population: 7 in 65 (1 in 65+) Deep Cameo, 7 finer (4/13). From *The MKJ Collection, Part II*. PCGS# 95591

**1890 Deep Cameo Quarter, PR65+
Brilliant and Strongly Contrasted**

- 3369 1890 PR65+ Deep Cameo PCGS. CAC.** Gorgeous deep cameo contrast provides this high-end Gem quarter with an exceptional appearance. The coin displays brilliant, untuned surfaces. A few delicate hairlines appear in the right obverse field. Several tiny as-made strike-throughs are present on the reverse. Population: 7 in 65 (1 in 65+) Deep Cameo, 7 finer (4/13). PCGS# 95591

BARBER QUARTERS

- 3370 1892 MS65 ★ NGC.** Type Two Reverse. Ocean-blue, caramel-gold, and rose-red toning invigorates this lustrous and needle-sharp first year silver type coin. Impressively devoid of abrasions. Census: 4 in 65 ★, 7 finer with a Star designation (5/13). Ex: *Baltimore Signature (Heritage, 3/2009)*, lot 1109, which realized \$1,265. NGC ID# 23XT, PCGS# 5601
- 3371 1892 MS65 PCGS. CAC.** Type One Reverse. Fully struck and highly lustrous with pleasing golden-brown and blue-green toning near the rims. A graze behind Liberty's eye is all that limits the grade. Ex: *Milwaukee Signature (Heritage, 8/2007)*, lot 7960, which realized \$1,035. NGC ID# 23XT, PCGS# 5601
- 3372 1892 MS66 NGC. CAC.** Type One Reverse. Peripheral autumn-gold shades adorn this well struck and impressively preserved first-year type coin. A slender area of prooflike finish is near the 1 in PLURIBUS. NGC ID# 23XT, PCGS# 5601
- 3373 1892 MS66 PCGS. CAC.** Type One Reverse. Caramel-gold fields accompany slate devices. Lustrous and essentially immaculate with a needle-sharp strike. A magnificent Barber type coin. NGC ID# 23XT, PCGS# 5601
- 3374 1893 MS65 PCGS.** Rich satin luster adds to the eye appeal of this lovely Gem example. Toning is present on both sides, with the colors being darker near the outer edges. The hues are particularly attractive on the reverse of this well-struck representative. Population: 27 in 65 (1 in 65+), 13 finer (4/13). NGC ID# 23XW, PCGS# 5604
- 3375 1895-O MS64 PCGS. CAC.** Toning, in intermingled shades of green, red, brown, and yellow, appears on both sides of this near-Gem representative. Pleasing luster is present. Population: 42 in 64 (2 in 64+), 11 finer (4/13). NGC ID# 23Y5, PCGS# 5611
- 3376 1896-S VG8 PCGS. CAC.** An evenly worn example of this low-mintage key, with full rims and all major design elements remaining complete in outline. The pleasing gray surfaces show only a few mentionable abrasions, the worst being a thin vertical scratch on Liberty's throat. NGC ID# 23Y9, PCGS# 5615
- 3377 1906-O MS65 PCGS.** A delightful Gem, this New Orleans quarter shows frosty silver luster with delicate iridescent splashes over full design definition. Population: 33 in 65, 29 finer (4/13). NGC ID# 23Z7, PCGS# 5644
- 3378 1907 MS65 PCGS. CAC.** Both sides of this lovely Gem exhibit cartwheel luster. Champagne, gold, and teal toning is present. Population: 41 in 65, 17 finer (4/13). NGC ID# 23Z8, PCGS# 5645

3379 1909 MS65 PCGS. CAC. Lightly dappled honey-gold toning graces this lustrous and exceptionally preserved Gem. Though a type issue, the 1909 becomes scarce at the Gem level. Certified in a green label holder. Population: 64 in 65 (2 in 65+), 22 finer (4/13). NGC ID# 23ZG, PCGS# 5653

3380 1911-S MS65 PCGS. CAC. Rich satin luster provides this Gem with a tremendous degree of visual appeal. Tiny splashes of light golden-brown color cover portions of the obverse. Population: 34 in 65, 44 finer (4/13). NGC ID# 23ZR, PCGS# 5661

1913 Barber Quarter, MS65 Low-Mintage Date, Rare in High Grade

3381 1913 MS65 PCGS. The mintage for this issue was only 484,000 and survivors are scarcely encountered above the Gem level. Rich satin luster emanates from both sides of this pleasing Gem. The obverse displays large areas of light caramel color. Scattered tiny gray freckles appear on both sides. Population: 33 in 65 (1 in 65+), 7 finer (4/13). NGC ID# 23ZU, PCGS# 5664

3382 1913-D MS65 PCGS. Champagne toning, with hints of other colors, appears on both sides of this Gem. Areas of darker color appear at the rims and include shades of red, russet, and kelly-green. The luster is pleasing, particularly on the reverse. Population: 28 in 65, 21 finer (4/13). NGC ID# 23ZV, PCGS# 5665

3383 1913-S AG3 PCGS. The 1913-S Barber quarter is the last of the three well-known, low-mintage keys to the set, with only 40,000 pieces struck. Both sides of this well circulated example display a considerable degree of rim merging, but the date and mintmark remain intact. Subtle hints of ice-blue and light gold color appear on the medium-gray surfaces of this piece. NGC ID# 23ZW, PCGS# 5666

3384 1913-S Good 6 NGC. CAC. The letters L and Y remain clear on Liberty's headband for this key-date Barber quarter. Peach and gold overtones visit gray surfaces that range from pale to medium in intensity. Small rim bumps are noted on the reverse. NGC ID# 23ZX, PCGS# 5667

3385 1914 MS66 PCGS. CAC. This lustrous high grade type coin displays only a hint of golden toning. The strike is full except on the base of the fletchings. The reverse is smooth while the obverse exhibits delicate grazes. Certified in a green label holder. Population: 19 in 66, 2 finer (4/13). NGC ID# 23ZY, PCGS# 5668

1914-S Quarter, AU58 Low-Mintage Date

3386 1914-S AU58 PCGS. At 264,000 pieces, the 1914-S quarter dollar has the exact same mintage as the famous 1916-D Mercury dime, though the 1914-S quarter is of course far more affordable. This still-lustrous near-Mint representative remains radiant with just a touch of blue in the otherwise pale silver fields. Population: 8 in 58, 55 finer (4/13). NGC ID# 23ZZ, PCGS# 5669

3387 1916-D MS66 NGC. CAC. A stunning Premium Gem with frosty silver luster, this well-detailed example offers brilliant gold and vivid blue splashes on both sides. Census: 46 in 66, 9 finer (4/13). NGC ID# 2426, PCGS# 5674

PROOF BARBER QUARTERS

1896 Quarter, PR65 ★ Cameo Iridescently Toned

3388 1896 PR65 ★ Cameo NGC. CAC. Iridescent ocean-blue, peach-gold, and plum-red toning explains why NGC bestowed the coveted Star designation on the present Gem. Fully struck and prominently mirrored with a pristine reverse and a few faint hairlines on the right obverse field. Census: 1 in 65 ★ Cameo, 3 finer as Cameo with a Star designation (4/13). PCGS# 85682

3389 1897 PR66 NGC. This Premium Gem proof possesses lovely eye appeal and remains brilliant overall, with a few tiny dark gray freckles appearing on the obverse. The reverse displays a slight counter-clockwise rotation. Census: 34 in 66, 21 finer (4/13). NGC ID# 242C, PCGS# 5683

3390 1897 PR66 Cameo PCGS. An amazing Premium Gem Cameo proof, the reverse showing deep contrast. This example has fully and deeply mirrored fields around frosty and highly lustrous devices, showing faint gold toning on the obverse. Population: 16 in 66 (1 in 66+) Cameo, 9 finer (4/13). PCGS# 85683

**1897 Barber Quarter, PR66 Deep Cameo
Frosty Devices, Vivid Toning**

3391 1897 PR66 Deep Cameo PCGS. The design elements of this spectacular Premium Gem are sharply detailed, with rich mint frost that contrasts profoundly with the deeply reflective fields to produce a stunning cameo effect. Attractive shades of cobalt-blue and champagne-gold toning visit the well-preserved surfaces. Eye appeal is outstanding. Population: 4 in 66 Deep Cameo, 7 finer (4/13). PCGS# 95683

3392 1900 PR64 NGC. CAC. Type One Obverse. Type Two Reverse. Exquisite shades of butter-gold, plum-red, and navy-blue endow the borders, though the remainder of this Choice proof is lightly toned. Fully struck and flashy.
Ex: Dallas Signature (Heritage, 3/2007), lot 7669. NGC ID# 242F, PCGS# 5686

**1900 Barber Quarter, PR66
Intense Multicolor Toning**

3393 1900 PR66 NGC. From a nominal proof mintage of 912 pieces, this delightful Premium Gem exhibits sharply detailed design elements and deeply mirrored fields with no mentionable signs of contact. The well-preserved surfaces are blanketed in shades of burnt-orange, green, and cobalt-blue patina. Census: 39 in 66, 23 finer (4/13). NGC ID# 242F, PCGS# 5686

3394 1901 PR66 NGC. CAC. Rich toning covers both sides of this sharply struck coin. The darker shades appear near the outer edges, providing an appealing contrast to the more lightly toned central devices. The colors include several shades of green, blue, and purple. Census: 29 in 66, 32 finer (4/13). NGC ID# 242G, PCGS# 5687

**1901 Barber Quarter, PR65 Cameo
Last Year With Frosty Finish**

3395 1901 PR65 Cameo PCGS. CAC. The Philadelphia Mint switched to an all-brilliant finish for proof coins in 1902, making 1901 the last year when the desirable cameo effect was regularly seen. This attractive Gem displays classically frosted devices and deeply mirrored fields with bold contrast and terrific eye appeal. Population: 3 in 65 Cameo, 22 finer (4/13). PCGS# 85687

3396 1903 PR65 PCGS. Toning in hues of emerald-green, cobalt-blue, pale-pink, peach, lemon-yellow, and turquoise appears on this Gem proof. The design details display strong definition. Population: 44 in 65 (1 in 65+), 41 finer (4/13). NGC ID# 242J, PCGS# 5689

3397 1903 PR65+ PCGS. The toning on this high-end Gem includes shades of rose-red and lime-green on the obverse. The reverse features ocean-blue and sun-gold. Population: 44 in 65 (1 in 65+), 41 finer (4/13). NGC ID# 242J, PCGS# 5689

3398 1903 PR66 PCGS. The reverse is deep blue-green, as is the obverse periphery, while the portrait and obverse field display shades of orange-gold that deepen toward the border. Two slender horizontal streaks cross the cheek and jaw. Housed in an old green label holder. NGC ID# 242J, PCGS# 5689

**1903 Quarter, PR67
Only One Finer PCGS Example**

3399 1903 PR67 PCGS. Deeply toned, this Superb Gem proof includes a number of colors on the obverse, among them golden-orange, cherry-red, teal, plum, and violet. The reverse displays a medium gray patina that reveals hints of green and tan when examined closely. The designs display a pleasing level of detail. Minor breaks in the toning appear in the right obverse field. Population: 17 in 67, 1 finer (4/13). NGC ID# 242J, PCGS# 5689

**1903 Barber Quarter, PR66
Unusual Cameo Specimen**

3400 1903 PR66 Cameo PCGS. CAC. Proofs of this era were typically struck with an all-brilliant finish, but this impressive Premium Gem displays frosty texture on the sharply detailed design elements, providing bold cameo contrast with the reflective fields. Vivid shades of lime-green and violet toning blanket the unmarked surfaces. Population: 13 in 66 Cameo, 19 finer (4/13). PCGS# 85689

3401 1907 PR64 PCGS. From a tiny mintage of just 575 pieces, this impressive proof Barber quarter displays a mottled pattern of blue, gray, and gold toning over deeply mirrored fields and well-detailed devices. Population: 54 in 64, 43 finer (4/13). NGC ID# 242N, PCGS# 5693

**1908 Barber Quarter, PR67
Only 545 Pieces Struck**

3402 1908 PR67 NGC. Only 545 proof Barber quarters were struck in 1908. This spectacular Superb Gem exhibits sharply detailed design elements and deeply mirrored fields under a blanket of champagne-gold and violet patina. The surfaces are well-preserved and eye appeal is outstanding. Census: 22 in 67, 5 finer (4/13). NGC ID# 242P, PCGS# 5694

**1909 Quarter, Cameo PR65+
Faintly Toned**

3403 1909 PR65+ Cameo PCGS. CAC. Frosty motifs rise in nearly full definition above the glassy fields. This Gem is virtually brilliant but has a few minute flecks of aqua-blue patina on the lower right obverse quadrant. One tiny flan imperfection is beneath OF. Just 650 proofs were coined. Population: 12 in 65 (1 in 65+) Cameo, 17 finer (4/13). PCGS# 85695

3404 1911 PR65 PCGS. Blue-green and violet-rose hues are most prominent in the patina of this later-date Gem proof. Excellent quality for this issue of just 543 specimens. Population: 30 in 65, 47 finer (4/13). NGC ID# 242T, PCGS# 5697

**1911 Barber Quarter, PR66
Spectacular Multicolor Toning**

3405 1911 PR66 NGC. CAC. Intense shades of champagne-gold, cerulean-blue, and lemon-yellow toning blanket the surfaces of this delightful Premium Gem. The design elements are sharply detailed and the fields are brightly reflective underneath the toning. Only 543 proof Barber quarters were struck in 1911. Census: 31 in 66, 27 finer (4/13). NGC ID# 242T, PCGS# 5697

**1914 Barber Quarter, PR67
Lowest-Mintage Proof of the Series**

3406 1914 PR67 PCGS. When viewed with magnification under a light source, the deep patina on this Superb Gem reveals hues of copper, electric-blue, fuchsia, sea-green, and golden-yellow. This was the lowest-mintage issue of the series at 380 pieces. The strike is uniformly sharp. Population: 14 in 67, 4 finer (4/13). NGC ID# 242W, PCGS# 5700

3407 1915 PR65 PCGS. Dramatically toned on the obverse with a streak of silver slanting down left-to-right across otherwise rainbow-hued surfaces. The reverse has a dusky sliver of color at lower right on an otherwise untuned side. Population: 13 in 65, 25 finer (4/13). NGC ID# 242X, PCGS# 5701

EARLY HALF DOLLARS

3408 1795 2 Leaves VG10 PCGS. O-116, R.4. An original and highly attractive example for the grade, with medium gray fields that are darker near the photos, framing the lighter grayish-tan devices on each side. The surfaces are remarkably choice for the grade. NGC ID# 240000000, PCGS# 6052

3409 1795 2 Leaves — Repaired — NGC Details. Fine. O-102, R.5. Deeply patinated with pleasing surfaces showing faint hairlines and minor marks beneath the steel-gray toning. The repair work described by NGC is not readily apparent.

3410 1806 Pointed 6, No Stem VF30 NGC. O-109, R.1. A collectible mint blunder, the No Stem variety was created when the engraver forgot to enter the stem of the olive branch. The present midgrade example blended dove-gray and walnut-brown toning. No abrasions are apparent aside from a reverse rim mark at 6 o'clock. PCGS# 6073

1807 Draped Bust Half Dollar, XF45
O-102, Repunched 8

- 3411** 1807 Draped Bust XF45 PCGS. O-102, R.2. Luster illuminates the borders and motifs of this briefly circulated transitional year half dollar. Generally pearl-gray though the margins are wheat-gold. Marks are absent except for a thin diagonal line on the horizontal shield stripes. The 8 in the date is repunched within the upper loop. NGC ID# 24EM, PCGS# 6079

1807 Draped Bust Half Dollar, AU50, O-105

- 3412** 1807 Draped Bust AU50 ANACS. O-105, R.1. Hints of golden-brown patina adorn portions of the obverse, but this lightly circulated representative is mostly untuned. Plentiful bright luster fills the legends. Marks are absent aside from a hair-thin line on Liberty's neck. A transitional year for the half dollar denomination. NGC ID# 24EM, PCGS# 6079

BUST HALF DOLLARS

- 3413** 1807 Large Stars, 50 Over 20 VF30 PCGS. O-112, R.1. Rich powder-blue and tan-brown toning blankets this lightly abraded half dollar. All legends are bold though the types display wear appropriate for the grade. The 50 Over 20 variety was created when an absent-minded engraver began to enter the denomination as a quarter. NGC ID# 24EN, PCGS# 6086

1807 Capped Bust Half, MS64
O-112, 50 Over 20, Large Stars

- 3414** 1807 Large Stars, 50 Over 20 AU58 PCGS. O-112, R.1. Rich dove-gray toning embraces most of this near-Mint representative, though golden-brown and jade-green enrich the peripheries. The centers show moderate incompleteness of strike. Marks are minor overall though the left obverse field has minor chatter and a few hairlines are near the eagle's head. Population: 27 in 58, 21 finer (4/13). NGC ID# 24EN, PCGS# 6086

1807 Half Dollar, 50 Over 20
'Bearded Goddess,' O-111a

- 3415** 1807 Bearded Goddess, Large Stars, 50/20 PCGS Genuine. O-111a, R.5. The PCGS number ending in .94 suggests Altered Surfaces as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has altered surfaces. The Bearded Liberty is one of the few die crack varieties deemed sufficiently dramatic to merit a listing in the Guide Book, where it commands a large premium over the "common" 50 Over 20 variety, O-112. This nicely defined example is from a middle state of the curved crack between chin and chest, neither the lightest or the heaviest crack seen. The surfaces appear faintly cleaned, perhaps to reduce the extent of the mildly granular charcoal toning still prevalent at the margins. PCGS# 39358

- 3416** 1807 Capped Bust, Large Stars XF40 PCGS. O-114, R.3. Deep cream-gray toning envelops this unmarked introductory year Capped Bust half. Luster brightens protected elements. The borders are sharply struck while the centers show softness. NGC ID# 24EN, PCGS# 6088

- 3417** 1807 Capped Bust, Large Stars XF40 NGC. O-114, R.3. Golden-russet borders frame the cream-gray centers. Well defined and minimally abraded. Overton-114 is the sole Large Stars variety without the 50 over 20 blunder, and thus commands its own *Guide Book* listing. NGC ID# 24EN, PCGS# 6088

1807 Half Dollar, AU50, O-114
Capped Bust, Large Stars

- 3418** 1807 Capped Bust, Large Stars AU50 PCGS. O-114, R.3. The 1807 Capped Bust half dollar, O-114 variety, can be attributed by remembering that it is the only Capped Bust, Large Stars variety that *lacks* the 50/20 on the reverse. There are also die lumps below the 7. Gunmetal-gray overall with tan-gold and olive-green undertones. Smooth save for faded marks on the upper reverse field. NGC ID# 24EN, PCGS# 6088

- 3419** 1808/7 AU53 PCGS. O-101, R.1. Deep golden-brown, cobalt-blue, and forest-green toning embraces this attractive overdated half dollar. The fields display clash marks along with the occasional unobtrusive abrasion. O-101 is the sole 1808/7 variety. NGC ID# 24EP, PCGS# 6091

- 3420** 1808 AU55 PCGS. CAC. O-105, R.3. The centers are cream-gray while tobacco-brown and sea-green enrich the peripheries. An originally toned half dollar with lustrous borders and motifs. Generally unabraded though a single hair-thin line is concealed in the cap. NGC ID# 24EP, PCGS# 6090

**1809 O-109 Half Dollar, AU55
Experimental III Edge**

- 3421** 1809 III Edge AU55 PCGS. CAC. O-109, R.3. Although a tiny rust mark is attached to the lowest curl, this is an early die state specimen with remnants of letters and embossed or raised segments through AMERICA. There is no evidence of the die crack that appears in later die states. This example retains considerable luster with lovely golden and pale bluish-gray toning. NGC ID# 24ES, PCGS# 6094

- 3422** 1810 AU53 PCGS. O-106a, R.3. Caramel-gold and apple-green blend throughout this briefly circulated and unblemished half dollar. Misaligned dies cause a soft impression on the upper left stars and the leaves of the olive branch. NGC ID# 24ET, PCGS# 6095

**1810 Half Dollar, MS63
Overton-110**

- 3423** 1810 MS63 NGC. O-110, R.2. Rich apple-green, dove-gray, and golden-brown toning encompasses this minimally abraded representative. The strike is generally bold though the arrowheads are softly brought up. Luster illuminates the margins and motifs. O-110 is an available variety in circulated grades but surprisingly rare in Mint State. NGC ID# 24ET, PCGS# 6095

1811/10 Bust Half, AU58, O-101

- 3424** 1811/10 AU58 PCGS. O-101, R.1. The curls near the ear exhibit slight wear, but this almond-gold example offers substantial cartwheel luster and shows softness of strike only on the left-side margins. The left obverse field has minor marks but the remainder of the coin is unabraded. Population: 12 in 58, 13 finer (4/13). NGC ID# 24EV, PCGS# 6099

**1811 Half Dollar, MS62
Small 8, O-110**

- 3425** 1811 Small 8 MS62 NGC. O-110, R.1. This lustrous almond-gold silver type coin is remarkably devoid of contact and is well struck aside from the upper right stars. Though not the highest graded example of the Overton variety, it is difficult to image a collector of any stature who would be unsatisfied with the present coin. PCGS# 6097

- 3426** 1812 AU53 PCGS. O-106, R.3. Medium golden-brown toning dominates though cobalt-blue fills the margins. The surfaces are unabraded though mildly bright. The conditionally scarce O-106 is readily attributed by length and prominent die cracks on both sides. NGC ID# 24EW, PCGS# 6100

- 3427** 1812 AU58 NGC. O-105a, R.2. Chestnut-gold shades visit the borders though the fields and motifs are primarily stone-white. Free from marks and partly lustrous. Small dark gray freckles are largely confined to the margins though one is on Liberty's jaw. NGC ID# 24EW, PCGS# 6100

- 3428** 1812 MS61 NGC. O-103, R.1. Light caramel-gold toning visits the borders of this otherwise slate-gray half dollar. Cartwheel luster sweeps smooth surfaces. The strike is consistent except on the right-side stars and portions of the rims. Liberty's profile is strike doubled. NGC ID# 24EW, PCGS# 6100

- 3429** 1812 MS61 NGC. O-103, R.1. Glimpses of golden-brown and ocean-blue visit the margins of this lightly toned half dollar. Cartwheel luster sweeps unabraded surfaces. The reverse displays bold sets of clash marks while the obverse does not. NGC ID# 24EW, PCGS# 6100

**1812 O-104a Half Dollar, MS62
Distinctive Die Lines in Left Wing**

- 3430** 1812 MS62 PCGS Secure. O-104a, R.1. Parallel die lines in the upper part of the left wing identify this plentiful variety. The reverse of this late die state piece has fine die cracks. Both sides have lovely ivory luster with splashes of pale gold toning around the devices. NGC ID# 24EW, PCGS# 6100

- 3431** 1813 AU50 PCGS. O-104, R.4. A color example of this scarce Overton variety. The fields are golden-brown while the borders and high points are olive-green. Struck from clashed dies. Marks are moderate for the grade despite minor abrasions near Liberty's jaw. NGC ID# 24EZ, PCGS# 6103

- 3432** 1813 AU55 NGC. O-103, R.2. This stone-gray Choice AU half dollar displays bright luster throughout the margins and eagle. The fields are clashed but void of consequential marks. The inner corner of the 3 in the date is partly filled, confirming a later die state for O-103. NGC ID# 24EZ, PCGS# 6103

1813 Half Dollar, Smooth MS62, O-106a

- 3433 1813 MS62 PCGS. O-106a, R.2.** This satiny stone-gray representative is unabraded, though the obverse rim is raised near the 18 in the date due to deeply entered edge lettering, as made. A majority of LIBERTY is clashed beneath the eagle's right (facing) wing. O-106 is known for soft strikes near the bust tip and the left end of the scroll, as is the case for the present piece. The hammer die was presumably installed misaligned. NGC ID# 24EZ, PCGS# 6103

**Low-Mintage 1815/2 Half, VF25
Scarce O-101a Die State**

- 3434 1815/2 VF25 PCGS. O-101a, R.3.** The rising die crack through 50C confirms the scarce later die state. The only 1815-dated dies, and key to a date set of Capped Bust halves. This mildly glossy cream-gray example is impressively unabraded, although the fields display at least three sets of clash marks, as made. NGC ID# 24F5, PCGS# 6108
- 3435 1817/3 XF45 PCGS. O-101, R.3.** The obverse is chestnut-tan and stone-gray but the reverse displays powder-blue toning. A nicely defined and lightly marked example of this obvious overdate variety. Certified in a green label holder. NGC ID# 24F7, PCGS# 6111
- 3436 1817 Punctuated Date XF45 PCGS. O-103, R.2.** Aquamarine, autumn-gold, and stone-gray toning enriches this smooth representative. A die dot between the 1 and 7 in the date accounts for the Punctuated Date moniker, listed in the *Guide Book* and limited to the Overton-103 early die state. PCGS# 6110
- 3437 1817 Single Leaf Below Wing AU55 NGC. CAC. O-106a, R.4.** The scarce late die state caused by over-enthusiastic lapping at the Mint, one of the few such varieties listed in the *Guide Book*. The "Comet" obverse with a thick die line from the cap to the rim. Smooth and well defined with partial luster and rich olive-green, butter-gold, and cream-gray toning. NGC ID# 24F6, PCGS# 6109
- 3438 1818 AU58 NGC. O-112, R.1.** A whisper of tan toning graces the peripheries while the centers remain brilliant. A problem-free slider with smooth surfaces and an even strike. Luster illuminates the margins and devices. NGC ID# 24F9, PCGS# 6113
- 3439 1818 AU58 NGC. O-109a, R.1.** Autumn-gold borders bound the stone-gray fields and devices. A partly lustrous and evenly struck example without any remotely consequential marks. This die marriage has a high N in UNITED, as noted in the Dr. Glenn Peterson reference. NGC ID# 24F9, PCGS# 6113

- 3440 1818 MS62 ANACS. O-108, R.1.** Lemon-gold and powder-blue endow this lustrous and minimally abraded Capped Bust type coin. Evenly struck and attractive. Dr. Peterson attributes O-108 by the pinched appearance to the tops of the 8s in the date, presumably due to a flawed digit punch. NGC ID# 24F9, PCGS# 6113

**1819/8 Half Dollar, Lustrous MS62
Large 9, O-102**

- 3441 1819/8 Large 9 MS62 NGC. O-102, R.2.** Golden-brown, ocean-blue, and plum-red toning grace the peripheries of this lustrous and boldly struck half dollar. Marks are minimal for the grade and the eye appeal is impressive. Overton-102 is identified by a chip above the right foot of the Ts within the reverse legend, caused by a defective letter punch. PCGS# 6119
- 3442 1819 AU58 NGC. O-109, R.2.** A distinctive variety due to the die lines that connect the TE in STATES and the final A in AMERICA to the upper arrowhead. This almond-gold and stone-gray representative offers substantial mint bloom and is free from detrimental marks. NGC ID# 24FB, PCGS# 6117
- 3443 1822 MS62 PCGS. O-113, R.3.** Butter-gold borders encompass stone-gray fields and devices. A lustrous and intricately impressed half dollar. No marks are remotely of notice and the eye appeal is superior for the grade. NGC ID# 24FG, PCGS# 6129
- 3444 1823 — Double Struck Obverse, Close Overlap — AU55 PCGS. O-107, R.2.** Liberty's profile and neck are widely strike doubled. The remainder of the design does not show doubling. Autumn-gold toning graces the obverse margin but is only barely evident on the reverse. Lustrous and unabraded.
Ex: Long Beach Signature (Heritage, lot 6988, which realized \$977.50. NGC ID# 24FJ, PCGS# 6131
- 3445 1823 AU55 PCGS. O-103, R.2.** Various die lines beneath the beak identify this interesting Overton marriage. The luminous and unmarked surfaces display faint almond-gold toning. Liberty's neck is strike doubled. NGC ID# 24FJ, PCGS# 6131
- 3446 1823 MS61 NGC. O-112, R.1.** Lime-green and cream-gray encompass this satiny and minimally abraded half dollar. The strike is good and the eye appeal is pleasing. Overton-112 is attributed by the first line of the sixth vertical shield stripe, since it ascends well into the horizontal lines. NGC ID# 24FJ, PCGS# 6131
- 3447 1823 MS62 NGC. O-105, R.1.** The prominent center dot within the shield allows prompt attribution. This lustrous almond-gold and powder-blue half dollar has mark-free fields and only minor contact on the portrait.
Ex: Lewis M. Reagan Collection (Stack's, 1/1996), lot 534. NGC ID# 24FJ, PCGS# 6131
- 3448 1824/1 AU58 PCGS. O-101a, R.2.** The surfaces are smooth and lustrous though the experienced collector will observe light wear on the bust tip and curls near the ear. Faintly toned golden-gray, and struck from rotated dies. Population: 6 in 58, 29 finer (4/13). PCGS# 6139
- 3449 1824 Overdate AU58 ANACS. O-103, R.1.** The well known "jumble of recuttings" Overton variety. Dr. Peterson states "the 4 is cut over a 2 and a 0" but other digits may also participate. Smooth and partially lustrous beneath a blanket of of gunmetal-gray, autumn-gold, and forest-green toning. Liberty's profile is strike doubled. NGC ID# 24FK, PCGS# 6138

- 3450 1825 MS62 PCGS. O-101, R.1.** Tan-gold toning enriches the fields though cedes to slate-gray over the motifs. Unabraded and coruscating with a good strike. The coin has an orange-peel texture, as made from long-in-use dies. Encapsulated in a green label holder. NGC ID# 24FL, PCGS# 6142

1826 O-102 Half Dollar, Toned MS63

- 3451 1826 MS63 NGC. O-102, R.1.** This satiny Select Bust half dollar has a blanket of golden-brown, olive-green, and dove-gray toning. Impressively devoid of marks, and the strike is intricate aside from such high points as the curls near the ear and the top of the eagle's head. A pleasing example of the popular First Philadelphia Mint type. NGC ID# 24FM, PCGS# 6143

- 3452 1827/6 MS61 NGC. O-102, R.1.** Medium almond-gold and steel-gray shades embrace this sharply struck Bust half. The fields are clashed, as is Liberty's ear, but no abrasions are evident. A late die state with the outer star points drawn toward the rim. NGC ID# 24FP, PCGS# 6147

- 3453 1827 Square Base 2 MS61 NGC. O-128, Low R.4.** Dr. Glenn Peterson's "Jointed I" variety. Star 13 is low and provides another identifier. Medium to deep dove-gray and chestnut-gold toning blankets this satiny and minimally abraded Uncirculated half dollar. NGC ID# 24FN, PCGS# 6144

- 3454 1827 Square Base 2 MS63 NGC. O-114, R.3.** A die flaw on the Y in LIBERTY is the pick-up point for this nondescript Overton variety, one of 49 marriages known for the date. This unmarked and lustrous example has peripheral honey-gold toning. Well struck at the centers with moderate blending at the borders. NGC ID# 24FN, PCGS# 6144

- 3455 1828 Curl Base 2, Knob AU58 NGC. O-107, R.2.** Bright luster fills the borders of this minimally abraded Borderline Uncirculated half dollar. A lens shows only minor contact. Generally silver-gray with glimpses of tan near the rims. PCGS# 6149

**1828 Half, Colorful MS63 Overton-117a
Large Letters, Square 2, Small 8**

- 3456 1828 Square Base 2, Small 8, Large Letters MS63 PCGS. O-117a, R.1.** This patinated Select half dollar has lilac-red and steel-gray centers framed by caramel-gold and sea-green margins. The satiny surfaces are mark-free except for faint abrasions on the field near the chin. A crisp, even strike with only minor merging noted on the high points. Population: 24 in 63, 39 finer (4/13). PCGS# 6151

- 3457 1829 Small Letters MS62 PCGS. CAC. O-105, R.1.** Repunching on the upper arrow shaft confirms the Overton variety. Medium to deep walnut-brown and dove-gray toning encompasses this well defined Bust half. Marks are relegated to faint short lines beneath the left (facing) wing. NGC ID# 24FS, PCGS# 6154

- 3458 1829 Large Letters AU58 PCGS. O-110a, R.2.** Dusky golden-brown and steel-blue enrich this lustrous and mark-free half dollar. The top of the eagle's head shows minor wear, but the eye appeal is impressive. O-110a is interesting for its lengthy reverse die cracks and close spacing between UNITED and STATES. NGC ID# 24FS, PCGS# 6154

- 3459 1830 Small O MS62 PCGS. O-110, R.3.** Light golden toning visits this lustrous and evenly struck Bust half. Minimally abraded and desirable. Extensive patterns of die rust on the upper reverse and the date are as made and often seen on this moderately scarce Overton marriage. NGC ID# 24FU, PCGS# 6156

- 3460 1831 MS62 NGC. O-111, R.1.** A satiny gunmetal-gray example that boasts well preserved fields and a crisp strike on the major motifs. The stars show soft centers, and the cheek displays minor contact. NGC ID# 24FV, PCGS# 6159

- 3461 1833 AU58 PCGS. O-102, R.1.** Light wheat-gold and stone-gray toning visit lustrous and blemish-free surfaces. A hint of wear on Liberty's forehead denies a Mint State classification. A majority of the stars are well struck though the neck curls and the top of the shield show selected weakness. NGC ID# 24FX, PCGS# 6163

- 3462 1833 MS63 NGC. O-104, R.1.** A majority of this Select half dollar is medium cream-gray, though the left borders display broad arcs of deep russet-brown and forest-green. The portrait is toned rich steel-gray. Unmarked and satiny. NGC ID# 24FX, PCGS# 6163

- 3463 1833 MS63 NGC. O-108, R.1.** A lustrous and luminous Bust half that shows only a hint of sun-gold toning. Evenly struck and free from consequential contact. An exemplary example of a popular silver type. NGC ID# 24FX, PCGS# 6163

- 3464 1834 Large Date, Small Letters MS63 NGC. O-105, R.1.** Recutting on the ATEs of STATES and a line between that word and OF are diagnostic for the Overton variety. Butter-gold toning endows much of this unabraded and lustrous example, though the centers are pearl-white.
Ex: Rosemont Central States (Heritage, 4/2008), lot 1084. PCGS# 6165

**1834 Half Dollar, MS64
Small Letters, Small Date, O-109**

- 3465 1834 Small Date, Small Letters MS64 PCGS. O-109, R.1.** Rich ocean-blue, peach-gold, and cherry-red toning endows this coruscating and well preserved near-Gem. Several stars are softly defined, as is the lowest arrowhead, but the majority of the design is crisply struck. Repunching on stars 8 through 10 identifies Overton-109. PCGS# 6166

- 3466 1835 MS61 NGC. O-106, R.1.** The stand of the 5 in the date is repunched, characteristic of this collectible Overton variety. Lustrous and unabraded with a mostly brilliant appearance though the borders display shades of sea-green and tan-gold. NGC ID# 24FZ, PCGS# 6168

- 3467 1836 Lettered Edge AU50 PCGS. Gold CAC. O-104a, R.3.** Lustrous sea-green and golden-brown borders encompass the powder-blue and peach-gold centers. The glossy surfaces are minimally abraded. Encapsulated in an old green label holder. NGC ID# 24G2, PCGS# 6169

- 3468 1836 Lettered Edge AU55 PCGS. Gold CAC. O-104a, R.3.** The lengthy and eccentric reverse die crack attributes the Overton variety. Lustrous and unabraded. Lightly toned save for a bluish of gunmetal-gray near the cheek. Housed in a green label holder. NGC ID# 24G2, PCGS# 6169

**1836 Lettered Edge Half
Near-Gem Overton-102**

- 3469 1836 Lettered Edge MS64 NGC. O-102, R.3.** This colorful near-Gem is bathed in apricot-gold, lilac-red, powder-blue, and olive-green. Luster dominates raised elements and the surfaces display only inconsequential contact. The final year of the Lettered Edge type, though the Capped Bust design continued production through 1839 with a reeded edge. NGC ID# 24G2, PCGS# 6169

- 3470 1836 Lettered Edge, Beaded Reverse AU58 PCGS. O-106, R.1.** Toned medium golden-brown and lilac-gray with the latter color more prominent on the obverse. A satiny half dollar with attractive preservation. The strike is bold except for the first nine stars. Housed in a green label holder. PCGS# 6196

REEDED EDGE HALF DOLLAR

- 3471 1839-O/O AU55 NGC. GR-1, R.1.** The mintmark is nicely repunched south. The usual die variety for the only collectible New Orleans issue of the bust design. The present well struck half is lightly toned and displays substantial luster. Void of noticeable marks. NGC ID# 24G7, PCGS# 6181

SEATED HALF DOLLARS

- 3472 1839 No Drapery — Harshly Cleaned — NGC Details. AU.** Though the 1839 Drapery (and 1839 Bust) half dollars are relatively plentiful, the 1839 No Drapery is surprisingly rare in better Mint State grades. This polished example is bright and displays a few moderate field marks. The reverse rim is lightly filed at 9:30.

- 3473 1840 Reverse of 1839, Small Letters MS63 PCGS.** Bright and essentially untuned other than a few small spots of color, this Select representative possesses sharply struck design elements. A few small obverse marks limit the grade. Population: 17 in 63, 26 finer (4/13).

Ex: Long Beach Signature (Heritage, 9/2004), lot 6615. NGC ID# 24GM, PCGS# 6234

- 3474 1844-O Doubled Date VG8 NGC. CAC. WB-103, FS-301.** This dramatic repunched date variety is listed in the *Guide Book* and featured on the cover of the classic Wiley-Bugert reference. This cream-gray representative displays the repunched digits clearly. No marks are remotely relevant. NGC ID# 24H2, PCGS# 6247

- 3475 1846 Tall Date MS62 NGC.** The Open 6 confirms the scarce Tall or Large Date logotype. The 1846 is available by No Motto standards but most examples bear a Medium Date. The present Tall Date half possesses deep golden-gray toning and is devoid of evident abrasions. The strike is good and the luster is moderately subdued. PCGS# 6252

- 3476 1846-O Tall Date VF30 PCGS. CAC.** Overall even wear on both sides provides this piece with a pleasing appearance for the grade. The coin displays light gray color overall, but closer examination reveals several additional hues, including green, gold, and orange-peach. A small mark in the right obverse fields poses minimal distraction, if any. Population: 8 in 30, 25 finer (4/13). NGC ID# 24H9, PCGS# 6256

- 3477 1846-O Tall Date XF45 PCGS.** Representatives of the Tall Date variety are much more challenging to locate in any grade than their Medium Date counterparts. This Choice XF example exhibits deep blue-gray toning around the borders and in some of the interstices; the remaining surfaces are light silver-gray and gold. The design elements are well defined, save for strike weakness on the eagle's neck and left (facing) leg. A few trivial circulation marks are present in the obverse field. Population: 5 in 45, 8 finer (4/13). NGC ID# 24H9, PCGS# 6256

**1846-O Seated Half, AU50
Scarcer Tall Date Variant**

- 3478 1846-O Tall Date AU50 PCGS.** Both Tall Date and Medium Date logotypes were used at the New Orleans Mint in 1846, with the Tall Date being the scarcer variety. This attractive AU specimen exhibits well-detailed design elements and only minor abrasions, with prooflike reflectivity in sheltered areas. Population: 2 in 50, 6 finer (4/13). NGC ID# 24H9, PCGS# 6256

- 3479 1854-O Arrows MS63 PCGS.** Green-gold and peach overtones enhance each side of this otherwise medium-silver New Orleans half with bright cartwheel luster. Lively and lovely, a quality branch mint Arrows half. NGC ID# 24JM, PCGS# 6280

**1855-O Seated Half, MS64
Popular Arrows Type**

- 3480 1855-O Arrows MS64 PCGS. CAC.** The short-lived Arrows design is always in demand by type collectors as well as series specialists. This well-detailed Choice specimen shows recutting on many of the stars. The lightly marked surfaces display shades of champagne-gold and lavender patina, with satiny mint luster on both sides. Population: 69 in 64 (1 in 64+), 26 finer (4/13). NGC ID# 24JR, PCGS# 6283

- 3481 1855-S Arrows — Scratch — PCGS Genuine. XF Details.** Since San Francisco only struck gold coins in 1854, the 1855-S Arrows was the first silver issue from that facility. The present tan-gold and stone-gray representative shows moderate wear and a trio of dull marks on the right obverse field. NGC ID# 24JR, PCGS# 6284

3482 1856-S XF45 PCGS. A golden patina covers both sides of this Choice XF example, providing this piece with a lovely appearance. A few small splashes of cherry-red and bright orange are also present. Population: 15 in 45, 29 finer (4/13). NGC ID# 24HR, PCGS# 6289

3483 1861 MS63 NGC. This boldly defined Select Mint State half dollar has rich golden-brown toning with steel perimeters. NGC ID# 24J7, PCGS# 6302

CONFEDERATE STATES OF AMERICA

1861 Scott Restrike Half Dollar, AU55 Popular Tribute Coin

3484 1861 Scott Restrike AU55 NGC. Breen-8002. After seizing the New Orleans Mint in 1861, Confederate authorities unknowingly created a numismatic delicacy when they coined four half dollars from a Confederate reverse die. Many years later in 1879, coin dealer J.W. Scott acquired the die and set about making restrikes. He acquired 500 genuine 1861-O half dollars, planed off the reverse of each, and produced restrike half dollars such as this Choice AU example. In doing so, the obverse of each piece was partially obliterated and surviving examples are graded solely by the Confederate reverse design. This piece has still lustrous surfaces with pewter gray color and hints of gold toning. PCGS# 340402

SEATED HALF DOLLARS

3485 1866-S No Motto XF40 PCGS. The San Francisco Mint coined 60,000 No Motto half dollars in 1866, all from a single die pair. Light gray surfaces reveal hints of gold and green when this pleasing example is examined closely. The wear is even on both sides. Population: 15 in 40, 24 finer (4/13). NGC ID# 24JH, PCGS# 6315

1867 Seated Half, Satiny Near-Gem

3486 1867 MS64 PCGS. CAC. Satiny silver in general with peach overtones gracing much of the margins and wisps of cloud-white closer to the centers. Though this postwar Seated half dollar issue's mintage approaches half a million pieces, few near-Gem or better coins have survived. Population: 10 in 64, 8 finer (4/13). NGC ID# 24JT, PCGS# 6321

1867-S Half Dollar, MS63 Early With Motto S-Mint

3487 1867-S MS63 PCGS. Bright silver interiors show surprisingly little patina for a coin approaching 150 years old, though gold toning visits the rims and an arc of peach is noted at the right reverse. The stars are softly struck, particularly star 13 where a grade-contributing scrape appears, but the overall eye appeal is high for a Select coin. Struck from worn dies that show clashing and cracks. Population: 8 in 63, 4 finer (4/13). NGC ID# 24JU, PCGS# 6322

3488 1873 Closed 3, No Arrows MS63 PCGS. Light peach and gold overtones cross a pale gray base on this satin-frosted Select example from the (temporary) end of its type. Aside from a vertical line of reed marks to the right of star 1, marks are generally unobtrusive, not registering on an individual level. Population: 11 in 63, 12 finer (4/13). NGC ID# 24KA, PCGS# 6336

3489 1873-CC Arrows XF40 NGC. WB-4, R.4. Small CC. A lightly worn XF example of the popular Arrows subtype, with full LIBERTY and pleasing gray and amber patina. Only a few minor abrasions show on both sides. Census: 10 in 40, 57 finer (4/13). NGC ID# 24L8, PCGS# 6344

1873-CC Arrows Half, Almost Uncirculated

3490 1873-CC Arrows AU50 PCGS. WB-3, R.4. Date Right, Close Small CC. A lightly circulated gunmetal-gray Carson City half with unabraded fields and good eye appeal. A faint diagonal mark is noted on the lower half of Liberty. The more available of only two Arrows issues from the legendary Western facility. Population: 14 in 50, 42 finer (4/13). NGC ID# 24L8, PCGS# 6344

3491 1874 Arrows MS62 PCGS. Peach and gold overtones grace satiny surfaces that are light silver-gray elsewhere. Well-defined for an Arrows piece with surprisingly few overt abrasions for the grade. NGC ID# 24LA, PCGS# 6346

3492 1877-S MS64 NGC. Type Two Reverse. A precisely struck and satiny Choice silver type coin. Apricot toning clings to the margins but the fields and motifs are brilliant. The reverse is smooth and the obverse is only lightly abraded. NGC ID# 24KM, PCGS# 6357

3493 1879 MS64 PCGS. Semireflective like many business strike examples of this low-mintage issue, the watery fields not having the depth needed for this piece to be a proof. Occasional glimmers of blue and gold are ethereal additions to an otherwise silver coin. NGC ID# 24KS, PCGS# 6361

PROOF SEATED HALF DOLLARS

1857 Seated Half, PR63 Fewer Than 25 Examples Known

3494 1857 PR63 PCGS. CAC. A few minor milk spots and field hairlines account for the grade on this Select proof 1857 half dollar, one of an unknown but undoubtedly small coinage in the year before the Mint began publicly advertising proof coinage for general sale. The *Breen Proof Encyclopedia* comments, "Except for the small cent, probably the most difficult denomination of the year," and fewer than 25 examples are known today. This piece displays silver-gray surfaces throughout, with a sharp strike and much more appeal than the grade implies. Remember that the certified populations likely contain much duplication for these early issues. Population: 17 in 63, 16 finer (4/13). NGC ID# 27TG, PCGS# 6411

3495 1862 PR63 NGC. The designs display sharp definition on this lovely Select example. The medium gray patina reveals a wide array of colors when examined more closely, including shades of copper, gold, cobalt-blue, fuchsia, plum, and grape. Census: 28 in 63, 96 finer (4/13). NGC ID# 27TN, PCGS# 6416

Gem Cameo Proof 1862 Seated Half Gorgeous Peripheral Toning

3496 1862 PR65 Cameo NGC. CAC. Ocean-blue and lavender hues illuminate the margins of this intricately struck and beautiful Gem. Despite the toning, the major devices are frosty, particularly on the obverse. This Civil War specimen is from a proof mintage of only 550 pieces. Census: 9 in 65 Cameo, 2 finer (4/13).
Ex: The Slotkin Family Trust Collection (Heritage, 4/2011), lot 3697. PCGS# 86416

Border-Toned Gem Proof 1863 Half Dollar

3497 1863 PR65 NGC. Cobalt-blue and lavender toning clings to the margins of this Gem proof, leaving the centers silvery with soft champagne hues. The design elements are sharply impressed and display a degree of contrast with the mirrored fields. Carefully preserved with excellent eye appeal. Census: 12 in 65, 8 finer (4/13). NGC ID# 27TP, PCGS# 6417

3498 1864 PR63 Cameo PCGS. Among the many attributes of this Select example are a sharp strike, pleasing contrast between the fields and devices, and bright surfaces. Delicate hairlines limit the grade. Population: 13 in 63 (1 in 63+) Cameo, 16 finer (4/13). PCGS# 86418

1869 Half Dollar, PR64 Cameo Low-Mintage Early With Motto Date

3499 1869 PR64 Cameo PCGS. A flashy near-Gem with light yellow-gold color and a reasonable strike (just a bit soft on the head of Liberty and the eagle's claws). An excellent candidate for an advanced proof type set. Only 600 proofs were struck. Population: 7 in 64 Cameo, 7 finer (4/13).
Ex: New York Signature (Heritage, 11/2003), 6530; Central States Signature (Heritage, 5/2004), lot 7472. PCGS# 86427

3500 1870 PR63 PCGS. Blue-to-violet through much of the interiors with green-gold crescents gracing the margins and hints of red accenting the centers. Though lightly hairlined, this Select proof presents well at arm's length. Housed in a green label holder. NGC ID# 27U5, PCGS# 6428

3501 1870 PR63 PCGS. A well-defined Select proof with rich antique-gold, blue-green, and violet toning over lightly hairlined surfaces. Solid eye appeal for the grade. NGC ID# 27U5, PCGS# 6428

1872 Half Dollar, PR64 Cameo
Beautiful Border Toning

- 3502 1872 PR64 Cameo PCGS. CAC.** A glorious With Motto specimen from the year before the second Arrows type. Sharply frosted devices are key to the contrast, though the reflectivity of the surrounding fields is no slouch, either. Blue-to-green outer toning fades to peach at an upper obverse crescent and around most of the reverse. Population: 6 in 64 Cameo, 6 finer (4/13). PCGS# 86430

1872 Seated Liberty Half, PR66 Cameo
Only One Finer Example at NGC

- 3503 1872 PR66 Cameo NGC.** The 1872 proof Seated Liberty half dollar is seldom encountered in grades above the Gem level. This spectacular Premium Gem displays unusually frosty devices that contrast starkly with the deeply mirrored fields. The design elements are sharply detailed and the surfaces show only a few minor contact marks. Census: 4 in 66 Cameo, 1 finer (4/13). PCGS# 86430

1873 Seated Half, PR65
Popular No Arrows Variant

- 3504 1873 No Arrows PR65 PCGS. CAC.** One of just 600 No Arrows proof halves for the year, all struck from dies with the Closed 3 logotype in the date. Beautifully, albeit subtly contrasted with powerful mirrors that shine through lemon-gold central toning and peach and blue-green peripheral shadings. Population: 17 in 65, 11 finer (4/13).
Ex: Dallas Signature (Heritage, 10/2008), lot 933. NGC ID# 27U8, PCGS# 6431

- 3505 1873 No Arrows, Closed 3 PR63 Cameo PCGS.** Marked contrast between the fields and devices provides both sides of this lovely Select example with great eye appeal. The coin remains brilliant overall, with areas of light champagne toning appearing at portions of the peripheries. Population: 12 in 63 Cameo, 22 finer (4/13).
From The MKJ Collection, Part II. PCGS# 86431

- 3506 1873 No Arrows, Closed 3 PR64 Cameo PCGS.** Dusky almond-gold and stone-gray toning blend across the undisturbed glassy fields and the precisely impressed devices of this near-Gem example, providing a pleasing appearance. Only 600 proofs were struck prior to the addition of Arrows to the type. Population: 15 in 64 Cameo, 7 finer (4/13). PCGS# 86431

1873 Arrows Half, PR64 Cameo
Sharply Contrasted

- 3507 1873 Arrows PR64 Cameo PCGS.** The Arrows type of 1873 and 1874 is one of the most recognizable and sought-after types in 19th century U.S. numismatics. This near-Gem has the added attraction of strong cameo contrast on each side; the obverse is arguably Deep Cameo. A few light hairlines can be made out with a loupe, and the obverse shows just a hint of light toning while the reverse is brilliant. Population: 10 in 64 Cameo, 7 finer (4/13). PCGS# 86434

- 3508 1874 Arrows PR63 PCGS.** A pleasing level of contrast exists between the fields and devices on both sides of this brilliant piece, providing a cameo appearance although this coin did not receive that designation from the grading service. A few contact marks appear in the right obverse field. Population: 75 in 63, 83 finer (4/13). NGC ID# 27UV, PCGS# 6435

1874 Arrows Half, PR64 Cameo
Attractive Example of This Two-Year Type

- 3509 1874 Arrows PR64 Cameo NGC.** After the weight change in the previous year from 192.0 to 192.9 grains, arrows were added to each side of the date to indicate this change. This design change persisted into 1874, and thus a two-year type coin was created, one that is especially sought-after as a proof. This high-grade proof exhibits sharp cameo contrast on each side. The interiors are brilliant and surrounded by a hint of golden-rose toning at the margins. Census: 5 in 64 (1 in 64+) Cameo, 9 finer (4/13). PCGS# 86435

- 3510 1877 PR63 NGC.** Type Two Reverse. Appreciably contrasted, though not to a Cameo level, this Select proof example exhibits a nice appearance. Hints of gold and peach are present. A small mark appears near Liberty's head. Census: 47 in 63, 60 finer (4/13). NGC ID# 27UC, PCGS# 6438

- 3511 1877 PR64 PCGS.** This impressive Choice proof has rich iridescent toning, showing light cameo contrast between the fully mirrored fields and frosty devices. Population: 25 in 64 (1 in 64+), 10 finer (4/13). NGC ID# 27UC, PCGS# 6438

3512 1878 PR64 Cameo PCGS. CAC. Toning frames the bright champagne-colored centers on this example, providing plenty of eye appeal. The colors at the periphery include shades of gold, russet, emerald-green, and teal. Remnants of the planchet texture remain visible on portions of the reverse. Population: 14 in 64 (1 in 64+) Cameo, 10 finer (4/13). PCGS# 86439

3513 1879 PR63 NGC. Type One Reverse. Faint gold and tan patina appears on this Select proof example. A few small splashes of violet, plum, aquamarine, and bright blue are also present. A couple of contact marks likely held this piece from a higher grade. NGC ID# 27UE, PCGS# 6440

1882 Half Dollar, Premium Gem Proof Reflective Through Rich Toning

3514 1882 PR66 PCGS. CAC. Pale blue-green at the margins with deeper ocean and violet hues through the interiors, the last color more prominent on the reverse. A small spot of claret toning is noted to the left of the H in HALF. A gleaming and carefully preserved Premium Gem proof from an issue of 1,100 specimens. NGC ID# 27UH, PCGS# 6443

3515 1882 PR62 Cameo NGC. Lightly gold-tinged with clear field-to-device contrast. Both sides are lightly hairlined overall with a few higher-visibility flaws in the right obverse field, though the overall eye appeal is good for the grade. PCGS# 86443

1884 Half Dollar, PR65 Deep Peripheral Toning

3516 1884 PR65 PCGS. CAC. Lovely powder-blue, chestnut-gold, and plum-mauve shades embrace this precisely struck Gem. Each side has a window of brilliance at the center. Cameo contrast is evident though undesignated because of the old green label holder. A scant 875 proofs were produced. NGC ID# 27UK, PCGS# 6445

1884 Seated Half, Gem Cameo Proof

3517 1884 PR65 Cameo NGC. CAC. The mostly brilliant silver obverse has bold contrast within a peripheral iridescent frame, while the similarly toned reverse has light contrast. A few faint hairlines scattered in the fields are well within the bounds of the PR65 Cameo grade. Census: 6 in 65 Cameo, 10 finer (4/13). PCGS# 86445

3518 1885 PR64 NGC. Liberty in particular displays an attractive array of colors on this well toned Choice example, with the hues representing shades of the rainbow. The fields retain their reflectivity, particularly on the reverse. Census: 86 in 64, 56 finer (4/13). NGC ID# 27UL, PCGS# 6446

1885 Seated Half, PR66 Cameo Deeply Mirrored, Minimally Toned

3519 1885 PR66 Cameo NGC. The 1885 was struck near the nadir of total output for Seated halves. Only 5,200 strikes were produced for circulation, plus 930 proofs; making the proof examples highly popular with collectors. Apple-green and orange-gold embrace this coruscating and well-preserved example. Fully struck throughout. Census: 14 in 66 (1 in 66+) Cameo, 7 finer (4/13). PCGS# 86446

1886 Cameo PR65 Half Dollar Only 886 Proofs Struck

3520 1886 PR65 Cameo NGC. An intricately struck Gem whose untuned centers are framed by rich tobacco-brown, plum-red, and cobalt-blue patina. Exemplary despite a fingerprint trace on the right obverse field. Half dollar production in 1886 was limited to 5,000 business strikes and 886 proofs. Census: 7 in 65 Cameo, 9 finer (4/13). PCGS# 86447

**1887 Seated Liberty Half, PR65
Attractively Toned Cameo Specimen**

- 3521 1887 PR65 Cameo NGC. CAC.** A vivid ring of cobalt-blue toning surrounds the mixed brilliant and golden-brown center on the obverse, while the reverse is blanketed in shades of champagne-gold. The design elements are sharply detailed throughout, contrasting boldly with the deeply mirrored fields despite the spectacular toning. Census: 29 in 65 Cameo, 22 finer (4/13). PCGS# 86448

**1888 Half Dollar, PR65 Cameo
Low Total-Mintage Date**

- 3522 1888 PR65 Cameo NGC.** A flashy Gem with luminous devices and glassy fields. Sun-gold toning clings to the margins. A good strike with minor inexactness on Liberty's hair and the eagle's left (facing) claw. Another low-mintage date, presumably because the Mint relegated its resources to striking legally compelled silver dollars. Census: 15 in 65 Cameo, 9 finer (4/13).
Ex: Summer FUN (Heritage, 7/2010), lot 3745. PCGS# 86449

**1891 Seated Liberty Half Dollar, PR65
Only 600 Pieces Struck**

- 3523 1891 PR65 PCGS. CAC.** The Seated Liberty design was retired after 1891 and only 600 proof half dollars were struck in the final year of this long-lived series. This impressive Gem exhibits well-detailed design elements and deeply reflective fields, with hints of pale gold, blue, and lavender patina. Population: 22 in 65, 15 finer (4/13). NGC ID# 27UT, PCGS# 6452

BARBER HALF DOLLARS

- 3524 1892 MS64 PCGS.** Light peach and pink overtones grace pale gray surfaces. This first-year Choice example has lines near Liberty's mouth but few overt marks otherwise. NGC ID# 24LF, PCGS# 6461

Gem 1892 Barber Half Dollar

- 3525 1892 MS65 NGC. CAC.** Golden-gray and forest-green encompass this first-year Barber Gem, though glimpses of brilliance persist. Lustrous and well struck with a pristine reverse and only trivial obverse grazes. The 1892 was saved more than most subsequent issues, but originally toned examples of the present quality are always sought for type purposes. NGC ID# 24LF, PCGS# 6461

- 3526 1893-O MS64 PCGS. CAC.** A stunning near-Gem, this Barber half dollar has a bold strike with frosty luster beneath rich gray and iridescent toning. The reverse is much lighter than the obverse. Population: 46 in 64 (1 in 64+), 7 finer (4/13). NGC ID# 24LL, PCGS# 6466

- 3527 1900 MS62 NGC.** Appealing satin luster emanates from both sides of this lovely example displaying areas of gray-green and orange-brown toning. Contact marks appear to have limited the grade, but they pose little distraction and none are worthy of individual mention. NGC ID# 24M9, PCGS# 6486

- 3528 1901 MS63 PCGS.** Light honey toning graces this lustrous and well struck Select Barber half. No marks are evident and the eye appeal is superior for the designated grade. Housed in a first generation holder. NGC ID# 24MC, PCGS# 6489

- 3529 1901-O AU50 NGC.** The 1901-O is a very challenging issue. Areas of golden-brown toning appear on both sides of this lightly circulated coin, with hints of peach, blue, and green also present. Census: 3 in 50, 42 finer (4/13). NGC ID# 24MD, PCGS# 6490

- 3530 1901-S — Altered Surfaces — PCGS Genuine. Unc. Details.** This better date Barber half is sharply struck and shows no indication of wear, but the luster is muted, especially on the obverse, which has a stained appearance. The reverse is brilliant while the obverse is blended wheat-gold and stone-gray. NGC ID# 24ME, PCGS# 6491

- 3531 1906 MS64 PCGS.** Satin luster appears on both sides of this Choice example. Toning in shades of green-gray, russet, dark gray is scattered throughout. A few light marks, including an area on Liberty's cheek, likely held this piece from a higher grade. Population: 76 in 64 (1 in 64+), 27 finer (4/13). NGC ID# 24MU, PCGS# 6504

1906 Half, Orange-Gold MS65

Ex: Dale Friend

- 3532 1906 MS65 PCGS. CAC.** Ex: Friend. This well struck Gem has lustrous and undisturbed surfaces that display rich orange-gold, olive-green, and cream-gray toning. Though plentiful in typical circulated grades, the 1906 is scarce in Mint State and becomes rare at the MS65 level. Population: 21 in 65, 6 finer (4/13).
Ex: Dale Friend PCGS Registry Set of Barber Half Dollars (Heritage, 1/2009), lot 2945, which realized \$2,990. NGC ID# 24MU, PCGS# 6504

- 3533 1906-D MS64 NGC.** Original mint luster is present on both sides of this lovely near-Gem piece. The coin displays yellow-gold and gray toning overall, with small splashes of olive-green, orange, fuchsia, and ice-blue color appearing as well, primarily on the reverse. Census: 32 in 64 (1 in 64+), 11 finer (4/13). NGC ID# 24MV, PCGS# 6505

- 3534 1906-D MS64 NGC.** A pleasing near-Gem example, this piece features attractive ivory-white toned surfaces and satiny luster. The design elements display nice definition, further enhancing the eye appeal of this coin.
Ex: Long Beach Signature (Heritage, 9/2008), lot 2302. NGC ID# 24MV, PCGS# 6505

- 3535 1906-D MS64+ NGC.** Better-defined than often seen for this initial Denver half dollar issue. Essentially silver surfaces show just a hint of peach-gold near the rims. Light marks on and near Liberty's face leave this near-Gem just shy of the next grade. NGC ID# 24MV, PCGS# 6505

- 3536 1906-D MS64 PCGS. CAC.** A mix of light and dark toning on both sides of this near-Gem example provides an interesting appearance, with the reverse arguably being the side with more eye appeal. Numerous colors are present, including champagne, steel-gray, russet, red, teal, and lemon-yellow. Population: 62 in 64, 24 finer (4/13). NGC ID# 24MV, PCGS# 6505

1906-D Half Dollar, Scarce Gem Example

- 3537 1906-D MS65 PCGS.** Though 1906 was the first year of coinage at the Denver Mint, few local citizens saved half dollars to commemorate the occasion, and Gems of the issue are highly elusive today. This lustrous example is nicely struck and exhibits medium honey-gold patina with hints of deeper brown and aqua toning near the rims. Population: 15 in 65, 9 finer (4/13). NGC ID# 24MV, PCGS# 6505

- 3538 1912 MS64 PCGS.** This is a surprisingly challenging Philadelphia issue despite a mintage of more than 1.5 million pieces, with coins finer than this frosty near-Gem conditionally rare. Silver surfaces show streaks of reddish-gold up from the bottom of the obverse and at the inner reverse. NGC ID# 24NG, PCGS# 6524

- 3539 1912-D MS64 PCGS.** Pale and subtly frosted with touches of deep blue at the lower obverse rim. A few isolated abrasions and striking softness on the last two obverse stars contribute to the grade, though the eagle's talons are uncharacteristically sharp. NGC ID# 24NH, PCGS# 6525

1912-D Half Dollar, Smooth MS65

- 3540 1912-D MS65 PCGS. CAC.** Intermingled powder-blue and almond-gold toning adorns this coruscating and well preserved Gem. Tiny freckles of dark russet frequent the margins. The strike is generally good, though obverse star 11 and the fletchings show inexactness. Population: 52 in 65, 15 finer (4/13). NGC ID# 24NH, PCGS# 6525

1913 Barber Half Dollar, MS64

First of Three Low-Mintage Issues in a Row

- 3541 1913 MS64 NGC.** Were they part of a more popular series, the Philadelphia half dollar business strikes of 1913 - 1915 would be celebrated rarities. Instead, collectors have the opportunity to own attractive coins such as this 1913 near-Gem at affordable prices. Light silver surfaces swirl with luster and have just a touch of green-gold toning at the rims. NGC ID# 24NK, PCGS# 6527

- 3542 1915-D MS65 NGC.** Scattered subtle splashes of golden-brown toning appear on portions of this sharply struck Gem. This Denver representative from the last year of issue for this type exhibits great original luster. Census: 50 in 65, 8 finer (4/13). NGC ID# 24NS, PCGS# 6533

PROOF BARBER HALF DOLLARS

1892 Barber Half Dollar, PR65 Cameo First-Year Type Coin

- 3543 1892 PR65 Cameo NGC.** The Barber design was introduced in 1892 and a hefty proof mintage of 1,245 half dollars was accomplished. This sharply detailed Gem displays frosty devices and deeply mirrored fields with bold cameo contrast. A few wisps of pale gold toning visit the well-preserved surfaces. Census: 28 in 65 (1 in 65+) Cameo, 40 finer (4/13). PCGS# 86539

1893 Barber Half, Toned Gem Proof

- 3544 1893 PR65 PCGS.** A blanket of blended lavender and forest-green toning embraces this satiny and pristine Gem. The fletchings are fully struck, though the right shield corner shows incompleteness of impression. Proof mintages were significantly lower in 1893 than the preceding year, since type collector demand had been sated. Population: 22 in 65 Cameo, 28 finer (4/13). NGC ID# 24NV, PCGS# 6540

1893 Half, Multicolor Gem Proof

- 3545 1893 PR65 PCGS. CAC.** Exquisite sea-green, wheat-gold, and rose-red toning illuminates this satiny and intricately struck Gem. There are no visible imperfections, and a loupe reveals only inconsequential contact. The proof mintage of 792 pieces is significantly less than the preceding year, since type demand was satisfied. NGC ID# 24NV, PCGS# 6540

1901 Half Dollar, PR65 Cameo Colorful and Contrasted

- 3546 1901 PR65 Cameo PCGS. CAC.** A clearly contrasted Cameo Gem proof with the effect persisting through generous gold-gray and orange patina with aspects of violet at parts of the margins. After the 1901 issue, Cameo proof Barber coinage becomes scarce due to a change in Mint procedure that de-emphasized the cameo effect. Population: 12 in 65 Cameo, 23 finer (4/13). PCGS# 86548

1905 Half Dollar, PR66 Strong Reverse Toning

- 3547 1905 PR66 PCGS.** Silver-gray on the obverse with touches of blue, plum, and gold that echo the rich coverage on the reverse. This Premium Gem gleams around the portrait, and while the reverse luster is more subdued, the sharpness of strike leaves no doubt as to this coin's status. Population: 23 in 66 (1 in 66+), 13 finer (4/13). NGC ID# 24P9, PCGS# 6552

1905 Barber Half, Premium Gem Proof Rich, Dusky Colors

- 3548 1905 PR66 PCGS.** Deeply toned with peach and plum hues through the centers on each side and peripheral patina in deepest azure. Reflectivity is most visible at the margins and even then only at certain angles, though the sharpness of strike assures this Premium Gem proof's status. Population: 23 in 66 (1 in 66+), 13 finer (4/13). NGC ID# 24P9, PCGS# 6552

- 3549 1913 PR64 PCGS.** A strong gold-to-gray overtone graces this late-date proof Barber half. A few small splashes of teal are also present. Reflectivity remains beneath the patina, particularly on the reverse. Population: 66 in 64 (1 in 64+), 57 finer (4/13). NGC ID# 24PH, PCGS# 6560

EARLY DOLLARS

- 3550** 1795 Flowing Hair, Three Leaves Good 4 PCGS. B-12, BB-26, R.6. Bowers-Borckardt Die State II. A rare die variety of the introductory and briefly coined Flowing Hair type. LIBERTY is sharp and all other legends are readable though the bottom of the date and the top of UNITED is faint. The stone-gray and chestnut-gold surfaces are unmarked save for a small obverse rim ding at 8 o'clock. NGC ID# 24WZ, PCGS# 6852

1795 Flowing Hair Dollar VF Details B-5, BB-27

- 3551** 1795 Flowing Hair, Three Leaves — Rim Damage — NGC Details. B-5, BB-27, R.1. A lightly cleaned but nonetheless attractive Flowing Hair type coin whose slate-gray surfaces exhibit powder-blue, apricot-gold, and sea-green undertones. An edge mark at 12:30 near the obverse rim explains the NGC designation.
- 3552** 1795 Flowing Hair, Three Leaves — Scratch — PCGS Genuine. B-5, BB-27, R.1. Familiar to specialists, the "Bar" variety is named for the slender die scratch behind the highest neck curl. The present well defined example displays attractive chestnut-gold and jade-green toning. A single scratch is noted between the chin and star 12. Minor rim dings are at 4:30 and 6 o'clock on the obverse and at 6:30 on the reverse. NGC ID# 24WZ, PCGS# 6852

1795 Flowing Hair Dollar Very Fine, B-5, BB-27

- 3553** 1795 Flowing Hair, Three Leaves VF20 NGC. B-5, BB-27, R.1. Splashes of golden-brown dominate through the obverse field has a couple of stone-white areas. A pleasing early silver dollar with a smooth obverse and a pair of hair-thin lines above the eagle's head and near the right wreath stem. The Flowing Hair type was coined for only two years but the rarity of the 1794 compels type collectors to choose the 1795. NGC ID# 24WZ, PCGS# 6852

1795 Flowing Hair Dollar, B-5, BB-27 XF Sharpness, Three Leaves

- 3554** 1795 Flowing Hair, Three Leaves — Plugged, Cleaned — ANACS. XF40 Details. B-5, BB-27, R.1. Holed and plugged at 12 o'clock with the E in LIBERTY re-engraved and a lesser repair evident between the wreath ribbon ends. Harshly cleaned, and the central reverse has a few minor scratches. NGC ID# 24WZ, PCGS# 6852
- 3555** 1795 Flowing Hair, Two Leaves — Scratches — NGC Details. VF. B-1, BB-21, R.2. Deep ocean-blue and golden-brown patina envelops this nicely defined Flowing Hair dollar. Relatively short but fairly thick scratches are noted beneath the bust tip and near 9 and 12 o'clock on the reverse.
Ex: Lewis M. Reagan Collection (Stack's, 1/1996), lot 607, which realized \$1,430.
- 3556** 1795 Flowing Hair, Silver Plug — Holed — NGC Details. VF. B-7, BB-18, R.3. A round hole is noted beneath the bust tip and overlaps portions of the final star and the 5 in the date. The edges display a few abrasions and a trio of thin scuffs is noted beneath the jaw, which has a triangular depression. The silver plug is clearly outlined at the centers of both sides. Deeply toned blue-green. PCGS# 6854
- 3557** 1795 Draped Bust, Centered — Repaired — NGC Details. Fine. B-15, BB-52, R.2. This evenly whizzed first year Draped Bust dollar is retoned in deep cherry-red, apple-green, and sun-gold colors. The right obverse field is smoothed. Still a collectible example of this highly popular issue. The sole die marriage for the 1795 Centered Draped Bust *Guide Book* listing.

1795 Dollar, Fine 12 Uncentered Draped Bust, B-14, BB-51

- 3558** 1795 Draped Bust, Off Center Fine 12 PCGS. B-14, BB-51, R.2. Stone-gray devices are framed by aquamarine and golden-brown fields. This first-year Draped Bust dollar has bold legends, clear stars, and well outlined motifs. The hair and wings show some inner definition. Minimally abraded save for a slender mark on the obverse border at 5:30. PCGS# 96858
- 3559** 1795 Draped Bust, Off Center — Holed / Plugged — PCGS Genuine. VF Details. B-14, BB-51, R.2. Bowers-Borckardt Die State I. Though designated "Holed/Plug," neither notation is accurate. Instead, the right obverse field is repaired to remove the initials RC, and the reverse exergue is repaired to remove the initials HB. The initials remain faintly evident. The reverse has a minor rim ding at 6:30, and the border is scratched near the AM in AMERICA. PCGS# 96858

- 3560** 1795 Draped Bust, Off Center — Graffiti — PCGS Genuine. VF Details. B-14, BB-51, R.2. The initials WB are ornately and boldly engraved on the right obverse field. Faint pinscratches near the 6 o'clock on the reverse might also be interpreted as graffiti. The surfaces are mildly glossy from cleaning and exhibit powder-blue, pearl-gray, and golden-brown toning. PCGS# 96858

1796 B-5, BB-65 Silver Dollar
Large Date, Small Letters
Diagnostic Reverse Die Chip

- 3561** 1796 Large Date, Small Letters PCGS Genuine. B-5, BB-65, R.2. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a XF specimen that has been cleaned.

The characteristic reverse die lump attached to the right upright of the I joins the top half of that letter and nearly touches the C in AMERICA. The stars at the lower left obverse are indistinct and lack central detail. This otherwise nicely detailed specimen has delicate splashes of light tan with traces of luster and good overall eye appeal. PCGS# 6861

VF Details 1797 Dollar, B-3, BB-71
10x6 Stars, Large Letters

- 3562** 1797 10x6 Stars, Large Letters — Cleaning — PCGS Genuine. VF Details. B-3, BB-71, R.2. Bowers-Borckardt Die State III. This stone-gray Small Eagle silver dollar is moderately bright, but marks are confined to a brief scratch beneath the left wreath stem. The sole 10x6 stars die pairing, a minor Mint blunder that causes LIBERTY to be uncentered above the bust. NGC ID# 24X4, PCGS# 6865

- 3563** 1797 10x6 Stars, Large Letters — Reverse Damage — NGC Details. VF. B-3, BB-71, R.2. Bowers-Borckardt Die State III. Three small roundish marks near the tail confirm the NGC notation. A slender vertical adjustment mark beneath Liberty's ear is as made. The stone-gray surfaces are faintly hairlined.

- 3564** 1798 Small Eagle, 13 Stars — Damage — PCGS Genuine. VG Details. B-1, BB-82, R.3. Bowers-Borckardt Die State III. This stone-gray better variety 1798 dollar has an L-shaped abrasion near the eagle's beak and a scratch on the wreath near the R in AMERICA. The right obverse field displays faint graffiti, and the U in UNITED appears worn smooth. NGC ID# 24X5, PCGS# 6867

Small Eagle 1798 Dollar, B-1, BB-82
13 Stars, Large Letters, VF Details

- 3565** 1798 Small Eagle, 13 Stars — Cleaning — PCGS Genuine. VF Details. B-1, BB-82, R.3. B-1 is the sole Small Eagle variety of any date paired with a 13 Stars obverse. The reverse has Large Letters, unlike B-2, the other 1798 Small Eagle die variety. The present piece is a bit bright and exhibits subtle but suspicious pastel rose-red, ice-blue, and honey-gold obverse toning. The reverse has freckled forest-green toning throughout STATES. Minimally abraded with traces of remaining luster. NGC ID# 24X5, PCGS# 6867

1798 Small Eagle Dollar, 13 Stars
VF30, B-1, BB-82

- 3566** 1798 Small Eagle, 13 Stars VF30 ANACS. B-1, BB-82, R.3. Bowers-Borckardt Die State II. Generally cream-gray though protected areas exhibit almond-gold toning. The fields are slightly cloudy and the sole remotely mentionable mark is a thin line near the U in UNITED. One of only two 1798 Bolender varieties with a Small Eagle reverse, each further distinguished by different star counts. NGC ID# 24X5, PCGS# 6867

- 3567** 1798 Large Eagle, Pointed 9 — Improperly Cleaned — NGC Details. VF. B-25, BB-123, R.4. Bowers-Borckardt Die State II. Pearl-white high points contrast with tan-brown and powder-blue fields. Like many if not most early dollars, the present coin is moderately cleaned, but the sole mentionable mark is a minor obverse rim ding at 4 o'clock. NGC ID# 24X6, PCGS# 6873

- 3568** 1798 Large Eagle, Pointed 9 — Plugged — ANACS. VF20 Details. B-30, BB-116, R.5 Holed and plugged, the plug showing at RT in LIBERTY and CA in AMERICA. Otherwise a pleasing piece with only a few faint scratches and handling marks. NGC ID# 24X6, PCGS# 6873

**1798 B-8, BB-125 Dollar, VF30
Four Berries Reverse
Late Die State**

- 3569** 1798 Large Eagle, Pointed 9 VF30 PCGS. B-8, BB-125, R.2. Only four berries in the branch on the reverse of this variety, and that is a distinctive *Guide Book* variety. This piece has most of the characteristics of Die State IV in the new Bowers Silver Dollar Encyclopedia. The obverse exhibits 11 complete stars and two indistinct stars resulting from reverse die failure. A pleasing piece with medium gray and iridescent surfaces, this piece shows only a few minor handling marks. NGC ID# 24X6, PCGS# 6873

**1798 Heraldic Eagle Dollar, VF35
Challenging B-31, BB-115 Variety**

- 3570** 1798 Large Eagle, Pointed 9, Close Date VF35 NGC. B-31, BB-115, R.5. Bowers-Borckardt Die State IV. Dusky apple-green and stone-gray toning enriches this better variety Heraldic Eagle dollar. The strike is good save for softness on the reverse stars opposite the bust truncation. Unabraded except for a pair of thin marks above the 79 in the date and a reverse rim nick at 3 o'clock. NGC ID# 24X6, PCGS# 6873
- 3571** 1798 Large Eagle, Pointed 9, Four Berries XF40 ANACS. B-8, BB-125, R.2. Dusky wheat-gold and steel-gray toning embraces this moderately abraded but attractive Heraldic Eagle dollar. The only die variety with four berries on the branch, a *Guide Book*-listed distinction. NGC ID# 24X6, PCGS# 6873
- 3572** 1798 Large Eagle, Pointed 9 — Graffiti — PCGS Genuine. XF Details. B-14, BB-122, R.3. Bowers-Borckardt Die State V. The right obverse field has a few faint and illegible cursive letters, and other light to moderate abrasions are present. The cheek and shoulder display wear but the gunmetal-gray and tan-brown surfaces show substantial detail. NGC ID# 24X6, PCGS# 6873
- 3573** 1798 Large Eagle, Pointed 9 — Cleaning — PCGS Genuine. XF Details. B-14, BB-122, R.3. Bowers-Borckardt Die State IV. Though lightly hairlined and a bit subdued by cleaning, this Heraldic Eagle dollar has few consequential marks. Subtle powder-blue and almond-gold toning embraces both sides. NGC ID# 24X6, PCGS# 6873
- 3574** 1798 Large Eagle, Pointed 9 — Graffiti — PCGS Genuine. AU Details. B-14, BB-122, R.3. Bowers-Borckardt Die State IV. No graffiti is readily evident, but the top half of the shield is repaired and the central reverse is hairlined. Attractive to the unaided eye with ample golden-brown luster in protected areas. NGC ID# 24X6, PCGS# 6873

- 3575** 1798 Large Eagle, Knob 9, 5 Stripes, 10 Arrows VG10 PCGS. CAC. B-6, BB-96, R.3. Bowers-Borckardt Die State II. The stone-gray high points contrast with deep gunmetal fields. We note a moderate rim ding at 4 o'clock on the reverse and a few faded thin marks on the portrait and shield. PCGS# 6876

- 3576** 1798 Large Eagle, Knob 9, 5 Stripes, 10 Arrows — Improperly Cleaned — NGC Details. XF B-6, BB-96, R.3. Bowers-Bolender Die State IV. Dusky walnut-brown toning deepens moderately near the rims. This Heraldic Eagle dollar is well defined but the surfaces are cloudy from hairlines, and the portrait and right field display many faint thin marks. PCGS# 6876

**1798 Heraldic Eagle Dollar, VF30
Wide Date, Pointed 9, B-12, BB-120**

- 3577** 1798 Large Eagle, Pointed 9, Wide Date VF30 PCGS. B-12, BB-120, R.4. Bowers-Borckardt Die State IV. Deep cream-gray toning evenly encompasses this unabraded and midgrade Bust dollar. The strike is sharp at the borders but soft on the eagle's head and nearby stars. Traces of luster linger in protected areas of the design. A pleasing representative of a scarcer Bolender variety. PCGS# 6877

**1798 Large Eagle Dollar, VF30
Wide Date, Pointed 9, B-12, BB-120**

- 3578** 1798 Large Eagle, Pointed 9, Wide Date VF30 PCGS. B-12, BB-120, R.4. Bowers-Borckardt Die State II. Deep sea-green, steel-gray, and tan-brown toning dominates this midgrade Heraldic Eagle silver dollar. As usual for B-12, the stars above the eagle show an inconsistent strike, but the wings and curls are well defined. The reverse is only lightly abraded, while inconspicuous field marks are noted near Liberty's profile and ribbon. PCGS# 6877
- 3579** 1799 7x6 Stars PCGS Genuine. B-16, BB-158, R.2. Bowers-Borckardt Die State III. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has been cleaned. The walnut-brown and gunmetal-blue toning is slightly suspicious, but this silver dollar is richly detailed and unblemished. NGC ID# 24X7, PCGS# 6878
- 3580** 1799 7x6 Stars VG8 NGC. B-11, BB-161, R.3. Bowers-Borckardt Die State III. The portrait and eagle are stone-gray while the fields display moderately deeper charcoal hues. Though marks are present, they are unworthy of comment for the grade. NGC ID# 24X7, PCGS# 6878

**1799 B-14, BB-167 Dollar, Fine 12
7x6 Stars**

- 3581** 1799 7x6 Stars Fine 12 NGC. B-14, BB-167, R.3. Bowers-Borckardt Die State II. A cream-gray early silver dollar with smooth, pleasing surfaces. Most letters in E PLURIBUS UNUM are readable, and Liberty displays partial hair definition. Bolender-14 is interesting because of a raised area near the second-lowest berry, which vaguely resembles a leaf in the present grade. NGC ID# 24X7, PCGS# 6878

- 3582** 1799 7x6 Stars Fine 15 PCGS. B-17, BB-164, R.2. Bowers-Borckardt Die State II. Deep gunmetal-gray fields contrast with pearl-white high points. This Heraldic Eagle dollar has substantial hair and wing plumage definition. Both centers display a number of tiny ticks and the field near the chin is abraded. NGC ID# 24X7, PCGS# 6878

- 3583** 1799 7x6 Stars VF20 NGC. B-7, BB-156, R.4. Bowers-Borckardt Die State III. A scarcer variety deep stone-gray representative of the Heraldic Eagle design. Refreshingly free from abrasions. Wear is concentrated on the reverse near the eagle's head. NGC ID# 24X7, PCGS# 6878

- 3584** 1799 7x6 Stars — Repaired — NGC Details. VF. B-5, BB-157, R.2. The repair of this moderately circulated and deeply toned silver dollar is not immediately obvious. Both sides suggest strong VF details and excellent eye appeal.

- 3585** 1799 7x6 Stars — Cleaning — PCGS Genuine. VF Details. B-9, BB-166, R.1. Bowers-Borckardt Die State II. This untuned early dollar is somewhat bright and has a few thin obverse pinscratches, but the sharpness approaches XF and glimmers of luster are noted in design recesses. NGC ID# 24X7, PCGS# 6878

- 3586** 1799 7x6 Stars — Improperly Cleaned — NGC Details. VF. B-17, BB-164, R.2. Bowers-Borckardt Die State III. This stone-gray early dollar is hairlined but free from singular detrimental abrasions. All letters in E PLURIBUS UNUM are at least partly present though only the initial three letters are bold.

- 3587** 1799 7x6 Stars VF25 PCGS. B-10, BB-163, R.2. Bowers-Borckardt Die State III. The heavy die crack through OF identifies this collectible Bolender variety. This cream-gray and tan-gold example is ideal for the grade aside from a pinscratch between the ER in AMERICA and two spots near the hair ribbon and shoulder curl. NGC ID# 24X7, PCGS# 6878

**1799 7x6 Stars Dollar, Dappled VF35
B-5, BB-157**

- 3588** 1799 7x6 Stars VF35 NGC. B-5, BB-157, R.2. Bowers-Borckardt Die State III. Dappled ocean-blue and straw-gold toning alternates across the surfaces though the high points are pearl-gray. Flashes of luster illuminate peripheral elements. No marks are apparent aside from a thin line beneath the hair ribbon. NGC ID# 24X7, PCGS# 6878

**1799 'Apostrophe' Dollar, VF35
7x6 Stars, B-9, BB-166**

- 3589** 1799 7x6 Stars VF35 PCGS. B-9, BB-166, R.1. Bowers-Borckardt Die State V. A well defined example of the "Apostrophe" variety, which takes its name after a die break near the second S in STATES. The curved die crack near the chin is of equal interest. The cream-gray and walnut-brown surfaces are unmarked and attractive. NGC ID# 24X7, PCGS# 6878

**1799 Dollar, 7x6 Stars, XF40
'Apostrophe' Variety, B-9, BB-166**

- 3590** 1799 7x6 Stars XF40 ANACS. B-9, BB-166, R.1. Bowers-Borckardt Die State IV. The "Apostrophe" variety with a break after the second S in STATES and an arc-shaped die crack beneath Liberty's chin. Golden-brown and gunmetal-gray toning encompasses minimally abraded surfaces. Luster emerges from design elements. NGC ID# 24X7, PCGS# 6878

- 3591** 1799 7x6 Stars — Tooled — PCGS Genuine. XF Details. B-5, BB-157, R.2. Bowers-Borckardt Die State III. Repaired near the BE in LIBERTY. The opposite portion of the reverse is undisturbed, and there are no other relevant detractors. Medium lilac, olive, and tan toning covers each side. Luster glimmers from design crevices. NGC ID# 24X7, PCGS# 6878

**1799 Dollar, AU Details, 7x6 Stars
B-7, BB-156**

- 3592** 1799 7x6 Stars — Cleaning — PCGS Genuine. AU Details. B-7, BB-156, R.4. Bowers-Borckardt Die State III. This moderately hairlined but partly lustrous early dollar displays chestnut-gold and slate-gray toning. Small marks are scattered but none are individually noteworthy. The strike shows softness only near the eagle's head. NGC ID# 24X7, PCGS# 6878

- 3593** 1800 — Obverse Improperly Cleaned — NGC Details. VF. B-16, BB-187, R.2. Bowers-Borckardt Die State IV. Patches of hairlines emerge when this early dollar is rotated beneath a light. Chestnut-gold and gunmetal-gray encompass both sides with the deepest toning near the rims. No bagmarks or rim dings are evident. NGC ID# 24X9, PCGS# 6887

**1800 AMERICA! Dollar, Choice VF
B-19, BB-192**

- 3594** 1800 AMERICA! VF35 PCGS. CAC. B-19, BB-192, R.2. Bowers-Borckardt Die State IV. Undesignated as AMERICA! on the PCGS insert, but the prominent die scratch "I" is obvious at 5:30 on the reverse. This consistently struck silver dollar is predominantly deep steel-blue, though lighter olive and cream shades are also present. A few faint marks on the obverse field and the base of Liberty's neck provide only minor detractions. PCGS# 6892

**1801 B-2, BB-212 Dollar, VF30
Early Die State**

- 3595** 1801 VF30 NGC. B-2, BB-212, R.2. The early die state with no die cracks or clash marks, listed as a scarce die state in the Bowers *Silver Dollar Encyclopedia* published early this year, a revision of the 1993 Bowers-Borckardt reference. This Choice VF specimen has medium gray fields and lighter tan devices with a small obverse rim bump at 7 o'clock. NGC ID# 24XA, PCGS# 6893

- 3596** 1802/1 Narrow Date — Scratch — PCGS Genuine. VF Details. B-4, BB-232, R.3. Bowers-Borckardt Die State II. A vertical scratch on the upper right obverse field corresponds to the PCGS designation. Liberty's neck has a few small marks and a slight reverse rim nick is at 12:30. Toned silver-gray with additional charcoal and chestnut shades. NGC ID# 24XC, PCGS# 6898

**1802/1 Narrow Date Dollar, Choice VF
B-4, BB-232**

- 3597** 1802/1 Narrow Date VF35 PCGS. B-4, BB-232, R.3. Bowers-Borckardt Die State II, usual for the variety. Blended stone-gray and caramel-gold toning enriches this early silver dollar. The eagle is splendidly detailed though the breast feathers and Liberty's curls show wear. The obverse field is typically abraded. NGC ID# 24XC, PCGS# 6898

- 3598** 1803 Large 3 — Scratch — PCGS Genuine. VF Details. B-6, BB-255, R.2. Bowers-Borckardt Die State III. This moderately hairlined silver-gray early dollar displays more extensive luster than expected for a VF example. The central reverse has mint-made adjustment marks along with a number of pinscratches. The obverse has a few thin marks but only a pair beneath the neck are of any consequence. PCGS# 6901

**1803 Dollar, Choice VF
Large 3, B-6, BB-255**

- 3599** 1803 Large 3 VF35 PCGS. B-6, BB-255, R.2. Bowers-Borckardt Die State III. A luminous cream-gray and wheat-gold example. B-6 is the final variety of the type struck for commerce instead of collectors. The present coin has a lamination on the cleavage (as issued) but is smooth except for a couple of thin marks on the portrait. The dies are moderately rotated. PCGS# 6901

- 3600** 1803 Large 3 — Polished — PCGS Genuine. XF Details. B-6, BB-255, R.2. Bowers-Borckardt Die State III. This brilliant early crown-sized type coin exhibits light hairlines and is slightly bright. Substantial luster fills the wings, curls, and legends. Mildly granular near the 1 in the date but free from any scratches. PCGS# 6901

GOBRECHT DOLLAR

1836 Gobrecht Dollar, Proof, VG Details Judd-60, Die Alignment I

- 3601 1836 Name on Base, Judd-60 Original, Coin Alignment, Pollock-65, R.1 — Holed, Plugged — PCGS Genuine. Proof VG Details.** Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (the center of Liberty's head is opposite the D in DOLLAR). The coin shows heavy wear, and it is not possible to determine whether it falls in the early or late striking period for Alignment I dollars. This is an entry-level coin that has several problems. The main one is the large, semicircular plugged hole at the top of the obverse that was crudely filled in and reworked on both sides. The surfaces are bright also from a vigorous cleaning, and numerous, small abrasions and planchet flaws are scattered over the obverse and reverse. PCGS# 11225

SEATED DOLLARS

- 3602 1840 AU55 PCGS.** This richly toned Seated dollar is a dusky delight with rich blue-to-violet patina overall and a few hints of rose and gold. Well-defined with isolated high point wear on Liberty's figure and a few significant abrasions in the upper reverse field. Population: 26 in 55, 52 finer (4/13). NGC ID# 24YA, PCGS# 6926
- 3603 1844 AU55 NGC.** A pleasing Choice AU example, this coin exhibits an attractive level of detail. The low commercial mintage of 20,000 pieces came from a single pair of dies. On the obverse, LIBERTY and the shield are die doubled. The central reverse displays numerous die lines. Census: 24 in 55, 63 finer (4/13). NGC ID# 24YE, PCGS# 6930
- 3604 1845 XF45 PCGS.** Deep lavender-gray and golden-brown toning embraces this low mintage Seated dollar. All letters in LIBERTY are bold and luster emerges from the drapery. No marks are apparent other than an unobtrusive obverse rim ding near 6 o'clock. NGC ID# 24YF, PCGS# 6931
- 3605 1846-O AU55 NGC.** The 1846-O is the first New Orleans issue of the denomination and is much scarcer in better grades than its '59-O and '60-O Motto successors. This briefly circulated example has light tan-gold toning and an absence of relevant marks. Ex: *Stack's*, 6/1996, lot 1615, which realized \$935. NGC ID# 24YH, PCGS# 6933
- 3606 1847 AU58 NGC.** A medium gray patina covers this near-Mint example, with golden-brown accents also present along with small splashes of green and yellow-gold. Census: 98 in 58 (1 in 58+), 71 finer (4/13). NGC ID# 24YJ, PCGS# 6934
- 3607 1847 AU58 NGC.** The well-detailed design elements of this attractive near-Mint specimen show just a trace of actual wear on the high points of the design and the lightly abraded surfaces exhibit pleasing shades of lavender-gray, gold, and steel-blue patina. Census: 97 in 58 (1 in 58+), 70 finer (4/13). NGC ID# 24YJ, PCGS# 6934

1850 Seated Liberty Dollar, AU53 Only 7,500 Pieces Struck

- 3608 1850 AU53 NGC.** Only 7,500 business-strike Seated Liberty dollars were struck at the Philadelphia Mint in 1850, making the issue scarce-to-rare in all grades. This attractive AU53 example shows only a trace of wear on the high points of the design elements. The partially prooflike fields are lightly abraded and display hints of sea-green and amber patina. Census: 5 in 53, 72 finer (4/13). NGC ID# 24YM, PCGS# 6937
- 3609 1859-O AU55 NGC.** This attractive Choice AU Seated dollar retains attractive eye appeal and a pleasing level of design detail. There are no surface marks worthy of individual mention. This is a lovely example. NGC ID# 24YY, PCGS# 6947
- 3610 1859-O MS61 NGC.** Flashy and full luster is pale silver with faint golden overtones. Though significantly abraded, most notably to the left of Liberty's form, this New Orleans Seated dollar retains considerable all-around eye appeal. NGC ID# 24YY, PCGS# 6947
- 3611 1860-O AU53 PCGS.** This antebellum Seated dollar has soft peripheral detail but better-defined centers. Silver surfaces tinged with blue glimmer with semireflective luster in protected areas, most notably the margins. NGC ID# 24Z3, PCGS# 6950
- 3612 1860-O MS60 NGC.** Though this O-mint Seated dollar has its share of abrasions both wispy and with depth, the piece has no trace of wear and generous cartwheel luster. Surfaces are largely silver with peach accents appearing at the margins and at the upper reverse. NGC ID# 24Z3, PCGS# 6950
- 3613 1865 XF45 ANACS.** Lightly worn but with surprisingly radiant fields that are primarily pale silver-gray with splashes of gold-to-orange. Detail is perhaps closer to AU than XF, though abrasions and a scrape over the eagle's neck contribute to the grade. Housed in a small-format ANACS holder. NGC ID# 24Z8, PCGS# 6955
- 3614 1868 MS60 ANACS.** This piece is bright overall, with areas of toning appearing near many of the devices. The colors include copper, russet, and green-brown. Smaller splashes of more colorful toning appear at portions of the dentils and rims, including cherry-red and ice-blue. The reverse arguably has stronger eye appeal. NGC ID# 24ZB, PCGS# 6961
- 3615 1870 — Cleaning — PCGS Genuine. Unc. Details.** The motifs are frosty and the flashy fields display few bagmarks, but the obverse is delicately hairlined. Still a better grade example of this little-saved Motto date. NGC ID# 24ZD, PCGS# 6963

1871 Seated Liberty Dollar, MS63
Popular Type Coin

- 3616** 1871 MS63 PCGS. With a reported mintage over 1 million pieces, the 1871 Seated Liberty dollar is one of the most available dates of the series and a favorite choice of type collectors. This attractive Select specimen displays well-detailed design elements and partially prooflike surfaces under pleasing shades of lavender, cerulean-blue, and champagne-gold toning. Population: 40 in 63, 43 finer (4/13). NGC ID# 24ZG, PCGS# 6966

PROOF SEATED DOLLAR

- 3617** 1859 — Artificial Toning — NGC Details. Proof. Detectable hairlines are limited to the left reverse field, but this intricately struck specimen is mildly glossy, and the navy-blue and wheat-gold toning is deemed artificial by NGC. A scarce proof date since Mint-unsold pieces were melted. NGC ID# 252D, PCGS# 7002

TRADE DOLLARS

1874 Trade Dollar, MS64
Conditionally Rare Issue

- 3618** 1874 MS64 PCGS. Period after FINE. Light chestnut-gold and stone-gray toning embrace this lustrous near-Gem. The reverse is well preserved and the obverse field displays wispy grazes. The strike is full on Liberty's head though the eagle's right leg shows softness. Population: 24 in 64, 7 finer (4/13). NGC ID# 252Z, PCGS# 7034

1874-CC Trade Dollar, MS62

- 3619** 1874-CC MS62 PCGS. Tall CC. Tan-gold and steel-gray toning is moderate throughout this satiny Carson City Trade dollar. Field abrasions are minor and faint roller marks on the lower reverse are as made. The strike is above average but slightly inexact on the right (facing) leg of the eagle. NGC ID# 2532, PCGS# 7035

1874-S Chop Marked Trade Dollar
Lustrous MS64

- 3620** 1874-S Chop Mark MS64 PCGS. Large S. This lustrous Trade dollar is brilliant aside from a hint of sun-gold toning at the obverse center. The strike shows the usual blending on Liberty's hair and the eagle's right (facing) leg. A single chop mark is present, found near the eagle's upper right leg. PCGS# 87036

- 3621** 1874-S MS63 NGC. Large S, no period after FINE. This lightly toned and flashy Select Trade dollar has a smooth reverse and minor to moderate obverse field marks. Well struck on the eagle's legs though Liberty's hair is incomplete.
Ex: Long Beach Signature (Heritage, 9/2005), lot 3785. NGC ID# 2533, PCGS# 7036

- 3622** 1875-CC MS61 NGC. Type One Reverse. This coruscating Carson City type coin displays delicate golden toning and the expected number of minor obverse field marks. The reverse is only minimally abraded. A good strike with slight blending on the hair and right claw. NGC ID# 2535, PCGS# 7038

1875-CC Trade Dollar, Dusky MS63

- 3623** 1875-CC MS63 PCGS. Type One Reverse. Coruscating luster embraces this almond-gold and cream-gray Carson City type coin. Tiny obverse field marks are present but fewer than expected for the MS63 level. The strike shows softness on Liberty's hair and eagle's right leg, characteristic of the series. Population: 58 in 63, 30 finer (4/13). NGC ID# 2535, PCGS# 7038

- 3624** 1875-S MS62 PCGS. Type One Reverse. Large S. Caramel-gold toning encompasses this lustrous and lightly abraded West Coast Trade dollar. The strike is good with the usual moderate merging on the hair and right (facing) claw. NGC ID# 2536, PCGS# 7039

1877-S Trade Dollar, Lustrous MS64+

3625 1877-S MS64+ PCGS. CAC. Large S. This moderately toned Trade dollar type coin provides vibrant luster and unexpectedly few marks. Dusky golden-brown and gunmetal-gray embrace the obverse while the reverse offers straw-gold and ice-blue patina. The MS64+ grade may be ideal in terms of value given the considerable cost of a full Gem. NGC ID# 253E, PCGS# 7046

3626 1878-S MS64 NGC. This Choice Mint State S-Mint Trade dollar is the final business strike issue of the series. Once Morgan dollar production began, only proof Trade dollars were minted until 1885 when the series became a coin of the past. An attractive piece with frosty luster and outstanding toning over sharp details. NGC ID# 253G, PCGS# 7048

PROOF TRADE DOLLARS

**1875 Trade Dollar, PR62 Cameo
Type Two Reverse**

3627 1875 PR62 Cameo NGC. Type Two Reverse. Frosty designs contrast with glassy fields on this brilliant Trade dollar specimen. The strike is precise except for slight blending on Liberty's hair. Thorough rotation reveals vertical field hairlines consistent with the designated grade. Just 700 proofs were issued. PCGS# 87055

1876 Trade Dollar, Brilliant PR63

3628 1876 PR63 PCGS. Type One Obverse. Type Two Reverse. The motifs and legends are frosty and exhibit contrast with the untuned flashy fields, though no Cameo designation is present due to the age of the first generation holder. The strike is generally bold though the eagle's right (facing) leg is soft. Hairlines are minimal for the grade. NGC ID# 27YM, PCGS# 7056

**1879 Trade Dollar, PR63 Cameo
Proof-Only Issue**

3629 1879 PR63 Cameo PCGS. No business-strike Trade dollars were struck in 1879. The sharply detailed design elements of this attractive Select specimen display enough mint frost to create a bold cameo effect against the deeply reflective fields. Light champagne-gold patina visits the surfaces of both sides. A few minor hairlines and contact marks are consistent with the grade. Population: 30 in 63 (2 in 63+) Cameo, 67 finer (4/13). PCGS# 87059

**1880 Trade Dollar, PR62 Cameo
Popular Proof-Only Issue**

3630 1880 PR62 Cameo PCGS. A clearly contrasted specimen, pearl-gray overall with blue-and-gold patina at the obverse margins and lacing across much of the reverse. While a number of light hairlines pass through the fields around Liberty's form, this remains an eye-appealing example of its proof-only date. PCGS# 87060

3631 1880 PR62 Cameo PCGS. CAC. The post-1878 proof Trade dollars with their relatively generous mintages are popular with both date and type collectors. This Cameo example displays a pleasing level of contrast. PCGS# 87060

**1882 Trade Dollar, PR62 Cameo
Attractive, Variable Patina**

3632 1882 PR62 Cameo PCGS. Distinctly reflective through patina that ranges from gold-tinged pearl-gray at the interiors to rich peach at parts of the margins. Though the hairlines that account for the grade appear at certain angles to the light, this specimen's arm's-length eye appeal is comparable to that of numerous Select Cameo coins this cataloger has seen. PCGS# 87062

FLYING EAGLE CENTS

- 3633 1857 — Reverse Die Clash by Seated Liberty Quarter, Cleaned — ANACS. AU50 Details. FS-901.** One of three highly unusual cross-denomination clashed die varieties found on 1857 Flying Eagle cents (the others are FS-402 and FS-403). The walnut-brown surfaces are unblemished. The strike is bold on the eagle but soft on UNITED STATES. NGC ID# 2276, PCGS# 2016
- 3634 1857 MS63 NGC.** Many first-year type collectors choose the 1857 due to the rarity and associated expense of the 1856, which is technically a pattern coin. Attractive chestnut-gold color along with splashes of gold highlights and nice luster provide this Select example with a pleasing appearance. NGC ID# 2276, PCGS# 2016
- 3635 1857 MS63 PCGS. CAC. Snow-11, FS-301.** The date is lightly but widely repunched south. The variety is undesignated on the PCGS insert. This chestnut-gold cent displays satin luster and is smooth save for faint contact above the 7 in the date. NGC ID# 2276, PCGS# 2016
- 3636 1857 MS64 PCGS.** An attractive Choice representative of this short-lived design, with lustrous copper-red surfaces and well-detailed design elements. A few minor contact marks on both sides prevent a higher grade. NGC ID# 2276, PCGS# 2016
- 3637 1857 Doubled Die Obverse MS64 PCGS. Snow-4, FS-101.** Slight doubling is visible left of center on this variety. A Choice Mint State specimen, this Snow-4 cent shows lustrous light tan surfaces with splashes of iridescent toning. NGC ID# 2276, PCGS# 2016
- 3638 1857 MS64 PCGS. CAC.** Golden-tan patination resides on both sides of this near-Gem Flying Eagle cent, and an impressive strike imparts strong definition to the design features, including the eagle's tail. A few minute marks prevent Gem classification. NGC ID# 2276, PCGS# 2016
- 3639 1857 MS64 PCGS. CAC. Snow-2, FS-401b.** The "Type of 1856," identified by a square interior within the O in OF. The variety is undesignated on the PCGS insert. A coruscating and crisply struck Choice cent with smooth chestnut-gold surfaces. A couple of tiny flecks do not appear to limit the grade. NGC ID# 2276, PCGS# 2016
- 3640 1858 Large Letters MS64 NGC.** Note how well-struck this coin is front and back, but especially on the eagle's fully detailed feathers. Almond-tan with accents of orange and rose amid splendid luster make this a standout coin. NGC ID# 2277, PCGS# 2019

1858 Flying Eagle Cent, MS65
Small Letters, Low Leaves, Closed E

- 3641 1858 Small Letters MS65 PCGS.** Low Leaves, Closed E reverse. This attractive Gem exhibits well-detailed design elements and vibrant mint luster, with original red surfaces that show a few microscopic specks of carbon. No mentionable surface flaws are evident and eye appeal is quite strong. Population: 66 in 65, 9 finer (4/13). NGC ID# 2279, PCGS# 2020

1858 Flying Eagle Cent, MS65
Small Letters, Low Leaves

- 3642 1858 Small Letters MS65 PCGS.** Low Leaves, Open E reverse. This impressive Gem displays sharply detailed design elements and vibrant mint luster, with traces of prooflike reflectivity in sheltered areas. The original red surfaces show no mentionable distractions. Population: 66 in 65, 9 finer (4/13). NGC ID# 2279, PCGS# 2020

**Gem 1858 Small Letters Flying Eagle Cent
Low Leaves Reverse**

- 3643 1858 Small Letters MS65 NGC.** Low Leaves Reverse, Closed E in ONE. The Small Letters variety with clear separation between all letters in AMERICA. This Gem offers smooth eye appeal with light honey-gold surfaces showing occasional elements of deeper copper-peach. A small dark spot below the eagle's beak is of little concern when compared to the overall eye appeal.
Ex: *Long Beach Signature* (Heritage, 2/2010), lot 103. NGC ID# 2279, PCGS# 2020

INDIAN CENTS

- 3644 1859 MS64 PCGS.** The lustrous orange and crimson surfaces of this attractive Choice specimen show only a few minor contact marks and the design elements are well-detailed on both sides. Eye appeal is quite strong. NGC ID# 227E, PCGS# 2052

**1859 Indian Cent, MS65
Important One-Year Type Issue**

- 3645 1859 MS65 PCGS. CAC.** Wisps of pale blue overtones appear on the reflective tan surfaces of this extraordinary Gem one-year Indian cent type coin. The first two feather tips show slight weakness, but all other details are boldly defined. An extraordinary cent with amazing eye appeal. PCGS has only certified 20 numerically finer examples (5/13) NGC ID# 227E, PCGS# 2052

- 3646 1860 Pointed Bust MS64 PCGS. CAC. FS-401.** A caramel-gold near-Gem of this scarce transitional subtype. Lustrous and unabraded with exceptional eye appeal for the grade. A slender mint-made lump beneath the shield provides a die marker. PCGS# 2056

- 3647 1860 MS66 NGC.** Eagle Eye Photo Seal, card included. This gorgeous Premium Gem is fully struck and highly lustrous with mark-free orange-red surfaces. Minute, inconspicuous carbon determines the grade. Census: 36 in 66, 3 finer (5/13).
Ex: *Orlando FUN Signature* (Heritage, 1/2012), lot 4146, which realized \$2,309.20. NGC ID# 227F, PCGS# 2058

- 3648 1861 MS65 NGC.** Light apricot and peach shadings with occasional lavender overtones. Detail is excellent on the feather-tips, though Liberty's ribbon shows softness on the two inner diamonds. NGC ID# 227G, PCGS# 2061

**1861 Cent, Lustrous MS66
Eagle Eye Photo Seal**

- 3649 1861 MS66 NGC.** Eagle Eye Photo Seal, card included. This remarkable Premium Gem is devoid of contact and exhibits prominent cartwheel luster. The strike is unimprovable, and carbon is limited to a few minute flecks near the E in CENT. Census: 41 in 66 (1 in 66+), 3 finer (4/13).
Ex: *Orlando FUN Signature* (Heritage, 1/2003), lot 68; *Five Point Collection* (Heritage, 1/2010), lot 161. NGC ID# 227G, PCGS# 2061

**1862 Copper-Nickel Cent, Premium Gem
The Usual Choice for Type Purposes**

- 3650 1862 MS66 NGC.** Boldly struck, save for minor softness on the upper feather tips of the headdress, with gleaming luster and lovely golden-tan coloration that is slightly deeper-than-usual, for the type. A tiny center dot (as struck) resides between the E and N of CENT on the reverse. Minimally marked, with a few trivial nicks noted near Liberty's ear. Census: 35 in 66, 6 finer (4/13).
Ex: *Summer FUN Signature* (Heritage, 7/2007), lot 78. NGC ID# 227H, PCGS# 2064

- 3651 1863 MS65 PCGS. CAC.** Almond-tan and orange alternate across each side of this virtually pristine coin, save for a single dark dot at the lower obverse rim. The strike is far sharper than usually seen on this issue. A great example of the date with the CAC approval. NGC ID# 227J, PCGS# 2067

1863 Cent, Pastel-Toned MS66

- 3652 1863 MS66 NGC. CAC.** This sharply struck and highly lustrous Civil War cent is attractively patinated orange-gold, lime-green, and rose-red. A few areas of tobacco-brown are noted near the tip of the headdress and the lower right portion of the wreath. Certified in a former generation holder. Census: 19 in 66, 1 finer (4/13). NGC ID# 227J, PCGS# 2067

- 3653 1864 Copper-Nickel MS65 NGC.** This delightful Gem represents the final issue with copper-nickel composition, struck early in the year, with sharply detailed design elements and vibrant mint luster. NGC has graded 16 numerically finer examples (4/13). NGC ID# 227K, PCGS# 2070

**1864 Copper-Nickel Cent, MS66
Reddish Surfaces With Lilac Accents**

- 3654 1864 Copper-Nickel MS66 NGC.** Final year for the copper-nickel type and a transitional one as well with bronze cents produced in even more sizeable numbers. This piece superficially resembles a bronze coin as it has much red on each side, but the devices are accented in the characteristic pale blue-gray of copper-nickel alloy. Sharply struck throughout. Census: 16 in 66, 0 finer (4/13). NGC ID# 227K, PCGS# 2070
- 3655 1870 MS64 Red and Brown PCGS. CAC.** Bold N in ONE. Variegated sun-gold and gunmetal-gray shades encompass this well struck and lustrous near-Gem. Smooth aside from a solitary tiny tick on the cheekbone.
Ex: Orlando FUN Signature (Heritage, 7/2011), lot 3080, which realized \$862.50. NGC ID# 227U, PCGS# 2098
- 3656 1872 MS64 Red and Brown NGC.** Bold N. Olive-green, cherry-red, and straw-gold invigorate the obverse. The reverse is golden-brown, plum-mauve, and gunmetal-gray. A well struck near-Gem with vibrant luster and a smooth appearance. NGC ID# 227W, PCGS# 2104
- 3657 1877 VF30 NGC.** Although slightly weak at the centers, this attractive key-date Indian cent has pleasing medium brown surfaces with slightly lighter brown borders. A few scattered marks are evident. NGC ID# 2284, PCGS# 2127
- 3658 1877 — Reverse Rim Damage — NGC Details. XF.** This Shallow N key date cent has pleasing definition and the medium brown fields and devices are only moderately abraded. The reverse rim is partly flattened near 6:30 and the obverse rim shows minor granularity at 11:30 and 12 o'clock. NGC ID# 2284, PCGS# 2127
- 3659 1884 MS65 Red PCGS.** The obverse is medium orange-gold while the reverse is primarily peach-red. Crisply struck and coruscating with a few reverse flecks. Marks are confined to the 1 in the date. Housed in a green label holder. Population: 36 in 65 Red, 17 finer (4/13).
Ex: Joseph P. Gorrell Collection (Heritage, 1/2003), lot 4443, which realized \$2,185. NGC ID# 228B, PCGS# 2150

**1886 Type One Cent, MS66 Red and Brown
Tied for Finest in This Color Designation**

- 3660 1886 Type One MS66 Red and Brown PCGS. CAC.** This is a widely collected hubbing difference created mid-year by Charles Barber, here showing the last feather in the headdress between I and C. In spite of the generous numbers known, there are precious few extant in high grades. This is a bright, lustrous example with just a trace of browning present. The strike is strong throughout and there are no detracting abrasions. Population: 3 in 66 Red and Brown, 0 finer (4/13). NGC ID# 228D, PCGS# 2155
- 3661 1900 MS66 Red NGC.** Gorgeous copper and orange colors provide this lustrous example with lovely eye appeal. Minor clash marks appear above the headdress. A few small freckles and grazes are present. Census: 37 in 66 Red, 4 finer (4/13). NGC ID# 228V, PCGS# 2207
- 3662 1905 MS66 Red PCGS.** The obverse is fire-red, as is the reverse margin, while the field is orange-gold within the wreath. A hint of sea-green visits the obverse periphery. An outstanding Indian type coin housed in a first generation holder. Population: 44 in 66 Red, 1 finer (4/13). NGC ID# 2292, PCGS# 2222
- 3663 1908-S MS64 Red PCGS.** Lovely orange-gold luster bathes each side of this semi-key date. The design elements are struck up somewhat better than typically seen on this issue. No mentionable marks or spots are evident. NGC ID# 2296, PCGS# 2234
- 3664 1909-S MS65 Red and Brown NGC.** This lovely Gem example exhibits a pleasing strike for the issue. The lustrous orange-tan surfaces display scattered areas of toning that include sea-green, steel-blue, pink, and violet. Only 8 examples have been awarded higher numeric grades by NGC (4/13).
Ex: FUN Signature (Heritage, 1/2003), lot 5416. NGC ID# 2298, PCGS# 2239

PROOF INDIAN CENTS

1861 Indian Cent, PR64 Beautifully Toned Low-Mintage Key

3665 1861 PR64 PCGS. CAC. A low mintage of only 1,000 proof pieces resulted in the 1861 Indian cent becoming the key date in the proof series. Because many of the proofs went unsold, numerous pieces were either destroyed or released into circulation, leading to a lower number of survivors than the production figure might suggest. The design elements exhibit a pleasing degree of definition on this lovely near-Gem displaying a variety of attractive colors, particularly on the obverse, including shades of golden-yellow, cherry, lime-green, orange, and wheat-gold. A few small carbon spots are present on both sides. Population: 60 in 64, 22 finer (5/13). NGC ID# 229B, PCGS# 2256

3666 1870 PR65 Red and Brown NGC. CAC. FS-901. The Shallow N (in ONE) subtype. Precisely struck and flashy with no evident contact or carbon. The Indian and obverse field are steel-blue while the remainder the coin is orange-gold. NGC ID# 229N, PCGS# 2298

1877 Cent, PR64 Red and Brown Sharply Struck

3667 1877 PR64 Red and Brown PCGS. The 1877 proof Indian cent production consisted of only 900 pieces. Three obverse and three reverse dies were used. This delightful Choice example exhibits the bulging right pennant in the T of CENT produced by one of the three reverse dies. The design elements exhibit sharp detail and the slightly reflective surfaces retain most of their original red color, with a few hints of light brown. A few small carbon flecks are present. NGC ID# 229W, PCGS# 2319

3668 1881 PR66 Red PCGS. This well-struck Premium Gem displays tremendous eye appeal, with tan and sunset-orange in the centers of each side ceding to glimpses of cherry near the rims. A loupe reveals some jade accents and a few flecks on the obverse. Population: 23 in 66 Red, 3 finer (4/13). NGC ID# 22A2, PCGS# 2332

3669 1881 PR66 Red PCGS. CAC. Although not designated as a Cameo, this Premium Gem specimen shows definite elements of contrast between the reflective fields and the frosty design elements. The original red surfaces are free of mentionable flaws. Population: 23 in 66 Red, 3 finer (4/13). NGC ID# 22A2, PCGS# 2332

3670 1885 PR66 Red PCGS. A scarcer date in high grades, this is a rich reddish example that has a light overlay of purple on the obverse. Virtually perfect surfaces with a few tiny specks of carbon on the reverse (magnification is necessary). Population: 8 in 66 Red, 3 finer (4/13). NGC ID# 22A6, PCGS# 2344

3671 1897 PR65 Red and Brown PCGS. CAC. Attractive shades of cerulean-blue, burnt-orange, and violet toning visit the well-preserved surfaces of this delightful Gem. The design elements are sharply rendered and eye appeal is outstanding. Population: 46 in 65 Red and Brown, 20 finer (5/13). NGC ID# 22AK, PCGS# 2379

3672 1900 PR66 Red PCGS. Dazzling mirrored brilliance with flashes of rose and lime-green iridescence along the reverse periphery. All design motifs are exquisitely struck up. A terrific type coin candidate. Population: 15 in 66 Red, 6 finer (4/13). NGC ID# 22AN, PCGS# 2389

3673 1902 PR66 Red PCGS. Apple-green and rose-red share the obverse while the reverse is aquamarine. Fully struck and virtually carbon-free with a single minute tick near the O in ONE. Certified in a green label holder.
Ex: Long Beach Bullet (Heritage, 6/2000), lot 67. NGC ID# 22AR, PCGS# 2395

3674 1903 PR66 Red PCGS. The fire-red and jade-green obverse margin frames an orange-gold center. The reverse is mint-green overall with a blush of cherry-red at the exergue. Fully struck and flawless. Encapsulated in an old green label holder. Population: 31 in 66 Red, 11 finer (4/13). NGC ID# 22AS, PCGS# 2398

3675 1903 PR66 Red PCGS. The red surfaces exhibit fully struck design features and are devoid of mentionable marks or spots. This Premium Gem yields exquisite technical quality and aesthetic appeal. Population: 31 in 66 Red, 11 finer (4/13). NGC ID# 22AS, PCGS# 2398

LINCOLN CENTS

3676 1909 VDB MS67 Red PCGS. Glowing, cherry-red color and no spotting. A fully defined, Superb example of this popular first-year Lincoln Cent. NGC ID# 22AZ, PCGS# 2425

3677 1909 VDB MS67 Red PCGS. CAC. A sumptuous peach-hued example of this one-year type, strongly detailed with swirling luster that shows a hint of satin. PCGS has graded just one MS68 Red or finer example (4/13). NGC ID# 22AZ, PCGS# 2425

3678 1909-S VDB AU50 PCGS. A lightly handled example, this piece displays pleasing overall even golden-brown color and nice eye appeal. This well-struck coin retains strong details, including the initials. Minor buildup appears adjacent to the devices. NGC ID# 22B2, PCGS# 2426

3679 1909-S VDB AU55 NGC. Light chocolate brown color with splashes of olive-green provides this Choice AU piece with a pleasing appearance. The design elements exhibit nice detail on this key-date representative, including the VDB initials. There are no marks worthy of mention. NGC ID# 22B2, PCGS# 2426

3680 1909-S VDB — Spot Removals — NGC Details. Unc. An area near the right base of the N in CENT is tooled and darkly retoned. Otherwise, a lustrous Uncirculated example of the introductory and low mintage key with rich ruby-red, plum-mauve, cobalt-blue, and sun-gold toning. NGC ID# 22B2, PCGS# 2426

3681 1909-S VDB Questionable Color — PCGS Genuine. Unc Details. We have certainly seen less-convincing pieces certified in no-problem holders, but we suggest potential bidders inspect the color, hopefully in person, and decide for themselves. Any Uncirculated 1909-S VDB cent is the subject of intense collector demand, and we suspect this piece will be, as well. In terms of contact (or lack thereof), we would note that the surfaces are considerably nicer than “mere MS60.” The strike is sharp, as usual.

3682 1909-S VDB MS62 Brown PCGS. Glints of red appear on the reverse while the obverse is mostly brown with a thin red ring. Both sides are fortunately free of carbon. A noticeable horizontal scrape across the cheek largely accounts for the grade. NGC ID# 22B2, PCGS# 2426

3683 1909-S VDB MS63 Brown ANACS. Uniform, mellow tan patina glides over both sides of this Select key date representative. This is a nicely detailed piece, including a strong VDB and sharp lines in the wheat stalk. Really a very pretty coin. NGC ID# 22B2, PCGS# 2426

3684 1909-S VDB MS63 Brown PCGS. The important V.D.B. initials are well defined on this lovely Select example. Rich luster and lovely wheat-gold color provide this piece with a very attractive appearance. A couple of tiny carbon spots are present. NGC ID# 22B2, PCGS# 2426

3685 1909-S VDB MS64 Brown PCGS. This near-Gem boasts the sharp strike usual for the issue, but considerable orange-red remains near the peripheries. Each side is free of carbon and nice for the grade. NGC ID# 22B2, PCGS# 2426

3686 1909-S VDB MS64 Brown PCGS. CAC. Pleasing apple-green and golden-brown blend throughout this coruscating and mark-free near-Gem. The strike is crisp, especially on the all-important VDB initials. Certified in an older generation holder. NGC ID# 22B2, PCGS# 2426

3687 1909-S VDB MS63 Red and Brown PCGS. Both sides show considerable orange mint luster attractively blended with olive-brown toning. Sharply struck and highly appealing with hints of bluish overtones. NGC ID# 22B2, PCGS# 2427

3688 1909-S VDB MS63 Red and Brown PCGS. CAC. A pleasing Select example of the most famous Lincoln cent, well-defined with minor, scattered marks. Parts of the fields remain copper-orange, while the right obverse and much of the reverse periphery have turned walnut-brown.
Ex: ANA Signature (Heritage, 8/2007), lot 234. NGC ID# 22B2, PCGS# 2427

3689 1909-S VDB — Minor Reverse Lamination — MS64 Red and Brown PCGS. Both sides display faded mint red along with predominant medium brown toning. Near 7 o'clock on the reverse border is a bright coppery planchet flake or lamination of mint origin. This may prove to be interesting to certain collectors and a distraction to others.
Ex: Milwaukee Central States Signature (Heritage, 5/2004), lot 5573, which realized \$2,875. NGC ID# 22B2, PCGS# 2427

3690 1909-S VDB MS64 Red and Brown PCGS. Generous orange-gold luster remains on this near-Gem that is patinated with splashes of light brown. The design elements are sharply impressed, including the V.D.B. initials. NGC ID# 22B2, PCGS# 2427

3691 1909-S VDB MS64 Red and Brown PCGS. The obverse is fairly well mellowed to brown but considerable red-orange color clings to the reverse, and both sides are well-preserved and free of singular marks or carbon. NGC ID# 22B2, PCGS# 2427

3692 1909-S VDB MS64 Red and Brown PCGS. The obverse is largely brown with a ring of orange, while the reverse is about 50% orange-red. Both sides are free of singular contact or carbon, and the strike is well-detailed. NGC ID# 22B2, PCGS# 2427

3693 1909-S VDB MS64 Red and Brown PCGS. Vibrant orange color along with a few hints of red and pale sage-green covers the vast majority of this appealing Choice example. The initials display a pleasing level of definition. A few small carbon spots are present on the reverse. NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, MS65 Red and Brown Great Example of Longtime Favorite

3694 1909-S VDB MS65 Red and Brown NGC. This dusky delight has shimmering reddish-orange overtones mixed with mahogany and violet-brown. The initials at the bottom of the reverse are clear and the surfaces have few significant marks. A tiny spot of deeper color is noted behind Lincoln's head, but this is a minor concern on an excellent Red and Brown Gem example of the iconic 20th century American key-date coin. NGC ID# 22B2, PCGS# 2427

Famous 1909-S VDB Cent Red and Brown Gem

3695 1909-S VDB MS65 Red and Brown PCGS. Dusky peach-gold shades dominate this fully struck and coruscating wood-grain Gem. Since marks are virtually absent, only scattered minute flecks limit the third party grade. The lowest mintage regular issue and well known to even entry-level cent collectors. Certified in a green label holder. NGC ID# 22B2, PCGS# 2427

Gem Red and Brown 1909-S VDB Cent

3696 1909-S VDB MS65 Red and Brown PCGS. Large areas of vibrant orange color provide a nice contrast to the light tan shade also present. This lustrous well-preserved piece displays strong striking details overall, with the typical incompleteness noted at the initials. Tiny carbon spots appear on both sides. NGC ID# 22B2, PCGS# 2427

3697 1909-S VDB MS63 Red PCGS. This popular key date displays sharply struck design elements and attractive coppery-gold patina. Small contact marks are visible on Lincoln's portrait, but both sides are devoid of any significant spotting. NGC ID# 22B2, PCGS# 2428

Red Near-Gem 1909-S VDB Cent

- 3698 1909-S VDB MS64 Red NGC.** This distinctive 1909-S VDB cent, a highly popular issue among 20th century coinage, exhibits brilliant gold luster with steaks of deeper reddish mint color, the reverse adding traces of powder-blue toning. The bold strike includes a sharp appearing VDB at the lower reverse. NGC ID# 22B2, PCGS# 2428

**1909-S VDB Lincoln Cent, MS64 Red
First-Year Key**

- 3699 1909-S VDB MS64 Red PCGS. CAC.** The 1909-S VDB Lincoln cent is the low-mintage first-year key to the series, prized by collectors in all grades and conditions. This well-detailed Choice example shows the all-important designer's initials in bold relief and the original red surfaces show just a hint of light brown shading. NGC ID# 22B2, PCGS# 2428

**1909 Cent, MS67 Red
First-Year Type Coin**

- 3700 1909 MS67 Red PCGS.** Rich orange color, particularly on the obverse, with touches of peach and a small patch of bright straw-gold within the curve at the top of the reverse adds to the tremendous eye appeal of this Superb Gem. This attractive piece is well-suited to display with either side facing up. Population: 68 in 67 (2 in 67+) Deep Cameo Red, 0 finer (4/13). NGC ID# 22B3, PCGS# 2431

**1909 Lincoln Cent, Red Superb Gem
Fiery Orange Luster**

- 3701 1909 MS67 Red PCGS. CAC.** This Superb Gem first-year Lincoln cent exhibits fiery orange luster with pristine, nearly perfect surfaces. The only blemishes are a few minuscule carbon flecks and they are only visible with a glass. Population: 68 in 67 (2 in 67+) Red, 0 finer (5/13). NGC ID# 22B3, PCGS# 2431

**1909 Lincoln Cent, MS67 Red
Tied for Finest Certified**

- 3702 1909 MS67 Red PCGS. CAC.** This boldly detailed Superb Gem has pristine surfaces with exceptional eye appeal. Both sides are brilliant light orange, showing frosty mint luster. Close examination with a glass reveals only a few trivial carbon spots. Population: 68 in 67 (2 in 67+) Red, 0 finer (5/13). NGC ID# 22B3, PCGS# 2431

-
- 3703 1909-S MS65 Red PCGS.** Bright and lustrous, this Gem possesses brilliant color that includes small areas of deeper orange and hints of red. The surfaces are virtually pristine and only a few tiny carbon spots are present. This coin displays a high degree of eye appeal. *Ex: Dallas Bullet Sale (Heritage, 11/2003), lot 175, which realized \$977.50.* NGC ID# 22B4, PCGS# 2434

- 3704 1909-S S Over Horizontal S MS65 Red PCGS. FS-1502.** An intricately struck and lustrous peach-gold Gem. Splendid aside from an inconspicuous mark on Lincoln's temple. *Ex: St. Louis Central States Signature (Heritage, 5/2005), lot 5488, which realized \$1,092.50.* PCGS# 92434

**1910-S Cent, MS66 Red
Strong Second-Year Coin**

- 3705 1910-S MS66 Red PCGS. CAC.** The second-year San Francisco Lincoln cent issue was not saved in the same quantities as its predecessors, and Red coins finer than this Premium Gem are condition rarities. Peach-gold luster prevails on much of each side, though apricot and gold hues also are in evidence. A bright and pleasing coin. Population: 64 in 66 (1 in 66+) Red, 2 finer (4/13). NGC ID# 22B6, PCGS# 2440
- 3706 1911 MS66 Red PCGS.** A remarkable Premium Gem, with blazing mint luster and original red surfaces that show no mentionable signs of contact. Eye appeal is terrific. PCGS has graded eight numerically finer examples (4/13). NGC ID# 22B7, PCGS# 2443
- 3707 1911-D MS65 Red PCGS.** A sharply struck, satiny, and unabraded Gem, this piece exhibits lightly textured surfaces. The luminous gold color is seamless aside from infrequent traces of carbon. Struck from moderately rotated dies. Only 21 examples have achieved higher numeric grades from PCGS (4/13).
Ex: New York Signature (Heritage, 7/2004), lot 5257, which realized \$1,610. NGC ID# 22B8, PCGS# 2446
- 3708 1912 MS66 Red PCGS.** Vibrant mint luster provides both sides of this Premium Gem with tremendous visual appeal. Rich orange color further adds to the attractiveness. Only 8 examples have been awarded higher numeric grades by PCGS (4/13). NGC ID# 22BA, PCGS# 2452
- 3709 1912-S MS64 Red PCGS.** Golden-orange color and rich luster provide this Choice example with a strong degree of eye appeal. The strike is sharp overall, with only minor incompleteness noted. Tiny carbon spots are present, primarily on the reverse. Population: 194 in 64 (7 in 64+) Red, 51 finer (4/13).
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 5294, which realized \$833.75. NGC ID# 22BC, PCGS# 2458
- 3710 1913-S MS64 Red PCGS.** Subdued pumpkin-orange and copper colors are present on this near-Gem example. Minor die erosion resulted in striations along the left border of Lincoln's jacket. Areas of carbon appear on both sides. PCGS has awarded higher numeric grades to only 49 examples (4/13).
Ex: Long Beach Signature (Heritage, 9/2004), lot 5427, which realized \$776.25. NGC ID# 22BF, PCGS# 2467
- 3711 1914-D AU55 NGC.** Much detail remains on this Choice AU key date, although little luster survives on the medium-brown surfaces. Few contact marks appear on either side of this well-struck piece, and carbon is absent. NGC ID# 22BH, PCGS# 2471
- 3712 1914-S MS64 Red PCGS.** Well struck, save for softness on the AM of AMERICA, lustrous, and well preserved, with scattered verdigris on the obverse, and a large bit of verdigris near three o'clock on the reverse rim. The population data has changed very little since this coin was offered in 2004, with the current data standing at 131 in 64 (1 in 64+) Red, 35 finer (4/13).
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 5301, which realized \$1,322.50. NGC ID# 22BJ, PCGS# 2476
- 3713 1915 MS65 Red PCGS. CAC.** Original orange luster exudes from the well-preserved surfaces of this Gem Lincoln. The design elements are well brought up, save for the often-seen softness in the right (facing) wheat stalk. Nevertheless, this piece offers great eye appeal. NGC ID# 22BK, PCGS# 2479

- 3714 1915-D MS65 Red PCGS.** The original orange-red surfaces of this attractive Gem radiate vibrant mint luster and show few signs of contact. PCGS has graded 23 numerically finer examples (5/13). NGC ID# 22BL, PCGS# 2482

**1916 Lincoln Cent, MS67 Red
Bright, Undiminished Mint Luster**

- 3715 1916 MS67 Red PCGS.** The surfaces are undiminished over the passage of nearly a century with even cherry-red color on the obverse and a lighter, orange-red reverse. The strike is absolutely full. The 1916 is curiously scarce for an issue that had more than 131 million pieces struck and is generally considered to be common. Population: 37 in 67 (1 in 67+) Red, 0 finer (4/13). NGC ID# 22BN, PCGS# 2488
- 3716 1916-S MS64 Red PCGS.** This is a pale orange example with sharp design elements. A few minor abrasions and small carbon spots are noted. Considerable erosion of the die resulted in the texture seen bordering much of the portrait and other portions of the obverse. Only 22 examples have achieved higher numeric grades from PCGS (4/13).
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 5311, which realized \$1,035. NGC ID# 22BR, PCGS# 2494
- 3717 1917 MS66 Red PCGS.** Dazzling luster radiates through golden-orange patina that reveals hints of lime-green undertones on this Premium Gem exhibiting a strong degree of eye appeal. The design features are sharply impressed, with bold definition evident on Lincoln's hair and beard. A couple of minute marks on the cheek and another in the field right of the beard are not bothersome. Population: 126 in 66 (5 in 66+) Red, 17 finer (4/13).
Ex: Central States St. Louis Signature (Heritage, 5/2005), lot 555, which realized \$1,725. NGC ID# 22BS, PCGS# 2497
- 3718 1917-D MS64 Red PCGS.** Deep orange, cherry, and magenta hues dominate the eye appeal of this deep-and-delightful Red near-Gem with glassy luster. Minor carbon is noted near the rims but has little influence on the overall eye appeal. NGC ID# 22BT, PCGS# 2500
- 3719 1917-D MS65 Red NGC.** Attractive colors that include shades of copper, red, pink, denim-blue, and violet create a pleasing appearance for this Gem. Portions of the rim exhibit rich color. A few marks appear at several of the letters on the reverse. Census: 20 in 65 Red, 0 finer (4/13). NGC ID# 22BT, PCGS# 2500
- 3720 1917-S MS64 Red PCGS.** This better date cent has a lovely reddish-tan patina with hints of green and retains much original mint luster. Somewhat softly struck, as is generally the case with this issue. Population: 59 in 64 Red, 17 finer (4/13).
Ex: Long Beach Signature (Heritage, 9/2004), lot 5460, which realized \$776.25. NGC ID# 22BU, PCGS# 2503
- 3721 1918 MS65 Red and Brown NGC. CAC.** The emphasis in 1918 Philadelphia Lincoln cent production was on prodigious quantity, not pristine quality. This Red and Brown Gem is one of few in this grade, showing no carbon or mentionable contact, a piece just over the border from Red. The dies are not fresh, but not yet worn-out, either. Census: 61 in 65 Red and Brown, 4 finer (4/13). NGC ID# 22BV, PCGS# 2505

3722 1918 MS66 Red PCGS. An extremely lustrous and boldly impressed example, this piece displays fantastic tan-red color and a small patch of deep red-orange color above the E in ONE on the reverse. This is a beautifully preserved Premium Gem with a high degree of eye appeal. Only 17 examples have been assigned higher numeric grades by PCGS (4/13).

Ex: *Baltimore Signature (Heritage, 7/2003)*, lot 5618, which realized \$1,035. NGC ID# 22BV, PCGS# 2506

3723 1919 MS67 Red PCGS. Razor-sharp definition is evident on all design elements and the original red surfaces radiate vibrant mint luster, with no sign of carbon. Population: 61 in 67 (1 in 67+) Red, 15 finer (4/13). NGC ID# 22BY, PCGS# 2515

3724 1919-S MS64 Red PCGS. A smooth and satiny medium gold near-Gem, this piece displays an array of bold, intermingled colors when examined closely, further enhancing the eye appeal. Nicely struck, and desirable in full Red. The reverse has a small but interesting rim die break at 4 o'clock. PCGS has awarded higher numeric grades to only 21 pieces (4/13).

Ex: *Dallas Signature (Heritage, 11/2006)*, lot 196, which realized \$1,840. NGC ID# 22C2, PCGS# 2521

3725 1921 MS66 Red PCGS. This spectacular Premium Gem exhibits sharply detailed design elements and original red surfaces, with vibrant mint luster and no sign of carbon. Population: 64 in 66 (1 in 66+) Red, 11 finer (4/13). NGC ID# 22C6, PCGS# 2533

3726 1921-S MS64 Red PCGS. The surfaces are a lustrous copper-gold on this near-Gem. The mintmark and other devices display an attractive level of detail overall, with some incompleteness observed, as is generally the case for this issue. A few minute marks appear on the upper reverse. Population: 87 in 64 Red, 17 finer (4/13).

Ex: *ANA San Francisco Signature (Heritage, 7/2005)*, lot 5274, which realized \$1,725. NGC ID# 22C7, PCGS# 2536

3727 1922-D MS65 Red PCGS. Well struck for the issue, and with shimmering luster across the unmarked surfaces. The obverse has crimson and rose hues, with hints of olive color intermingled throughout the reverse. Tiny carbon spots are present. Population: 83 in 65 Red, 10 finer (4/13).

Ex: *Long Beach Signature (Heritage, 2/2005)*, lot 5476, which realized \$1,725. NGC ID# 22C8, PCGS# 2539

3728 1922 No D Strong Reverse VF20 PCGS. CAC. FS-401. Die Pair 2. Toned chocolate-brown with a hint of steel-gray, particularly on the reverse. Only lightly abraded, and just one small spot is noted near the E in WE. The lines of the wheat ears are mostly separated. NGC ID# 22C9, PCGS# 3285

3729 1922 No D Strong Reverse VF30 PCGS. FS-401. Die Pair 2. All diagnostics of this coveted variety are evident, such as the sharp second 2 in the date. The lines in the wheat ears are nearly fully separated. The chocolate-brown surfaces show a tick on the jaw and a pinscratch from 6:30 to the E in ONE. NGC ID# 22C9, PCGS# 3285

3730 1922 No D Weak Reverse XF40 NGC. Die Pair 3. No trace of the Denver mintmark is evident on the present Lincoln cent, though the variety is not the coveted FS-401 Die Pair 2. The softly struck surfaces are medium brown and relatively mark-free. The borders display luster. PCGS# 2540

3731 1923 MS66 Red PCGS. This Premium Gem example displays a strong degree of eye appeal, due in part to bright and radiant full red color along with pleasing mint luster. During this time, the hubs and master dies became weak from use and Lincoln's hair detail became soft, as is the case with this piece. A few tiny contact marks and flyspecks appear on each side of this otherwise splendid coin. Population: 89 in 66 (1 in 66+) Red, 14 finer (4/13).

Ex: *Central States Signature (Heritage, 5/2004)*, lot 5687, which realized \$1,499.60. NGC ID# 22CA, PCGS# 2545

3732 1923-S MS63 Red PCGS. Attractive color on both sides provides this piece with lovely eye appeal. This Select example exhibits a pleasing level of design detail. A splash of red appears near the T in CENT. A couple of small ticks are present between Lincoln's ear and cheek and a strike-through appears near the IB in PLURIBUS. Population: 25 in 63 (1 in 63+) Red, 78 finer (4/13).

Ex: *Long Beach Signature (Heritage, 9/2006)*, lot 499, which realized \$977.50. NGC ID# 22CB, PCGS# 2548

1924 Cent, MS66 Red High-Quality Type Coin From the 1920s

3733 1924 MS66 Red PCGS. CAC. Rich, frosted red mint luster swirls around both sides of this immaculate, upper-end coin. Heavy metal flow gives the coin a matte appearance beneath the cartwheel mint frost. Essentially unaffected by post-striking abrasions. Population: 68 in 66 (1 in 66+) Red, 7 finer (4/13).

Ex: *Central States Signature (4/2006)*, lot 644. NGC ID# 22CC, PCGS# 2551

3734 1924-D MS63 Red PCGS. A Select example of a semikey issue with relatively few mint state survivors, this representative displays attractive color and satin luster. This piece exhibits the weakness this issue is known for. Often the mintmark lacks definition, as is the case with this coin. Attractive color and satin luster are present. Numerous small carbon spots appear.

Ex: *Portland Bullet Sale (Heritage, 3/2004)*, lot 139, which realized \$506. NGC ID# 22CD, PCGS# 2554

3735 1924-D MS64 Red PCGS. The lustrous red surfaces of this near-Gem cent exhibit well struck design features and is very nicely preserved. Gem and finer coins are difficult to come by; PCGS and NGC have seen fewer than 60 such pieces. NGC ID# 22CD, PCGS# 2554

3736 1924-S MS63 Red PCGS. Splashes of red and orange-red color add to the eye appeal of this piece. The strike was well executed overall on this lustrous example, with minor incompleteness noted at the last few letters of TRUST. Contact marks on the obverse were a grade-limiting factor. Population: 20 in 63 Red, 90 finer (4/13). NGC ID# 22CE, PCGS# 2557

3737 1925 MS67 Red PCGS. This is a lovely Superb Gem with bright yellow-orange color, vibrant luster, a very good strike and undisturbed surfaces. As expected, these attributes add up to great overall eye appeal. Population: 58 in 67 Red, 0 finer (4/13). NGC ID# 22CF, PCGS# 2560

3738 1925-S MS63 Red PCGS. A lustrous pumpkin-gold example of this conditionally rare branch mint issue. Free from even the slightest contact, though pinpoint flecks are present. Struck from a well-worn obverse die. Certified in a green label holder. NGC ID# 22CH, PCGS# 2566

**1925-S Cent, MS64 Red
Deep, Glowing Mint Luster**

- 3739 1925-S MS64 Red NGC.** The surfaces are primarily orange-red, with a better-than-average strike for the issue and some scattered minor flecks. The 1925-S Lincoln cent in Gem Red condition is a notable rarity, making this piece worthy of serious consideration. Census: 25 in 64 Red, 3 finer (4/13). NGC ID# 22CH, PCGS# 2566

- 3740 1926 MS67 Red PCGS.** Rich lustrous honey-gold surfaces, along with a few splashes of other shades serving as accents, provide this Superb Gem with a high level of eye appeal. The coin is well struck and displays only a few tiny flyspecks of carbon. Population: 87 in 67 Red, 0 finer (4/13).

Ex: Central States Columbus Signature (Heritage, 4/2002), lot 5238, which realized \$891.25. NGC ID# 22CJ, PCGS# 2569

- 3741 1926 MS67 Red PCGS. CAC.** Orange-gold luster radiates from both sides of this lovely Superb Gem, and a solid strike imparts excellent detail to the design motifs. The CAC sticker confirms the great eye appeal. Population: 87 in 67 Red, 0 finer (4/13). NGC ID# 22CJ, PCGS# 2569

- 3742 1926-S MS64 Red and Brown PCGS.** The Red and Brown designation comes more from the toned reverse, as the obverse is nearly full red. This is a well struck piece devoid of mentionable marks and spots. PCGS has graded only 14 coins finer (5/13). NGC ID# 22CL, PCGS# 2574

- 3743 1926-S MS63 Red PCGS.** Variegated color on both sides of this Select example provides this piece with an interesting appearance. Lincoln's portrait includes several splashes of emerald-green, with areas of bright red-orange and sea-green present on the reverse. A few carbon specks appear. Population: 14 in 63 Red, 69 finer (4/13). *Ex: Pittsburgh Signature (Heritage, 8/2004), lot 5339, which realized \$1,725. NGC ID# 22CL, PCGS# 2575*

**1927 Cent, MS67 Red
Fresh and Vibrant**

- 3744 1927 MS67 Red PCGS. CAC.** Color ranges from pale copper-gold at the upper obverse to a richer orange on and around Lincoln's coat. Bright with a clean appearance and minimal carbon, far from a guarantee on a more than 80-year-old coin such as this Red Superb Gem. Population: 37 in 67 Red, 0 finer (4/13). NGC ID# 22CM, PCGS# 2578

- 3745 1927-S MS64 Red PCGS.** A well struck example, this near-Gem displays rich luster and vibrant red-orange color that is deeper on the obverse. Lincoln's forehead and cheek reveal additional colors, including mint-green, deep red, and plum. A few contact marks are present on each side, along with some scattered flyspecks. Only 16 examples have been awarded higher numeric grades by PCGS.

Ex: Dallas Signature (Heritage, 12/2004), lot 5163, which realized \$2,070. NGC ID# 22CP, PCGS# 2584

- 3746 1928-D MS65 Red PCGS.** A bright, nicely detailed Gem, this coin possesses pleasing luster and includes splashes of pink, red, mint-green, and steel-blue. Tiny flyspecks of carbon are present. Population: 78 in 65 Red, 12 finer (4/13).

Ex: Palm Beach Signature (Heritage, 11/2004), lot 5547, which realized \$1,063.75. NGC ID# 22CS, PCGS# 2590

- 3747 1934 MS67 Red PCGS. CAC.** Beautiful copper-orange luster emboldens this sharply struck Superb Gem. Both sides are nicely preserved.. PCGS and NGC have graded only 11 examples finer (5/13). NGC ID# 22D9, PCGS# 2635

**1936 Cent, MS65+ Red
FS-102, Doubled Die Obverse**

- 3748 1936 Doubled Die Obverse Type Two MS65+ Red PCGS. CAC. FS-102.** The date is strongly die doubled, similar to FS-101, though LIBERTY and TRUST show less doubling than on the latter variety. A lustrous peach-red Gem with mark-free surfaces and a good strike. A loupe reveals minute obverse carbon. Population: 16 in 65 (1 in 65+) Red, 11 finer (5/13). PCGS# 92650

- 3749 1941 Doubled Die Obverse, DDO-001 MS65 Red ANACS. FS-102.** Similar to FS-101, but in slightly greater demand, this remarkable Gem shows the doubling on IN GOD WE TRUST and the first hubbing was almost as strong as the second. PCGS# 37780

- 3750 1943 MS68 PCGS.** This Superb Gem example exhibits a later die state crack across Lincoln's coat. Boldly struck and bright with no significant flaws, this piece exhibits evidence of die clashing on the reverse with a partial outline of Lincoln's portrait. Rich satin luster further enhances the eye appeal. Population: 47 in 68, 0 finer (4/13).

Ex: Baltimore Signature (Heritage, 7/2003), lot 5678, which realized \$718.75. NGC ID# 220000, PCGS# 2711

- 3751 1943-D MS68 PCGS.** A beautifully struck, well-preserved example, this coin exhibits a tremendous degree of visual allure. A virtually pristine silver-white representative of this single-year type, this piece displays attractive satin luster. Neither PCGS nor NGC has awarded a higher numeric grade to a single example (4/13). NGC ID# 22000000, PCGS# 2714

- 3752 1943-D/D MS65 PCGS. FS-501.** The most desirable repunched mintmark steel cent variety, listed and photographed in the *Guide Book*. The secondary mintmark has a nearly full outline and is widely repunched to the southwest. Lustrous and spot-free with only minor field grazes. Population: 38 in 65, 32 finer (4/13). PCGS# 2715

- 3753 1943-S Doubled Die Obverse MS65 PCGS. FS-101.** The 9 in the date shows the strongest doubling on this steel cent variety. Crisply struck, lustrous, and void of contact with minute pale gray freckles distributed on the reverse. Population: 15 in 65, 18 finer (4/13). PCGS# 37822

- 3754 1943-S Doubled Die Obverse MS66 PCGS. FS-101.** The pick-up point for this steel cent variety is the 9 in the date, which has a strong spread to the northwest. Lustrous and pristine with a good strike and a few olive freckles on the right obverse field. Population: 13 in 66 (1 in 66+), 5 finer (4/13). PCGS# 37822
- 3755 1943-S Doubled Die Obverse MS66 PCGS. CAC. FS-101.** Die doubling is evident on the bowtie and, especially, the 194 in the date. Intricately struck, lustrous, and immaculate with pastel rose and aqua undertones. Population: 13 in 66 (1 in 66+), 5 finer (4/13). PCGS# 37822
- 3756 1945 MS67 Red PCGS.** Rich lustrous surfaces and blazing orange color with hints of red and yellow provide this Superb Gem with outstanding visual allure. The coin exhibits a pleasing strike. A few minor contact marks are present, primarily on the reverse. Population: 48 in 67 Red, 0 finer (4/13). NGC ID# 22EG, PCGS# 2734
- 3757 1948-D MS67 Red PCGS.** Brick-red color and blatant eye appeal are the hallmarks of this sharply struck Superb Gem Red 1948-D cent. The color is especially desirable when found on nice, problem-free postwar cents such as this example. Population: 48 in 67 Red, 0 finer (5/13). NGC ID# 22ET, PCGS# 2764
- 3758 1948-D MS67 Red PCGS.** Brick-red surfaces on this Superb Gem show a few tiny ticks but no carbon or singular contact. A boldly detailed and highly attractive example. Population: 47 in 67 Red, 0 finer (4/13). NGC ID# 22ET, PCGS# 2764
- 3759 1949-D MS67 Red PCGS.** Bright orange-gold color adorns both sides of this Superb Gem. A solid strike sharpens the design elements. Many 1949-D cents were poorly made, showing weak strikes, water marks, or other imperfections. The present offering is therefore quite exceptional. Population: 32 in 67 Red, 0 finer (4/13). NGC ID# 22EW, PCGS# 2773
- 3760 1950-D MS67 Red PCGS.** Blazing red-orange color and a tremendous degree of luster provide both sides of this Superb Gem with exceptional eye appeal, even at a quick glance. A few splashes of cherry serve as accents. The coin displays a strong level of detail and areas of as-made die lines are present. A few tiny spots appear on each side, with the few contact marks appearing on the reverse. Population: 34 in 67 Red, 0 finer (4/13). NGC ID# 22EZ, PCGS# 2782
- 3761 1950-S MS67 Red PCGS.** Glowing satin luster covers the unblemished fields and crisply defined devices. Hints of subdued green-gold color ring the dusky orange central devices. Population: 48 in 67 Red, 0 finer (4/13).
Ex: Long Beach Bullet Sale (Heritage, 1/2004), lot 265, which realized \$2,070. NGC ID# 22F2, PCGS# 2785
- 3762 1950-S MS67 Red PCGS.** Copper-gold luster endows both sides of this Superb Gem cent, each of which exhibits well defined design elements. A couple of minuscule ticks detract nothing from the overall eye appeal. Population: 48 in 67 Red, 0 finer (4/13). NGC ID# 22F2, PCGS# 2785
- 3763 1951-D MS67 Red PCGS. CAC.** Bright reddish-gold luster and sharply struck devices endow both sides of this magnificent Superb Gem. This coin possesses outstanding overall eye appeal. Population: 83 in 67 Red, 0 finer (4/13). NGC ID# 22F4, PCGS# 2791
- 3764 1951-D MS67 Red PCGS. CAC.** Red luster cascades over this Superb Gem cent, and a solid strike delivers strong definition to the design elements. Both sides are devoid of mentionable marks or spots. Population: 83 in 67 Red, 0 finer (4/13). NGC ID# 22F4, PCGS# 2791
- 3765 1951-S MS67 Red PCGS.** Bright orange coloration runs over the well preserved surfaces of this lovely Lincoln cent. The design elements are very well brought up. Very appealing for this San Francisco issue. Population: 61 in 67 Red, 0 finer (4/13). NGC ID# 22F5, PCGS# 2794

- 3766 1952-D MS67 Red PCGS.** Rich satin luster and bold color create a lovely appearance for this bright Superb Gem. The coin displays a pleasing strike. A few tiny flyspecks are present. Population: 51 in 67 Red, 0 finer (4/13). NGC ID# 22F7, PCGS# 2800
- 3767 1954-D MS67 Red PCGS.** A lovely Superb Gem displaying blazing luster and outstanding color, the reverse is particularly attractive. Population: 46 in 67 Red, 0 finer (4/13).
Ex: FUN Signature (Heritage, 1/2004), lot 4714, which realized \$920. NGC ID# 22FD, PCGS# 2818
- 3768 1955 Doubled Die Obverse — Altered Color — NGC Details. AU. FS-101.** This satiny key date cent has barely a trace of wear but is retoned. The obverse is apple-green, as is the reverse margin, while the reverse center is peach-gold. A loupe reveals only a single tick on the field near the forehead. NGC ID# 22FG, PCGS# 2825
- 3769 1955 Doubled Die Obverse — Whizzed — NGC Details. AU. FS-101.** Whizzed to pass as a red Uncirculated coin, but a loupe reveals a granular texture, a luminous sheen, and blurring of definition. Orange-gold at the centers with rose-red and lime-green at the margins. A collectible key date example.
- 3770 1955 Doubled Die Obverse AU55 NGC. FS-101.** A charming medium brown example of this famous and dramatic mint error. The strike is precise and the coruscating surfaces display minimal contact. NGC ID# 22FG, PCGS# 2825
- 3771 1955 Doubled Die Obverse AU58 PCGS. FS-101.** A lustrous example of the famously strong obverse doubled die. Medium brown overall with glimpses of orange-gold in design crevices. Smooth aside from a single thin mark above the ear. NGC ID# 22FG, PCGS# 2825
- 3772 1955 Doubled Die Obverse — Altered Color — NGC Details. Unc. FS-101.** The surfaces of this famous overdate show some unnatural brown toning, but the design elements are well-detailed and the doubling is bold. A still-attractive example that retains considerable mint luster. NGC ID# 22FG, PCGS# 2825
- 3773 1955 Doubled Die Obverse MS61 Brown NGC. FS-101.** This lustrous doubled die cent is medium brown aside from lighter red-gold high points on the jaw and cheekbone. A loupe reveals only minute contact. Among the keys to the series. NGC ID# 22FG, PCGS# 2825

1955 Doubled Die Obverse Cent MS63+ Brown

- 3774 1955 Doubled Die Obverse MS63+ Brown PCGS. CAC. FS-101.** A sharply struck representative of this blatant and famous doubled die variety. Rich ocean-blue, medium brown, and lavender toning graces smooth and coruscating surfaces. The obverse provides excellent eye appeal and the reverse shows only minor carbon near the C and T in CENT. NGC ID# 22FG, PCGS# 2825
- 3775 1956-D MS67 Red PCGS.** Much more elusive than generally thought at the Superb Gem Red level, the 1956-D was struck to the extent of more than 1.09 billion coins, but most examples suffer from excessive contact, poor planchet quality, or outright carbon spots. This flame-red piece shows a few tiny marks at the lower bust but is pristine otherwise. Some microscopic brownish flecks in the fields are *not* carbon. Population: 32 in 67 Red, 0 finer (4/13). NGC ID# 22FL, PCGS# 2839

3776 1956-D MS67 Red PCGS. Pleasing orange luster energizes the sharply struck surfaces of this D-mint superb Gem. A few scattered light ticks are within the parameters of the designated grade. Population: 32 in 67 Red, 0 finer (4/13). NGC ID# 22FL, PCGS# 2839

3777 1956-D MS67 Red PCGS. The original red surfaces of this magnificent Superb Gem display blazing mint luster, with outstanding eye appeal and sharply struck devices. A few light flecks do not detract. Very elusive in this grade. Population: 32 in 67 Red, 0 finer (4/13). NGC ID# 22FL, PCGS# 2839

1957-D Cent, MS67 Red Significant Registry Coin

3778 1957-D MS67 Red PCGS. While more than a billion 1957-D cents were struck, PCGS has graded just 29 examples as MS67 Red with none numerically finer (4/13), making this Superb Gem a Registry collector essential. Apricot-gold surfaces are brightly lustrous with hints of pink-peach at the margins, more prominently on the reverse. NGC ID# 22FN, PCGS# 2845

3779 1958 MS67 Red PCGS. A fully lustrous orange-red Superb Gem, this piece includes hints of cherry at portions of the reverse periphery. A few light carbon specks are present along with a few trivial contact marks on each side. Population: 23 in 67 Red, 0 finer (4/13).
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 5358, which realized \$2,415. NGC ID# 22FP, PCGS# 2848

3780 1960-D Small Over Large Date MS66 Red PCGS. FS-101. The Small Date is easily visible over the larger undertype and the secondary mintmark is lightly punched north of the primary D. The original red surfaces show dramatic die striations in the obverse fields, with vibrant mint luster and well-detailed design elements. PCGS# 82869

3781 1968 MS67 Red PCGS. Tied with a few others as finest certified, this Superb Gem exhibits pristine original orange surfaces with satin luster. A glass is required to see the scattered flecks that prevent a higher grade. Population: 16 in 67 Red, 0 finer (4/13). NGC ID# 22GC, PCGS# 2905

3782 1970-S Large Date MS67 Red PCGS. Pleasing mint-red, coral, sunset-orange, and steel-blue coloration decorates the bright, highly lustrous surfaces. Typically boldly defined with a few small marks on Lincoln's face and a wispy luster graze in the upper right obverse field. Population: 20 in 67 Red, 0 finer (4/13).
Ex: Central States St. Louis Signature (Heritage, 5/2007), lot 1282, which realized \$1,495. NGC ID# 22GN, PCGS# 2939

3783 1972 MS67 Red PCGS. Like Rodney Dangerfield, the Lincoln Memorial cents issued for circulation after the retirement of the Wheat Ear reverse in 1958 "got no respect," but some are surprisingly elusive in top grade with Red surfaces. This orange-red 1972 is a virtually unmarked and unspotted example, one of only 28 at PCGS with none finer (4/13). NGC ID# 22GT, PCGS# 2953

3784 1972 Doubled Die Obverse MS66 Red PCGS. FS-101. A high grade orange-red example of this desirable variety. Lustrous, boldly struck, and essentially pristine. Only the 1955 FS-101 exhibits more dramatic die doubling.
Ex: New York Signature (Heritage, 11/2003), lot 5396, which realized \$862.50. NGC ID# 22GU, PCGS# 2950

1972-D Cent, MS67 Red None Numerically Finer at Either Service

3785 1972-D MS67 Red PCGS. Although both sides of this well-struck Superb Gem example display appealing color, the reverse is particularly attractive with blazing shades of deep orange and small splashes of pink and violet. Vibrant luster further enhances the eye appeal. A few tiny flecks of carbon are present. Population: 11 in 67 (1 in 67+) Red, 0 finer (5/13). NGC ID# 22GV, PCGS# 2956

3786 1972-S MS67 Red PCGS. An appealing Superb Gem that displays flashy satin luster, rich gold-orange toning, and crisply struck devices. A few splashes of violet and magenta appear on both sides. Moderate die polish lines are present on the reverse. Population: 14 in 67 Red, 0 finer (4/13).

Ex: FUN Signature (Heritage, 1/2004), lot 4883, which realized \$356.50. NGC ID# 22GW, PCGS# 2959

3787 1977-D MS67 Red PCGS. Fiery color and blazing luster provide this Superb Gem with a tremendous degree of eye appeal. A few small ice-blue highlights appear on portions of the steps on the reverse. Population: 19 in 67 Red, 0 finer (4/13).

Ex: Long Beach Signature (Heritage, 9/2008), lot 7489, which realized \$1,265. NGC ID# 22HA, PCGS# 2987

3788 1979-D MS67 Red PCGS. Well struck and intensely lustrous, with a lovely coating of sunset-red patina over the center of each side and pleasing yellow-golden accents at the peripheries. Carefully preserved and nearly free of surface marks. Population: 15 in 67 Red, 0 finer (5/13). NGC ID# 22HE, PCGS# 2998

3789 1982 Large Date MS68 Red PCGS. Struck on a copper-plated zinc planchet, confirmed by its minutely granular mint-made appearance. This orange-gold and rose-red cent is free from marks or noticeable carbon. Population: 17 in 68 Red, 0 finer (4/13). NGC ID# 22HN, PCGS# 3047

3790 1982-D Small Date MS68 Red PCGS. Struck in copper-plated zinc, as are all Small Date '82-D cents. The fire-red surfaces are flawless in terms of contact or carbon, though they are moderately granular, as made from imperfect plating. Population: 11 in 68 Red, 0 finer (4/13).

Ex: Long Beach Signature (Heritage, 9/2008), lot 477, which realized \$1,035. NGC ID# 22HP, PCGS# 3050

3791 1984-D MS68 Red PCGS. A solid strike sharpens the design elements of this Superb Gem. Lustrous red surfaces are exquisitely well preserved. A few tiny blisters on the obverse do not detract. Population: 15 in 68 Red, 0 finer (5/13). NGC ID# 22J2, PCGS# 3068

3792 1985 MS68 Red PCGS. Captivating satiny luster shimmers over each side of this bright orange and fully struck representative. The surfaces have an rippled texture, and a close inspection yields only a few tiny spots. Population: 19 in 68 (1 in 68+) Red, 0 finer (5/13). NGC ID# 22J3, PCGS# 3071

3793 1989 MS68 Red PCGS. This is a solidly struck piece with magnificent red color. Lustrous surfaces are devoid of mentionable marks or spots. Population: 12 in 68 (1 in 68+) Red, 0 finer (5/13). NGC ID# 22JB, PCGS# 3077

3794 1997 MS68 Red PCGS. This copper-red Memorial cent exhibits crisp definition on the design elements, including Lincoln's beard. The lustrous surfaces are nicely preserved. Population: 14 in 68 Red, 0 finer (5/13). NGC ID# 22JW, PCGS# 3145

3795 2001-D MS69 Red PCGS. Gorgeous copper-red luster endows both sides of this near-perfect Lincoln Memorial cent. A solid strike brings out virtually full detail on the design elements. Population: 21 in 69 Red, 0 finer (5/13). NGC ID# 22K7, PCGS# 3169

PROOF LINCOLN CENTS

1912 Cent, PR64 Red Matte Proof Lincoln

3796 1912 PR64 Red PCGS. Although production figures list 2,172 pieces for the 1912 proof cent, surviving examples are rarer than that number would suggest. Red, orange, gold, and green colors combine to provide this Choice example with an attractive appearance. The design details exhibit a bold level of definition. A few tiny carbon flecks are present. Population: 28 in 64 Red, 19 finer (5/13). NGC ID# 22KV, PCGS# 3314

1914 Matte PR66 Brown Cent Considerable Iridescence

3797 1914 PR66 Brown PCGS. Iridescent ruby-red, powder-blue, olive-green, and orange shades embrace this satiny and needle-sharp Premium Gem. A loupe reveals the microgranular texture characteristic of original matte proofs. No carbon or contact is evident. Only 1,365 proofs were struck, less than half the mintage of the proof 1913.
Ex: Los Angeles Signature (Heritage, 8/2009), lot 167.
From The MKJ Collection, Part II. NGC ID# 22KX, PCGS# 3318

3798 1936 Type One—Satin Finish PR65 Red NGC. This fiery orange-red Satin Finish cent is kept from a finer grade by a couple of small contact marks. There is much appeal remaining, however, and the no-line fatty holder will appeal to many as well. NGC ID# 22L2, PCGS# 3332

3799 1936 Type Two—Brilliant Finish PR65 Red PCGS. Both sides of this Gem proof are awash with orange-red brilliance, and each exhibits sharply struck design elements. This is a very pleasing eye appealing specimen. NGC ID# 22L3, PCGS# 3335

3800 1936 Type Two—Brilliant Finish PR65 Red PCGS. Red brilliance exudes from both sides of this magnificent Gem. Exquisite design detail and well preserved surfaces add to the eye appeal. NGC ID# 22L3, PCGS# 3335

3801 1937 PR66 Red PCGS. CAC. Blazing fire-red surfaces are thoroughly struck and deeply reflective on this second-year 1930s proof. A nice and satisfying example for the issue and grade, with the CAC approval. NGC ID# 22L4, PCGS# 3338

3802 1938 PR67 Red PCGS. Blazing Red surfaces with dazzling eye appeal are the hallmark of this pristine example, among the few finest certified at either PCGS or NGC. Population: 32 in 67 Red, 0 finer (4/13).
From The MKJ Collection, Part II. NGC ID# 22L5, PCGS# 3341

3803 1939 PR67 Red PCGS. Both sides of this magnificent Superb Gem proof are awash with golden-orange brilliance. All design elements are fully brought up.
From The MKJ Collection, Part II. NGC ID# 22L6, PCGS# 3344

1940 Lincoln Cent, PR67 Red A Conditionally Rare Proof

3804 1940 PR67 Red PCGS. CAC. An impressive proof example, this Superb Gem has deep orange mint color with fully mirrored fields and sharply defined design elements on each side. The surfaces are pristine and even a glass fails to reveal any carbon spots. Population: 10 in 67 Red, 0 finer (5/13).
From The MKJ Collection, Part II. NGC ID# 22L7, PCGS# 3347

1941 Cent, PR67 Red Tied for Finest Certified

3805 1941 PR67 Red PCGS. Ex: Tom Mershon Collection. Glowing orange-gold surfaces provide this marvelous Superb Gem proof with a tremendous degree of eye appeal. Sharply defined design elements further add to the attractiveness. Both sides exhibit a few silver streaks. A few tiny flecks are present on each side. NGC has yet to assign a PR67 grade and this piece is one of only three to have achieved this grade level from PCGS, with none finer at either service (5/13).
Ex: Long Beach Signature (Heritage, 9/2008), lot 501, which realized \$8,625.
From The MKJ Collection, Part II. NGC ID# 22L8, PCGS# 3350

**1942 Cent, PR66 Red Cameo
Rarely Encountered With Contrast**

- 3806 1942 PR66 Red Cameo PCGS.** Ex: Tom Mershon Collection. The 1942 Lincoln cent is challenging to locate with any degree of cameo contrast. This example displays nice contrast, with bright gold color and a pleasing level of design detail. The upper obverse exhibits a couple of tiny spots that are visible only under a loupe. Population: 4 in 66 Cameo, 2 finer (5/13).
Ex: *Long Beach Signature* (Heritage, 9/2008), lot 502, which realized \$4,312.50.
From *The MKJ Collection, Part II*. NGC ID# 22L9, PCGS# 83353

- 3807 1950 PR65 Deep Cameo PCGS.** Outstanding golden-orange-on-black contrast graces both sides of this magnificent Gem. A solid strike delivers sharp definition on the design elements, enhancing even more the coin's eye appeal. Population: 22 in 65 Deep Cameo, 13 finer (4/13).
From *The MKJ Collection, Part II*. NGC ID# 22LA, PCGS# 93359

**1951 Cent, PR68 Red
Green Label Holder**

- 3808 1951 PR68 Red PCGS.** An immaculate pumpkin-gold specimen. Neither carbon or contact is visible. The strike is intricate though lapping has removed minor details from the reverse design. Certified in a green label holder. Population: 4 in 68 Red, 1 finer as 68 Red Cameo (5/13).
From *The MKJ Collection, Part II*. NGC ID# 22LB, PCGS# 3362

- 3809 1953 PR68 Red Cameo NGC.** A magnificent pumpkin-gold proof cent with flashy flawless surfaces and good contrast between the motifs and fields. Though spotted specimens are plentiful, high grade pieces with noticeable cameo contrast are rare. Census: 12 in 68 Cameo, 1 finer (4/13). NGC ID# 22LD, PCGS# 83368

- 3810 1953 Doubled Die Obverse PR68 Red PCGS. FS-101.** The 19 in the date is nicely die doubled. Doubling is also apparent on the RTY in LIBERTY. An intricately struck and pristine specimen of this interesting *Cherrypickers'* variety. PCGS# 38151

- 3811 1955 PR67 Deep Cameo PCGS.** Magnificent peach-red color and luminous motifs ensure the eye appeal of this high grade proof cent. Dappled rose-red shades emerge beneath a loupe. Certified in a green label holder. Population: 26 in 67 Deep Cameo, 6 finer (4/13).
Ex: *Dallas Signature* (Heritage, 12/2004), lot 5428, which realized \$2,070.
From *The MKJ Collection, Part II*. NGC ID# 22LF, PCGS# 93374

- 3812 1957 PR66 Red Deep Cameo PCGS.** A flashy fire-red Premium Gem that boasts luminous devices and glassy fields. Exceptional quality for this often carbon-afflicted proof issue. Population: 10 in 66 Deep Cameo, 11 finer (4/13).
From *The MKJ Collection, Part II*. NGC ID# 22LH, PCGS# 93380

- 3813 1958 PR67 Red Deep Cameo PCGS.** A blindingly mirrored straw-gold exemplar with surprisingly bold contrast between the fields and the faintly frosted devices. Sharply struck with electric visual appeal. Population: 26 in 67 Deep Cameo, 4 finer (4/13).
From *The MKJ Collection, Part II*. NGC ID# 22LJ, PCGS# 93383

- 3814 1959 PR68 Red Deep Cameo PCGS.** Golden-orange motifs are highlighted by the deeply mirrored fields of this wonderful Superb Gem Lincoln. Both sides are impeccably preserved and exquisitely struck up. Population: 34 in 68 Deep Cameo, 3 finer (4/13).
From *The MKJ Collection, Part II*. NGC ID# 22LK, PCGS# 93386

- 3815 1960 Small Date PR68 Red Deep Cameo PCGS.** The 1960-P and D Small Date Lincoln cents created a sensation back when this cataloger was just a tyke. The proofs in Deep Cameo are the finest obtainable survivors, and this example displays impeccable preservation with blazing color and deep contrast. Population: 37 in 68 Deep Cameo, 0 finer (4/13).
From *The MKJ Collection, Part II*. NGC ID# 22LL, PCGS# 93392

- 3816 1960 Small Over Large Date PR66 Red Cameo PCGS. FS-102.** A magnificent Premium Gem with deeply reflective original red surfaces and outstanding eye appeal. The Small Date is easily visible over the larger undertype and some of the letters in LIBERTY are perceptibly doubled. PCGS# 83413

**1961 Lincoln Memorial Cent
PR69 Red Deep Cameo**

- 3817 1961 PR69 Red Deep Cameo PCGS.** An essentially perfect Superb Gem Deep Cameo proof, this early Lincoln Memorial cent has light orange mint color with deeply mirrored fields around highly lustrous devices. Population: 10 in 69 Red Deep Cameo, 0 finer (5/13).
From *The MKJ Collection, Part II*. NGC ID# 22LN, PCGS# 93395

**1982-S Lincoln Cent
Perfect PR70 Deep Cameo Specimen**

- 3818 1982-S PR70 Deep Cameo PCGS.** This perfect proof specimen has frosty light orange devices that exhibit brilliant surfaces and intricate design definition, all over deeply mirrored fields, exhibiting "copper and black" contrast. Population: 12 in 70 Deep Cameo (5/13). From *The MKJ Collection, Part II*. NGC ID# 22MG, PCGS# 93473

- 3819 1984-S PR70 Deep Cameo PCGS.** A lesson in Red Deep Cameo perfection, the blazing surfaces of this 1984-S Lincoln show simply no mentionable impairment amid the profound contrast and full strike. Population: 63 in 70 Deep Cameo (4/13). From *The MKJ Collection, Part II*. NGC ID# 22MJ, PCGS# 93479

**1990 No S Cent, PR66 Red Deep Cameo
Fantastic Eye Appeal**

- 3820 1990 No S PR66 Red Deep Cameo PCGS.** FS-101. As the lone No S proof variety to appear in the Lincoln Memorial series, the 1990 No S is highly popular with series enthusiasts. This Superb Gem displays impressively mirrored copper-orange surfaces that offer delightful contrast with the sharp, richly frosted devices. A pinpoint fleck appears in the right obverse field below the second T in TRUST. From *The MKJ Collection, Part II*. NGC ID# 274B, PCGS# 93506

**1990 No S Cent, PR67 Deep Cameo
Rare and Popular No-S Issue**

- 3821 1990 No S PR67 Deep Cameo PCGS.** FS-101. A splendid Superb Gem of this key Lincoln Memorial variety. The strike is needle-sharp, there is no evidence of contact, and the grade appears limited solely by a small tan freckle on the forehead and minute flecks near the lower left border of the Memorial. NGC ID# 274B, PCGS# 93506

SHIELD NICKELS

- 3822 1867 No Rays MS66 PCGS.** CAC. Both sides of this well-detailed Premium Gem display an interesting network of die cracks, with vibrant mint luster and outstanding eye appeal. Population: 12 in 66, 0 finer (4/13). NGC ID# 22NZ, PCGS# 3794

- 3823 1873 Doubled Die Obverse, Closed 3 MS62 NGC.** FS-101. The annulet is the usual pick-up for doubled die obverses on Shield nickel. On FS-501, the annulet is doubled toward 11 o'clock. Olive-green and chestnut-gold toning blends this throughout satiny and unmarked example. PCGS# 38395

- 3824 1881 MS63 PCGS.** One of the late-series low-mintage business strikes, the 1881 saw 68,000 pieces made, and relatively few survive in Mint State. This medium-gray Select example is pleasing and well-struck overall, but a deep gray toning blob on one of the right leaf triplets bears mentioning. Certified in a green-label holder. Population: 17 in 63, 82 finer (5/13). NGC ID# 276F, PCGS# 3811

**1881 Shield Nickel, MS65
Elusive Circulation Strike**

- 3825 1881 MS65 PCGS.** CAC. This is a scarce business strike Shield nickel that only had a mintage of 68,000 coins. Subtle hints of gold toning appear on portions on the obverse of this lovely, bright Gem displaying a high degree of eye appeal. Numerous die cracks are visible on the obverse. Population: 37 in 65, 18 finer (5/13). NGC ID# 276F, PCGS# 3811

- 3826 1883/2 AU58 PCGS.** CAC. FS-302. Much of the 2 underdigit emerges beneath a loupe. The jagged die crack above the date is also diagnostic for the *Cherry-pickers'* variety. A briefly circulated but nonetheless impressive example with smooth olive-gray surfaces. NGC ID# 22PD, PCGS# 3814

PROOF SHIELD NICKELS

**1866 With Rays Nickel, PR65
First Year of the Denomination**

- 3827 1866 Rays PR65 PCGS.** The first production issue of the Shield nickel, and the first coin of the composition produced for circulation, or for collectors in the case of proofs. This Gem proof has bold design motifs with light cameo contrast. The surfaces are fully mirrored with delicate gold toning. Both sides are pristine. NGC ID# 276G, PCGS# 3817

- 3828 1869 PR66 Cameo NGC.** Fully reflective fields are set against frosted devices, producing the cameo effect that is so highly valued by specialists. This lovely Premium Gem displays minimal toning and gorgeous surfaces. Census: 8 in 66 Cameo, 2 finer (4/13). (Total: 0 coins) PCGS# 83823

**1870 Shield Nickel, PR66
Delicately Toned**

- 3829 1870 PR66 PCGS.** The mintage of proofs for this year is estimated between 850 and 1100 pieces. Most are similar to this one with evidence of a heavily lapped reverse that has thinned some of the letters. Field reflectivity is good, thought, especially for a nickel product. Each side shows just the slightest traces of delicate toning. Excellent for a type coin. Population: 7 in 66, 0 finer (4/13). NGC ID# 276L, PCGS# 3824

**1873 Closed 3 Nickel, PR67
Colorful Toning**

- 3830 1873 Closed 3 PR67 PCGS.** All proofs from 1873 are the Closed 3 variety. Areas of rainbow toning appear on both sides of this Superb Gem example. The central reverse displays mottled toning in shades of pale gold, cherry, lime-green, and plum. Areas of retained laminations are present near the right rim on the reverse. Population: 2 in 67, 0 finer (5/13). NGC ID# 276P, PCGS# 3827

- 3831 1876 PR66 Cameo NGC.** A touch of pinkish-gray patina visits each side of this perceptibly contrasted and sharply struck Premium Gem proof Shield nickel, struck in America's Centennial year. Pleasing and popular. Census: 35 in 66 (2 in 66+) Cameo, 3 finer (5/13). PCGS# 83830

- 3832 1876 PR66 Cameo NGC.** Although this piece appears fully brilliant at first glance, examination under a light reveals charming green-gold overtones. Impressively frosted on the sharply struck central devices, this Premium Gem has lovely eye appeal. Two small strikethroughs appear near the D in UNITED. Census: 34 in 66 (2 in 66+) Cameo, 3 finer (4/13). PCGS# 83830

**1876 Nickel, PR67 Cameo
Only One Finer**

- 3833 1876 PR67 Cameo NGC.** Collectors eagerly seek high-grade proof examples of this popular Centennial-year issue, such as this piece. This minimally toned Superb Gem proof displays lovely spot-free fields that provide a pleasing level of contrast against the frosty devices. Census: 2 in 67 Cameo, 1 finer (5/13). PCGS# 83830

**1877 Shield Nickel, PR64
Key Proof-Only Date**

- 3834 1877 PR64 NGC.** No business-strike Shield nickels were struck in 1877, leaving the tiny proof mintage to satisfy collector demand. The actual production quantity is unknown, with estimates generally ranging from 900 to 1500. This lovely near-Gem example exhibits attractive color and details, leading to a pleasing level of eye appeal. IN GOD WE TRUST displays evidence of die erosion. NGC ID# 276U, PCGS# 3831

- 3835 1880 PR66 Cameo PCGS. CAC.** The second 8 is strongly repunched within the loops. Brilliant, flashy, and virtually void of detractions. The rarity of the business strike 1880 nickel increases proof demand for the date. Population: 74 in 66 (2 in 66+) Cameo, 15 finer (4/13). PCGS# 83835

- 3836 1881 PR67 PCGS. CAC.** Light golden overtones grace otherwise nickel-gray surfaces. An exquisitely detailed and carefully preserved Superb Gem that offers delightful eye appeal. Population: 23 in 67, 0 finer (4/13).
Ex: Long Beach Signature (Heritage, 5/2009), lot 276.
From The MKJ Collection, Part II. NGC ID# 276X, PCGS# 3836

- 3837 1881 PR67 Cameo PCGS. CAC.** This Superb Cameo displays considerable silver-white on black contrast. Both sides are sharply struck and nicely preserved. Population: 15 in 67 Cameo, 0 finer (4/13). PCGS# 83836

- 3838 1882 PR67 PCGS. CAC.** Dappled tan-gold toning overlies stone-gray surfaces. The razor-sharp strike and smooth, satiny fields attest to the superior quality. Certified in a first generation holder. NGC ID# 276Y, PCGS# 3837

- 3839 1882 PR67 Cameo PCGS.** Dappled chestnut-gold toning visits this satiny and fully struck Superb Gem. Traces of gunmetal-blue are confined to the upper obverse margin. A tiny lint mark near the C in CENTS is of mint origin. A pristine specimen from the penultimate date of the introductory nickel type. Population: 14 in 67 Cameo, 1 finer (4/13). PCGS# 83837

3840 1882 PR67 Cameo NGC. Pleasing contrast between the field and devices adds to the eye appeal of this sharply struck Superb Gem. The obverse exhibits a few tiny spots of color. Hints of dark orange appear at the outer edges of the reverse and that side reveals a few lint marks. Census: 23 in 67 Cameo, 0 finer (4/13). (Total: 0 coins) PCGS# 83837

LIBERTY NICKELS

3841 1883 No Cents MS67 NGC. Exquisite strike detail is apparent over most of this coin, including Liberty's hair, the star centrils, and the wreath. Only the corn ear left of the bow is a tad soft. Lustrous surfaces are lightly toned and very nicely preserved. Census: 60 in 67, 0 finer (4/13). NGC ID# 2772, PCGS# 3841

3842 1883 No Cents MS67 NGC. Fully struck and highly lustrous with flashy, semi-reflective fields. Hints of golden patina visit otherwise untuned surfaces. Always of interest to collectors as a single-year type. Neither NGC nor PCGS has graded a numerically finer piece (4/13). NGC ID# 2772, PCGS# 3841

3843 1883 No Cents MS67 PCGS. The Liberty Head design was introduced in 1883, famously omitting the word CENTS on the reverse. This spectacular Superb Gem is well-detailed and brightly lustrous, with an interesting network of die breaks on both sides. A few hints of lavender-gray and pale gold toning enhance the well-preserved surfaces. Population: 17 in 67, 0 finer (5/13). NGC ID# 2772, PCGS# 3841

1885 Liberty Nickel, AU58 Scarce Series Key

3844 1885 AU58 PCGS. CAC. The 1885 Liberty nickel is a low-mintage key date in the series, along with the 1886 and 1912-S. This attractive near-Mint specimen shows only a touch of wear on the well-detailed design elements, with light gold and gray patina and strong underlying mint luster. The surfaces are lightly abraded for the grade. NGC ID# 2773, PCGS# 3846

1885 Liberty Nickel, MS62 Elusive Key Date Issue

3845 1885 MS62 PCGS. Splashes of gold toning appear on the light nickel-gray surfaces of this splendid Mint State Liberty nickel key. Both sides have brilliant mint luster with frosty surfaces. Trivial hairlines and surface marks are evident. Mint State examples of the 1885 are substantially rarer than proofs, and this piece will certainly generate considerable bidding interest. NGC ID# 2773, PCGS# 3846

3846 1886 AU58 PCGS. An important key-date that is normally encountered in proof format, this lightly circulated business strike has bold details and nearly full luster. A light die crack joins star 4 to the forecurl. NGC ID# 22PK, PCGS# 3847

1886 Liberty Nickel, MS64 Second Key Date

3847 1886 MS64 PCGS. The 1885, 1886, and 1912-S Liberty nickels are the three key dates among Mint State coins, and this Choice specimen will appeal to a large number of collectors. Both sides have brilliant light gray surfaces with a few scattered marks. The surfaces exhibit satin luster and excellent eye appeal. NGC ID# 22PK, PCGS# 3847

3848 1888 MS65 PCGS. This impressive Gem exhibits well-detailed design elements, with just a touch of the usual softness on the lower wreath. The well-preserved lustrous surfaces are blanketed in attractive shades of champagne-gold and powder-blue toning. Population: 65 in 65 (1 in 65+), 14 finer (5/13). NGC ID# 2774, PCGS# 3849

1889 Liberty Nickel, MS66 Scarce in Finer Grades

3849 1889 MS66 PCGS. CAC. Despite the large mintage of 15.8 million pieces, the 1889 Liberty nickel is an elusive date in high grade. This spectacular Premium Gem exhibits sharply detailed design elements and well-preserved surfaces with frosty mint luster and a few hints of pale gold and lavender toning. Population: 15 in 66 (1 in 66+), 0 finer (5/13). NGC ID# 2775, PCGS# 3850

1893 Liberty Nickel, MS66 Border-Toned Beauty

3850 1893 MS66 PCGS. Gold-to-peach patina of varying intensity shimmers at the margins, while the interiors are satiny and pearl-gray. This Premium Gem shows uneven detail on the obverse stars and the left ear of corn in the wreath, not unusual for the series, but the surfaces are carefully preserved. Population: 16 in 66, 1 finer (4/13). NGC ID# 2778, PCGS# 3854

3851 1894 MS65 PCGS. CAC. Warmly lustrous with peach and pink overtones. The strike is strong in the centers but erratic on the margins with a decently detailed left ear of corn in the reverse wreath but hit-and-miss obverse stars. Population: 65 in 65 (5 in 65+), 28 finer (4/13). NGC ID# 2779, PCGS# 3855

3852 1898 MS66 PCGS. Potent luster endows this lightly toned Premium Gem. An excellent strike delivers sharp definition to the design elements, including the corn ear left of the bow knot, an area often found weakly struck. Population: 27 in 66, 1 finer (5/13). NGC ID# 22PP, PCGS# 3859

1899 Nickel, Satiny MS67

3853 1899 MS67 NGC. Peach overtones add color to a medium-gray base. This satiny Superb Gem has a touch of softness at the usual trouble-spots (peripheral stars, left ear of corn) but solid all-around eye appeal thanks to its impressive preservation. Neither NGC nor PCGS has graded an MS68 example of the issue (4/13). NGC ID# 22PR, PCGS# 3860

3854 1900 MS66+ PCGS. CAC. A high-end Premium Gem example with tremendous eye appeal, this piece exhibits a sharp strike. The colors include shades of ice-blue, olive-green, and champagne. A few small die cracks extend from the reverse rim. A small mark appears in the field between the tops of the wreath. Population: 43 in 66 (1 in 66+), 5 finer (4/13). NGC ID# 22PS, PCGS# 3861

3855 1904 MS66 PCGS. Lovely peach-gold shades endow this lustrous Premium Gem. The design elements are sharply impressed, save for characteristic softness on the left ear of corn. Well preserved, and desirable in such quality. Population: 72 in 66 (6 in 66+), 0 finer (5/13).
Ex: Palm Beach Signature (Heritage, 3/2006), lot 321. NGC ID# 277F, PCGS# 3865

3856 1904 MS66 PCGS. CAC. Excellent luster radiates from each side of this lightly toned V nickel. The design elements are well struck, save for the usual softness in the second star and the corn ear left of the bow. Population: 72 in 66 (6 in 66+), 0 finer (4/13). NGC ID# 277F, PCGS# 3865

3857 1912-S AU53 NGC. Satin surfaces and light gray patina host splashes of darker gray toning with faint blue highlights. The 1912-S is rarely found in high circulated grades. NGC and PCGS have each graded one AU53 example. Typical examples grade VG or lower, although a number of Mint State pieces exist. NGC ID# 277R, PCGS# 3875

3858 1912-S MS62 NGC. Nickel-gray surfaces exhibit well struck motifs. A key issue, the only Liberty nickel struck at the San Francisco Mint. NGC ID# 277R, PCGS# 3875

1912-S Nickel, Fully Struck Gem

3859 1912-S MS65 NGC. An unusually well struck Gem of this low mintage branch mint issue. The forehead curls and both ears of corn are fully defined. The obverse is apricot-gold while the reverse is apple-green and lilac-red. Unabraded and desirable. Certified in a former generation holder. NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

3860 1883 No Cents PR66 PCGS. CAC. An important one-year type without the word CENTS, this lightly toned Premium Gem is sharply detailed, with well-preserved reflective surfaces. Housed in a green label holder. Population: 86 in 66, 4 finer (4/13). NGC ID# 22PU, PCGS# 3878

3861 1883 No Cents PR65 Cameo PCGS. Hoarders went crazy in 1883 when the No CENTS Liberty nickels were falsely rumored to be planned for recall by the government due to counterfeiters gold-plating circulation strikes and passing them off as five dollar gold pieces. This Gem Cameo proof shows untuned, frosty surfaces with good contrast that are well-struck and appealing. A single nick on Liberty's chin determines the grade. Population: 93 in 65 (2 in 65+) Cameo, 85 finer (4/13). PCGS# 83878

3862 1883 With Cents PR66 Cameo PCGS. CAC. Frosty devices contrast with mirrored fields, despite a hint of sun-gold toning on each side. Razor-sharp detail is apparent on the design elements. Population: 34 in 66 (2 in 66+) Cameo, 2 finer (4/13). PCGS# 83881

3863 1884 PR66 Cameo PCGS. This Premium Gem is well deserving of the Cameo designation as it sports strong contrast on both sides. A solid strike leaves razor-sharp definition on the devices enhancing even more the coin's outstanding eye appeal. Population: 39 in 66 (3 in 66+) Cameo, 3 finer (4/13). PCGS# 83882

3864 1884 PR66 Cameo PCGS. CAC. A starkly contrasted Premium Gem proof from the second year of issue, seemingly Deep Cameo on the obverse but not so bold on the reverse. Nonetheless, a carefully preserved and entirely delightful coin. Population: 39 in 66 (3 in 66+) Cameo, 3 finer (4/13). PCGS# 83882

3865 1884/188 PR66 Cameo NGC. FS-301. The 1 is boldly repunched, and traces of the prior logotype impression are also evident on the 8s. Icy motifs rise above mark-free mirrored fields. Hints of golden toning are present along with pinpoint flecks. PCGS# 83882

3866 1885 PR63 NGC. Deep copper-toned patina complements the well-struck surfaces on this key-date coin, one held back from a finer grade by a couple of minor marks away from the focal areas. NGC ID# 277T, PCGS# 3883

3867 1885 PR66 Cameo PCGS. CAC. The key to the set in business strike or proof format. This Premium Gem Cameo proof boasts a full strike and excellent contrast over minimally toned surfaces. Population: 47 in 66 Cameo, 7 finer (5/13). PCGS# 83883

3868 1886 PR66 NGC. CAC. Minimal signs of contact and a full strike (including that pesky ear of corn) contribute to the allure of this Premium Gem 1886 Liberty nickel, like its counterpart, the 1885, eagerly pursued either as proof or business strike. NGC has seen only 15 numerically finer (4/13). NGC ID# 277U, PCGS# 3884

3869 1886 PR66 NGC. CAC. A fair amount of field-device contrast shows on this Premium Gem proof at certain angles, despite a thin layer of toning. The design elements are exceptionally well struck. NGC ID# 277U, PCGS# 3884

3870 1886 PR66 Cameo PCGS. CAC. A gorgeously preserved and needle-sharp Premium Gem Cameo proof whose faint pastel-golden patina does not impact the noticeable contrast. A better date due to its low business strike production. Population: 17 in 66 (2 in 66+) Cameo, 2 finer (4/13). PCGS# 83884

1887 Liberty Nickel, PR67 None Finer at PCGS

3871 1887 PR67 PCGS. Ex: Groman. The well-preserved surfaces of this magnificent Superb Gem are blanketed in attractive shades of champagne-gold and powder-blue toning. The design elements are sharply detailed throughout and the fields are deeply mirrored. Eye appeal is tremendous. Population: 4 in 67, 0 finer (5/13). NGC ID# 277V, PCGS# 3885

3872 1890 PR66 Cameo NGC. Liberal mint frost covers the devices front and back, providing appreciable contrast against the midnight-black, reflective fields on this fully struck and pleasing coin. Census: 21 in 66 Cameo, 2 finer (5/13). PCGS# 83888

1890 Liberty Nickel, PR66 Deep Cameo The Finest Certified Specimen

3873 1890 PR66 Deep Cameo PCGS. A delightful Premium Gem Deep Cameo proof, this 1890 Liberty nickel has brilliant light gray surfaces with delicate gold toning. Both sides exhibit deeply mirrored fields and highly lustrous devices with bold design motifs. Population: 1 in 66 Deep Cameo, 0 finer (5/13). PCGS# 93888

3874 1891 PR65 Deep Cameo PCGS. CAC. Grand cameo contrast is the hallmark of this gleaming ice-white Gem Deep Cameo piece, one of the most attractive survivors of the proof Liberty nickel issue for 1891. For those who prefer untuned coins, this piece fills the bill marvelously, with a stunning silver-on-black appearance. For a proof, however, the strike is rather blunt on the peripheral stars and lower wreath details, but they detract little from the enormous deep cameo appeal. Population: 6 in 65 Deep Cameo, 6 finer (4/13). PCGS# 93889

3875 1892 PR66 Cameo PCGS. CAC. Exquisite delineation shows on the design elements of this Premium Gem Cameo. The field-device contrast and nicely preserved surfaces add to the overall eye appeal. Population: 25 in 66 (1 in 66+) Cameo, 0 finer (4/13). PCGS# 83890

3876 1893 PR66 Cameo PCGS. Both sides of this lovely Premium Gem Cameo have distinct champagne-gold tints, though the gleaming reverse sports the richer color. Well-contrasted and carefully preserved. Population: 27 in 66 (1 in 66+) Cameo, 11 finer (4/13). PCGS# 83891

1893 Liberty Nickel, PR67 Cameo Among the Finest Certified at PCGS

3877 1893 PR67 Cameo PCGS. Ex: Groman. Razor-sharp definition is evident on all design elements of this delightful Superb Gem, and the frosty devices contrast boldly with the reflective fields. Attractive shades of champagne-gold and violet toning blanket the well-preserved surfaces. Population: 11 in 67 Cameo, 0 finer (5/13). PCGS# 83891

3878 1895 PR65 Cameo PCGS. CAC. The considerable field-device contrast is enhanced by the lack of perceptible toning on this fully struck coin, producing a marvelous silver-on-jet-black appearance throughout both sides. A bit of planchet roughness appears, as made, under Liberty's nose. Population: 17 in 65 Cameo, 7 finer (5/13). PCGS# 83893

1895 Liberty Nickel, PR66 Unusual Toned Cameo Specimen

3879 1895 PR66 Cameo PCGS. Ex: Groman. The 1895 proof Liberty nickel claims a nominal mintage of 2,062 pieces. This impressive Premium Gem displays frosty design elements that contrast intensely with the deeply reflective fields to produce a startling cameo effect. The well-preserved surfaces are blanketed in shades of pale gold and lavender-gray toning. Population: 5 in 66 Cameo, 2 finer (5/13). PCGS# 83893

**1897 Liberty Nickel, PR67 Cameo
None Finer at PCGS**

3880 1897 PR67 Cameo PCGS. CAC. From a proof mintage of 1,938 pieces, this delightful Superb Gem exhibits sharp definition on all design elements and deeply mirrored fields that provide profound cameo contrast. The surfaces are patinated in attractive shades of pale green and violet. Population: 10 in 67 Cameo, 0 finer (5/13). PCGS# 83895

3881 1900 PR66+ Cameo PCGS. CAC. Magnificent field-device contrast shows on both sides of this high-end Premium Gem proof. This is a sharply struck and nicely preserved piece. Population: 3 in 66+ Cameo, 10 finer (4/13). PCGS# 83898

3882 1901 PR67 NGC. CAC. Strongly mirrored for this 20th century proof issue with soft, elegant nickel-gold and orange patina across much of each side. NGC has graded only two finer representatives for the contrast designation (5/13). NGC ID# 278B, PCGS# 3899

3883 1903 PR67 NGC. This lovely Superb Gem exhibits sharp design detail and is devoid of any significant marks or spots. All in all, this piece yields really nice eye appeal. Census: 27 in 67, 5 finer (4/13). NGC ID# 278D, PCGS# 3901

3884 1903 PR66 Cameo PCGS. CAC. Both sides show appreciable contrast on this minimally toned Premium Gem specimen, though the frost on the devices is thicker on the reverse. Attractively mirrored and eminently appealing. Population: 35 in 66 (2 in 66+) Cameo, 14 finer (4/13). PCGS# 83901

3885 1903 PR66 Cameo PCGS. CAC. Razor-sharp delineation shows on the design elements of this Premium Gem Cameo, including the corn ear left of the bow knot. This will be a great addition to a high-grade Liberty nickel collection. Population: 35 in 66 (2 in 66+) Cameo, 14 finer (4/13). PCGS# 83901

3886 1906 PR66 Cameo PCGS. CAC. Amazing strike detail is seen on the design elements of this Premium Gem Cameo; in fact we have to consider it fully struck. Additionally, the well cared for surfaces add to the coin's overall eye appeal. Population: 24 in 66 (2 in 66+) Cameo, 16 finer (4/13). PCGS# 83904

**1907 Liberty Nickel, PR66
Elusive Cameo Example**

3887 1907 PR66 Cameo PCGS. CAC. The design elements of this spectacular Premium Gem are sharply detailed and richly frosted, while the lightly toned fields are deeply mirrored, creating a bold cameo flash when the coin is tilted in the light. Eye appeal is terrific. Population: 12 in 66 Cameo, 4 finer (5/13). PCGS# 83905

3888 1909 PR66 PCGS. CAC. The obverse on its own would likely merit a Cameo designation today, but the deeper patina and lesser contrast on the reverse would come up short. Nonetheless a beautiful, sharply struck, and problem-free coin, certified in a green-label holder. NGC ID# 278K, PCGS# 3907

3889 1909 PR66 PCGS. CAC. This Premium Gem is a very pleasing representative in the Liberty Head proof series. Its surfaces are well preserved and exhibit sharp design detail. PCGS has seen only 35 specimens finer (4/13). NGC ID# 278K, PCGS# 3907

3890 1909 PR67 NGC. Deep toning covers the luminous surfaces of this Superb Gem V nickel and a solid strike delivers sharp definition to the design motifs. Both sides are nicely preserved. Census: 81 in 67, 7 finer (4/13). NGC ID# 278K, PCGS# 3907

3891 1909 PR67 PCGS. The luminous surfaces of this lovely Superb Gem proof display sharply impressed design features. Both sides are devoid of mentionable marks or spots. Population: 33 in 67, 2 finer (4/13). NGC ID# 278K, PCGS# 3907

3892 1909 PR66 Cameo PCGS. CAC. Just a touch of patina visits the well-preserved and fully struck surfaces of this lovely Premium Gem Cameo nickel. The largish mintage of 4,763 pieces was due to the introduction of the new Lincoln cent design in the same year. Population: 61 in 66 Cameo, 17 finer (5/13). PCGS# 83907

3893 1909 PR67 Cameo NGC. Green-to-gold toning graces the rims, while nickel-frost and pearl elements prevail at the centers. This Superb Gem specimen has clear contrast on both sides, though the obverse is more obvious with its cameo effect. Census: 25 in 67 (1 in 67+) Cameo, 5 finer (2/13). PCGS# 83907

3894 1910 PR67 NGC. Waves of coppery patina wash over each side of this needle-sharp Superb Gem proof, one of the later entries in the series struck to the extent of 2,405 pieces. This example is bested by only a handful of survivors. Census: 47 in 67 (1 in 67+), 4 finer (5/13). NGC ID# 278L, PCGS# 3908

3895 1910 PR67 PCGS. CAC. This fully struck high grade proof type coin exhibits dusky blended lilac and chestnut toning. Pristine except for a spot east of the S in CENTS. Housed in a green label holder. NGC ID# 278L, PCGS# 3908

3896 1912 PR66 Cameo PCGS. Frosty devices stand out against the deeply mirrored backdrop of this Premium Gem five cent. Exquisite detail is evident over the design elements. Population: 22 in 66 (2 in 66+) Cameo, 4 finer (4/13). PCGS# 83910

3897 1912 PR66+ Cameo PCGS. CAC. No trace of toning occurs on either side. The contrast on the reverse is close to Deep Cameo, less so on the obverse. Each side shows excellent preservation and a full proof strike, as expected for the grade. Population: 23 in 66 (2 in 66+) Cameo, 4 finer (5/13). PCGS# 83910

BUFFALO NICKELS

3898 1913-D Type One MS67 NGC. This Type One 1913-D nickel shows consistent color and excellent preservation throughout both sides, with no mentionable marks and a bold strike. A great coin for a type or complete set. Census: 16 in 67, 0 finer (4/13). NGC ID# 22PX, PCGS# 3916

3899 1913-S Type Two MS63 PCGS. CAC. The Type Two mintmarked issues are among the lowest-mintage and most challenging in the Buffalo nickel series. This Select coin is softly struck through the centers but luminous under dusky gold-to-gray patina. NGC ID# 22R3, PCGS# 3923

3900 1914-S MS65 PCGS. CAC. This spectacular Gem displays sharply detailed design elements and vibrant mint luster on both sides, with attractive hints of golden-brown and ice-blue toning. PCGS has graded 31 numerically finer examples (5/13). NGC ID# 22R6, PCGS# 3926

**1916-D Nickel, MS66
None Certified Finer**

- 3901 1916-D MS66 NGC.** An amazing Premium Gem, tied for the finest that NGC or PCGS have certified with a combined population of just 17 certified examples, this golden-toned specimen has bold design motifs with matte-like nickel gray surfaces and exceptional eye appeal. Census: 4 in 66, 0 finer (5/13). NGC ID# 22RB, PCGS# 3932

- 3902 1917 MS66 NGC. CAC.** Whispers of gold visit the lustrous surfaces of this Premium Gem. A solid strike imparts sharp definition to the design elements, and both sides are devoid of mentionable marks or spots. Some "orange-peel" effect does not detract. Census: 52 in 66 (2 in 66+), 6 finer (4/13). NGC ID# 22RD, PCGS# 3934

- 3903 1917-D MS65 PCGS.** The obverse is gold-toned with blue at the back of the neck, while the reverse is dusker with primarily peach hues. Well-defined by the standards of the issue and carefully preserved. The 1917-D nickel is rare any finer, with just 16 pieces graded MS66 or better by PCGS (4/13). NGC ID# 22RE, PCGS# 3935

- 3904 1917-D MS65 PCGS.** This Gem is well but not fully struck, nonetheless a high-quality coin with generous luster and attractive silver-gray surfaces with minimal toning accents. A few scattered marks are undistracting but grade-consistent. PCGS has seen only 16 numerically finer (5/13). NGC ID# 22RE, PCGS# 3935

- 3905 1917-S MS63 NGC.** This Select 1917-S Buffalo nickel offers a nice, clean look for the grade with medium gray surfaces that show only scattered, minor ticks but broad eye appeal. The strike is a sharp one, despite the minor weakness above the braid. NGC ID# 22RE, PCGS# 3936

- 3906 1917-S MS64 PCGS.** Traces of pale gold and light blue toning grace this Choice Mint State example. The strike is average with a degree of high-point weakness. An obverse die crack begins at the border below the feathers, crosses the braid and neck, to the Indian's mouth.

Ex: *The S.G. Griffin Collection (Heritage, 7/2010), lot 3314.* NGC ID# 22RE, PCGS# 3936

**1918/7-D Nickel, Fine 15
Strong Underdigit**

- 3907 1918/7-D Fine 15 PCGS. FS-101.** Despite 45 points of wear, the thick crossbar and downstroke of the underdigit 7 is readily evident. This stone-gray key date representative is evenly defined and moderately granular. A few delicate and unimportant marks are noted beneath STATES. Only the 1916 Doubled Date commands higher prices. NGC ID# 22RJ, PCGS# 3939

- 3908 1918/7-D — Tooled — PCGS Genuine. VF Details. FS-101.** Some minor tooling is evident in the obverse fields of this key date, but the all-important overdate is plainly evident. Collectors prize this issue in all grades and conditions. NGC ID# 22RJ, PCGS# 3939

- 3909 1918-D MS64 NGC.** Well struck and highly appealing thanks to the shimmering honey-gold luster and essentially pristine surfaces. A splendid near-Gem that offers plenty for the Buffalo nickel enthusiast. NGC ID# 22RH, PCGS# 3938

**1918-S Five Cent, MS64
Delicate Patina**

- 3910 1918-S MS64 NGC.** A well-preserved representative of this notably elusive San Francisco nickel issue, delicately toned pink and champagne across most of each side. Quicksilver luster comes from eroded dies and the strike is naturally soft, as often seen for the date. NGC has graded 15 coins as MS65 or finer (4/13).

Ex: *ANA Signature (Heritage, 7-8/2008), lot 1340; Long Beach Signature (Heritage, 2/2009), lot 750; CSNS Signature (Heritage, 4-5/2009), lot 1500.* NGC ID# 22RK, PCGS# 3940

- 3911 1919-S MS63 NGC.** Deep rust-orange patina coats the surfaces, which have only trivial abrasions. The centers are softly struck, but the peripheral design is clearly brought up. The 1919-S is relatively elusive in Mint State grades. NGC ID# 22RN, PCGS# 3943

**1919-S Nickel, MS64
Condition Rarity**

3912 1919-S MS64 PCGS. Flashes of light gold toning accompany the dusky gray surfaces of this elusive S-Mint nickel. Both sides of this Choice Mint State piece show considerable strike weakness that is typical for the issue. PCGS has only certified 34 finer examples of the 1919-S Buffalo (5/13). NGC ID# 22RN, PCGS# 3943

3913 1920-D MS64 PCGS. Sharply detailed for the issue with LIBERTY fully separated from the obverse border and essentially complete details on the bison. Lustrous light gray surfaces have a faint trace of gold on the obverse and streaks of darker steel on the reverse. PCGS has graded 69 examples as MS65 or finer (4/13).

Ex: Long Beach Signature (Heritage, 2/2008), lot 3416; Long Beach Signature (Heritage, 2/2009), lot 753. NGC ID# 22RR, PCGS# 3945

3914 1921-S AU50 NGC. The 1921-S is a popular low-mintage issue. The light gray surfaces of this AU offering are remarkably devoid of significant marks. This is a nice choice for the Buffalo nickel collector. NGC ID# 22RU, PCGS# 3948

3915 1921-S MS62 PCGS. CAC. Although more available than certain later S-mint Buffalos of the 1920s such as the 1926-S, the 21-S is still a rare issue. This satiny Mint State example has light gray luster with delicate rose and iridescent toning. NGC ID# 22RU, PCGS# 3948

3916 1921-S MS64 PCGS. Well struck design features stand out on this near-Gem Buffalo, including the braid, LIBERTY, the horn, and tail. Lustrous surfaces are uniformly toned and minimally marked. NGC ID# 22RU, PCGS# 3948

3917 1924 MS66 PCGS. CAC. Lightly gold-toned along the rims with the faint bluish interior tones more distinct on the reverse. Softly struck from eroded dies but a pleasing Premium Gem nonetheless. Population: 83 in 66, 5 finer (4/13). NGC ID# 22RX, PCGS# 3951

3918 1924-D MS64+ NGC. This high-end Choice specimen exhibits well-detailed design elements and vibrant mint luster under attractive shades of ice-blue and golden-tan toning. NGC has graded 19 numerically finer examples (5/13). NGC ID# 22RY, PCGS# 3952

**1924-S Nickel, MS64
Quicksilver Luster**

3919 1924-S MS64 NGC. This Choice example shows this issue's typical quicksilver luster and characteristic softness is noted on the highest design elements. The horn is intact, however, and the gold-orange and violet patina that drapes each side offers considerable eye appeal. All in all, a coin where the positives significantly outweigh any negatives.

Ex: Long Beach Signature (Heritage, 9/2008), lot 780; Baltimore Signature (Heritage, 3/2009), lot 633. NGC ID# 22RZ, PCGS# 3953

3920 1925-D MS64 PCGS. CAC. The obverse features dusky fire-red, sea-green, and steel-gray toning. The reverse is primarily olive-green and cream-gray. Quicksilver luster shimmers through the patina and marks are few for the grade.

Ex: Houston Signature (Heritage, 12/2008), lot 973. NGC ID# 22S3, PCGS# 3955

**1925-S Nickel, MS64
Good Reverse Detail**

3921 1925-S MS64 NGC. Outstanding luster outweighs a typically blunt strike on the obverse. The definition on the reverse is better-executed and that side, taken by itself, easily would qualify as a Gem. Both sides exhibit appreciable patina with a mix of gold and orange shadings and a touch of rose.

Ex: Long Beach Signature (Heritage, 2/2002), lot 5457; FUN Signature (Heritage, 1/2004), lot 5418; The Victoria Collection (Heritage, 8/2009), lot 312. NGC ID# 22SA, PCGS# 3956

3922 1927-S MS62 PCGS. Luminous with quicksilver luster beneath gold-gray and nickel-blue shadings. Well-struck with few overt abrasions and just a few too many wispy flaws for a Select grade.

Ex: Baltimore Signature (Heritage, 3/2009), lot 643. NGC ID# 22SA, PCGS# 3962

**1928-S Nickel, Well-Struck MS65
Subtle Ice-Blue Toning**

- 3923 1928-S MS65 NGC.** This Gem 1928-S Buffalo is far better-struck than the average survivor, with a full horn on the bison and a split tail, despite some minor softness on the shoulder and on the obverse above the braid. Glints of rose and ice-blue appear under a lamp, along with bright mint luster and few mentionable marks of any size. An attractive example of this elusive S-mint issue from the 1920s. NGC has graded only nine submissions finer (5/13). NGC ID# 22SD, PCGS# 3965

- 3924 1929-D MS65 PCGS.** Golden-gray luster displays a few splashes of ice-blue. The date is sharp, the mintmark is well-outlined, and the centers decently detailed. A conditionally elusive Denver Mint issue at this grade level and finer.

Ex: FUN Signature (Heritage, 1/2007), lot 2344; Dallas Signature (Heritage, 4/2007), lot 449; The Victoria (Heritage, 8/2009), lot 322. NGC ID# 22SF, PCGS# 3967

- 3925 1935 Doubled Die Reverse AU50 PCGS. FS-901.** FIVE CENTS is strongly die doubled on this desirable *Guide Book* variety. The present briefly circulated nickel is toned almond-gold and powder-blue. The hair above the braid shows a small spot and a diagonal field mark is near the bison's beard. PCGS# 93974

- 3926 1937-D Three-Legged AU53 PCGS. FS-901.** Glimmers of luster emerge on this straw-gold and cream-gray key date nickel. No marks are remotely consequential, and all diagnostics are present for the famous lapped die variety. NGC ID# 22SX, PCGS# 3982

- 3927 1937-D Three-Legged AU58 NGC. FS-901.** A satiny cream-gray near-Mint representative of the perennially popular variety. An unobtrusive mint-made lamination is on the obverse margin at 7:30 and a couple of faint hair-thin marks are noted near the bison's beard. NGC ID# 22SX, PCGS# 3982

- 3928 1937-D Three-Legged AU58 PCGS. FS-901.** A sharp golden-gray representative that shimmers with luster despite slight wear on the hip. Marks are absent save for a thin mark over the bison's eye. The best known and most dramatic of the various partial leg varieties of the widely collected series. NGC ID# 22SX, PCGS# 3982

- 3929 1937-D Three-Legged AU58 NGC. FS-901.** Much of the appeal of a Mint State coin is present on this AU58 piece at a more-attractive price. Generous luster, minimal wear, and great eye appeal occur on silver-gray surfaces with rose accents. NGC ID# 22SX, PCGS# 3982

- 3930 1937-D Three-Legged AU58 PCGS. FS-901.** One of the most perennially popular varieties in U.S. numismatics. This near-Mint example shows generous luster and minimal high-point wear amid washes of silver-gray and orange-rose on each side. NGC ID# 22SX, PCGS# 3982

Three Legged 1937-D Nickel, MS62

- 3931 1937-D Three-Legged MS62 NGC. FS-901.** Blended sea-green and honey-gold toning embraces lustrous and minimally abraded surfaces. All diagnostics of the key variety are evident. Though higher grade examples are obtainable, the present piece will please the experienced collector. Encapsulated in a prior generation holder. NGC ID# 22SX, PCGS# 3982

PROOF BUFFALO NICKELS

1913 Type One Nickel, Multicolor PR66

- 3932 1913 Type One PR66 PCGS.** Iridescent rose-red, jade-green, and lemon-gold endow this lustrous and immaculate Premium Gem. The strike is intricate, even on the hair above the braid. A single-year subtype that is far rarer as a proof than in business format. Housed in a first generation holder. Population: 92 in 66, 50 finer (4/13). *From The MKJ Collection, Part II.* NGC ID# 278R, PCGS# 3988

**1914 Buffalo Nickel, PR66
Gorgeous Matte Proof**

- 3933 1914 PR66 PCGS.** A stunning Premium Gem matte proof, this 1914 Buffalo nickel has full design definition with gray matte surfaces and gorgeous golden overtones. Both sides are free of spots and blemishes. While proof examples of the 1914 are usually available, seldom do they appear at this or finer grade levels, and rarely with so much eye appeal. NGC ID# 278T, PCGS# 3991

**1936 Buffalo Nickel, PR67
Type One, Satin Finish**

- 3934 1936 Type One—Satin Finish PR67 PCGS. CAC.** This Superb Gem satin finish proof approaches Cameo quality with hints of luster on the boldly detailed devices. The satin and brilliant finish proof Buffalo nickels are rarely seen with any degree of contrast. This pristine specimen has delicate gold toning with spot-free surfaces. PCGS has only certified 31 finer examples. NGC ID# 278X, PCGS# 3994

- 3935 1936 Type One—Satin Finish PR67 PCGS. CAC.** After a two-decade gap, proof production resumed in 1936 in both satin and brilliant format. Soft brown patina adorns both sides of this sharply struck Superb Gem proof. NGC ID# 278X, PCGS# 3994

1936 Brilliant Finish Nickel, Pastel-Toned PR67

- 3936 1936 Type Two—Brilliant Finish PR67 PCGS.** Lilac, gold, and powder-blue patina enriches this fully struck Superb Gem. Hairlines are completely absent across the glassy fields. The occasional pinpoint toning fleck fails to deny the eye appeal. PCGS has certified just six pieces in finer grades (5/13).
Ex: FUN Signature (Heritage, 1/2007), lot 2406.
From The MKJ Collection, Part II. NGC ID# 278Y, PCGS# 3995

- 3937 1937 PR63 NGC.** The luminous surfaces of this lovely Select proof Buffalo exhibit excellent delineation on the design motifs, including fullness on the horn and tail. Both sides yield pleasing eye appeal. NGC ID# 278Z, PCGS# 3996

- 3938 1937 PR67 PCGS.** Touches of light gold color visit the luminous surfaces of this Superb Gem proof Buffalo nickel. The mirrored fields highlight the well struck design elements. Great all around eye appeal.
From The MKJ Collection, Part II. NGC ID# 278Z, PCGS# 3996

- 3939 1937 PR67 NGC.** This Superb Gem is an exceptional Buffalo proof. Its design elements are razor-sharp, including the bison's horn and tail. Impeccably preserved surfaces yield fantastic overall eye appeal. NGC ID# 278Z, PCGS# 3996

- 3940 1937 PR67 NGC.** A magnificent Superb Gem, with fully struck design elements and brilliant mirrored fields that show just a wisp of pale gold toning. NGC has graded only 40 numerically finer examples (4/13). NGC ID# 278Z, PCGS# 3996

- 3941 1937 PR67+ NGC.** This crisply struck Superb Gem proof is a high-end example, clearly on the cusp of PR68. There is little trace of color, but the pristine surfaces display thoroughgoing eye appeal and pristine preservation. Census: 3 in 67+, 40 finer (4/13). NGC ID# 278Z, PCGS# 3996

**1937 Nickel, Brightly Reflective PR67+
Pale, Even Toning**

- 3942 1937 PR67+ PCGS. CAC.** Second and final year of issue for the second series of proof Buffalo nickels, the 1937 has an enduring popularity. The fields are deeply mirrored and there are no visible signs of contact on either side. Just the faintest golden patina can be seen on each side, and we see no signs of carbon. NGC ID# 278Z, PCGS# 3996

JEFFERSON NICKELS

- 3943 1939 Quadrupled Die Reverse MS65 PCGS. FS-802.** The multiple imaging is most apparent on the final O in MONTICELLO on this scarce and popular variant. Both sides of this attractive Gem are lustrous and well-detailed, with hints of pale gold toning. PCGS# 38483

- 3944 1939 Reverse of 1940 MS67 Full Steps PCGS.** The "Straight Steps" variety of this Superb Gem displays fairly strong central detail, which is uncharacteristic of the issue. Both sides are impeccably preserved. Population: 30 in 67 Full Steps, 0 finer (4/13). PCGS# 894003

- 3945 1944-P MS67+ PCGS.** Daubs of beautiful iridescent rim color complement silvery centers and generous luster on this wartime "silver nickel," so-called although the pieces have more copper (56%) than silver (35%). *Note that this piece is the sole finest graded at PCGS.* Population: 25 in 67 (1 in 67+), 0 finer (4/13). NGC ID# 22TU, PCGS# 4022

- 3946 1946-D/D MS65 Full Steps PCGS. FS-501.** Apricot and lilac toning endows lustrous and unmarked surfaces. The D over Horizontal D variety is much scarcer than the 1943/2 overdate, though it has not attained a listing in the *Guide Book*. Population: 11 in 65 Full Steps, 13 finer (4/13). PCGS# 894029

**Rare 1946-D Over Horizontal D Nickel
FS-501, MS65 Full Steps**

- 3947 1946-D/D MS66 Full Steps PCGS. FS-501.** “This is considered the second rarest of the original Jefferson ‘Top 10’ in Mint State grades, report Fivaz and Stanton in their *Cherrypickers’ Guide*. This spectacular overmintmark shows part of a horizontal D protruding to the left of the main mintmark, which is in the proper upright position. This variety has been well known for decades, and Walter Breen dedicated number 2078 to it in his seminal *Encyclopedia*. Few examples could hope to rival this Premium Gem for sheer visual appeal. The slightly satiny surfaces shimmer with excellent luster, and a thin veneer of sunset-orange and golden toning graces the carefully preserved surfaces. This coin’s bold overall detail, most evident at the decisively struck steps of Monticello, is a crowning touch. A truly special example of this important variety.

Ex: *Long Beach Signature* (Heritage, 5-6/2007), lot 615, where it brought \$5,750. PCGS# 894029

**1946-D over Inverted D Nickel
MS66 Full Steps, Tied for Finest**

- 3948 1946-D/D MS66 Full Steps PCGS. FS-501.** The mintmark is dramatically repunched with the first punch inverted. This valuable repunched mintmark is considered the second rarest of the original Jefferson “Top 10” in Mint State, second only to the 1942-D Over Horizontal D. The mint luster on this piece is thick and frosted, more suggestive of a San Francisco product than a Denver piece, in our opinion. Lightly toned with a pale golden overlay of patina on each side, the only mentionable abrasion is a shallow scuff on the collar of Jefferson’s coat. Population: 13 in 66 (1 in 66+) Full Steps, 0 finer (4/13).

Ex: *Portland Signature* (Heritage, 3/2004), lot 5445; *Central States Signature* (Heritage, 5/2007), lot 1701, where it brought \$8,280. PCGS# 894029

**1946-D Over Horizontal D Nickel
FS-501, MS66 Full Steps**

- 3949 1946-D/D MS66 Full Steps PCGS. FS-501.** This D over Horizontal D variety was discovered by Adolf Weiss, founder of the PAK Full Step Nickel Club. It is a surprisingly rare coin, especially in Uncirculated grades. Butter-gold and lilac-gray endow this lustrous and well preserved Premium Gem. Population: 13 in 66 (1 in 66+) Full Steps, 0 finer (4/13).

Ex: *Long Beach Signature* (Heritage, 2/2006), lot 650, which realized \$11,500. PCGS# 894029

- 3950 1951 MS66 Full Steps PCGS.** Like most P-mint Jefferson nickels of the early 1950s, this piece shows somewhat grayish surfaces, but here they are enlivened by a pleasing golden patina with glints of ice-blue at the rims. This is a rare and in-demand issue in MS66 Full Steps. Population: 14 in 66 Full Steps, 0 finer (5/13). NGC ID# 22UG, PCGS# 84043

- 3951 1951-D MS66+ Full Steps PCGS.** Beautiful rainbow-like patina around the borders frames soft violet centers on this high-end Premium Gem. Sharply defined motifs enhance the coin’s overall eye appeal. Population: 43 in 66 (1 in 66+) Full Steps, 0 finer (4/13). NGC ID# 22UH, PCGS# 84044

- 3952 1953-S MS64 Full Steps PCGS.** Soft champagne-gold patina rests on the lustrous surfaces of this near-Gem, and a solid strike delivers crisp detail to the devices. The ‘53-S is a true rarity with Full Steps. Population: 15 in 64 Full Steps, 3 finer (5/13). NGC ID# 22UR, PCGS# 84051

SMS JEFFERSON NICKELS

- 3953 1965 SMS MS66 Deep Cameo PCGS.** An elusive issue at the Deep Cameo level. This piece offers deep mirrors contrasting well with moderate frosting. A small flaw, likely as struck, appears to the right of Jefferson’s head, and a couple of contact marks are on the lower jaw. Population: 20 in 66 Deep Cameo, 8 finer (4/13).
From *The MKJ Collection, Part II*. PCGS# 94197

- 3954 1966 SMS MS67 Deep Cameo PCGS.** Collectors who have never dabbled in the 1965-67 Special Mint Set coins might be surprised to learn just how elusive some issues are in Deep Cameo. This profoundly contrasted, untoned 1966 SMS nickel is one of just 15 submissions in MS67 Deep Cameo at PCGS, with a single piece finer (4/13).

From *The MKJ Collection, Part II*. PCGS# 94198

PROOF JEFFERSON NICKELS

1938 Jefferson Nickel, PR68 Among the Finest Certified

- 3955 1938 PR68 PCGS.** Gentle golden color fades to multicolored hues at the obverse border. Soft bluish-violet dominates the reverse, accented with yellow-gold at the margins. The design elements are exquisitely defined. Essentially perfect overall, a pristine specimen. Population: 11 in 68, 0 finer (5/13).
From The MKJ Collection, Part II. NGC ID# 279W, PCGS# 4175

- 3956 1939 Reverse of 1940 PR66 PCGS. CAC.** The sharply defined steps on Monticello identify the reverse of 1940, seldom encountered on a 1939 proof. This spectacular Premium Gem is sharply detailed throughout, with vibrant mint luster and a few wisps of pale gold toning. Population: 45 in 66, 19 finer (5/13).
NGC ID# 22YB, PCGS# 94176

- 3957 1940 Reverse of 1938 PR66 PCGS. CAC.** The blurry steps on Monticello identify the scarcer Reverse of 1939. This spectacular Premium Gem displays razor-sharp definition on the design elements and vibrant mint luster on both sides with a few hints of champagne-gold toning. Population: 30 in 66, 18 finer (5/13).
NGC ID# 279Y, PCGS# 94177

1942 Type One Jefferson Nickel, PR68 None Certified Finer at Either Service

- 3958 1942 Type One PR68 PCGS. Ex:** Tom Mershon Collection. This decisively struck piece would be an excellent addition to a Registry Set. Neither NGC nor PCGS has certified any coins finer than this resplendent specimen, with each service reporting nine pieces at the PR68 level (4/13). Vibrant yellow toning encircles the perimeter and contrasts nicely against the light blue patina that covers the centers.
Ex: Summer FUN Signature (Heritage, 7/2010), lot 3416, which realized \$3,220.
From The MKJ Collection, Part II. NGC ID# 27A3, PCGS# 4179

- 3959 1942-P Type Two PR68 NGC.** Collectors treasure the 1942-P Jefferson nickel because it is the only wartime proof with the silver/manganese composition. Only 27,600 Type Two proofs were minted in 1942, and proof offerings were discontinued after that year. This spectacular coin displays toning in shades of iridescent pearl, cherry, lemon-yellow, lime-green, pink, denim-blue, and violet. Census: 17 in 68, 0 finer (4/13).
NGC ID# 27A4, PCGS# 4180

1942 Type Two Nickel, PR66 Cameo Surprisingly Scarce in Better Grades

- 3960 1942-P Type Two PR66 Cameo PCGS. CAC.** Brilliant throughout, this silver striking of the wartime Jefferson nickel is fully defined, as one would expect. The fields are exceptionally deep and there is noticeable frost over the devices that gives the piece its cameo appearance. Remarkably few of this issue have achieved such a high grade. Population: 4 in 66 Cameo, 0 finer (4/13).
PCGS# 84180

1950 PR66 Deep Cameo Jefferson Nickel Remarkably Few Known in High Grades

- 3961 1950 PR66 Deep Cameo PCGS.** Considered by many to be the key to the Cameo Jefferson nickel series, this 1950 has remarkably deep mirrors with noticeably contrasting mint frost over the devices. Both sides are draped in rich reddish-aqua patina. Remarkably few examples are known in high grades, nowhere near enough to satisfy collector demand. Population: 6 in 66 Deep Cameo, 8 finer (4/13).
NGC ID# 27A5, PCGS# 94182

- 3962 1954 PR67 Deep Cameo PCGS.** Deep Cameo examples of this early Jefferson nickel proof are few and far between, this Superb Gem silver-on-black example being a blatant exception showing profound contrast. Population: 12 in 67 Deep Cameo, 7 finer (4/13).
From The MKJ Collection, Part II. NGC ID# 27A7, PCGS# 94186

- 3963 1955 PR68 Deep Cameo PCGS.** The improved flat-pack proof set package introduced in this year — for about half of the proof sets sold — provided better protection for the coins (and prevented haze better than) than the plasticized envelopes, making it a bit easier to find nice proofs. Deep Cameo examples of the 1955 nickel are still elusive, however; this profoundly contrasted, untoned example is one of only 25 in this top grade at PCGS (4/13).
From The MKJ Collection, Part II. NGC ID# 22YF, PCGS# 94187

- 3964 1959 PR68 Deep Cameo PCGS.** The icy devices are exquisitely struck and provide outstanding contrast with the darkly mirrored fields. This piece is flawless aside from a couple of fully retained and nearly imperceptible laminations. There is no shortage of proof 1959 nickels without cameo contrast, but specimens such as this piece with a stunning white-on-black appearance are extremely rare. Population: 14 in 68 Deep Cameo, 1 finer (4/13).
From The MKJ Collection, Part II. NGC ID# 27A9, PCGS# 94191

3965 1971 No S PR68 Cameo NGC. A sharp strike and deeply mirrored surfaces provide this piece with tremendous visual appeal. The lightly frosted devices produce pleasing contrast against the brilliant fields. Census: 20 in 68 Cameo, 12 finer (4/13). NGC ID# 22YN, PCGS# 84204

**1971 No S Nickel, PR69 Cameo
Low-Mintage No S Proof**

3966 1971 No S PR69 Cameo PCGS. A single proof nickel die in 1971 missed the step where mintmarks were added and that die produced a small number of proofs before the error was detected. Surviving examples are seldom encountered. This nearly perfect proof is virtually untoned, other than a few small spots of color on Jefferson's portrait. Population: 10 in 69 Cameo, 0 finer (5/13). NGC ID# 22YN, PCGS# 84204

3967 1977-S PR70 Deep Cameo PCGS. Perfect preservation occurs on this 1977-S Jefferson nickel, profoundly contrasted and totally untoned, one of few to achieve the ultimate grade. Extremely appealing.
From The MKJ Collection, Part II. NGC ID# 27AR, PCGS# 94210

3968 1979-S Type Two PR70 Deep Cameo PCGS. The Type Two 1979-S proof coins, showing a clear mintmark with distinct serifs and open inner loops, are much more elusive than the Type One pieces. This piece displays ultimate preservation and deep contrast. Population: 33 in 70 Deep Cameo (4/13).
From The MKJ Collection, Part II. NGC ID# 22YR, PCGS# 94213

3969 1982-S PR70 Deep Cameo PCGS. Excellent eye appeal is the product of profound white-on-black contrast over immaculately preserved surfaces. A Registry Set prize. Population: 20 in 70 Deep Cameo (4/13).
From The MKJ Collection, Part II. NGC ID# 27AW, PCGS# 94217

3970 1984-S PR70 Deep Cameo PCGS. An issue seldom seen in the ultimate PR70 Deep Cameo grade at PCGS, this sparkling and optimally contrasted example is one of only 23 such (4/13).
From The MKJ Collection, Part II. NGC ID# 27AY, PCGS# 94219

3971 1987-S PR70 Deep Cameo PCGS. This perfectly preserved piece also offers stark contrast between fields and devices that few survivors of the issue can match. A great untuned example. Population: 29 in 70 Deep Cameo (4/13).
From The MKJ Collection, Part II. NGC ID# 27B3, PCGS# 94222

MERCURY DIMES

3972 1916-D VG10 NGC. The light gray surfaces of this key date representative are visited by occasional whispers of russet. The design elements display nice definition for the grade designation, including about one-half of the lines in the faces. This is a great, original example that will fit nicely into a low- to middle-grade Mercury dime set. NGC ID# 23GY, PCGS# 4906

3973 1916-S MS66 Full Bands PCGS. Frosty silver surfaces show excellent eye appeal and an essentially full strike with immaculate preservation. This coin appears to be an early strike from fresh dies. Population: 75 in 66 (3 in 66+) Full Bands, 19 finer (4/13). NGC ID# 23GZ, PCGS# 4909

3974 1918 MS65 Full Bands NGC. The surfaces are lightly but thoroughly patinated in a blush of pinkish-gold over uniform mint frost. This piece approaches a full strike appears close to a finer grade. Census: 61 in 65 Full Bands, 18 finer (5/13). NGC ID# 23H5, PCGS# 4917

3975 1921 AU58 PCGS. This low-mintage key is needed in all grade ranges. The present near-Mint State offering possesses generous luster and is sharply detailed. Indeed, the central bands appear to be just a hair from Full Band classification. NGC ID# 23HE, PCGS# 4934

1921 Dime, MS63 Full Bands

3976 1921 MS63 Full Bands PCGS. This low-mintage key is desirable in all grade ranges. The surfaces of this Select example are thoroughly frosty and appealing, with hints of green and tan present along with small splashes of gold and pink on the obverse. A lovely piece with nice eye appeal, this coin was likely held from a higher grade due to a few small marks on the face. NGC ID# 23HE, PCGS# 4935

1921 Mercury Dime, MS64 Full Bands Low-Mintage Semikey

3977 1921 MS64 Full Bands PCGS. CAC. The 1921 Mercury dime is a popular low-mintage issue that is quite scarce in MS64 condition. This sharply detailed example exhibits Full Bands definition on the fascies, with vibrant mint luster and traces of golden-tan and ice-blue toning. Overall visual appeal is outstanding. NGC ID# 23HE, PCGS# 4935

3978 1921-D AU55 PCGS. A lightly circulated example of this low-mintage semikey, with just a trace of wear on the high points of the design and original mint luster on both sides. A few hints of golden-tan toning add to the considerable eye appeal. NGC ID# 23HF, PCGS# 4936

3979 1921-D MS64 PCGS. This semi-key dime is close to brilliant and displays vibrant cartwheel sheen. No marks are readily evident, though the central bands and peripheral legends show minor incompleteness. Encapsulated in a green label holder. NGC ID# 23HF, PCGS# 4936

MERCURY DIMES

3980 1921-D MS63 Full Bands NGC. The 1921-D Mercury dime boasts a low mintage of just over 1 million pieces. The present Select example displays an exemplary strike throughout all design elements. NGC ID# 23HF, PCGS# 4937

3981 1923 MS67 Full Bands PCGS. The frosty surfaces are virtually untuned on this Superb Gem dime of 1923, the first struck since the 1921-P and D issues. A fully struck coin of remarkable beauty, and all but unimprovable Population: 64 in 67 (1 in 67+) Full Bands, 3 finer (4/13). NGC ID# 23HG, PCGS# 4939

1924 Mercury Dime, MS67 Full Bands Condition and Strike Rarity

3982 1924 MS67 Full Bands PCGS. The 1924 Mercury dime had a substantial mintage of 24 million coins, yet it is one of the important rarities in high grades, especially with sharp bands on the reverse. This boldly defined Superb Gem has soft, frosty silver luster with iridescent splashes on both sides. Population: 19 in 67 Full Bands, 0 finer (5/13). NGC ID# 23HJ, PCGS# 4943

3983 1926 MS66 Full Bands PCGS. Gold CAC. Beautifully lustrous and sharply struck on both sides, this Premium Gem displays bands of deeper rose-copper color on the obverse with just an echo of similar hues on the reverse. A great coin for color aficionados. Population: 90 in 66 (4 in 66+) Full Bands, 17 finer (5/13). NGC ID# 23HR, PCGS# 4955

3984 1935-S MS64 Full Bands PCGS. CAC. An untuned and extremely well-struck example of this issue, probably a point finer except for minor and scattered marks that detract little from the appeal. NGC ID# 23JE, PCGS# 4997

3985 1936 MS68 Full Bands PCGS. Freckles of golden-orange patina adhere to the lustrous surfaces of this delightful dime. The solid strike goes beyond the Full Bands, enhancing the coin's eye appeal. Population: 14 in 68 Full Bands, 0 finer (5/13). NGC ID# 23JF, PCGS# 4999

3986 1939-S MS65 Full Bands PCGS. CAC. Frosty surfaces show just a trace of color and a needle-sharp strike along with excellent preservation and equal eye appeal. One of the better-produced dime issues from the 1930s. NGC ID# 23JT, PCGS# 5021

3987 1941-S MS68 Full Bands PCGS. Small S. This virtually immaculate World War II type coin displays pastel almond-gold and ice-blue patina. Precisely struck at the centers though the peripheral letters show occasional slight softness near the rim. Population: 6 in 68 Full Bands, 0 finer (4/13). NGC ID# 23JZ, PCGS# 5033

3988 1942/1 AU55 PCGS. FS-101. A partly lustrous example of this obvious overdate. Minimally abraded and attractive with pastel lilac-red, sea-green, and apricot-gold toning. Among the keys to the Mercury dime series. NGC ID# 23K4, PCGS# 5036

3989 1943-S MS68 Full Bands NGC. Delightful rim toning in shades of pale cobalt-blue and copper tones complement silvery centers on this stunning, frosted Superb Gem, with the strike as bold as the color is appealing. A great example of this issue. Census: 8 in 68 Full Bands, 0 finer (4/13). NGC ID# 23KA, PCGS# 5049

PROOF MERCURY DIMES

3990 1936 PR65 PCGS. This lightly toned Gem proof exhibits razor-sharp design elements and luminous surfaces. A really pleasing specimen for the designated numerical grade. NGC ID# 27DG, PCGS# 5071

3991 1936 PR65 PCGS. CAC. A veneer of light color does not diminish the brilliance of this lovely Gem. Both sides are exquisitely struck and nicely preserved. NGC ID# 27DG, PCGS# 5071

3992 1936 PR65 PCGS. CAC. This is a lovely Gem proof that exudes outstanding eye appeal, evidenced by the CAC sticker. The design elements are exquisitely brought up. NGC ID# 27DG, PCGS# 5071

3993 1936 PR66 PCGS. The 1936 is the first and lowest mintage date of the seven-year run of proof Mercury dimes. The present Premium Gem offering yields fully struck devices and exquisitely preserved surfaces. NGC ID# 27DG, PCGS# 5071

3994 1936 PR66 PCGS. This wonderful Premium Gem offering displays sharply struck devices and nicely preserved surfaces. This is a great coin for a high-grade Mercury collection. NGC ID# 27DG, PCGS# 5071

1936 Superb Gem Proof Dime Always-Popular First-Year Proof

3995 1936 PR67 PCGS. The surfaces are almost completely brilliant, showing just the slightest outline of russet over the rims. The fields are nicely mirrored and there is no contrast apparent between the fields and devices, when such contrast is found it is invariably chance rather than intention on Mint employee's part. Essentially perfect surfaces. NGC ID# 27DG, PCGS# 5071

1936 Mercury Dime, PR67 First-Year Proof Issue

3996 1936 PR67 PCGS. The first proof issue in the Mercury dime series, the 1936 had a mintage of a little more than 4,000 proofs, and survivors are in high demand. This brilliant Superb Gem has bright silver surfaces with no evidence of toning on either side. Population: 51 in 67, 1 finer (5/13).
From The MKJ Collection, Part II. NGC ID# 27DG, PCGS# 5071

1936 Mercury Dime, PR67
Only One Finer NGC-Graded Example

- 3997 1936 PR67 NGC.** A brilliant, well-struck example from the beginning of the seven-year run of proof Mercury dimes, this Superb Gem proof exhibits tremendous eye appeal. A small translucent spot appears near the I in LIBERTY and a few tiny flyspecks of color are present near Adolph Weinman's initials. This piece was struck from lightly rotated dies. NGC and PCGS have each awarded higher numeric grades to only one example (4/13). NGC ID# 27DG, PCGS# 5071

1937 Dime, Rainbow-Toned PR68

- 3998 1937 PR68 PCGS.** The beautiful peripheral rainbow patina consists of lemon-gold, rose-red, and lime-green. Fully struck, satiny, and immaculate. Certified in a green label holder. Population: 26 in 68, none finer (5/13).
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 5867; Houston Signature (Heritage, 12/2008), lot 1196, which realized \$7,475.
From The MKJ Collection, Part II. NGC ID# 27DH, PCGS# 5072

- 3999 1939 PR68 NGC.** Medium-intensity russet and lime-green patination flows over the luminous surfaces of this Superb Gem proof Mercury dime. Exquisitely struck and flawless, as expected for the numerical grade. NGC ID# 27DK, PCGS# 5074

- 4000 1939 PR68 NGC.** This immensely appealing and deeply reflective Superb Gem features milky toning that adds a touch of dappled tan about the obverse periphery. The strike is seemingly flawless, as are the magnificently preserved surfaces. Neither NGC nor PCGS has graded a finer specimen (4/13). NGC ID# 27DK, PCGS# 5074

- 4001 1939 PR68 PCGS.** This is an exquisitely struck and virtually flawless proof, as would be expected from the designated numerical grade. Both sides are lightly toned. Population: 43 in 68, 0 finer (4/13). NGC ID# 27DK, PCGS# 5074

- 4002 1939 PR68 PCGS.** this is a stunning PR68 Mercury dime, with razor-sharp definition on all design elements and deeply mirrored brilliant fields that show no signs of contact. Really great eye appeal.
From The MKJ Collection, Part II. NGC ID# 27DK, PCGS# 5074

- 4003 1939 PR68 PCGS. CAC.** This magnificent Mercury dime displays razor-sharp definition on all design elements and close inspection reveals no mentionable distractions on the deeply mirrored surfaces. Shades of vivid cobalt-blue, greenish-gold, and violet toning enhance the incredible eye appeal. Population: 43 in 68, 0 finer (5/13). NGC ID# 27DK, PCGS# 5074

- 4004 1940 PR68 NGC.** Pretty lime-green and pink-red iridescence adorns the peripheries, and the field areas, on each side of this sharply struck Superb Gem proof. A coating of milky patina, on obverse and reverse alike, fails to completely obscure the noticeable reflectivity in the fields. Impeccably preserved and entirely free of bothersome hairlines or contact marks. Census: 40 in 68, 1 finer (4/13).
Ex: Long Beach Signature (Heritage, 2/2005), lot 6432. NGC ID# 27DL, PCGS# 5075

- 4005 1940 PR68 NGC.** The quicksilver surfaces on this frosty, top-notch Mercury dime proof are untuned and essentially defect-free, as demanded at this grade level. Census: 40 in 68, 1 finer (5/13). NGC ID# 27DL, PCGS# 5075

1940 Mercury Dime, Attractively Toned PR68

- 4006 1940 PR68 PCGS.** Slight accents of reddish-gold, pale green, and purple are seen over the obverse, while streaks of faint purple appear on the reverse. Immaculately preserved surfaces exhibit boldly impressed design elements, rounding out this coin's magnificent eye appeal. Population: 20 in 68, 0 finer (4/13).
Ex: Houston Signature (Heritage, 12/2008), lot 1202; ANA Signature (Heritage, 8/2010), lot 4572.
From The MKJ Collection, Part II. NGC ID# 27DL, PCGS# 5075

- 4007 1941 PR68 NGC.** Hazy gray patina covers each side with strongly reflective, underlying mirrors in the fields. The peripheries show thin, bright rings of iridescence and give the coin considerable eye appeal. A splendidly preserved example of this late-series proof. Census: 43 in 68, 0 finer (4/13). NGC ID# 27DM, PCGS# 5076

- 4008 1941 PR68 NGC.** The silver-white surfaces display a chromelike gleam on this beautifully struck Mercury dime. This well-preserved specimen is among the finest numerically known examples, with neither NGC nor PCGS having assigned a PR69 or higher grade (4/13). NGC ID# 27DM, PCGS# 5076

- 4009 1942 PR68 NGC.** The last of the proof Mercury dimes, represented here by a gorgeous PR68 survivor. Gleaming and minimally toned with spectacular visual appeal. NGC ID# 27DN, PCGS# 5077

1942 Mercury Dime, PR68
Sharply Detailed, Strong Visual Appeal

- 4010 1942 PR68 PCGS.** *Ex: Tom Mershon Collection.* Essentially a flawless coin to the unaided eye. Glimpses of pale rose-gray toning are the only evidence of color on this gleaming and otherwise brilliant Superb Gem specimen. Razor-sharp striking definition and crisp eye appeal. Population: 44 in 68 (1 in 68+), 0 finer (5/13).
From The MKJ Collection, Part II. NGC ID# 27DN, PCGS# 5077

- 4011 1942 PR66 Cameo NGC.** Appreciably contrasted, a rarity for the Mercury dime proof series, though the frost is light all-around. Excellent detail and silver mirrors with only a few tiny faults to preclude an even finer designation. A remarkable coin. Census: 3 in 66 Cameo, 3 finer (4/13). PCGS# 85077

ROOSEVELT DIMES

1946-S Mercury Dime, MS68 Full Bands None Certified Finer at PCGS

- 4012 1946-S MS68 Full Bands PCGS.** The mintmark is of the Knob S type, rather than the Trumpet S. This virtually perfect specimen is sharply detailed throughout, with Full Bands definition on the fascies. The pristine lustrous surfaces are patinated in shades of golden-brown and violet. Eye appeal is tremendous. Population: 6 in 68 Full Bands, 0 finer (4/13). NGC ID# 23KL, PCGS# 85084

1949-S Roosevelt Dime, MS67+ Rare Full Bands Specimen

- 4013 1949-S MS67+ Full Bands PCGS.** This high-end Superb Gem features brilliant centers that yield to dark shades of amber, burnt-orange, and lavender toning at the peripheries. The design elements are well-detailed and vibrant mint luster is evident on both sides. Population: 14 in 67 (1 in 67+) Full Bands, 0 finer (5/13). NGC ID# 23KW, PCGS# 85093

1957 Roosevelt Dime, MS67 Full Bands Toned on One Side

- 4014 1957 MS67 Full Bands PCGS.** Toned in speckled gold on the obverse, and fully brilliant white on the reverse, this Superb Gem 1957 dime has a sharp strike and impressive eye appeal. The virtually perfect surfaces are satiny and pristine. Population: 6 in 67 (1 in 67+) Full Bands, 0 finer (5/13). NGC ID# 23LK, PCGS# 85114

PROOF ROOSEVELT DIMES

- 4015 1950 PR67 Deep Cameo PCGS.** A lovely and well-preserved silver-white Superb Gem of this first-year proof issue, exquisitely preserved and with pleasing Deep Cameo surfaces. Population: 11 in 67 Deep Cameo, 1 finer (4/13).
From The MKJ Collection, Part II. PCGS# 95225

- 4016 1951 PR68 Cameo PCGS.** Wisps of pastel toning appear on the obverse of this otherwise brilliant Superb Gem, with full cameo contrast from deeply mirrored fields and frosty devices. The finest-graded Deep Cameos at PCGS are a trio of PR67s. Population: 7 in 68 Cameo, 0 finer (4/13).
From The MKJ Collection, Part II. NGC ID# 27EK, PCGS# 85226

- 4017 1952 PR68 Cameo PCGS Secure.** Close examination reveals delicate champagne toning on essentially brilliant silver surfaces with satin luster on the devices and deeply mirrored fields. The exquisite strike features bold hair detail and full torch bands. Population: 6 in 68 Cameo, 1 finer (4/13).
From The MKJ Collection, Part II. NGC ID# 27EL, PCGS# 85227

- 4018 1953 PR68 Cameo PCGS.** Another Registry Set price, this 1953 PR68 Cameo dime is one of only eight in this grade at PCGS, which has seen but one in PR68 Deep Cameo (4/13). Thorough contrast appears over silver-white, pristine surfaces.
From The MKJ Collection, Part II. NGC ID# 27EM, PCGS# 85228

1954 Roosevelt Dime, PR67 Deep Cameo Tied for Finest at PCGS

- 4019 1954 PR67 Deep Cameo PCGS.** This fully brilliant Superb Gem has bright silver surfaces without toning on either side. The devices are sharply detailed with frosty mint luster, floating over deeply mirrored fields. Population: 4 in 67 Deep Cameo, 0 finer (5/13).
From The MKJ Collection, Part II. NGC ID# 27EN, PCGS# 95229

- 4020 1955 PR68 Deep Cameo PCGS.** Deep Cameo examples of the 1955 dime can be found occasionally in lower grades, but a PR68 Deep Cameo is rare. This snow-white example boasts impeccable contrast and preservation. Population: 13 in 68 Deep Cameo, 0 finer (4/13).
From The MKJ Collection, Part II. PCGS# 95230

- 4021 1957 PR68 Deep Cameo PCGS.** Frosted silver-white devices offer engaging contrast against jet-black fields on this midseries Roosevelt dime issue, one seldom seen at the Deep Cameo level. Population: 50 in 68 Deep Cameo, 3 finer (4/13).
From The MKJ Collection, Part II. NGC ID# 27ES, PCGS# 95232

- 4022 1970 No S PR69 ★ Cameo NGC.** An attractive example of this popular missing-mintmark issue, this dime displays a crisp strike with and pleasing field-motif contrast. Both sides are impeccably preserved. This is the only '69 Cameo given the coveted Star designation. NGC ID# 27F5, PCGS# 85248

- 4023 1974-S PR70 Deep Cameo PCGS.** Certified impeccable surface quality on this elusive clad Roosevelt dime issue, one of only 21 such submissions at PCGS (4/13). A deeply contrasted and thoroughly appealing piece.
From The MKJ Collection, Part II. NGC ID# 27F9, PCGS# 95252
- 4024 1983 No S PR69 Deep Cameo PCGS.** An untuned and seemingly immaculate specimen with outstanding white on black contrast. This piece displays great technical quality and aesthetic appeal. NGC ID# 27FJ, PCGS# 95265
- 4025 1983 No S PR69 Ultra Cameo NGC.** After a few years without missing-mintmark gaffes, San Francisco had another on a 1983 dime obverse die, creating the popular No S variant. This example of the 30-year-old error has preservation almost as flawless as the contrast between black-mirror fields and white-frosted devices. NGC ID# 27FJ, PCGS# 95265
- 4026 1983 No S PR69 Deep Cameo PCGS.** Vivid contrast endows this major no S dime error. This is a virtually perfect specimen of this popular issue. NGC ID# 27FJ, PCGS# 95265
- 4027 1983 No S PR69 Deep Cameo PCGS.** The frosted devices and mirrorlike fields are clearly delineated on this magnificent example. Immaculate preservation throughout. NGC ID# 27FJ, PCGS# 95265
- 4028 1983 No S PR69 Deep Cameo PCGS.** The 1983 No S dime was the last such dime error, although later No S errors occurred in other series such as the Lincoln cent. This piece offers essentially pristine preservation and bold eye appeal. PCGS has never certified a PR70 Deep Cameo.
From The MKJ Collection, Part II. NGC ID# 27FJ, PCGS# 95265

STANDING LIBERTY QUARTERS

1916 Standing Quarter, Good 6
Original Surfaces

- 4029 1916 Good 6 NGC.** The curve of the 6 in the date is just barely visible with a loupe. The absence of three stars under the eagle identifies this as a Type One. The surfaces are original and show pale gray overall with an outline of deeper gray surrounding the devices. Scarce and valuable in all grades. NGC ID# 242Y, PCGS# 5704
- 4030 1917 Type One MS65 Full Head PCGS.** Hints of light tan and soft blue patina adhere to the lustrous surfaces of this magnificent Gem. The full strike goes beyond Liberty's head as razor-sharp definition is apparent in the rivets and the lines of the outer and inner shield. This is an overall fantastic piece! NGC ID# 242Z, PCGS# 5707
- 4031 1917 Type One MS66 Full Head PCGS.** This issue is known as being sharply struck, which is certainly the case with this Premium Gem example. In addition to the Full Head detail, it displays strong definition of the shield rivets. Lustrous surfaces have soft gold-orange toning framed by electric-blue at the rims. NGC ID# 242Z, PCGS# 5707

- 4032 1917 Type One MS66 Full Head PCGS. CAC.** An extremely important date for type purposes, this delightful Premium Gem is sharply detailed throughout, with Full Head definition and vibrant mint luster. Shades of champagne-gold toning add to the terrific eye appeal. NGC ID# 242Z, PCGS# 5707
- 4033 1917 Type One MS66 Full Head PCGS. CAC.** A sharply detailed Premium Gem, with Full Head definition and all shield rivets sharply defined. Vibrant mint luster shines through layers of pale gold toning. PCGS has graded 69 numerically finer examples (4/13). NGC ID# 242Z, PCGS# 5707
- 4034 1917 Type One MS66 Full Head PCGS. CAC.** Type One Standing Liberty quarters with Full Head details are among the best-struck coins in the entire series, as the Type Two redesign actually created a different subtype that is more strike-challenged. This lovely Premium Gem shows silver centers with a light touch of peripheral toning — and a full strike throughout both sides. Simply gorgeous. NGC ID# 242Z, PCGS# 5707
- 4035 1917-D Type One MS66 PCGS.** An attractive Premium Gem representative of this important type issue, this coin displays well-detailed design elements and vibrant mint luster with a few hints of golden-tan toning. Population: 20 in 66 (3 in 66+), 3 finer (4/13). NGC ID# 2432, PCGS# 5708
- 4036 1917-D Type One MS65 Full Head NGC.** Whispers of reddish-gold, green, and purple toning are more extensive and deeper in hue on the reverse of this lovely Gem. This boldly struck specimen has been well cared for. NGC ID# 2432, PCGS# 5709

1917-D Type One Quarter, MS66 Full Head
Brilliant and Lustrous

- 4037 1917-D Type One MS66 Full Head PCGS.** The head displays a bold level of definition on this extremely lustrous and brilliant Premium Gem example. Other areas of the coin exhibit a sharp strike as well, including the shield rivets. A few tiny contact marks are present. PCGS has awarded higher numeric grades to only 21 examples (4/13). NGC ID# 2432, PCGS# 5709

1917-S Type One Quarter, MS65+ Full Head

- 4038 1917-S Type One MS65+ Full Head PCGS.** Areas of toning appear on this high-end Gem example with Full Head definition. The obverse periphery displays a number of shades, including mint-green, yellow, cherry, and violet. Both sides have scattered splashes and flecks of light golden-brown toning. NGC ID# 2433, PCGS# 5711

**1917-S Type One Quarter, MS66 Full Head
Scarcest of the 1917 Type One Issues**

- 4039** 1917-S Type One MS66 Full Head NGC. Originally toned in autumn-brown and forest-green, with the reverse border displaying the deepest shades. Luster invigorates the essentially immaculate surfaces. Fully struck and desirable. The 1917-S is the scarcest of the three Type One PDS issues for the year. Census: 70 in 66 (1 in 66+) Full Head, 18 finer (4/13).
Ex: ANA Signature (Heritage, 7-8/2008), lot 307. NGC ID# 2433, PCGS# 5711

- 4040** 1917 Type Two MS65 Full Head PCGS. A lightly toned and lustrous Gem with splendid preservation and a crisp strike on the date and head. Only a pair of shield rivets near the waist lack full definition. NGC ID# 2434, PCGS# 5715

- 4041** 1917 Type Two MS65 Full Head NGC. CAC. Occasional wisps of reddish-gold adhere to the lustrous surfaces of this lovely Gem. The solid strike transcends the Full Head to sharply delineate the chain mail, rivets, and lines of the inner shield. There are no significant marks to report. NGC ID# 2434, PCGS# 5715

**Full Head 1917 Type Two Quarter, MS67
Fully Struck Throughout**

- 4042** 1917 Type Two MS67 Full Head NGC. While collectors are accustomed to high-end examples of the 1917 Type One quarter, its Type Two counterpart is considerably more elusive, with or without a Full Head. This coin boasts both amazing detail and impressive preservation. Light gold and blue tints settle over softly frosted surfaces. Census: 12 in 67 Full Head, 0 finer (4/13). NGC ID# 2434, PCGS# 5715

- 4043** 1917-S Type Two MS64 Full Head PCGS. This suitably struck near-Gem has some softness on the highpoints of the shield. The surfaces have creamy luster and traces of gold and orange patina. Population: 94 in 64 Full Head, 73 finer (5/13). NGC ID# 2436, PCGS# 5719

- 4044** No lot.

- 4045** 1918-D MS64 Full Head PCGS. CAC. Reddish-gold and light brown patina adorns the obverse of this near-Gem, leaving the reverse nearly untuned. The design features are well struck. NGC ID# 2438, PCGS# 5723

- 4046** 1918-S MS64 Full Head PCGS. Light gold and orange shadings overall with hints of silver-white peeking through. Though this near-Gem shows minor striking softness, as most examples of the issue do, Liberty's head shows the requisite detail. A tiny planchet flaw is noted to the right of the shield. PCGS has certified just 39 finer Full Head coins (4/13). NGC ID# 2439, PCGS# 5725

**1918/7-S Quarter, Contrasted Fine 15
Popular Wartime Overdate**

- 4047** 1918/7-S Fine 15 PCGS. CAC. FS-101. The 1918/7-D nickel and 1918/7-S quarter were both likely caused by inexperienced staff at the Philadelphia Mint. The regular Mint crew presumably left to aid the World War effort. The present example has stone-white high points and rich dove-gray fields. Marks are absent save for minor filing on the obverse rim at 5:30. NGC ID# 243A, PCGS# 5726

1918/7-S Quarter, VF Details

- 4048** 1918/7-S — Damage or Tooling — PCGS Genuine. VF Details. FS-101. The thick downstroke of the 7 underdigit is unmistakable. The present stone-gray key date quarter appears to retain traces of luster but the eagle's wings have a few noticeable marks, with lesser digs noted on the reverse field and the wall behind Liberty. NGC ID# 243A, PCGS# 5726

- 4049** 1919 MS65 Full Head PCGS. This silvery, scarcely toned specimen is well-struck not only on the head but also shows full shield rivets and chain mail, as well as full digit tops in the date. A great example of the issue. NGC ID# 243B, PCGS# 5729

**Premium Gem 1919 Quarter With Full Head Detail
Highly Lustrous and Nicely Toned**

- 4050** 1919 MS66 Full Head PCGS. A surprisingly sharply struck Premium Gem that has a razor-sharp head and above-average details on the waist and shield rivets. Lustrous and nicely preserved with an abundant amount of variegated antique-golden and sunset-rose patina. Population: 67 in 66 (6 in 66+) Full Head, 15 finer (4/13).
Ex: Denver Signature (Heritage, 8/2006), lot 1308; FUN Signature (Heritage, 1/2007), lot 4171. NGC ID# 243B, PCGS# 5729

**1919-D Standing Liberty Quarter, MS64
Lustrous and Well Struck**

4051 1919-D MS64 PCGS. While this near-Gem lacks the Full Head designation, it is quite sharply struck, and the head details are nearly full, certainly well in excess of 50% complete. Both sides are attractive with brilliant luster beneath a blend of rose, violet, blue, and gold toning.

Ex: *Coinfest Signature (Heritage, 10/2010)*, lot 4085. NGC ID# 243C, PCGS# 5730

4052 1919-S AU58 PCGS. The 1919-S quarter is a better date in all grades. The present near-Mint State offering yields ample luster and is minimally marked. The design elements are nicely defined. NGC ID# 243D, PCGS# 5732

4053 1919-S MS61 NGC. Reddish-brown patina gravitates to the margins of this S-mint specimen. The 1919-S is a better date in all grades, due to a low mintage of 1,836,000 pieces, most of which entered circulation NGC ID# 243D, PCGS# 5732

4054 1920-D MS65 NGC. Deep russet, red, and blue patination graces the lustrous surfaces of this magnificent Gem, and a solid strike imparts strong detail to the design elements. Both sides have been lovingly cared for. Census: 22 in 65, 16 finer (4/13). NGC ID# 243E, PCGS# 5736

4055 1921 AU58+ PCGS. CAC. The 1921 Standing Liberty quarter is one of the P-mint series keys. This AU58+ (a popular grade for many collectors) PCGS example boasts deep copper-amber patina with slight color change on the high points but few signs of contact. NGC ID# 243H, PCGS# 5740

**1921 Quarter, MS64 Full Head
Richly Toned**

4056 1921 MS64 Full Head PCGS. Strong gold, peach, and rose overtones grace medium-gray surfaces that shimmer with understated, satiny luster. Liberty's head and shield show decidedly above-average definition. A pleasing near-Gem representative of this challenging Philadelphia issue. PCGS has graded 71 finer Full Head pieces (4/13). NGC ID# 243H, PCGS# 5741

**1923 Full Head Quarter, MS65
Beautifully Toned**

4057 1923 MS65 Full Head PCGS. Crimson, yellow-gold, mint-green, lavender, blue-gray, and sky-blue patina bathes the radiantly lustrous surfaces of this attractive Gem. A powerful strike complements the gorgeous toning, and includes sharp definition on the chain mail, rivets, date, and eagle's plumage, in addition to the Full Head. Impeccably preserved surfaces further enhance the eye appeal. Population: 35 in 65 Full Head, 30 finer (4/13).

Ex: *Phoenix Signature (Heritage, 3/2008)*, lot 590. NGC ID# 243J, PCGS# 5743

**1923 Quarter, MS65 Full Head
A Full Strike Rarity**

4058 1923 MS65 Full Head PCGS. An amazing example, this Full Head Gem has an extremely sharp strike, with the obvious full head details as designated, but also with a bold and complete shield, and sharp breast feathers on the reverse. Both sides have frosty silver luster with delicate and barely visible gold toning. Population: 35 in 65 Full Head, 30 finer (5/13). NGC ID# 243J, PCGS# 5743

**1923-S Quarter, MS64
Well-Struck and Nicely Toned**

4059 1923-S MS64 PCGS. CAC. This near-Gem key date representative is endowed with vibrant luster. Though falling somewhat short of Full Head, the design features are nevertheless well impressed. Dapples of cobalt-blue, purple, and gold-orange patina race over each side. The minor reverse marks are fewer than what might be expected for the designated grade.

Ex: *Central States Signature (Heritage, 4-5/2009)*, lot 567. NGC ID# 243K, PCGS# 5744

4060 1924 MS65 Full Head PCGS. Rich russet and amber peripheral hues give way to lustrous medium-gray at the centers. A sharp Gem with frosty eye appeal. PCGS has graded 41 finer Full Head coins (4/13). NGC ID# 243L, PCGS# 5747

- 4061 1924-D MS64+ Full Head NGC.** This high-end Choice example displays well-detailed design elements with Full Head definition and vibrant mint luster, under shades of pale gold patina. Census: 45 in 64 (1 in 64+) Full Head, 43 finer (4/13). NGC ID# 243M, PCGS# 5749

**1924-S Quarter, MS64 Full Head
Attractive, Original Toning**

- 4062 1924-S MS64 Full Head PCGS.** Splashes of cobalt-blue, golden-brown, and lavender toning make uneven appearances on the radiantly lustrous surfaces of this near-Gem. The well-executed strike culminates in a Full Head on Liberty, along with strong definition on the chain mail and the vertical stripes of the shield. Well-preserved surfaces reveal just a couple of small reverse marks. Population: 71 in 64 Full Head, 41 finer (4/13).
Ex: Houston Signature (Heritage, 11/2007), lot 60570. NGC ID# 243N, PCGS# 5751

- 4063 1926-S MS63 PCGS.** While not fully struck, the design definition is still better than normally found on this issue. The highly lustrous surfaces reveal just a few grazes and scuffs consistent with the designated grade. NGC ID# 243T, PCGS# 5758

**1926-S Quarter Dollar, MS66
Partial Details on Liberty's Head**

- 4064 1926-S MS66 PCGS.** About half of the head details are visible on this deeply toned Premium Gem. The obverse has dark gold and blue toning over the entire surface, while the reverse has light gold and iridescent toning with a splash of brilliant silver. Population: 18 in 66, 0 finer (5/13). NGC ID# 243T, PCGS# 5758

- 4065 1927 MS66 Full Head PCGS.** The brilliant surfaces of this Premium Gem yield nicely defined devices and pleasing luster. A few minuscule marks are within the parameters of the designated numerical grade. Population: 51 in 66 (1 in 66+) Full Head, 5 finer (4/13). NGC ID# 243U, PCGS# 5761

- 4066 1927-D MS65 Full Head NGC. CAC.** The 1927-D Standing Liberty quarter can best be called a strike rarity, common in average grades, but seldom seen with full head details. Both sides of this Gem have brilliant and frosty silver luster beneath a lovely panorama of gold, lime, and iridescent toning. Census: 44 in 65 Full Head, 8 finer (4/13). NGC ID# 243V, PCGS# 5763

- 4067 1928 MS67 NGC.** Dramatic swaths of fire-red, caramel-gold, apple-green, and navy-blue consume this coruscating and virtually immaculate Superb Gem. The strike is intricate on the date, sharp on the shield, and typical on the top of the head. Housed in a former generation holder.
Ex: Ft. Lauderdale FUN Signature (Heritage, 1/2005), lot 6668, which realized \$1,380. NGC ID# 243X, PCGS# 5766

- 4068 1928 MS65 Full Head PCGS.** Toning in several soft shades adds to the visual appeal of this Full Head Gem along with pleasing luster. Minor incompleteness of strike appears at portions of the shield. The coin is pristine aside from a few small contact marks on the reverse field. Population: 81 in 65 (1 in 65+) Full Head, 42 finer (4/13). NGC ID# 243X, PCGS# 5767

WASHINGTON QUARTERS

- 4069 1932 MS66 NGC.** The 1932 is very popular as a first year type coin. Dazzling luster exudes from both sides of this Premium Gem, each of which is remarkably well preserved. Census: 91 in 66 (1 in 66+), 2 finer (4/13). NGC ID# 2447, PCGS# 5790

- 4070 1932 MS66 PCGS.** Speckled multi-colored toning gravitates to the obverse border of this Premium Gem, replaced by light russet at the reverse margin. This is a nicely struck piece with minimal marks. PCGS and NGC have seen only four finer (4/13). NGC ID# 2447, PCGS# 5790

- 4071 1932 MS66 PCGS. CAC.** An exquisite Premium Gem, this first-year Washington quarter has iridescent splashes along the obverse border, with deeper golden-brown and iridescent toning near the reverse border. PCGS has only certified two finer examples (5/13). NGC ID# 2447, PCGS# 5790

- 4072 1932-D MS62 NGC.** The essentially untuned, lustrous surfaces of this popular Washington quarter exhibit well impressed design elements. A few minute marks just barely prevent the next highest grade. Nevertheless, this is a nice choice for a high-grade Washington set. NGC ID# 2448, PCGS# 5791

- 4073 1932-D MS64 PCGS Secure.** Whispers of deep russet toning adhere to the lustrous surfaces of this pleasing near-Gem key date representative. Both sides are well struck and minimally marked. The '32-D is difficult to locate any finer. NGC ID# 2448, PCGS# 5791

- 4074 1932-S MS64 PCGS.** The moderately toned obverse of this key date representative cedes to more light patination on the reverse. This is a well struck, minimally marked specimen. NGC ID# 2449, PCGS# 5792

- 4075 1932-S MS64 PCGS.** The smooth stone-gray and almond-gold surfaces display glimpses of aquamarine. Lustrous and boldly struck with exceptional eye appeal for the grade and key date issue.
Ex: Orlando FUN Signature (Heritage, 1/2004), lot 6316. NGC ID# 2449, PCGS# 5792

**1932-S Washington Quarter, MS65
First-Year Key**

- 4076 1932-S MS65 PCGS.** The 1932-S represents the first year of the Washington quarter design and boasts the lowest mintage of the series. This attractive Gem displays sharply detailed design elements and vibrant mint luster with traces of sea-green and golden-tan toning. PCGS has graded only four numerically finer examples (4/13). NGC ID# 2449, PCGS# 5792

**1932-S Washington Quarter
Scarce Gem Example**

- 4077 1932-S MS65 PCGS.** Wisps of gold toning appear alongside a few darker toning spots on each side of this Gem key-date Washington quarter. This conditionally rare issue seldom appears at the Gem level, and rarely in finer grades. In fact, PCGS has only certified four finer examples (5/13). Both sides have satin luster and sharp details. NGC ID# 2449, PCGS# 5792

**1932-S Washington Quarter, MS65
Low-Mintage Issue**

- 4078 1932-S MS65 PCGS. CAC.** The 1932-S Washington quarter boasts the lowest business-strike mintage of the series, at 408,000 pieces and only the famous 1932-D is more elusive in today's market. This impressive Gem displays well-detailed design elements and vibrant mint luster, under amber, golden-brown, gray, and bright light-green toning. The colors are more subdued on the reverse. NGC ID# 2449, PCGS# 5792

- 4079 1934 Doubled Die Obverse MS64 PCGS. FS-101.** Perhaps the best known of all doubled die quarter varieties, the 1934 FS-101 exhibits a wide clockwise spread on IN GOD WE TRUST and thickness throughout LIBERTY and the date. Lightly toned and well preserved. Population: 27 in 64 (1 in 64+), 30 finer (4/13). PCGS# 5795

**1934 Doubled Die Obverse Quarter, MS65
FS-101**

- 4080 1934 Doubled Die Obverse MS65 PCGS. CAC. FS-101.** This *Guide Book* variety has become famous for its signature obverse die doubling, most visible on the G in GOD and the first T in TRUST. Offered here is a frosty Gem example which offers dappled blue, gold, cobalt, and umber shadings over lustrous silver surfaces. For the variety, Population: 19 in 65 (1 in 65+), 11 finer (4/13). PCGS# 5795

- 4081 1934-D Medium Motto MS66 PCGS.** The Medium Motto is identified by the lower point in the diagonals of the W in WE. This Motto variety is not indicated on the holder. Wisps of light gold toning occur on the obverse periphery, ceding to deeper reddish-gold on the reverse borders. NGC ID# 244C, PCGS# 5796

- 4082 1934-D Medium Motto MS66 PCGS.** Silvery surfaces show a single small spot of patina on Washington's cheek but are largely untuned otherwise. The preservation is quite good, producing excellent eye appeal. Seldom seen finer. Population: 89 in 66 (6 in 66+), 5 finer (5/13). NGC ID# 244C, PCGS# 5796

- 4083 1935-D MS66 PCGS. CAC.** Soft pearl-gray patina with hints of peach drapes the softly lustrous surfaces of this well-defined Premium Gem. Both sides show wonderful preservation, particularly the impressive obverse. PCGS and NGC have graded fewer than 30 specimens finer (4/13). NGC ID# 244E, PCGS# 5798

- 4084 1936-D MS65 PCGS.** A beautifully preserved Gem, this piece features a largely brilliant obverse, with a few splashes of golden toning present on the reverse. This coin displays attractive luster and has a pleasing appearance on both sides. NGC ID# 244H, PCGS# 5801

**1936-S Quarter, MS67
Lower Mintage Issue, Among the Finest**

- 4085 1936-S MS67 PCGS.** With 3.8 million pieces coined, the 1936-S can claim the ninth lowest mintage of the series. The present coin is sharply struck, with fine detail on the hair strands and feathers. The silver centers yield to lovely golden-brown toning at the rims. Overall eye appeal is excellent. Population: 27 in 67 (1 in 67+), 0 finer (4/13).
Ex: FUN Signature (Heritage, 1/2009), lot 2733. NGC ID# 244J, PCGS# 5802

- 4086 1937 MS67 PCGS.** Frosty luster resides on the well struck surfaces of this Superb Gem. A couple of ticks on each side might prevent an even finer grade. Population: 60 in 67 (2 in 67+), 0 finer (4/13). NGC ID# 244K, PCGS# 5803

- 4087 1937 MS67 PCGS Secure.** Frosty silver luster and a bold strike over pristine surfaces contribute to the high eye appeal on this top-grade 1937 quarter. Population: 60 in 67 (2 in 67+), 0 finer (4/13). NGC ID# 244K, PCGS# 5803

- 4088 1937 Doubled Die Obverse AU58 PCGS. FS-101.** Cherrypickers' states "this variety is one of the most important of the series." IN GOD WE TRUST and the date are obviously die doubled with a clockwise spread. Lustrous and unmarked with dappled caramel-gold and steel-blue toning. PCGS# 95803

- 4089 1937-D MS67 PCGS.** From a mintage of 7.1 million pieces, the 1937-D Washington quarter is quite rare in MS67 condition, and unknown in finer grades. This well-detailed Superb Gem displays satiny mint luster under slightly hazy gray toning. Population: 36 in 67 (1 in 67+), 0 finer (4/13). NGC ID# 244L, PCGS# 5804

4090 1937-S MS66+ PCGS Secure. The 1937-S Washington quarter issue is nearly as elusive grade-for-grade as the better-known 1935-S. This piece offers splendid preservation and a bold strike over even-colored surfaces. Population: 3 in 66+, 24 finer (4/13). NGC ID# 244M, PCGS# 5805

4091 1938 MS67 PCGS. Wisps of soft bluish color makes occasional visits to the margins of this well struck Superb Gem. Both sides have been nicely cared for. Population: 42 in 67 (3 in 67+), 0 finer (4/13). NGC ID# 244N, PCGS# 5806

4092 1938-S MS67 PCGS. CAC. A brilliant satin luster provides lovely visual appeal to this Superb Gem. This splendidly preserved example is well-struck. Population: 38 in 67 (2 in 67+), 0 finer (4/13). NGC ID# 244P, PCGS# 5807

**1939-S Quarter, MS67
Tied for Finest Certified**

4093 1939-S MS67 PCGS. An impressive Superb Gem, this 1939-S Washington quarter has ivory surfaces with frosty mint luster and hints of gold toning at the borders. Both sides display sharp design details and pristine surfaces. Destined for a high level Registry set. Population: 32 in 67, 0 finer (4/13). NGC ID# 244T, PCGS# 5810

**Superb Gem 1940-D Quarter
Tied for Finest PCGS-Graded**

4094 1940-D MS67 PCGS. CAC. As one of only 26 Superb Gems certified by PCGS, with none at MS68 or finer levels (5/13), this 1940-D quarter is a coin of great importance to Registry collectors. Golden and russet toning covers a large portion of the obverse while the reverse is almost entirely free of color other than the extreme outer edges. NGC ID# 244V, PCGS# 5812

4095 1941-D MS67 PCGS. Despite a mintage of nearly 17 million pieces, the 1941-D quarter is coveted in high grades, such as the Superb example offered here. Both sides have thick satiny luster and a light overlay of milky toning. The obverse shows more dynamic color in the form of a maroon crescent at the top. Both sides are clean and the strike is bold. A single shallow diagonal contact mark at the truncation of Washington's bust on the obverse, near the hair ribbon serves as a pedigree marker. Population: 24 in 67 (5 in 67+), 1 finer (4/13). NGC ID# 244Y, PCGS# 5815

4096 1941-S MS67 PCGS. Small S. An untoned and pristine Superb Gem with bountiful cartwheel luster. The centers are fully impressed though the peripheral letters show minor softness. Population: 39 in 67 (1 in 67+), 0 finer (4/13). NGC ID# 244Z, PCGS# 5816

4097 1941-S MS67 PCGS. This untuned, silvery Superb Gem boasts a sharp strike for the issue and shows surfaces that are problem-free and quite attractive, one of the finest certified at PCGS. Population: 39 in 67 (1 in 67+), 0 finer (5/13). NGC ID# 244Z, PCGS# 5816

4098 1941-S MS67 PCGS. CAC. The obverse of this sharply detailed Superb Gem exhibits intense shades of sea-green and lavender-gray toning, while the reverse toning is much more delicate. Population: 39 in 67 (1 in 67+), 0 finer (5/13). NGC ID# 244Z, PCGS# 5816

4099 1942 MS67 PCGS. This coin is bright and satiny with no observable abrasions. Each side is primarily brilliant with just a bit of peripheral golden color. Population: 34 in 67 (6 in 67+), 0 finer (5/13). Ex: *Central States Signature* (Heritage, 4/2012), lot 4293. NGC ID# 2452, PCGS# 5817

4100 1942-D Doubled Die Obverse AU53 PCGS. FS-101. Doubling is most noticeable as notching on the E of LIBERTY. Lightly gold-splashed surfaces are otherwise pale silver on this still-lustrous and well-defined example. A few light surface and rim marks contribute to the grade. Ex: *Long Beach Signature* (Heritage, 2/2009), lot 1222, which realized \$948.75. PCGS# 95818

4101 1942-S MS67 PCGS. Spectacular shades of burnt-orange and bluish-gray patina blanket both sides of this magnificent Superb Gem, with impeccably preserved surfaces that radiate vibrant mint luster beneath the toning. Eye appeal is tremendous. Population: 35 in 67 (3 in 67+), 1 finer (4/13). NGC ID# 2454, PCGS# 5819

4102 1942-S MS67 PCGS Secure. Trumpet Tail S. Attractive apple-green and autumn-gold toning graces the margins of this lustrous Superb Gem. A lintmark (as made) is beneath Washington's jaw. Population: 35 in 67 (3 in 67+), 1 finer (4/13). NGC ID# 2454, PCGS# 5819

4103 1943-D MS67 PCGS. A light touch of rim toning sets off silvery centers on this beautiful and well-struck Superb Gem 1943-D quarter, tied for what is essentially the finest obtainable. An exceptionally nice example. Population: 46 in 67 (2 in 67+), 1 finer (4/13). NGC ID# 2456, PCGS# 5821

4104 1943-D MS67 PCGS Secure. This fully lustrous and exceptionally well-struck 1943-D quarter shows scarcely any trace of perceptible color beyond silver-white, but the immaculate surfaces display bold eye appeal. Population: 46 in 67 (2 in 67+), 1 finer (4/13). NGC ID# 2456, PCGS# 5821

4105 1943-S MS67 PCGS. Frosty, well-struck, and untuned, this Superb Gem is among the few dozen finest certified of this issue, one generally "found nice" but seldom seen so fine. Population: 41 in 67 (2 in 67+), 1 finer (5/13). NGC ID# 2457, PCGS# 5822

4106 1943-S MS67+ NGC. CAC. The Plus grade and CAC sticker are both well-deserved on this frosty, untuned Superb Gem 1943-S quarter, undoubtedly one of the finest survivors from the original mintage. The surfaces are virtually impeccable. Census: 1 in 67+, 1 in 68 ★ finer (5/13). NGC ID# 2457, PCGS# 5822

4107 1943-S Doubled Die Obverse MS65 PCGS Secure. FS-101. The popular *Guide Book* variety with "fat" date that shows notching at the upper right corner of the 1. Minimally toned surfaces offer a pale silver gleam. For the variety, Population: 18 in 65 (1 in 65+), 4 finer (4/13). PCGS# 5823

4108 1944-D MS67 PCGS. CAC. Both sides of this Denver Mint Washington are awash in intense luster, and the design elements are well impressed. This will be a wonderful addition to a high-grade Washington collection. NGC ID# 2459, PCGS# 5825

- 4109 1945 MS67 PCGS.** As with some other P-mint wartime issues from World Wars I and II the emphasis was on quantity at the expense of quality. This 1945 quarter is one of 20 such at PCGS, with a sole MS68 finer (5/13). The light rose-copper patina around the obverse rim explodes to cover most of the reverse, but the surface preservation and eye appeal are spectacular. NGC ID# 245B, PCGS# 5827
- 4110 1945-D MS67 PCGS. CAC.** Tied for the finest that PCGS has certified, this Superb Gem has a hint of gold toning over its frosty silver surfaces. Most would call this piece fully brilliant and untoned. Population: 26 in 67, 0 finer (4/13). NGC ID# 245C, PCGS# 5828
- 4111 1945-S MS67 PCGS. CAC.** Knob S. Beautifully patinated in jade-green and caramel-brown, aside from ivory-gray across the portrait. A lustrous and essentially pristine Superb Gem. Population: 38 in 67 (2 in 67+), none finer (4/13).
Ex: Gary Kramer Collection (*Heritage*, 5/2005), lot 7720; Michael Fuller Collection (*Heritage*, 11/2007), lot 60884, which realized \$977.50. NGC ID# 245D, PCGS# 5829
- 4112 1946-D MS67 PCGS Secure.** Reddish-gold and green toning at the borders frame the white centers. The highly lustrous surfaces are sharply struck and devoid of mentionable marks. Population: 35 in 67 (1 in 67+), 0 finer (4/13). NGC ID# 245F, PCGS# 5831
- 4113 1946-D MS67 PCGS. CAC.** Richly lustrous surfaces are silvery and largely untuned on this near-immaculate 1946-D Superb Gem quarter, among the numerically finest certified at PCGS. The bold strike and CAC approval are added pluses. Population: 35 in 67 (1 in 67+), 0 finer (4/13). NGC ID# 245F, PCGS# 5831
- 4114 1948-D MS67 PCGS. CAC.** Whispers of gold and russet are slightly more prevalent at the obverse margins of this Superb Gem. This is a lustrous, well preserved, and nicely struck piece. Population: 32 in 67 (2 in 67+), 0 finer (4/13). NGC ID# 245M, PCGS# 5837
- 4115 1948-S MS67 PCGS.** Delicate iridescent rim toning complements silvery centers on this lightly marked Superb Gem 1948-S quarter, thickly frosted, boldly struck, and highly appealing. Population: 54 in 67 (2 in 67+), 1 finer (4/13). NGC ID# 245N, PCGS# 5838
- 4116 1949 MS67 PCGS.** Attractive pastel iridescent hues grace each side of this lovely Superb Gem 1949 Washington quarter, among the few dozen finest at PCGS. If you are seeking a new collecting challenge, try working on a PCGS Registry Set 1949 Mint Set, one that has a few conditionally elusive issues. Population: 45 in 67 (4 in 67+), 1 finer (5/13). NGC ID# 245P, PCGS# 5839
- 4117 1949 MS67 PCGS. CAC.** Lightly rim-toned surfaces boast frosty luster and excellent eye appeal, while each side is free of all but the most minor signs of contact. With the CAC green label. Population: 45 in 67 (4 in 67+), 1 finer (4/13). NGC ID# 245P, PCGS# 5839
- 4118 1950 MS67 PCGS.** Among the finest certified at PCGS, this recently graded Superb Gem 1950 Washington quarter displays lavish luster over untuned, silver-white surfaces. Extremely appealing. Population: 42 in 67 (2 in 67+), 0 finer (4/13). NGC ID# 245S, PCGS# 5841
- 4119 1950 MS67 PCGS.** The nearly untuned surfaces of this Superb Gem yield pleasing luster and well struck design elements. The lack of mentionable marks adds to the great eye appeal of this piece. Population: 42 in 67 (2 in 67+), 0 finer (4/13). NGC ID# 245S, PCGS# 5841
- 4120 1950 MS67 PCGS.** The highly lustrous surfaces of this Superb Gem display soft gold color at the left margins. This is a well preserved and sharply struck specimen. Population: 42 in 67 (2 in 67+), 0 finer (4/13). NGC ID# 245S, PCGS# 5841
- 4121 1950-D MS67 PCGS. CAC.** A brilliant Superb Gem that boasts a sharp strike, smooth surfaces, and vibrant cartwheel luster.
Ex: Patrick Mullen Collection (*Heritage*, 1/2004), lot 6449; Long Beach Signature (*Heritage*, 6/2005), lot 6178, which realized \$805. NGC ID# 245T, PCGS# 5842
- 4122 1950-D/S MS64 PCGS. FS-601.** One of the classic "mirror-image" overmintmark varieties listed in the *Guide Book*, counterpart of the 1950-S/D. Pastel yellows and blues with a few spots of auburn grace impressively lustrous surfaces. Housed in a green label holder. For the variety, Population: 28 in 64, 27 finer (4/13). NGC ID# 245U, PCGS# 5843
- 4123 1950-S/D MS65 PCGS. FS-601.** The S over D version of the 1950 Washington quarter overmintmarks, offered as a frosty Gem with hints of green-gold gracing the margins. Certified in a green label holder. Population: 45 in 65, 36 finer (4/13).
Ex: FUN Signature (*Heritage*, 1/2003), lot 7031; CSNS Signature (*Heritage*, 5/2003), lot 6353; Houston Signature (*Heritage*, 11/2007), lot 60899. NGC ID# 245V, PCGS# 5845
- 4124 1953 MS67 PCGS. CAC.** A melange of violet, green, and orange toning is much deeper and more extensive on the reverse of this gorgeous Superb Gem. This is a very well preserved and eye-appealing specimen. Population: 53 in 67 (1 in 67+), 0 finer (4/13). NGC ID# 2464, PCGS# 5852
- 4125 1953 MS67 PCGS. CAC.** The obverse is more deeply toned in mottled amber-copper tones, with an echo on the reverse, but each side of this frosty Superb Gem offers impeccable preservation and excellent eye appeal. The 1953 quarter in this grade is more elusive than generally thought. Population: 53 in 67 (1 in 67+), 0 finer (4/13). NGC ID# 2464, PCGS# 5852
- 4126 1953-D MS67 PCGS.** Light reddish-tan toning at the obverse margin cedes to slightly deeper tones at the reverse border. This is a highly lustrous, well struck, and nicely preserved Superb Gem. Population: 19 in 67, 0 finer (4/13). NGC ID# 2465, PCGS# 5853

1960 Quarter Dollar, MS67

- 4127 1960 MS67 PCGS.** Many years ago, few collectors paid attention to the middle and late 20th century issues, and today those coins are rarely seen in high grades. This Washington quarter is fully brilliant without toning, and exhibits satin luster and pristine surfaces. Population: 10 in 67, 0 finer (5/13). NGC ID# 246K, PCGS# 5868
- 4128 1964-D MS67 PCGS.** A textbook example of conditional rarity, the 1964-D quarter can be found by the millions in 90% silver bags to this day, but Superb Gem are almost never encountered due to bag marks, other signs of contact, or outright wear. This piece offers untuned surfaces with a bold strike and blatant eye appeal. Population: 37 in 67 (1 in 67+), 0 finer (4/13). NGC ID# 246V, PCGS# 5877
- 4129 1964-D MS67 PCGS.** Generous mint luster coats frosty surfaces that are mostly untuned and thoroughly eye-appealing on both sides. The paucity of contact marks puts this piece into a distinct minority. Population: 37 in 67 (1 in 67+), 0 finer (5/13). NGC ID# 246V, PCGS# 5877

PROOF WASHINGTON QUARTERS

- 4130 1936 PR65 NGC.** Light rim toning on the obverse contrasts with deep patina on the reverse, but this fully struck first-year proof exhibits only a couple of minor marks that preclude an even finer grade. NGC ID# 27HN, PCGS# 5975
- 4131 1936 PR65 NGC. CAC.** This lightly toned Gem proof is well defined and devoid of significant marks. All in all, this is a very appealing piece that will fit nicely into a high-grade Washington collection. NGC ID# 27HN, PCGS# 5975
- 4132 1936 PR66 PCGS. CAC.** The first proof Washington quarters were struck in 1936, with a mintage of 3,837 pieces. The present Premium Gem offering displays razor-sharp design elements and minimally marked surfaces. PCGS has seen only eight coins finer. NGC ID# 27HN, PCGS# 5975
- 4133 1936 PR66+ NGC. CAC.** This first-year Washington quarter proof issue is ceaselessly pursued but seldom available in finer grades. Light pastel color and boldly struck, pristine surfaces add up to excellent eye appeal. Census: 2 in 66+, 20 finer (4/13). NGC ID# 27HN, PCGS# 5975

1942 Washington Quarter, PR68 None Finer at Either Service

- 4134 1942 PR68 PCGS. Ex: Tom Mershon Collection.** A fantastically reflective, decisively struck example from the last of the brilliant-era proof Washington quarter issues. The obverse offers subtle blue and gold shadings, while the reverse is generally gleaming silver-gray. Population: 6 in 68, 0 finer (5/13).
Ex: Long Beach Signature (Heritage, 9/2008), lot 919, which realized \$5,462.50.
From The MKJ Collection, Part II. NGC ID# 27HV, PCGS# 5981
- 4135 1950 PR67 Cameo PCGS.** The lightly toned surfaces of this Superb Gem proof Washington yield a degree of field-device contrast. This is a sharply struck and well preserved example. Population: 17 in 67 Cameo, 4 finer (4/13).
From The MKJ Collection, Part II. NGC ID# 27HW, PCGS# 85982

1952 Quarter Dollar, PR66 Deep Cameo A Contrast Rarity

- 4136 1952 PR66 Deep Cameo PCGS.** Brilliant and deep cameo contrast is rarely seen on proof quarters from the early 1950s. PCGS has certified just 15 1952 proof quarters as Deep Cameo. Well-struck and virtually immaculate with darkly reflective fields and luminous motifs. The margins display light mauve toning. Population: 9 in 66 Deep Cameo, 2 finer (5/13).
From The MKJ Collection, Part II. NGC ID# 248X, PCGS# 95984
- 4137 1954 PR68 Deep Cameo PCGS.** This early Washington quarter proof is seldom seen with the Deep Cameo designation. The silver surfaces on this piece display preservation that borders on immaculate, with jet-black, reflective fields. Population: 16 in 68 Deep Cameo, 0 finer (4/13).
From The MKJ Collection, Part II. NGC ID# 27HY, PCGS# 95986
- 4138 1955 PR68 Deep Cameo PCGS.** Stark silver-on-black contrast is the foremost attribute of this top-grade 1955 quarter, one of only 22 such at PCGS with none finer (4/13). The surface preservation is impeccable.
From The MKJ Collection, Part II. NGC ID# 27HZ, PCGS# 95987
- 4139 1956 PR69 Deep Cameo PCGS.** Ice-white motifs rise in full detail above the darkly mirrored fields. Unimprovable quality for the proof issue. Housed in an old green label holder. Population: 40 in 69 Deep Cameo, none finer (4/13).
Ex: Long Beach Signature (Heritage, 9/2006), lot 1805, which realized \$929.20.
From The MKJ Collection, Part II. NGC ID# 27J2, PCGS# 95988
- 4140 1957 PR68 Deep Cameo PCGS.** An exceptional proof representative with crisply struck devices and glassy fields. The pristine surfaces display an occasional wisp of golden toning. Population: 23 in 68 Deep Cameo, 5 finer (4/13).
Ex: Long Beach Signature (Heritage, 9/2007), lot 1427, which realized \$1,495.
From The MKJ Collection, Part II. NGC ID# 27J3, PCGS# 95989
- 4141 1958 PR68 Deep Cameo PCGS.** Speckles of faint gold color make infrequent visits to each side of this lovely proof. Sharply struck design elements stand out boldly against deeply mirrored fields. Immaculately preserved throughout. Population: 23 in 68 Deep Cameo, 5 finer (4/13).
From The MKJ Collection, Part II. NGC ID# 27J4, PCGS# 95990
- 4142 1960 PR69 Deep Cameo PCGS.** Few of the silver Washington quarters from the 1950-1964 series appear in both the PR69 and Deep Cameo levels at PCGS; this 1960 is one of only 36 with none finer (4/13). Ice-white devices contrast boldly against midnight-black fields.
From The MKJ Collection, Part II. NGC ID# 2492, PCGS# 95992

4143 1961 PR69 Deep Cameo PCGS. Pristine preservation, deep reflectivity, and sparkling eye appeal are hallmarks of this top-grade late-series silver Washington quarter. Population: 41 in 69 Deep Cameo, 0 finer (4/13).

From The MKJ Collection, Part II. NGC ID# 2493, PCGS# 95993

4144 1964 PR69 Deep Cameo PCGS. This immaculate specimen provides seamless glassy fields and radiant, fully struck devices and legends. Remarkable quality for this popular proof date. Population: 88 in 69 Deep Cameo, none finer (4/13).

Ex: Baltimore Bullet (Heritage, 7/2003), lot 1566; Michael Fuller Collection (Heritage, 11/2007), lot 60958, which realized \$644.

From The MKJ Collection, Part II. NGC ID# 27J7, PCGS# 95996

4145 1970-S PR69 Deep Cameo PCGS. The clad quarter proof issues that commenced with the 1968-S issue are more elusive in PR69 Deep Cameo than generally thought. This 1970-S is tied for the finest at PCGS, showing bold contrast and impeccable surface preservation. Population: 46 in 69 Deep Cameo, 0 finer (4/13).

From The MKJ Collection, Part II. NGC ID# 2497, PCGS# 96002

4146 1976-S Silver PR70 Deep Cameo PCGS. Both the Bicentennial silver quarter and silver half dollar are elusive in the ultimate PR70 Deep Cameo grade, but they are mighty popular with collectors as one-year silver types. This quarter displays optimal field-device contrast, particularly on the large-profile obverse design. Population: 50 in 70 Deep Cameo (4/13).

From The MKJ Collection, Part II. NGC ID# 27JG, PCGS# 96008

PROOF STATEHOOD QUARTER

4147 1999-S Delaware Silver PR70 Deep Cameo PCGS. The silver Delaware Statehood quarter, from the debut year 1999, is one of the keys to the complete set in the perfect PR70 Deep Cameo grade at PCGS. An even 100 coins are in this grade, far fewer than the number of collectors working on this popular series. This is a silver-white, optimally contrasted example, certified in the special Flag holder.

From The MKJ Collection, Part II. NGC ID# 27M8, PCGS# 96043

WALKING LIBERTY HALF DOLLARS

4148 1916 MS65 NGC. Splashes of russet toning visit the lustrous surfaces of this Gem Walker; these are somewhat more extensive and deeper in hue on the reverse. This is a well struck piece that is devoid of mentionable marks. NGC ID# 24PL, PCGS# 6566

4149 1916 MS65 NGC. This is a great Gem example of this first-year Walking Liberty half issue, frosty and well-struck with few marks over even pinkish-gray surfaces. NGC ID# 24PL, PCGS# 6566

4150 1916 MS65 PCGS. The 1916 Walking Liberty half dollar is always in demand due to its low mintage and its status as a first-year type coin. Hints of light tan make occasional visits to the highly lustrous surfaces of this attractive Gem. The design elements are well brought up throughout. NGC ID# 24PL, PCGS# 6566

4151 1916-D MS64 PCGS. CAC. Well-struck with the usual large granularity over each side and a bright presence of mint luster. Lightly toned around the margins. Scarcer first-year issue. NGC ID# 24PM, PCGS# 6567

4152 1916-S — Cleaning — PCGS Genuine. Unc. Details. This introductory year half dollar is from a low mintage and is devoid of bagmarks though careful rotation reveals faint parallel hairlines on both sides. NGC ID# 24PN, PCGS# 6568

4153 1916-S MS62 PCGS. Softly struck but pleasingly lustrous with glimmers of gold against a pale silver backdrop. Marks are few for the grade assigned on this first-year coin with obverse mintmark. NGC ID# 24PN, PCGS# 6568

1916-S Walker, Lightly Toned MS64 Strong Underlying Mint Luster

4154 1916-S MS64 PCGS. CAC. Few examples of the 1916-S were set aside at the time of issue, and higher grade examples are notable for collectors of early Walkers. Each side has a light, even layer of gray and rose toning, but the mint luster shines brightly through. Just a couple of minor marks keep this piece from a Gem grade. NGC ID# 24PN, PCGS# 6568

4155 1917 MS65 PCGS. Gold-orange at the margins with textured silver interiors showing considerable luster. Pleasingly detailed overall with a thumb clearly separated from the rest of the branch hand. NGC ID# 24PP, PCGS# 6569

1917 Walking Liberty Half, MS66 Wonderfully Lustrous Surfaces

4156 1917 MS66 PCGS. This high-mintage issue is a popular one for those seeking an early Walker for type purposes. This half exhibits thick mint frost beneath the gray-golden patina that evenly covers each side. Sharply struck except on the skirt lines, as usual. The MS66 level is generally the finest grade for early Walkers. In the case of the 1917, only three pieces are finer (5/13). NGC ID# 24PP, PCGS# 6569

4157 1917 MS66 PCGS. The silvery surfaces on this frosty Premium Gem show just the slightest touch of color sprinkled here and there. The bold strike complements few mentionable marks, those present mostly removed from the focal points. A great type for collectors of early type. Population: 87 in 66, 3 finer (4/13). NGC ID# 24PP, PCGS# 6569

4158 1917-D Obverse MS64 PCGS. Both sides of this near-Gem Walker are awash in pleasing luster, each of which is minimally marked. An impressive strike leaves pleasing detail on the devices. NGC ID# 24PR, PCGS# 6570

4159 1917-S Obverse — Improperly Cleaned — NGC Details. Unc. This early branch mint half dollar displays full design detail and is essentially void of marks, but the cartwheel luster is muted and the untuned surfaces possess a consistent matte texture uncharacteristic of the issue. NGC ID# 24PT, PCGS# 6572

1918-D Half, MS63
Scarce and Pricey Any Finer

- 4160 1918-D MS63 PCGS.** At the MS63 level, the 1918-D is a relatively affordable early Walker. It is one that costs a fraction of the price of Gem. The central design elements are not fully brought up, but seldom are '18-D halves. The mint luster displays light, even gray-rose toning over each side. NGC ID# 24PW, PCGS# 6575
- 4161 1918-S MS63 PCGS.** A satiny olive-gold and powder-blue representative of this conditionally difficult early branch mint issue. No marks are worthy of singular mention. Certified in a green label holder.
Ex: St. Louis Central States Signature (Heritage, 5/2005), lot 7355, which realized \$1,552.50. NGC ID# 24PX, PCGS# 6576

1918-S Walking Liberty Half, MS64
Sharply Struck

- 4162 1918-S MS64 PCGS.** Even though the 1918-S is a high-mintage issue, there are no fully struck coins we are aware of. This one is close though. Both sides are completely brilliant and there are no mentionable areas of striking incompleteness, just slight softness over the high points. The mint luster is strong and unaffected by any larger abrasions. NGC ID# 24PX, PCGS# 6576
- 4163 1919-S XF45 PCGS.** The silver-gray surfaces of this Choice XF Walker retain traces of luster in the recessed areas. Both sides are nicely detailed and reveal just a few light marks. NGC ID# 24R2, PCGS# 6579
- 4164 1920 MS64 PCGS. CAC.** A cream-gray near-Gem with splashes of russet-orange near the rims. Nicely struck and lustrous with a few unimportant grazes on the right obverse field. Encased in a first generation holder. NGC ID# 24R3, PCGS# 6580

1920 Half Dollar, Lustrous MS65
Popular as a Type Coin From the Early Series

- 4165 1920 MS65 PCGS.** Once in a while this cataloger used to find a 1920 in circulation many moons ago. This indicates the widespread distribution of this issue in the channels of commerce, and its usefulness today as an early Walker type coin. Its availability diminishes appreciably at the Gem level however with only 84 so graded by PCGS and 14 finer (5/14). This is a wonderfully lustrous coin with a strong strike and nearly brilliant surfaces. NGC ID# 24R3, PCGS# 6580
- 4166 1929-D MS64 NGC.** Bright luster endows both sides of this near-Gem Walker, each of which is free of mentionable marks. The design elements are well struck save for the usual softness in the branch hand. A light toning spot is visible in the lower feathers of the eagle. NGC ID# 24RC, PCGS# 6589
- 4167 1934 MS67 PCGS.** Strong luster radiates from the impeccably preserved surfaces of this Superb Gem Walker. The design features are very well struck, including Liberty's branch hand. NGC ID# 24RF, PCGS# 6592
- 4168 1934-D MS66 PCGS.** Strong definition is seen on the design elements of this Premium Gem. Its lustrous surfaces are very nicely preserved. PCGS and NGC have certified only five pieces finer (4/13). NGC ID# 24RG, PCGS# 6593
- 4169 1934-S MS64 NGC.** Intensely lustrous surfaces display sharply struck devices, including the branch hand. Nicely preserved throughout. NGC ID# 24RH, PCGS# 6594
- 4170 1934-S MS64 PCGS. CAC.** Pleasing luster abounds on this near-Gem, and is nicely complemented by well struck design elements, including that of the branch hand. This piece yields great overall eye appeal. NGC ID# 24RH, PCGS# 6594

1934-S Half Dollar, Intensely Lustrous MS65
Key to the Middle Series

- 4171 1934-S MS65 NGC.** Rated first of the 19 issues in the Middle Date Series from 1934 to 1940 in both overall Uncirculated grades and MS65 and better grades. This is a very sharply struck example that exhibits thick, frosted mint luster and light, even reddish-yellow patina over both sides. NGC ID# 24RH, PCGS# 6594

**1935-S Half Dollar, MS66
Lightly Toned, Sharply Defined**

- 4172 1935-S MS66 NGC.** Green-gold overtones grace much of the outer fields, and additional dots of lavender and heather visit the lower reverse. The centers offer soft silver luster. Impressively preserved with a well-defined head of Liberty, though her branch hand is characteristically weak. Census: 47 in 66 (1 in 66+), 3 finer (4/13). NGC ID# 24RL, PCGS# 6597

**1935-S Half Dollar, MS66
Only Two Finer at PCGS**

- 4173 1935-S MS66 PCGS.** The heavy die polish in the fields of this satin Premium Gem creates reflective fields that are unlike most examples of this issue. Both sides have delicate champagne toning with iridescent splashes that create outstanding eye appeal. PCGS has only certified three finer examples of this issue (5/13). NGC ID# 24RL, PCGS# 6597
- 4174 1936-S MS66 PCGS. CAC.** Speckles of reddish-gold visit the obverse margin of this Premium Gem Walker, leaving the remaining surfaces essentially untuned. This piece is well struck and very nicely preserved. PCGS has seen only eight pieces finer. NGC ID# 24RP, PCGS# 6600
- 4175 1936-S MS66+ PCGS. CAC.** A high-end Premium Gem representative of this popular mid-series date, with well-detailed design elements and vibrant mint luster throughout. The well-preserved surfaces are patinated in attractive shades of golden-brown and amber. PCGS has graded only eight numerically finer examples (4/13). NGC ID# 24RP, PCGS# 6600
- 4176 1937 MS67 PCGS.** Wisps of light tan on the obverse cede to a more extensive pattern of this palette on the reverse. The design elements are sharply defined, including full detail in the branch hand. Lustrous surfaces are very well preserved. NGC ID# 24RR, PCGS# 6601
- 4177 1937-S MS66 PCGS. CAC.** Speckled gray and reddish-gold toning adheres to the lustrous surfaces of this Premium Gem. This is a well struck specimen, save for some typical softness in the central areas. The '37-S is difficult to acquire any finer; PCGS and NGC have graded fewer than 40 examples better than MS66. NGC ID# 24RT, PCGS# 6603
- 4178 1938-D MS65 PCGS.** Light golden patina visits this lustrous and nicely struck Gem. Well preserved and attractive. The third-lowest mintage issue of the series. Housed in a first generation holder. NGC ID# 24RV, PCGS# 6605

- 4179 1938-D MS66 PCGS.** The lustrous surfaces of this Premium Gem display well struck design features and pleasing surfaces. The 1938-D has the lowest mintage among late-date Walkers and is avidly sought-after by collectors. NGC ID# 24RV, PCGS# 6605

- 4180 1939 MS67 PCGS.** Moderate pastel patina includes golden and bluish hues thicker at the rim, complementing silvery centers and surfaces that show only scattered minor ticks, mostly visible only with magnification. The sharp strike produces a partial split thumb. A pretty example of this issue. PCGS has seen 26 numerically finer (4/13). NGC ID# 24RW, PCGS# 6606

- 4181 1939 MS67 PCGS. CAC.** The lustrous surfaces of this Superb Gem Walker are framed by soft gold patina around the margins. A solid strike imparts strong detail to the design elements, including Liberty's thumb on the branch hand. NGC ID# 24RW, PCGS# 6606

- 4182 1940-S MS66 PCGS.** An impressive Premium Gem, this 1940-S Walking Liberty half dollar is fully brilliant with satin luster and minimal marks. The strike, while not full, is far finer than most examples of the issue. PCGS has only certified seven finer examples (5/13). NGC ID# 24S2, PCGS# 6610

- 4183 1941 MS67+ PCGS. CAC.** Hints of pale gold toning enliven the well-preserved surfaces of this high-end Superb Gem. The design elements are well-detailed and vibrant mint luster radiates from both sides. NGC ID# 24S3, PCGS# 6611

- 4184 1941-D MS67 PCGS. CAC.** The lustrous surfaces of this Superb Gem display deeper toning on the reverse. Both sides are well struck and devoid of significant marks. PCGS and NGC have seen only three finer. NGC ID# 24S4, PCGS# 6612

- 4185 1941-S MS66 PCGS.** Booming luster emanates from the essentially untuned surfaces of this Premium Gem. The branch hand, though not full, displays fairly nice definition. PCGS has seen just seven pieces finer (5/13). NGC ID# 24S5, PCGS# 6613

- 4186 1941-S MS66 PCGS.** This impressive Premium Gem exhibits the usual softness on the head, hand, and eagle's leg, but the peripheral devices are sharply rendered. The pristine surfaces radiate vibrant mint luster, with a few hints of golden-tan toning. PCGS has graded seven numerically finer examples (4/13). NGC ID# 24S5, PCGS# 6613

- 4187 1942-S MS66 PCGS. CAC.** This Premium Gem 1942-S half dollar is untuned, frosty, and well-struck, showing generous luster and excellent eye appeal throughout. Only two examples of this elusive issue are numerically finer at PCGS (5/13). NGC ID# 24S8, PCGS# 6617

- 4188 1943-S MS66+ PCGS. CAC.** This MS66+ 1943-S half dollar is better-struck overall than most examples of this issue, despite minor softness on the branch hand. A sparse scattering of small and insignificant marks are all that preclude an even finer grade. Population: 30 in 66+, 30 finer (5/13). NGC ID# 24SB, PCGS# 6620

- 4189 1945 MS67 PCGS.** This Superb Gem displays nice eye appeal on both sides, with areas of rich toning present, particularly on the reverse. Neither PCGS nor NGC has assigned a higher numeric grade to a single example (4/13). NGC ID# 24SF, PCGS# 6624

- 4190 1946-S MS67 PCGS.** Frosty surfaces are virtually untuned and fairly well-struck on this Superb Gem late-series issue, one of the top-graded pieces at PCGS. Marks are scattered and minimal, in concert with the grade. Population: 49 in 67 (1 in 67+), 0 finer (5/13). NGC ID# 24SL, PCGS# 6629

- 4191 1946-S MS67 NGC.** Knob S. A coruscating stone-white Superb Gem with nearly immaculate preservation. The skirt lines are well struck and Liberty's cheek and branch hand show only moderate incompleteness. Census: 63 in 67, none finer (4/13).
Ex: Dallas Signature (Heritage, 12/2005), lot 2205, which realized \$1,955. NGC ID# 24SL, PCGS# 6629
- 4192 1946-S MS67 PCGS.** Knob S. A lustrous pearl-white Superb Gem with exemplary preservation and only minor inexactness of strike. Last of the San Francisco issues of the type. Population: 48 in 67 (1 in 67+), 0 finer (4/13). NGC ID# 24SL, PCGS# 6629
- 4193 1946-S MS67 PCGS.** One of the finest few certified in this grade, a well-preserved and thoroughly frosted example with lots of eye appeal and no singular marks. Population: 49 in 67 (1 in 67+), 0 finer (5/13). NGC ID# 24SL, PCGS# 6629

1946-S Half, Well-Preserved MS67

- 4194 1946-S MS67 PCGS. CAC.** Trumpet Tail S. This caramel-gold and stone-gray Superb Gem exhibits exemplary luster and imposing eye appeal. The strike shows minor weakness on the high points of Liberty but is above average for a Walker from the 1940s. Population: 48 in 67 (1 in 67+), 0 finer (4/13). NGC ID# 24SL, PCGS# 6629

PROOF WALKING LIBERTY HALF DOLLARS

1936 Walking Liberty Half, PR66 Evenly Toned Surfaces

- 4195 1936 PR66 NGC.** Struck with an all-brilliant finish, the reflective surfaces of this remarkable Premium Gem are evenly toned in attractive shades of champagne-gold. The design elements are sharply detailed throughout and no mentionable distractions are evident. Only 3,901 proofs were struck in 1936 and the issue is always in demand. NGC ID# 27V4, PCGS# 6636
- 4196 1937 PR66 NGC.** This second-year Premium Gem proof Walker offers nice, delicate, even patina on each side with a full strike and much eye appeal. An attractive collector-grade coin from this popular series. NGC ID# 27V5, PCGS# 6637
- 4197 1937 PR67 NGC.** Moderate pastel toning and a full strike with complete luster make this Superb Gem 1937 half dollar one of the most desirable survivors of this second-year proof issue. A thoroughly attractive example. NGC ID# 27V5, PCGS# 6637

- 4198 1937 PR67 NGC.** Lightly toned in shades of pale gold and ice-blue, this spectacular Superb Gem is sharply detailed throughout, with outstanding eye appeal. NGC has graded 19 numerically finer examples (4/13). NGC ID# 27V5, PCGS# 6637
- 4199 1937 PR67 PCGS. CAC.** This fully struck Superb Gem proof example of the second-year Walking Liberty half is frosty silver-white with just the barest trace of color. PCGS has seen only 10 numerically finer, but the eye appeal of this piece and the CAC sticker put it into a small minority (4/13). NGC ID# 27V5, PCGS# 6637
- 4200 1938 PR66 PCGS. Gold CAC.** Chestnut-gold and dove-gray toning competes for territory across this undisturbed and appealing high grade half dollar. Sharply struck, satiny, and encapsulated in an old green label holder. NGC ID# 27V6, PCGS# 6638
- 4201 1938 PR67 NGC.** Only a faint outline of the designer's monogram is apparent on this well struck and flashy Superb Gem. Lightly toned honey-gold aside from a single forest-green freckle on the right border of the eagle's front wing. Certified in a prior generation holder. NGC ID# 27V6, PCGS# 6638
- 4202 1938 PR67+ NGC.** Grayish-tan and greenish patination envelops both sides of this high-end Superb Gem. The surfaces are solidly struck and devoid of mentionable marks. This coin is one of two PR67s given the "plus" designation by NGC. NGC ID# 27V6, PCGS# 6638
- 4203 1939 PR67 NGC. CAC.** Beautiful multicolor patina includes shades of jade in the interiors and copper-gold near the rims on this fully struck Superb Gem 1939 half dollar. A great coin for toning enthusiasts and those who simply appreciate high-grade coins. NGC ID# 27V7, PCGS# 6639
- 4204 1939 PR67+ PCGS. CAC.** This high-end Superb Gem displays razor-sharp definition on all design elements and hazy reflective fields blanketed in pale jade and ice-blue patina. PCGS has graded only 28 numerically finer examples (4/13). NGC ID# 27V7, PCGS# 6639

1939 PR68 Walking Liberty Half Pale Toning

- 4205 1939 PR68 NGC.** Yellow-gold patination is slightly more extensive and deeper on the reverse, and both sides are accented with freckles of light brown and sky-blue. A full strike delineates the design features, and both faces are immaculately preserved. Census: 75 in 68, 1 finer (4/13).
Ex: Dallas Signature (Heritage, 10/2009), lot 788. NGC ID# 27V7, PCGS# 6639

**1939 Walking Liberty Half, PR68
Only One Finer at NGC**

- 4206 1939 PR68 NGC.** Bold toning covers large portions of the peripheries on both sides of this example, creating a high degree of visual appeal. The colors include shades of deep golden-yellow, lemon-yellow, cherry-red, and lime-green. Areas of golden-brown and gold color appear elsewhere as well. The design elements display sharp definition. Census: 75 in 68, 1 finer (5/13). NGC ID# 27V7, PCGS# 6639

**1939 PR68 Walking Liberty Half
None Finer at PCGS**

- 4207 1939 PR68 PCGS.** An essentially brilliant Superb Gem. Gorgeously preserved, and desirable in such exemplary quality. The fields display remarkable depth of reflectivity, especially on the obverse where there is less design and more field presence. As one would expect from a coin in such exemplary grade, there are no obvious or detracting contact marks. Population: 28 in 68, 0 finer (4/13). *From The MKJ Collection, Part II.* NGC ID# 27V7, PCGS# 6639

- 4208 1940 PR67 PCGS. CAC.** Medium-intensity toning covers both sides of this Superb Gem proof Walker, each of which has been well cared for. A solid strike imparts excellent definition to the design elements. NGC ID# 27V8, PCGS# 6640

- 4209 1940 PR67+ PCGS. CAC.** Produced with the standard all-brilliant finish, this high-end Superb Gem exhibits sharply detailed design elements and brightly reflective fields, with hints of pale gold toning and outstanding eye appeal. NGC ID# 27V8, PCGS# 6640

**1940 PR68 Walking Liberty Half
Subtle Iridescent Toning**

- 4210 1940 PR68 PCGS. CAC.** Pastel lemon-gold, cherry-red, and lime-green graces the peripheries of this intricately struck Superb Gem. The satiny fields are gloriously pristine, and the eye appeal is outstanding. A finer proof Walking Liberty half can hardly be imagined. Population: 31 in 68 (1 in 68+), 0 finer (4/13). *Ex: FUN Signature (Heritage, 1/2008), lot 2173.* *From The MKJ Collection, Part II.* NGC ID# 27V8, PCGS# 6640

- 4211 1941 PR67 PCGS.** Deep jade and amber hues liberally cover each side of this Superb Gem level, almost assuredly long-term album toning. The fully struck surfaces show only scattered marks with bold eye appeal. PCGS has seen 15 submissions finer (5/13). NGC ID# 24SP, PCGS# 6641

- 4212 1941 PR67 PCGS. CAC.** No AW. Butter-gold toning adorns this flawless and fully struck Superb Gem. The designer's monogram is absent from a majority of '41 proofs due to the lapping of a reverse die prior to installation. NGC ID# 24SP, PCGS# 6641

**1941 Half Dollar, PR68
Peripherally Toned**

- 4213 1941 PR68 PCGS. CAC.** The AW monogram is present on this beautifully toned specimen. The centers are brilliant, but the borders are sea-green, gold, and rose-red. A fully struck and pristine proof representative of this widely collected silver type. Population: 15 in 68, 0 finer (5/13). *Ex: Orlando FUN Signature (Heritage, 1/2008), lot 2175, which realized \$5,750.* *From The MKJ Collection, Part II.* NGC ID# 24SP, PCGS# 6641

- 4214 1942 PR67+ PCGS. CAC.** A coin with plenty of eye appeal, this high-end Superb Gem displays only small hints of color. The design elements exhibit sharp detail throughout and the surfaces are deeply reflective. NGC ID# 27V9, PCGS# 6642

- 4215 1942 PR67+ PCGS. CAC.** Proof coinage was suspended after 1942, with a final mintage of 21,120 Walking Liberty half dollars. This high-end Superb Gem displays sharply detailed design elements and pale gold reflective surfaces. NGC ID# 27V9, PCGS# 6642

**1942 Walking Liberty Half, PR68
Only Three Finer Coins at NGC**

- 4216** 1942 PR68 NGC. This virtually perfect coin displays fully struck design elements and impeccably preserved surfaces, with deeply mirrored brilliant fields. Eye appeal is tremendous. The Mint suspended proof set offerings after 1942 because of the economic pressures of World War II. NGC has graded only three numerically finer examples (4/13). NGC ID# 27V9, PCGS# 6642

**1942 Half Dollar, PR68
Great Proof Type Coin**

- 4217** 1942 PR68 NGC. CAC. Slivers of crimson, electric-blue, and gold cling to the margins of this proof Walker, while freckles of charcoal-gray make occasional visits to the remaining surfaces. The design elements are fully impressed, and both sides are immaculately preserved, as expected for the grade designation. This year was the final proof Walker, with the highest mintage of the seven proof issues, an ideal candidate for type collectors. NGC ID# 27V9, PCGS# 6642

FRANKLIN HALF DOLLARS

- 4218** Complete Set of Business-Strike Franklin Half Dollars Certified by PCGS in Individual Holders. Includes: 1948 MS64 Full Bell Lines, 1948-D MS64 Full Bell Lines, 1949 MS64 Full Bell Lines, 1949-D MS64 Full Bell Lines, 1949-S MS65, 1950 MS64 Full Bell Lines, 1950-D MS64 Full Bell Lines, 1951 MS65, 1951-D MS64 Full Bell Lines, 1951-S MS65, 1952 MS65 Full Bell Lines, 1952-D MS65, 1952-S MS65, 1953 MS64 Full Bell Lines, 1953-D MS64 Full Bell Lines, 1953-S MS65, 1954 MS64 Full Bell Lines, 1954-D MS65 Full Bell Lines, 1954-S MS64 Full Bell Lines, 1955 MS65 Full Bell Lines, 1956 MS65 Full Bell Lines, 1957 MS65 Full Bell Lines (in a green label holder), 1957-D MS65 Full Bell Lines, 1958 MS65, 1958-D MS65 Full Bell Lines, 1959 MS64 Full Bell Lines, 1959-D MS64 Full Bell Lines, 1960 MS64 Full Bell Lines, 1960-D MS64 Full Bell Lines, 1961 MS65, 1961-D MS64 Full Bell Lines, 1962 MS65, 1962-D MS64 Full Bell Lines, 1963 MS65, and a 1963-D MS64 Full Bell Lines. (Total: 35 coins)

**Key 1949-D Half Dollar
MS66 Full Bell Lines**

- 4219** 1949-D MS66 Full Bell Lines PCGS. Iridescent powder-blue, caramel-gold, lime-green, and steel-gray toning endow this lustrous and well struck high grade half dollar. Per the *Guide Book*, the 1949-D is the key date of the series at the MS65 level, and MS66 Full Bell Line examples are even more desirable. Population: 31 in 66 Full Bell Lines, none finer (5/13). NGC ID# 24SU, PCGS# 86654

- 4220** 1949-S MS66 Prooflike NGC. As of (4/13), NGC has certified examples of only two dates as Prooflike, the 1949-S and the 1959. For the 1949-S, NGC has grades six pieces as Prooflike and another 14 as Full Bell Lines Prooflike. At the MS66 level, the present piece is the sole Prooflike, while two are graded MS66 FLP. Brilliant and flashy with a good strike and smooth surfaces. PCGS# 96655

- 4221** 1950-D MS66 Full Bell Lines PCGS. CAC. A finely speckled patina in shades of gray, plum, green, and fuchsia covers large portions of the obverse. The reverse displays significantly less color. Population: 54 in 66 (3 in 66+) Full Bell Lines, 0 finer (4/13). NGC ID# 24SX, PCGS# 86657

- 4222** 1952-D MS66 Full Bell Lines PCGS. CAC. A Premium Gem example, this piece displays pleasing luster and has nice eye appeal. Dark gray freckles appear on both sides of this coin, primarily at the outer edges on the obverse. The reverse features areas of toning that include shades of olive-green, russet, and lime-green. Population: 70 in 66 Full Bell Lines, 2 finer (4/13). NGC ID# 24T4, PCGS# 86662

- 4223** 1952-S MS66 Full Bell Lines PCGS. CAC. Subtle toning appears on both sides of this Premium Gem, primarily at the outer edges. This is a lovely example with lustrous surfaces. Neither PCGS nor NGC has assigned a higher numeric grade to a single example (4/13). NGC ID# 24T5, PCGS# 86663

- 4224** 1953-D MS66 PCGS. CAC. The obverse of this gorgeous Premium Gem exhibits brilliant gold and iridescent toning while the reverse has light blue toning with peripheral gold splashes. Virtually complete bell lines are noted on the reverse. Population: 12 in 66, 0 finer (5/13). NGC ID# 24T7, PCGS# 6665

**1957-D Half, MS67 Full Bell Lines
Mint Set Toning**

- 4225 1957-D MS67 Full Bell Lines PCGS.** Beautiful mint set toning occupies the obverse of this conditionally elusive issue, one of only nine so certified at PCGS and none finer (4/13). Orange, cherry, lime, and lavender prevail among silver tinges on the obverse, while the reverse is far more subdued, powder-gray with glints of orange near the rims. NGC ID# 24TF, PCGS# 86673

**1958-D Franklin Half, MS67
Scarce Example With Full Bell Lines**

- 4226 1958-D MS67 Full Bell Lines PCGS. CAC.** This spectacular Superb Gem exhibits dark shades of amber, sea-green, and violet-gray toning, with most of the color on the reverse. The design elements are well-detailed, with Full Bell Lines, and vibrant mint luster shines through the patina. Population: 32 in 67 Full Bell Lines, 0 finer (4/13). NGC ID# 24TH, PCGS# 86675

- 4227 1959 MS66 Full Bell Lines PCGS.** In MS66 Full Bell Lines the 1959 Franklin half is among the most elusive conditional rarities of the 1948-59 era, surpassed only by the 1949-D and the 1953-S. This silvery, frosted untuned piece displays "all there" bell lines and excellent strike and eye appeal throughout. Population: 33 in 66 Full Bell Lines, 0 finer (4/13). NGC ID# 24TJ, PCGS# 86676

**1960 Full Bell Lines Half, MS66
Conditionally Elusive**

- 4228 1960 MS66 Full Bell Lines PCGS.** The 1960 Franklin is a challenging issue, as despite its normally sharp strike and excellent luster, most pieces show tiny nicks and abrasions that hold them from the MS66 level. This bright piece displays the coveted full bell lines and hints of rose-gold color. Population: 42 in 66 Full Bell Lines, none finer (4/13). NGC ID# 24TL, PCGS# 86678

**1960 Franklin Half Dollar, MS66 Full Bell Lines
Vibrant Obverse Toning**

- 4229 1960 MS66 Full Bell Lines PCGS.** The shimmering obverse displays toning throughout in vibrant shades of yellow, red, fuchsia, green, and orange. Although not as pronounced on the reverse, toning is present throughout. Several areas of reed marks appear in Franklin's hair and a couple of small marks are present to the left of the eye. Population: 42 in 66 Full Bell Lines, 0 finer (5/13). NGC ID# 24TL, PCGS# 86678

**Mint Set Toned 1960 Franklin Half
MS66 Full Bell Lines**

- 4230 1960 MS66 Full Bell Lines PCGS. CAC.** The 1960 Franklin half is quite rare in MS66 even without the Full Bell Lines designation; with it, this piece becomes one of only 42 seen at PCGS with none finer (4/13). Lovely obverse mint set toning comprises cherry, jade, gold, and russet mostly at the rims, while the reverse is untuned save for a few charcoal-gray flecks. Ex: R & I Coins (6/2004). NGC ID# 24TL, PCGS# 86678

**1960-D Half Dollar, MS66 Full Bell Lines
Bright Luster and Lovely, Subtle Toning**

- 4231 1960-D MS66 Full Bell Lines PCGS.** The cartwheel luster on this Franklin half would do any Morgan dollar proud, and the surfaces are virtually untuned, save for a consistent pinkish-blue tint throughout both sides. The 1960-D is even more elusive than the 1960-P in MS66 Full Bell Lines, and this example is among the finest available in aesthetic terms as well as technical. Population: 20 in 66 Full Bell Lines, 0 finer (4/13). NGC ID# 24TM, PCGS# 86679

- 4232 1963-D MS66 Full Bell Lines PCGS.** Bright luster embellishes both sides of this Premium Gem Franklin, each of which is devoid of significant marks. The strike is solid, evidenced by the Full Bell Lines and clarity in the lettering on the upper part of the bell. Population: 71 in 66 (2 in 66+) Full Bell Lines, 0 finer (4/13). NGC ID# 24TU, PCGS# 86685

PROOF FRANKLIN HALF DOLLARS

- 4233 1950 PR65 Cameo PCGS.** Both sides of this Gem Cameo yield a white-on-black appearance when the coin is observed from directly overhead. This is a sharply struck, well cared for Franklin. *From The MKJ Collection, Part II.* NGC ID# 27VA, PCGS# 86691

1950 Half Dollar, White PR66 ★ Cameo

- 4234 1950 PR66 ★ Cameo NGC. CAC.** This brilliant first-year proof Franklin offers deeply mirrored fields and frosty, precisely struck motifs. The reverse on its own might merit an Ultra Cameo designation though the obverse contrast, while consistent, is short of that elusive ideal. *Ex: Houston Signature (Heritage, 12/2009), lot 874, which realized \$2,070.* NGC ID# 27VA, PCGS# 86691

- 4235 1951 PR66 Cameo PCGS.** Strong field-motif contrast adorns the nicely preserved surfaces of this Premium Gem Franklin half. A curved lint mark is visible just to the left of HALF. This will be an excellent addition to a high-grade Franklin-half collection. *From The MKJ Collection, Part II.* NGC ID# 27VB, PCGS# 86692

1951 Franklin Half, PR65 Ultra Cameo

- 4236 1951 PR65 Ultra Cameo NGC.** This early proof Franklin half issue is relatively available in non-cameo condition, but Ultra Cameo pieces are extremely scarce. This Gem example exhibits a sharp strike along with pleasing white-on-black contrast. Census: 18 in 65 Ultra Cameo, 14 finer (5/13). NGC ID# 27VB, PCGS# 96692
- 4237 1952 PR67 Cameo PCGS.** Both sides of this Superb Gem Franklin display pleasing Cameo contrast. Full definition shows on the design features, and each side is near pristine, as expected for a proof in this high level of preservation. Population: 29 in 67 Cameo, 1 finer (4/13). *From The MKJ Collection, Part II.* NGC ID# 27VC, PCGS# 86693

- 4238 1954 PR67 Deep Cameo PCGS.** Deep Cameo examples of the 1954 Franklin half are few and far between, and series fans pursue them eagerly — particularly an example such as this, displaying blatant silver-on-black contrast with a few scattered milk spots. Population: 33 in 67 (1 in 67+) Deep Cameo, 5 finer (4/13). *From The MKJ Collection, Part II.* PCGS# 96695

- 4239 1955 PR69 NGC.** Pristine preservation is a given at this level, but this silver-on-black piece offers perceptible contrast as well, even if insufficient for a Cameo designation. A mighty attractive example. NGC ID# 27VE, PCGS# 6696

- 4240 1955 PR67 Deep Cameo PCGS.** A boldly struck piece that has strong contrast and exceptional mirrors. A few flecks are confined to the field below the TY of LIBERTY. Only a tiny minority of proof halves can secure the Deep Cameo designation. Certified in a green label holder. Population: 50 in 67 Deep Cameo, 17 finer (4/13). *Ex: St. Louis Central States (Heritage, 5/2007), lot 3172, which realized \$1,265.* *From The MKJ Collection, Part II.* NGC ID# 27VE, PCGS# 96696

1956 Half Dollar, PR69 Deep Cameo
Type Two

- 4241 1956 Type Two PR69 Deep Cameo PCGS.** A gorgeous and seemingly unimprovable Franklin half dollar. The strike on the Liberty Bell is razor-sharp, and the white-on-black contrast is extraordinary. Population: 39 in 69 Deep Cameo, 0 finer (5/13). *From The MKJ Collection, Part II.* NGC ID# 24TW, PCGS# 96697

- 4242 1957 PR68 Deep Cameo PCGS.** Only a tiny percentage of proof 1957 half dollars can match the exemplary cameo contrast of the present high grade specimen. Pristine, virtually brilliant, and housed in a green label holder. Population: 63 in 68 Deep Cameo, 2 finer (4/13). *Ex: Orlando FUN Signature (Heritage, 1/2010), lot 2784, which realized \$1,610.* *From The MKJ Collection, Part II.* NGC ID# 24TX, PCGS# 96698

- 4243 1958 PR67 Deep Cameo PCGS.** A sharply struck Superb Gem that has good cameo contrast and attractive peripheral rose-gold patina. In a green label holder. Population: 40 in 67 Deep Cameo, 21 finer (4/13). *Ex: New York FUN Signature (Heritage, 7/2002), lot 8322; St. Louis Central States (Heritage, 5/2007), lot 3176, which realized \$1,725.* *From The MKJ Collection, Part II.* NGC ID# 27VH, PCGS# 96699

- 4244 1959 PR68 Cameo NGC.** Considered by many to be the key to the Cameo series, this 1959 is brilliant throughout. Slight but noticeable contrast is seen between the fields and devices on each side. NGC ID# 27VJ, PCGS# 86700

- 4245 1960 PR68 Deep Cameo PCGS.** The silver-white surfaces on this 1960 Franklin half proof offer excellent preservation throughout, displaying profound silver-on-black contrast and generous eye appeal. Population: 75 in 68 Deep Cameo, 5 finer (4/13). *Ex: FUN Signature (Heritage, 1/2009), lot 8904.* *From The MKJ Collection, Part II.* NGC ID# 24TY, PCGS# 96701

4246 1960 PR68 Ultra Cameo NGC. An issue seldom seen at the Ultra Cameo contrast level, the present PR68 1960 Franklin is bettered by a meager two pieces at NGC (4/13). Full silver-on-black contrast is amplified by the absence of appreciable toning. A great example for set collectors. NGC ID# 24TY, PCGS# 96701

4247 1961 PR68 Deep Cameo PCGS. This piece is gleaming with deep contrast and moderate frost. The surfaces are silver-on-black save for two small milk spots, one above the date and one between LI. Certified in a green-label holder. Population: 81 in 68 Deep Cameo, 1 finer (5/13).
From The MKJ Collection, Part II. NGC ID# 24TZ, PCGS# 96702

KENNEDY HALF DOLLARS

4248 1997-D MS68 NGC. This lovely Superb Gem displays highly lustrous, silvery surfaces and exquisitely struck design elements. A few wispy marks on the reverse shield likely preclude an even higher grade. Nevertheless, both sides yield outstanding eye appeal. NGC ID# 24VY, PCGS# 6772

4249 1999-P MS69 NGC. Bright luster cascades over the virtually pristine surfaces of this Kennedy half. An impressive strike leaves strong definition on the design elements. Census: 1 in 69, 0 finer (4/13). NGC ID# 24W3, PCGS# 6776

4250 2002-D MS69 NGC. Intense luster radiates out to the observer of this virtually pristine Kennedy half. The design features are well impressed. Census: 1 in 69, 0 finer (4/13). NGC ID# 24WA, PCGS# 6783

SMS KENNEDY HALF DOLLAR

4251 1966 SMS MS68 Cameo PCGS. Cameo and Deep Cameo examples of the 1965-67 Kennedy half SMS coins are particularly elusive. This top-grade 1966 SMS half with Cameo designation is one of only 13 at PCGS with none finer (4/13). The silver-white devices contrast well against darkly mirrored fields.
From The MKJ Collection, Part II. NGC ID# 24WH, PCGS# 86846

PROOF KENNEDY HALF DOLLARS

4252 1964 PR69 Deep Cameo PCGS. Type Two Reverse. This first-year Kennedy half, and the only 90% silver issue along with the 1964-D, in proof format with Deep Cameo designation is among the keys to a Registry Set. PR69 (and even PR70) examples are seen fairly often, but PR69 Deep Cameos exist to the extent of only 78 submissions at PCGS with none finer (4/13). This is a largely untuned and starkly contrasted example, well within the designation. A small toning spot appears in the obverse field above the 9 in the date.
From The MKJ Collection, Part II. NGC ID# 24WF, PCGS# 96800

4253 1974-S PR70 Deep Cameo PCGS. The exquisitely struck, frosted devices appear to float over the deep watery fields of this perfect Kennedy half. This is simply a marvelous piece! Population: 19 in 70 Deep Cameo (4/13).
From The MKJ Collection, Part II. NGC ID# 27WN, PCGS# 96810

4254 1976-S Clad PR70 Deep Cameo PCGS. The clad Bicentennial Kennedy half in perfect PR70 Deep Cameo condition is even more elusive than its silver counterpart, and it is an important conditional rarity for Registry Set collectors. This essentially untuned example offers the profound contrast and pristine preservation demanded at this grade level. Population: 32 in 70 Deep Cameo (4/13).
From The MKJ Collection, Part II. NGC ID# 27WP, PCGS# 96811

4255 1976-S Silver PR70 Deep Cameo PCGS. One of the keys to a Kennedy half Registry Set, the Bicentennial silver 90% issue in the perfect PR70 Deep Cameo grade is eagerly pursued by legions of series fans. This one-year type displays stark contrast between frosted silver devices and night-black fields. Population: 54 in 70 Deep Cameo (4/13).
From The MKJ Collection, Part II. NGC ID# 27WR, PCGS# 96812

4256 1981-S Type Two PR70 Ultra Cameo NGC. A technically flawless and perfectly contrasted specimen of the rarer Type Two mintmark for the proof 1981-S Kennedy half. Both sides present as black-and-white. Census: 25 in 70 Ultra Cameo (4/13). NGC ID# 24WS, PCGS# 96822

4257 1981-S Type Two PR70 Deep Cameo PCGS. PCGS has certified only 31 examples of the 1981-S Type Two Kennedy half at this ultimate level of preservation. This example displays optimal contrast and excellent eye appeal, "all there" in strike and contrast.
From The MKJ Collection, Part II. NGC ID# 24WS, PCGS# 96822

COLONIALS

1662 Oak Tree Sixpence
Small 2, Noe-29, AU55

- 4301** 1662 Oak Tree, Small 2 AU55 PCGS. Noe-29, W-240, Salmon 1-A, R.6. An evenly struck representative of this challenging Noe variety. From the same die marriage as Noe-30 but an earlier state without the lengthy "tail" on the 2 in the date. Noe-31 is also from this die pair but features a straight die crack from the top of the 2 to the rim. Rich gunmetal patina is consistent throughout aside from a few small areas of lighter pearl-gray toning. Mint-made clips create a moderately oval appearance, and the obverse is misaligned toward 7 o'clock, but all legends are complete. Listed on page 38 of the 2013 *Guide Book*. PCGS# 45355

1652 Pine Tree Sixpence, XF40
Noe-33, Pellets at Trunk

- 4302** 1652 Pine Tree Sixpence XF40 PCGS. Noe-33, W-670, Salmon 2-B, R.3. Pellets at trunk. This sixpence is evenly and moderately circulated but all major design details are clear. The deep silver-gray surfaces show only a few unobtrusive marks. Diagnostic for Noe-33, the obverse is misaligned several degrees toward 12 o'clock, affecting the upper peripheral legend. The reverse legends are fully intact. Listed on page 39 of the 2013 *Guide Book*. PCGS# 22

1652 Large Planchet Pine Tree Shilling
Noe-9, VF30

- 4303** 1652 Pine Tree Shilling, Large Planchet VF30 PCGS. Noe-9, W-750, Salmon 7a-Diii, R.6. 68.67 gn. No pellets at trunk. A dove-gray midgrade example of this famous Colonial silver issue. Mildly wavy, as made, causing moderately uneven wear on the obverse center and the E in NEW. The reverse legends are virtually complete while selected outer obverse letters are incomplete due to mint-issued clips to bring the piece within standard weight. Refreshingly unabraded. Listed on page 39 of the 2013 *Guide Book*. PCGS# 23

**1652 Large Planchet Pine Tree Shilling
Very Rare Noe-6.1, XF40**

- 4304** 1652 Pine Tree Shilling, Large Planchet XF40 PCGS. Noe-6.1, W-720, Salmon 5-Di, R.7. 69.91 gn. No pellets at trunk. First described by Richard Picker, Noe-6.1 is a very rare variant of Noe-6 distinguished by Boston Mint re-engraving of the letters IN M on the lower obverse. In particular, the I is short and sans serif with a pointed end. A different example of Noe-6.1 appears in lot 110 of the Hain Family Collection (Stack's, 1/2002), where it is stated "we have not recorded another." The die state is later than Noe-6 with prominent breaks on the reverse above the 6 in the date and through the M in DOM. The deep lavender-brown surfaces are wavy due to rocker press manufacture. Listed on page 39 of the 2013 *Guide Book*. PCGS# 23

**1722 Hibernia Halfpenny, SP64 Brown
Harp Left, Martin 4.3-Bc.1**

- 4305** 1722 Hibernia Specimen Halfpenny SP64 Brown PCGS. Martin 4.3-Bc.1, W-12730. Harp Left. Nine harp strings. Perhaps made for presentation purposes, this first-year Hibernia halfpenny has the appearance of a proof. The chocolate-brown fields are glossy and moderately mirrored. The strike is sharp, though hints of the granular planchet surface remain on the high points such as the cheek of King George. Listed on page 44 of the 2013 *Guide Book*. Population: 2 in 64 Brown, 1 finer (4/13). PCGS# 193

**1787 'Muttonhead' Connecticut Copper
XF45, Miller 1.2-C
Ex: Stearns Collection**

- 4306** 1787 Connecticut Copper, Muttonhead XF45 PCGS. CAC. M. 1.2-C, W-2720, R.3. Ex: C.H. Stearns. A middle to late die state example with partial legends. Pieces from early dies exist with full legends, and coins from late dies are known with only fragments of the legend. Apparently, the unknown and unauthorized maker enjoyed lapping dies. The scarce Muttonhead variety is distinctive both for its oversized portrait and topless Liberty. The present golden-brown representative is remarkably void of contact and shows only minor granularity. The centers retain the planchet texture, as produced. Listed on page 61 of the 2013 *Guide Book*. Ex: C.H. Stearns Collection (*Mayflower*, 12/1966), lot 171. PCGS# 343

1787 Fugio Cent, AU53, N.1-B
No Cinquefoils, UNITED STATES

- 4307 1787 Fugio Cent, UNITED STATES, No Cinquefoils AU53 PCGS. CAC. N. 1-B, W-6600, R.4. The Newman 1 obverse appears to be a prototype die as it was used to strike the extremely rare N. 1-CC American Congress pattern. Newman 1 lacks cinquefoils but does possess a cross after the date. The die was later paired with the Raised Rims pattern reverse to coin the very rare N. 1-Z. Apparently, Newman 1 then became part of the regular die inventory, and eventually was used to coin a STATES UNITED variety, N. 1-L, and the present UNITED STATES variety. Both of the latter varieties are very scarce. This is a lovely chocolate-brown example with sharp definition and smooth surfaces. Struck from prominently clashed dies. Listed on page 87 of the 2013 *Guide Book*.

1787 STATES UNITED Fugio Cent, XF45
Scarce 1 Over Horizontal 1, Newman 10-T

- 4308 1787 Fugio Cent, STATES UNITED, 1/Horizontal 1 XF45 PCGS. N. 10-T, W-6705, R.5. The well-known but very scarce engraver's blunder with the 1 in the date initially entered horizontal to its proper position. A pleasing medium brown Fugio copper with surfaces that are surprisingly free from marks or flan striations. Population: 2 in 45, 1 finer (4/13). Listed on page 87 of the 2013 *Guide Book*. PCGS# 886

1787 STATES UNITED Fugio Cent, AU53
Raised Rim, Newman 19-Z

- 4309 1787 Fugio Cent, STATES UNITED, Raised Rim AU53 PCGS. N. 19-Z, W-6975, R.5. The curious Raised Rim "Z" reverse is best appreciated in better grades, which show clear definition on the incused lettering of UNITED STATES. The "Z" reverse is likely a pattern design, as it was initially paired with the rare No Cinquefoils, Cross after Date obverse. The present walnut-brown Newman 19-Z example is unabraded with a straight mint-made edge clip at 3 o'clock and a couple of flan flaws on the right-side rays. Listed on page 87 of the 2013 *Guide Book*. PCGS# 895

Scarce (1785) Bar 'Cent,' AU53
Breen-1145, W-8520

- 4310 (1785) Bar Copper AU53 PCGS. Breen-1145, W-8520, R.4. Specialists know the diagnostics for the distinctive and famous Bar "cent." The A is over the S, which in turn is over the U. Using coin turn, there is a spur down from the right end of the second bar, and a slender die crack connects two bars at the reverse center. Not much is known about the issue aside from the approximate time of its circulation in early American commerce, due to a brief mention in the *New Jersey Gazette*. The present chocolate-brown example has minor obverse flan imperfections (as made) but the surfaces are pleasing overall. Listed on page 74 of the 2013 *Guide Book*. PCGS# 599

(1785) Bar Copper, AU58
Early Federal 'Cent' Substitute?

4311 (1785) Bar Copper AU58 PCGS. Breen-1145, W-8520, R.4.

The Bar coppers are among the least-understood items of the early Federal period of U.S. coinage, generally thought to have been made in England (probably at Boulton and Watt's Soho Mint in Birmingham) but by an American, perhaps in observance of New York becoming the new nation's capital in January 1785.

Will Nipper writes in *In Yankee Doodle's Pocket* that "given the date of their first known appearance, the minting of bar coppers probably occurred at about the same time that the Coinage Act of 1785 was being passed (i.e., July 6). Since it was not until August 8, 1786, that new regulation created and named cents and half cents, the old custom of calling bar coppers 'cents' clearly is inaccurate." PCGS continues the old tradition on this newly encapsulated chocolate-brown piece. One of the bars shows an apparent planchet flaw. Listed on page 74 of the 2013 *Guide Book*. PCGS# 599

Silver 1796 Castorland Medal, AU58
Original Dies, W-9100

4312 1796 Castorland Medal, Silver AU58 PCGS. Breen-1058, W-9100, R.5.

Castorland was a planned community in upstate New York, intended to provide a home for French emigrants fleeing the French Revolution. There is little die rust and no bulge on the present specimen, which was struck from the original dies. This bold example has reflective silver surfaces beneath deep steel-blue and iridescent toning on both sides. Population: 5 in 58, 10 finer (4/13).

Ex: *Long Beach Signature* (Heritage, 6/2010), lot 33, which realized \$4,887.50. PCGS# 653

**1783 Washington Cent, MS63 Brown
Engrailed Edge, Small Military Bust
Finest PCGS-Certified Baker-4B**

- 4313** 1783 Washington & Independence Cent, Small Military Bust, Engrailed Edge MS63 Brown PCGS. Baker-4B, W-10150, R.6. The Small Military Bust variety is much scarcer than the Large Military Bust (Baker-4), and among the former, the Engrailed Edge is rarer than the Plain Edge (Baker-4A). This is a boldly struck specimen with deeply blended golden-brown and ice-blue surfaces. Devoid of contact aside from a single thin vertical line above the mouth of Washington, who more closely resembles the Duke of Wellington on this variety. Typically encountered in circulated grades. As of (4/13), PCGS has certified just three pieces as Mint State, with the present cent as the single finest. Listed on page 79 of the 2013 *Guide Book*. PCGS# 673

**1791 Washington Large Eagle Cent
MS65 Brown, Baker-15**

- 4314** 1791 Washington Large Eagle Cent MS65 Brown PCGS. Baker-15, W-10610, R.2. The 1791 Large and Small Eagle Washington cents were struck in England in hopes of securing a Federal coinage contract. The present well struck and splendidly preserved Gem displays hints of faded red in protected areas, though the open fields and motifs are gunmetal-blue. Population: 6 in 65 Brown, 1 finer (4/13). PCGS# 702

**Washington Success Medal, AU58 Silvered
Reeded Edge, Large Size, Baker-265**

- 4315** Undated Washington Success Medal, Large Size, Reeded Edge, Silvered AU58 PCGS. CAC. Baker-265, W-10900, R.5. The die break from 11 to 3 o'clock across Washington's nose is familiar to specialists. This moderately circulated piece is toned medium brown and is virtually devoid of marks. The reverse exhibits nearly unbroken luster. The all-seeing eye is incompletely brought up, as always. Listed on page 84 of the 2013 *Guide Book*. Population: 3 in 58, 1 finer (4/13).
Ex: Fort Worth Signature (Heritage, 3/2010), lot 26, which realized \$1,955. PCGS# 788

HALF CENTS

1793 Half Cent, Cohen-1
Only Minor Wear

- 4316 1793 PCGS Genuine. C-1, B-1, High R.3.** The PCGS number ending in .94 suggests Altered Surfaces as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, the piece has the details of an AU specimen that has been cleaned. Faint hairlines and pink accents on an otherwise Brown coin suggest a past cleaning, but in general this softly struck coin retains considerable eye appeal. Only a touch of actual wear is present, and though a few small digs are visible, these are eminently forgivable on a first-year half cent that has survived for more than two centuries. Our EAC grade VF30. NGC ID# 2222, PCGS# 1000

1793 Half Cent, C-3, VF20
Original Surfaces

- 4317 1793 VF20 PCGS. B-3, C-3, R.3.** Many numismatists have a soft spot in their heart for America's 1793-dated copper coinage, whether cents or half cents. The "old coppers" have a certain allure even among those who choose not to collect them. The year 1793 stands out as that in which the first-year Mint struck only copper coins, due to bureaucratic obstacles. The "little sisters" half cents of 1793 are prized, with four die marriages known that are about equally available, but all in demand. This Very Fine example of the Cohen-3 marriage shows the moderate wear expected; buildup appears in some of the peripheral letters and the date on the obverse and in the wreath on the reverse. The surfaces are reddish-brown overall with glints of olive, a strictly original look. Certified in a green-label holder. Our EAC grade Fine 12. NGC ID# 2222, PCGS# 1000

Choice XF 1794 Half Cent, C-1a
Widely Rotated Reverse

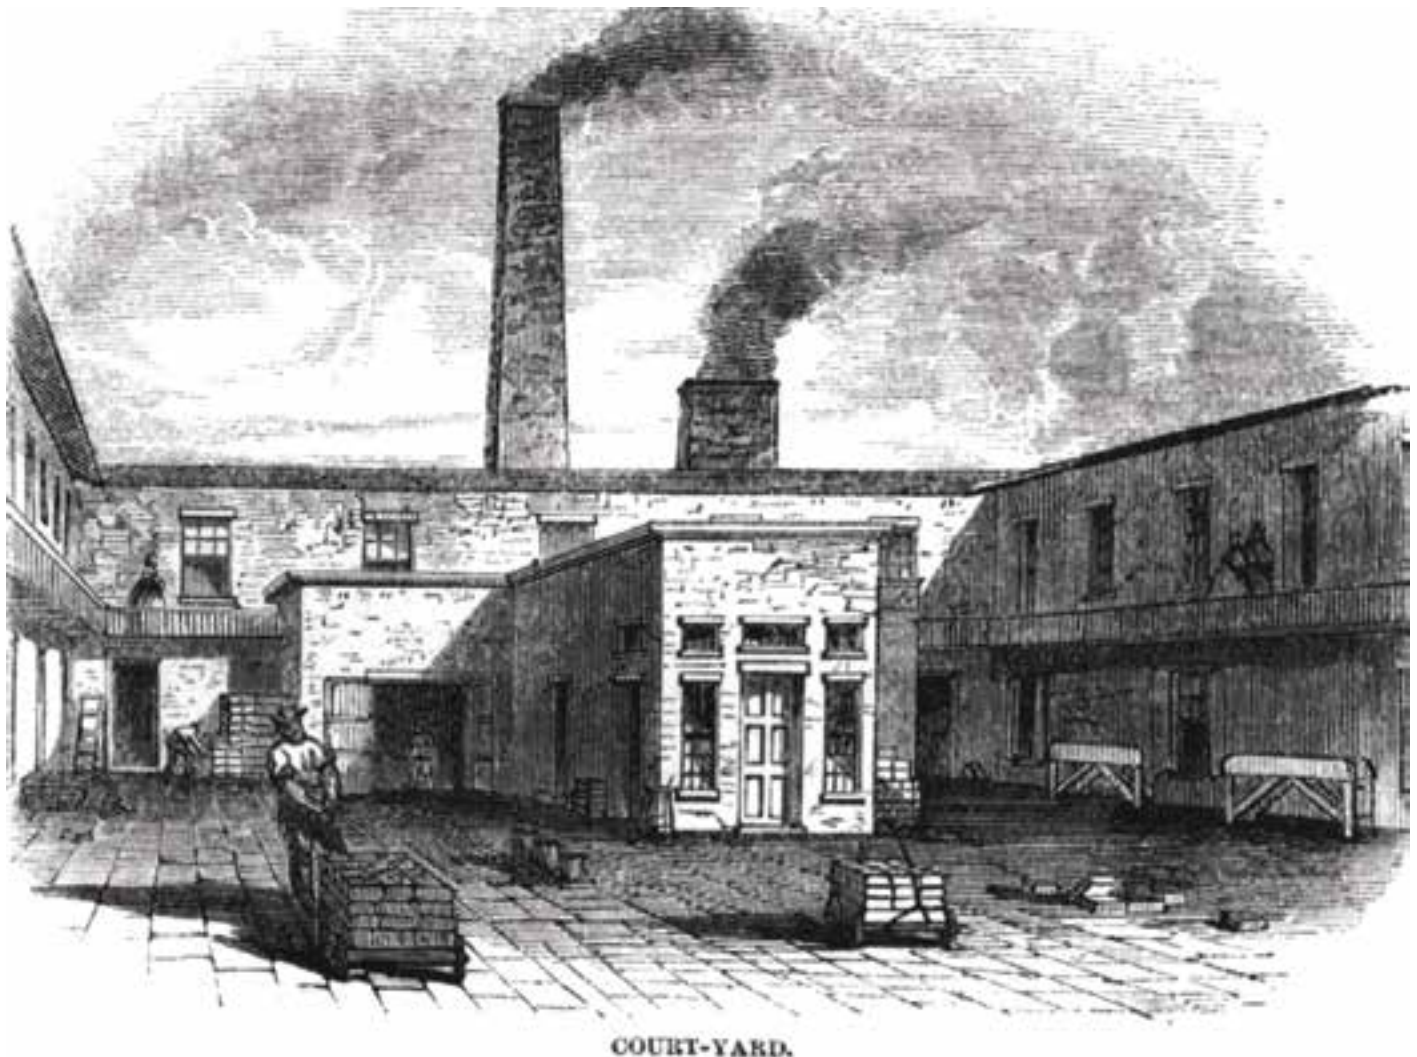

4318 1794 XF45 NGC. C-1a, B-1a, R.3. Manley Die State 2.0, "very scarce." The Large Letters edge is visible through the new-style NGC holder. This pleasing medium to deep brown half cent is lightly abraded and mildly granular. The strike is above average though the reverse legends have a few softly brought up letters. The reverse is rotated 60 degrees clockwise. Our EAC grade VF25. NGC ID# 2223, PCGS# 1003

1795 No Pole Half Cent, AU50
Plain Edge, C-5a, B-5a

4319 1795 Plain Edge, No Pole AU50 PCGS. C-5a, B-5a, R.3. A lightly circulated and refreshingly unabraded early copper. Sea-green margins frame cherry-red centers. The strike is generally crisp, with all of HALF CENT readable, though portions of the left-side borders retain the planchet texture. Struck slightly off center toward 7 o'clock. Our EAC grade VF30. NGC ID# 2225, PCGS# 1018

PROOF CLASSIC HEAD HALF CENT

Original 1831 Half Cent, C-1/EO-5, B-1
Well-Pedigreed PR58 Specimen

4320 1831 Original PR58 PCGS. C-1/EO-5, B-1, R.5. Die State 1. The EO-5 notation pioneered by Cohen refers first to Adam Eckfeldt ("E") as the Chief Coiner under whom this piece was made, followed by an "O" for Original and "5" for its slot in the sequence of original proofs produced. The "C-1" designation refers to business strikes (if they exist), which would have been struck from the same dies as the proofs.

Considerable controversy existed at the time of this piece's offering as part of The Jules Reiver Collection and remains today; the previous cataloger of this coin references the debate that took place in the pages of *Penny Wise* in 1996 and 1997, when Ron Manley and Frank Wilkinson opined that all Original 1831 half cents were proofs and Rick Coleman argued for the existence of business strikes. The Reiver catalog description notes how NGC described the coin as a proof, yet in its prior auction appearance as part of the Norweb Collection, the coin was labeled as a business strike. PCGS, in "crossing over" this coin, showed concurrence with NGC.

This is a generally smooth example, worn only at the uppermost design elements. It is sharply struck, if less reflective than might be expected on a proof, with rich olive-brown surfaces showing traces of rose and lilac. A handful of isolated spots appear on the obverse, while the reverse has a minor rim bump over the M of AMERICA. All-in-all, this is an appealing coin that stands on its own merits and continues to prove why it earned its famous past owners. Our EAC grade PR40.

Ex: King Farouk; Norweb Collection (Bowers and Merena, 10/1987), lot 79; Jules Reiver Collection (Heritage, 1/2006), lot 19114, which realized \$80,500. NGC ID# 2236, PCGS# 1186

LARGE CENTS

1793 Wreath Cent, VF30
Vine and Bars, S-9, B-12

- 4321 1793 Wreath Cent, Vine and Bars VF30 PCGS. S-9, B-12, R.2.** The horizontal leaf sprig and kidney-shaped bow on the reverse identify the S-9 variety. The S-9, with the Vine and Bars edge, is probably the most available variety of the date, from an estimated mintage of 22,000 pieces that was delivered from April 13-18, 1793.

This attractive Wreath cent displays pleasing brown surfaces with some minor porosity and scratches on the obverse. The design elements are well-detailed and the coin was struck a little off center to the right. The dentils on the left of both sides are full, but they merge into the edge on the right. Altogether, an attractive example of this popular variety. Our EAC grade Fine 12. NGC ID# 223H, PCGS# 1347

1793 Wreath Cent, Bold VF30
S-11c, Lettered Edge

- 4322 1793 Wreath Cent, Lettered Edge VF30 NGC. S-11c, B-16c, Low R.3.** Noyes Die State B/A with prominent clash marks near the profile. The NGC holder allows inspection of the edge, including the sole leaf after DOLLAR. A pleasing golden-brown representative of the single-year, first-year Wreath type. The right side of the hair displays wear commensurate with the grade but traces of luster emerge from design recesses. Small mint-made planchet flaws are noted on the forehead, the final A in AMERICA, and the reverse border at 6:30. Verdigris is absent, and abrasions are incidental except for a single slender mark on the cheek. Our EAC grade Fine 12. NGC ID# 223J, PCGS# 1350

1794 Liberty Cap Cent, Fine 15
Head of 1793, S-19, B-3

- 4323 1794 Head of 1793 Fine 15 PCGS. S-19, B-3, R.4.** The design elements are well-detailed except for the letters in AMERICA, which were weakly impressed and are no longer legible. The surfaces are a dark olive color and show considerable corrosion on both sides. No other problems are evident and the overall appearance is still quite pleasing for this scarce and important variety. This coin closely resembles the example in lot 1251 of the William F. Gable Collection (S.H. Chapman, 5/1914), but a conclusive match is not possible at this time. Housed in a green label holder with the edge hidden, making a complete attribution impossible. PCGS# 1363

1803 Cent, Large Date, Small Fraction
S-264, VF Details
Draped Bust Key

- 4324** 1803 Large Date, Small Fraction — Corroded — NCS. VF Details. S-264, B-24, High R.4. The only Sheldon variety that pairs a Large Date obverse with a Small Fraction reverse. The conditionally rare S-264 is key to a *Guide Book* variety set of Draped Bust cents. Prominent die breaks on both sides are likely responsible for its brief production. This is a sharp example with pleasing hair detail on Liberty. The ebony-brown surfaces are granular but all legends are bold and the types are clear. This piece has the sharpness of a VF25 specimen. Our EAC grade VG8. NGC ID# 224G, PCGS# 1497

1853 Cent, MS67 Brown, N-3

- 4325** 1853 MS67 Brown PCGS. N-3, R.1. Grellman Die State b. A gorgeous Superb Gem that boasts a virtually mark-free appearance. The obverse field has an orange peel texture due to long-in-use dies, but the strike is sharp and there are no spots of any size. An outstanding representative of the Mature Head type. Our EAC grade MS63. NGC ID# 226K, PCGS# 1901

1853 Large Cent, MS65+ Red
N-25, A Hoard Variety

- 4326** 1853 MS65+ Red PCGS. N-25, R.1. Die State b, dully repunched under the 1 in the date, a relatively common "hoard state" that is the source for many high-end examples. This coin's fiery orange and rose luster qualifies it as fully Red in the eyes of PCGS, and aside from minor carbon visible at 9 o'clock on the obverse rim and in the date area, this coin has few significant flaws. Our EAC grade MS65. NGC ID# 226K, PCGS# 1903

PROOF LARGE CENT

1842 Cent, PR63+ Brown, N-1
Perhaps a Half-Dozen Survive

- 4327** 1842 PR63+ Brown NGC. N-1, R.7 as a proof. Small Date. The curl point is directly over the upright of the 4 in the date, and a tiny die lump appears above the rim, beneath the 1. The N-1 die pairing is rarer even as a business strike than the N-2, the other Small Date die. In proof format, this piece is perhaps one of a half-dozen survivors and the first we have offered in many years. The rims are bold and squared off all the way around the coin on both sides, and the strike is impeccable. The Brown designation is inadequate for the lovely aqua patina with glints of jade and pinkish-gold that appears on the surfaces beneath a light. Our EAC grade PR62. Census: 1 in 63 (1 in 63+) Brown, 2 finer (4/13). PCGS# 1955

FLYING EAGLE CENTS

1858 Large Letters Flying Eagle Cent Only One Finer at PCGS

- 4328** 1858 Large Letters MS66 PCGS. CAC. High Leaves, Closed E in One. The Large Letter variety is affirmed by the AM in AMERICA being joined. Rick Snow estimates the circulation mintage of the Large Letters variety to be 12.3 million pieces. Beautiful light tan patination adorns both sides of this lovely Premium Gem, and the design elements are sharply struck, including the breast and tail feathers and the wreath, areas that are sometimes soft. Close inspection reveals no mentionable contact marks, and just a few small flecks take away nothing from the coin's overall eye appeal. This is likely to be the finest grade encountered, as PCGS has seen only one finer and NGC none better. Population: 26 in 66, 1 finer (4/13). NGC ID# 2277, PCGS# 2019

1858 Small Letters Flying Eagle Cent, MS65 Scarce Low Leaves, Open E

- 4329** 1858 Small Letters MS65 PCGS. CAC. Low Leaves, Open E. A scarce reverse subtype. Well struck for a "fleaegel" despite minor blending on the breast feathers. Lustrous and nearly mark-free with one pinpoint spot concealed on the front wing. A wire rim is noted on the upper right obverse. Population: 65 in 65, 9 finer (4/13). NGC ID# 2279, PCGS# 2020

PROOF FLYING EAGLE CENTS

1856 Flying Eagle Cent, Snow-3 VF Sharpness

- 4330** 1856 — Reverse Damage — NGC Details. Proof, VF Details. Snow-3. A walnut-brown example of the historically significant 1856 Flying Eagle cent, the first date of the small cent denomination. Pieces from Snow-3 dies were struck in 1856 to demonstrate the convenient diameter relative to the cumbersome large cent. A majority of the issue are Snow-9 restrikes from later in the decade after collector demand soared. The present Snow-3 specimen made its way into commerce and received a number of tiny marks near the denomination and right wreath end.

Proof 1856 Flying Eagle Cent XF Sharpness, Snow-9

- 4331** 1856 — Device Engraved — PCGS Genuine. Proof, XF Details. Snow-9. Portions of the eagle's plumage are strengthened with thin marks, and the field between the EN in CENT is abraded, but this key date cent is otherwise appealing. The blended olive-green and chestnut-gold surfaces show moderate circulation but retain glimmers of luster. A historic and famous issue.

Snow-9 1856 Flying Eagle Cent, Proof

- 4332** 1856 — Improperly Cleaned — NGC Details. Proof. Snow-9. The die line between the top of the I in UNITED and the rim is faint but visible. The 1856 Flying Eagle cents technically are not regular issues, but due to their relative availability and popularity they are collected alongside the brief Flying Eagle series. Though this peach and golden-brown example has been cleaned, possibly in response to environmental effects on the obverse, the overall eye appeal remains decent. NGC ID# 227A, PCGS# 2037

**1857 Flying Eagle Cent
Deeply Toned Gem Proof**

- 4333 1857 PR65 NGC.** Though the 1856 Flying Eagle cent is more famous than its 1857 and 1858 proof successors, the latter two dates are actually rarer in proof format than the 1856. For the 1857, NGC has certified a mere 37 proofs in all grades, since the date preceded the 1858 advent of proof set sales to the general public. The present fully struck Gem offers flashy fields and deep cobalt-blue, lavender, and orange-gold toning. Census: 7 in 65, 2 in 65 Cameo, none finer (4/13).
Ex: FUN Signature (Heritage, 1/2007), lot 786, which realized \$21,850. NGC ID# 227B, PCGS# 2040

**1858 Cent, PR63 Cameo
Rare Large Letters Proof**

- 4334 1858 Large Letters PR63 Cameo PCGS. Snow-PR1.** High Leaves, Closed E in ONE. Rick Snow in 2001 estimated that only 100 proofs were struck, and 50 of those have survived. Certainly, there are fewer proofs of the 1858 than the 1856, though that first-year issue receives more glory due to its very low overall mintage. The present piece is fully struck and boasts prominently mirrored wheat-gold fields, characteristic of the well-made proof issue. Devoid of hairlines or contact marks, and carbon is nearly absent. PCGS# 82042

INDIAN CENTS

**1859 Indian Cent, MS66
Tied for Finest Certified, Extraordinary Eye Appeal**

- 4335 1859 MS66 PCGS.** The feather tips and diamonds are sharply defined on this Premium Gem aside from only minor incompleteness on the lower two feathers. The surfaces are extremely lustrous on both sides and the coin displays gorgeous butter-gold color with splashes of plum, violet, and orange also present. Population: 20 in 66 (1 in 66+), 0 finer (4/13). NGC ID# 227E, PCGS# 2052

**1873 Doubled LIBERTY Cent, MS63 Brown
Rare Snow-1 Variant**

- 4336 1873 Doubled LIBERTY, Closed 3 MS63 Brown PCGS. Snow-1, FS-101.** Among all Indian cent die varieties, the Doubled LIBERTY is the second most valuable, trailing only the 1888/7. A less prominent Snow-2 Doubled LIBERTY also exists for the Closed 3 1873, but the present lot is the key *Guide Book* Snow-1 variety with strong die doubling throughout LIBERTY. Other design elements, such as Liberty's eye and profile, are also clearly doubled. Sharply struck and satiny with medium walnut-brown, olive-green, and powder-blue toning. Minor obverse carbon determines the grade. PCGS# 2115

**1877 Indian Cent, MS64 Brown
Sought-After Key Date**

- 4337 1877 MS64 Brown NGC.** The 1877 Indian cent is the most elusive business-strike issue of the series, from a mintage of 852,500 pieces. This well-preserved Choice example exhibits glossy brown surfaces with few signs of contact and well-detailed design elements. Census: 27 in 64 Brown, 10 finer (4/13). NGC ID# 2284, PCGS# 2127

1909-S Indian Cent, MS65 Red
Key Final Date

- 4338 1909-S MS65 Red PCGS.** The Indian cent was discontinued after 1909, with a small final mintage of 309,000 pieces at the San Francisco Mint. This spectacular Gem displays original red surfaces with blazing mint luster and few signs of contact. The design elements are well-detailed and eye appeal is outstanding. PCGS has graded 15 numerically finer examples (4/13). NGC ID# 2298, PCGS# 2240

PROOF INDIAN CENTS

1860 Indian Cent, PR66
Light Overall Color, Well-Mirrored

- 4339 1860 PR66 PCGS.** This pleasing Premium Gem is boldly impressed, and the sun-gold and chestnut-tan fields and devices are undisturbed aside from the occasional pinpoint fleck. Proofs of this date are far more difficult to locate than implied by the mintage of 1,000 pieces, since many sets went unsold. Population: 10 in 66, 0 finer (4/13). Ex: FUN Signature (Heritage, 1/2009), lot 385. NGC ID# 229A, PCGS# 2253

Full Red 1877 Indian Cent, PR66
Strong Date Pressure From Collectors

- 4340 1877 PR66 Red PCGS.** The smooth sheen on both sides of this important 1877 cent allows full appreciation of the rich cherry-red luster with a noticeably deeper appearance on the reverse. Both sides display razor-sharp striking definition throughout, and the surfaces are expectedly free of distracting carbon for the PR66 level of preservation. A small amount of die rotation is noted, somewhat unusual on this proof issue. The 1877 is not appreciably rarer than any of the other proof Indian cents from this decade. As specialists know, however, this issue is under extreme collector pressure due to the key date status of the business strike 1877 cent. Expect strong bidder competition for this Premium Gem. Population: 11 in 66 Red, 2 finer (4/13). Ex: New York Signature (Heritage, 11/2003), lot 5246; Central States Signature (Heritage, 5/2004), lot 5498; Long Beach Signature (Heritage, 5/2009), lot 140. NGC ID# 229W, PCGS# 2320

**1884 Cent, PR67 Red Cameo
Only Such at PCGS**

- 4341 1884 PR67 Red Cameo PCGS.** A total of 3,942 proof Indian cents were made for the year 1884, down by nearly half from that of the previous year, when the minor proof sets containing the debut-year Liberty nickel issue caused production to spike. This example is one of only 11 submissions at PCGS to attain the Superb Gem Red level, but 10 of those coins are non-Cameo pieces; this is the only PR67 Cameo certified of the date, and there are no PR67 Deep Cameos. Perceptible field-device contrast is consistent with the Cameo designation. The Red label is an oversimplification for surfaces that show bands of yellow-gold, medium orange, and light rose color, all completely within the Red context with no deeper mellowing. The surfaces are free of carbon or contact. An especially attractive Indian cent. PCGS# 82341

LINCOLN CENTS

Low Mintage 1909-S VDB Cent, MS65 Red

- 4342 1909-S VDB MS65 Red PCGS.** Rose-red, olive-green, and sun-gold shades grace lustrous and unabraded surfaces. A trace of carbon is visible beneath a loupe. The VDB initials are fully struck, as is the remainder of the coin with the exception of the top of Lincoln's ear. Encapsulated in an old green label holder. NGC ID# 22B2, PCGS# 2428

Red Gem 1909-S VDB Cent

- 4343 1909-S VDB MS65 Red PCGS. CAC.** The ceaseless popularity of the 1909-S VDB cent is partly because of the story behind the removal of Victor D. Brenner's initials, supposedly due to jealousy on the part of Chief Engraver Charles Barber. Following Barber's death, the initials returned in 1918, though in a less prominent position. This orange-gold and lime-green Gem is pristine aside from a faintly abraded spot near the stem of the left wheat ear. Housed in an old green label holder. NGC ID# 22B2, PCGS# 2428

1909-S VDB Cent, MS65 Red

- 4344 1909-S VDB MS65 Red PCGS. CAC.** Potent luster sweeps this apricot-gold key date Gem. No marks are readily evident and flecks are confined to the reverse field near the N in CENT. The strike is crisp except for minor softness on the VDB initials and the top half of the O in ONE. Certified in a green label holder. NGC ID# 22B2, PCGS# 2428

**1909-S VDB Cent, Red Gem
Classic Collector Piece**

- 4345 1909-S VDB MS65 Red PCGS. CAC.** Rich reddish-orange coloration with minimal carbon makes for an impressive 1909-S VDB cent, and this well-defined Red Gem with rolling satin luster makes for a magnificent first-year key. A great example of an issue that has been popular since the year it was struck and maintained that popularity for more than a century. NGC ID# 22B2, PCGS# 2428

1909-S VDB Cent, MS65 Red
Famous Key Date

- 4346** 1909-S VDB MS65 Red PCGS. CAC. One of the most famous dates in all of numismatics offered in a Red Gem holder. Predominantly apricot-gold surfaces with touches of green on the reverse offer boldly swirling luster and the devices are well-defined. A small carbon spot at the 1 in the date is the sole flaw worth singling out. NGC ID# 22B2, PCGS# 2428

1915-D Lincoln Cent, MS66 Red
None Finer at PCGS

- 4347** 1915-D MS66 Red PCGS. This spectacular Premium Gem is one of the finest 1915-D Lincoln cents extant. The original red surfaces radiate vibrant mint luster and show only the most insignificant signs of contact. The design elements are sharply rendered, with terrific eye appeal. Population: 23 in 66 Red, 0 finer (4/13). NGC ID# 22BL, PCGS# 2482

1923 Lincoln Cent, MS67 Red
Fresh Color

- 4348** 1923 MS67 Red PCGS. Primarily copper-gold luster has an undercurrent of orange and is always fresh. Sharply struck with only a few tiny flecks. Despite a mintage of more than 74 million pieces, the 1923 cent seldom is offered in MS67 Red or better condition. Population: 13 in 67 Red, 1 finer (4/13). NGC ID# 22CA, PCGS# 2545

1929-S Cent, Even, Fiery Red MS66

- 4349** 1929-S MS66 Red PCGS. While a common coin in circulated grades, upper-grade Uncirculated pieces such as this one are certainly challenging. The surfaces are even red over each side and display horizontal die striations. We see no mellowing and no obvious signs of carbon spotting. Well, but not fully struck, as usually seen. Population: 22 in 66 Red, 0 finer (4/13). NGC ID# 22CW, PCGS# 2602

1941 Doubled Die Obverse Cent,
FS-101, MS66 Red

- 4350** 1941 Doubled Die Obverse MS66 Red PCGS. CAC. FS-101. The obverse is nicely die doubled, most notably on the B in LIBERTY and the crossbar of the 4 in the date. Two other DDO varieties are listed in *Cherrypickers'*, with FS-101 in between FS-102 and FS-103 in terms of strength and value. This is a well-struck orange-gold Premium Gem with strong mint luster and a few minute flecks on the reverse exergue. PCGS# 37780

1943-S Steel Cent, MS68
Bright, Fresh Appearance

- 4351** 1943-S MS68 PCGS. CAC. This MS68 San Francisco "steelie" is tied for the finest example of its issue certified by PCGS (4/13). Both sides are pale with a faint suggestion of blue and largely free of spotting, the sole small exception appearing above the second S in STATES. Excellent detail for the one-year alloy. PCGS# 2717

PROOF LINCOLN CENTS

1936 Lincoln Cent, PR66 Red Type One, Satin Finish

- 4352** 1936 Type One—Satin Finish PR66 Red PCGS. The rich orange-red surfaces show slight hints of yellow-green and magenta on this scarce Type One cent. Minuscule flyspecks can also be seen under a loupe. Although more examples of the Satin Finish were struck, it appears that more examples were mishandled than of the Type Two coins that followed. Population: 24 in 66 Red, 1 finer (4/13).
Ex: Central States Signature (Heritage, 4/2007), lot 1303; Dallas Signature (Heritage, 11/2007), lot 176.
From The MKJ Collection, Part II. NGC ID# 22L2, PCGS# 3332

1936 Lincoln Cent, PR66 Red Brilliant Finish

- 4353** 1936 Type Two—Brilliant Finish PR66 Red PCGS. This uniformly mirrored representative displays attractive, original copper-orange color that is imbued with whispers of light green and orange. A powerful strike has left its impression on the design elements, and the surfaces are impeccably preserved. Population: 33 in 66 Red, 2 finer (4/13).
Ex: FUN Signature (Heritage, 1/2007), lot 1885; Dallas Signature (Heritage, 11/2007), lot 179.
From The MKJ Collection, Part II. NGC ID# 22L3, PCGS# 3335

1936 Lincoln Cent, PR66 Cameo Brilliant Finish Example

- 4354** 1936 Type Two—Brilliant Finish PR66 Cameo PCGS. CAC. The Mint resumed proof set offerings in 1936 after a two-decade hiatus. The collecting public was preoccupied with the Commemorative craze at the time, and this initial proof offering gathered little attention. A small mintage of 5,569 proof Lincoln cents was accomplished, split between the Satin finish and Brilliant types. The present coin is a magnificent example of the second type, with sharply detailed design elements and surfaces that are virtually free of post-striking impairments. The all-brilliant finish of these coins resulted in a lack of field/device contrast on most examples, and this coin is one of only three specimens certified Cameo at PCGS. Both sides display visually appealing golden-orange patina. Population: 1 in 66 Cameo, 0 finer (4/13).
Ex: Long Beach Signature (Heritage, 2/2002), lot 5332.
From The MKJ Collection, Part II. NGC ID# 22L3, PCGS# 83335

**1937 Lincoln Cent, PR67 Red Cameo
Tied for Finest at PCGS**

4355 1937 PR67 Red Cameo PCGS. Ex: Tom Mershon Collection. Although a handful of 1937 proof Lincolns, with a total mintage of 9,320 coins, are certified at PCGS in grades up to PR67 Red, in PR67 Red Cameo this piece is tied for finest certified with only one other coin—or else this piece has been submitted twice (4/13). Considerable contrast that appears to verge on Deep Cameo appears on each side of this stunning sunset-orange piece, and the effect is especially noticeable on the wheat ears and lettering of the reverse. A likely candidate for acquisition by Registry Set collectors of the popular Lincoln cent series.

Ex: Long Beach Signature (Heritage, 9/2008), lot 496; Long Beach Signature (Heritage, 6/2010), lot 279.

From The MKJ Collection, Part II. NGC ID# 22L4, PCGS# 83338

**1956 Lincoln Cent, PR68
Tied for Finest Deep Cameo at PCGS**

4356 1956 PR68 Deep Cameo PCGS. Rick Tomaska wrote of this date: "Ultra-heavy [cameo] examples do exist, but they are quite rare. The few examples that have surfaced usually exhibit lovely obverse contrast with little or no reverse contrast. This is not a major concern to cameo cent collectors, since the design of the wheat cents makes detecting cameo contrast on the reverse quite difficult anyway." This copper-orange specimen has bold contrast, particularly on the obverse, and stunning eye appeal. Population: 6 in 68 Deep Cameo, 0 finer (4/13).

Ex: Dallas Signature (Heritage, 11/2006), lot 247; Long Beach Signature (Heritage, 2/2009), lot 593.

From The MKJ Collection, Part II. NGC ID# 22LG, PCGS# 93377

PROOF TWO CENT PIECES

**1865 Two Cent Piece, PR65 Cameo
Last Civil War Issue**

4357 1865 PR65 Red Cameo PCGS. Only 500 proof two cent pieces were struck in 1865, the last year of the Civil War. This impressive Gem offers original orange and crimson surfaces, with deeply mirrored fields that contrast boldly with the sharply detailed frosty design elements. Population: 6 in 65 Cameo, 2 finer (4/13). PCGS# 83629

**1866 Two Cent, PR66+ Red and Brown
Finest Certified at PCGS**

4358 1866 PR66+ Red and Brown PCGS. CAC. The deeply reflective original surfaces of this high-end Premium Gem are mostly copper-red, with a few hints of light brown and burnt-orange. The design elements are sharply detailed and frosty, providing intense field-device contrast. Eye appeal is terrific. Only 725 proof two cent pieces were struck in 1866. Population: 10 in 66 (1 in 66+) Red and Brown, 0 finer (4/13). NGC ID# 274V, PCGS# 3631

**High Grade 1868 Two Cent
PR66 Red**

- 4359 1868 PR66 Red PCGS. CAC.** A razor-sharp Premium Gem with intermingled apple-green and rose-red toning. Devoid of contact though two tiny spots are noted at 2 o'clock on the obverse and on the upper right portion of the wreath. Housed in an old green label holder. Population: 8 in 66 Red, 1 finer (4/13). NGC ID# 274X, PCGS# 3638

**1873 Closed 3 Two Cent, PR66 Red and Brown
Significant Red Remains**

- 4360 1873 Closed 3 PR66 Red and Brown PCGS.** The Closed 3 coins were the original proof strikings, as all of the Open 3 two cent pieces were later restrikes. One wonders what Mint officials of the 19th century would think if they knew the depth of numismatic research today, which distinguishes between the two types. This piece shows much more red than brown, the latter primarily occupying the device high points, and the strike and overall appeal are impeccable. Only a single PCGS-certified piece is numerically finer, a PR67 Red coin. Population: 19 in 66 Red and Brown, 0 finer (4/13). NGC ID# 2753, PCGS# 3652

THREE CENT SILVER

**1852 Type One Three Cent Silver, MS67
Remarkably Clean and Lustrous Surfaces**

- 4361 1852 MS67 PCGS.** Struck in the second year of issue, also the second year of the Type One design. Just the faintest light blue toning is present on each side, but what is truly remarkable is the thick mint frost. The strike details are also unusually strong throughout, and there are no mentionable abrasions. One of the finest pieces known of this date. Population: 12 in 67, 2 finer (4/13). NGC ID# 22YZ, PCGS# 3666

**1858 Three Cent Silver
Colorful MS66**

- 4362 1858 MS66 PCGS. CAC.** Peach, violet, and blue hues sweep across this Premium Gem of the double-outline obverse type. The right reverse shows a degree of striking softness, most notably on the stars, but the obverse presents as well as a trime collector could hope. Population: 32 in 66, 11 finer (4/13). NGC ID# 22Z7, PCGS# 3674

**1861 Three Cent Silver, Nearly Untoned MS67
Among the Finest at PCGS**

- 4363 1861 MS67 PCGS.** This Superb Gem piece has the reverse rotated 180 degrees from normal, presenting a "medal-turn" die orientation. The surfaces are brilliant-silver with frosty luster that is accompanied by a nearly invisible splash of pale gold toning. Population: 26 in 67, 0 finer (4/13).
Ex: Central States Signature (Heritage, 5/2007), lot 1368. NGC ID# 22ZA, PCGS# 3679

**1861 Three Cent Silver, MS67
None Finer at PCGS**

- 4364 1861 MS67 PCGS.** A respectable mintage of 497,000 trimes was struck in 1861, the first year of the Civil War. Few survivors exhibit the quality and appeal of the present Superb Gem. This coin displays well-detailed devices and lustrous pristine surfaces, with hints of golden-tan and lavender-gray patina. Housed in a green label holder. Population: 26 in 67, 0 finer (4/13). NGC ID# 22ZA, PCGS# 3679

PROOF THREE CENT SILVER

1856 Three Cent Silver, PR65 Scarce Type Two Issue

- 4365 1856 PR65 PCGS. CAC.** Under a strong light the deep patina resolves into attractive shades of aqua-gray on the obverse with pinkish accents, while the reverse features a more golden palette overall with dabs of rose and charcoal. The 1856 three cent silvers were among the last of the Type Two issues, those with two lines around the six-pointed star on the obverse and a sprig of olive under the denomination on the reverse. The proof mintages are a guessing game before 1858; suffice it to say that this Gem PCGS proof is one of only six submissions in this grade, with a lone PR66 finer at that service (4/13). No obvious clash marks appear on either side of this piece, and a bold strike prevails throughout. The lower-right star on the reverse shows repunching. NGC ID# 27C3, PCGS# 3703

1857 Three Cent Silver, PR65 Rare Pre-1858 Proof

- 4366 1857 PR65 NGC.** The mintage of proof 1857 trimes was not recorded, but it was certainly small. This attractive Gem displays well-detailed design elements and reflective surfaces under shades of pale gold and lavender toning. The obverse shows a number of die striations in the fields. Census: 13 in 65, 7 finer (4/13). NGC ID# 27C4, PCGS# 3704

1869 Trime, PR66 Cameo Only 600 Examples Struck

- 4367 1869 PR66 Cameo PCGS.** From a limited proof mintage of just 600 pieces, the 1869 trime is seldom encountered in Premium Gem condition with cameo surfaces. This magnificent piece displays bold cameo contrast between the sharply detailed frosty devices and the deeply mirrored fields. Attractive shades of champagne-gold patina add to the considerable eye appeal. Population: 5 in 66 (1 in 66+) Cameo, 1 finer (4/13). PCGS# 83719

THREE CENT NICKEL

1883 Three Cent Nickel, MS66+ Only One Finer Coin at NGC

- 4368 1883 MS66+ NGC.** The 1883 three cent nickel claims a minuscule business-strike mintage of just 4,000 pieces, and the issue is very rare at the Premium Gem level. This high-end Premium Gem displays prooflike surfaces with hints of champagne-gold toning and no mentionable signs of contact. Census: 8 in 66 (1 in 66+), 1 finer (4/13). NGC ID# 275E, PCGS# 3751

PROOF THREE CENT NICKELS

1865 Three Cent Nickel, PR66 Only 500 Pieces Struck

- 4369 1865 PR66 NGC.** Only 500 proof three cent nickels were struck in 1865, during the final year of the Civil War, and the issue is one of the most challenging of the series. This spectacular Premium Gem displays sharply detailed design elements and reflective fields, under light shades of green and lavender-gray toning. Census: 12 in 66, 3 finer (4/13). NGC ID# 275K, PCGS# 3761

**1865 Three Cent Nickel, PR66 Cameo
Lowest Proof Mintage of Type**

4370 1865 PR66 Cameo PCGS. The 1865 is the rarest proof date in the three cent nickel series, though the 1877 is about as valuable due to its proof-only status. 1865 proofs show a clearly repunched date and are infrequently encountered the evident cameo contrast seen on the present almond-gold specimen. After the proof strikes were made, the obverse die was then put into service to produce coins for circulation. Examples of those pieces still exhibit a strongly repunched date and are listed as FS-302 in *Cherrypickers'*. Population: 33 in 66 (2 in 66+) Cameo, 1 finer (4/13). PCGS# 83761

SHIELD NICKELS

**1866 Rays Nickel, Faintly Toned MS66
Always Popular as the First-Year of the Type**

4371 1866 Rays MS66 PCGS. The 1866 is always popular as the first year of production for five cent nickels. The rays motif proved to be a problematic design feature and was eliminated the following year. This particular example lacks the irregular strike often seen as well as the heavy die cracks usually encountered. The satiny surfaces are draped with just the slightest yellow patina on each side. The only striking deficiency is seen in the center of the stars. Population: 32 in 66, 0 finer (4/13). NGC ID# 22NX, PCGS# 3790

**1867 Rays Nickel, Subtly Toned MS66
Underappreciated Condition Rarity**

4372 1867 Rays MS66 PCGS. The Rays variant from 1867 is much less available than the previous year (2 million vs. 14.7 million), and it is also dwarfed by the No Rays 1867 with 28.8 million pieces produced. The 1867 Rays is also a significant condition rarity. This is a remarkably fine example, one that is as fully struck as a business strike is ever likely to be found. The satiny surfaces also display subtle aqua and rose toning throughout. Population: 5 in 66, 1 finer (4/13). NGC ID# 22NY, PCGS# 3791

**1879 Nickel, MS66
Only 25,900 Pieces Struck for Circulation**

4373 1879 MS66 PCGS. CAC. Booming cartwheel luster, a full strike, and essentially mark-free surfaces attest to the immense quality of this low mintage Shield nickel. A scant 25,900 commercial pieces were struck. Certified in an old green label holder. Population: 23 in 66 (1 in 66+), 0 finer (4/13). NGC ID# 276D, PCGS# 3808

PROOF SHIELD NICKELS

**1867 No Rays Nickel, PR66 Deep Cameo
Single Finest PCGS Example**

4374 1867 No Rays PR66 Deep Cameo PCGS. CAC. This is an outstanding representative of the first of the No Rays proof issues in the Shield nickel series. The coin possesses brilliant mirrored fields and richly frosted devices leading to a bold degree of contrast and tremendous visual allure. A few tiny toning spots are present. The production figures for the 1867 proof mintage vary depending upon the reference, ranging from 600 to 1100. Regardless of the number, this is the sole finest PCGS-graded Deep Cameo example and has the additional benefit of the CAC verification sticker (4/13). This piece will make a wonderful addition to a great collection. PCGS# 93821

**1871 Nickel, Impressive PR67 ★
Well-Struck, Great Eye Appeal**

4375 1871 PR67 ★ NGC. A pleasing level of reflectivity is present on this lovely well-struck piece, although this issue is not generally known for deep mirrorlike fields. The coin is primarily nickel-white but displays faint elements of green-gold and olive that add to the eye appeal. NGC has awarded the PR67 ★ grade to one other example, with none finer (4/13). NGC ID# 276M, PCGS# 3825

1881 Shield Nickel, PR67 Cameo
Only One Finer

- 4376 1881 PR67 Cameo NGC.** Brilliant reflective surfaces, a sharp strike, and subtle almond-gold color create tremendous eye appeal for this lovely Superb Gem with pleasing cameo contrast. Subtle splashes of chestnut-brown appear on the reverse and a few tiny gray freckles are present on both sides. Census: 28 in 67 Cameo, 1 finer (4/13). PCGS# 83836

LIBERTY NICKELS

1886 Liberty Nickel, MS65
Better Date in High Grade

- 4377 1886 MS65 NGC.** The 1886 Liberty Head nickel is a better date in the series from a smallish mintage of 3.3 million pieces. This impressive Gem features sharply detailed central devices, but some of the stars are a little flat. The lustrous surfaces are blanketed in attractive shades of champagne-gold toning. A few interesting die breaks and planchet flakes are evident on the reverse. Census: 26 in 65, 3 finer (4/13). NGC ID# 22PK, PCGS# 3847

1886 Nickel, MS65
Second Key of the Business-Strike Series

- 4378 1886 MS65 PCGS.** The 1886 is the second of two notable business-strike key dates near the start of the Liberty nickel series. This Gem representative has uncommonly vibrant luster and blushes of orange peripheral toning around nickel-white interiors. Well-struck save for the star right of the coronet and the left ear of corn on the wreath. Population: 37 in 65, 6 finer (4/13). NGC ID# 22PK, PCGS# 3847

1912-D Liberty Nickel, MS66
Gorgeous Toning and Eye Appeal

- 4379 1912-D MS66 NGC.** Gorgeous toning on both sides of this lustrous Premium Gem, in intermingled pastel shades of orange, blue, green, yellow, and violet, creates tremendous visual allure. The colors are readily apparent without magnification. This sharply struck representative of the first issue of Denver Mint nickels displays a strong degree of design detail. Although a few examples have been awarded higher grades, it is difficult to imagine any of them can rival the appearance of this wonderful piece. Census: 20 in 66 (1 in 66+), 3 finer (4/13). NGC ID# 277P, PCGS# 3874

PROOF LIBERTY NICKELS

1884 Nickel, PR66 Deep Cameo
Attractively Toned

- 4380 1884 PR66 Deep Cameo PCGS.** Light green-gold patina drapes both sides of this sharply struck and attractively frosted specimen. Reflective fields have a few small planchet flaws, most visibly above the V in the denomination on the reverse, akin to a small depression that rises from the middle of Liberty's jawline. Population: 5 in 66 (2 in 66+) Deep Cameo, 0 finer (4/13). PCGS# 93882

1884 Nickel, PR66+ Deep Cameo
Repunched Date, FS-301

- 4381 1884 PR66+ Deep Cameo PCGS. CAC. FS-301.** The 18 in the date is clearly repunched. The luminous portrait and wreath contrast favorably with the glassy fields. Brilliant and beautiful with nary a whit of carbon. The strike is bold though slightly incomplete on the left ear of corn. Population: 5 in 66 (2 in 66+) Deep Cameo, 0 finer (4/13). PCGS# 93882

**1886 Liberty Nickel, PR67+ ★
None Finer at NGC**

4382 1886 PR67+ ★ NGC. CAC. A generous proof mintage of 4,290 Liberty nickels was achieved in 1886 but few survivors can match the quality of this high-end Superb Gem. This coin offers well-detailed design elements with just a touch of softness on the upper stars. The pristine reflective surfaces are blanketed in shades of lime-green and cerulean-blue patina. Eye appeal is tremendous. Census: 2 in 67+ ★, 0 finer (4/13). NGC ID# 277U, PCGS# 3884

**1893 Liberty Nickel, PR67 Cameo
Lightly Toned With Bold Contrast**

4383 1893 PR67 Cameo PCGS. CAC. Only 2,195 proof Liberty nickels were struck in 1893. This was the lowest mintage of the series up to that point, although later years saw many smaller production totals. This spectacular Superb Gem exhibits intense field-device contrast despite the delightful champagne-gold patina that blankets the pristine surfaces. Population: 11 in 67 Cameo, 0 finer (4/13). PCGS# 83891

**1901 Liberty Nickel, PR67 Cameo
None Finer at PCGS**

4384 1901 PR67 Cameo PCGS. This magnificent Superb Gem displays sharply detailed frosty design elements that create intense cameo contrast with the deeply mirrored fields. The well-preserved surfaces show highlights of golden-tan toning and close inspection reveals no mentionable signs of contact. Population: 6 in 67 Cameo, 0 finer (4/13). PCGS# 83899

**1902 Nickel, PR67 Cameo
Scarce Date With Contrast**

4385 1902 PR67 Cameo PCGS. Lemon-gold and ice-blue patina graces the flashy and undisturbed fields. The wreath and portrait are radiant, consistent with the Cameo designation. A razor-sharp representative that boasts full definition on the kernels of the left ear of corn. Population: 9 in 67 Cameo, 0 finer (4/13). PCGS# 83900

1902 Nickel, Cameo Superb Gem

4386 1902 PR67 Cameo PCGS. CAC. This is an unusual date to locate with cameo contrast in any series as the Mint began to polish the devices as well as the fields beginning in 1902. Contrast is definitely present, though, and each side displays pale yellow patina (nearly brilliant, actually) and the strike details are pinpoint-sharp. PCGS# 83900

**1910 Liberty Nickel, PR67+
Exceptional Late-Series Proof**

4387 1910 PR67+ PCGS. CAC. A high-end Superb Gem from a proof mintage of 2,405 pieces, this coin exhibits razor-sharp details on all design elements and the hazily reflective fields display attractive shades of champagne-gold and lavender-gray patina. Population: 31 in 67 (1 in 67+), 2 finer (4/13). NGC ID# 278L, PCGS# 3908

1910 Liberty Nickel, PR68 ★
Tied for Finest at NGC

4388 1910 PR68 ★ NGC. Only 2,405 proof Liberty nickels were struck in 1910 as collector demand for proof sets continued to drop. This well-detailed PR68 specimen displays moderately reflective pristine surfaces blanketed in shades of lime-green and cerulean-blue patina. Census: 2 in 68 ★, 0 finer (4/13). NGC ID# 278L, PCGS# 3908

BUFFALO NICKELS

1916-D Nickel, MS66
Distinctly Toned

4389 1916-D MS66 PCGS. CAC. Peach and blue overtones are prominent on both sides of this Premium Gem with the obverse color slightly lighter. Detail is strong on the bison's head, though the shoulder shows a degree of softness. Surfaces are surprisingly smooth for the date. Population: 13 in 66 (1 in 66+), 0 finer (4/13). NGC ID# 22RB, PCGS# 3932

1919-D Buffalo Nickel, MS65
Well-Defined and Colorful

4390 1919-D MS65 PCGS. Impressively toned with strong underlying luster, quality preservation, and even an above-average strike, this 1919-D nickel "has it all." Primarily gold surfaces (lower obverse, upper reverse) have a peach transition crescent before fading into attractive blue and violet. Population: 59 in 65 (4 in 65+), 16 finer (4/13). NGC ID# 22RM, PCGS# 3942

Exceptional 1919-D Five Cent, MS66
Among the Finest Certified
Sharply Struck

4391 1919-D MS66 PCGS. The 1919-D five cent Buffalo is one of the more challenging coins to locate, both in terms of availability in the better Mint State grades and from a strike perspective. PCGS and NGC combined have seen fewer than 20 coins in Premium Gem and none finer. Lange writes that strike weakness is evenly distributed, with particular indistinctness in the bison's head and the all-important horn.

The present MS66 example is a refreshing exception to the poor strike characteristics of most 1919-D nickels. The braid is well defined and the date and LIBERTY are bold. The bison's horn and tail are virtually full. Minor softness is noted in the hair above the forehead, but there is distinct separation between the two. Both sides display soft reddish-gold patina and pleasing luster, and each has been well cared for. Population: 16 in 66, 0 finer (4/13). NGC ID# 22RM, PCGS# 3942

1920-D Buffalo Nickel, MS65+
Only Three Finer Coins at PCGS

4392 1920-D MS65+ PCGS. CAC. Sharply detailed almost everywhere, this delightful high-end Gem shows just the slightest softness on the bison's shoulder. Vibrant mint luster shines through attractive shades of champagne-gold and ice-blue toning on both sides. Eye appeal is terrific. Population: 66 in 65 (2 in 65+), 3 finer (4/13). NGC ID# 22RR, PCGS# 3945

1923-S Nickel, MS65
Pleasing Patina

4393 1923-S MS65 NGC. Both sides show a mix of peach, green-gold, and blue hues, the last color dominating the reverse fields. This piece was struck with heavily eroded dies, the texture most visible at the field below the portrait's chin, but the reverse detail is strong for the date and conditions with only minor softness on the shoulder. NGC ID# 22RW, PCGS# 3950

1923-S Nickel, Sharp MS66 Example
One of Three at PCGS, Sole CAC Piece

4394 1923-S MS66 PCGS. CAC. This incredible 1923-S Buffalo nickel is one of only three in MS66 at PCGS, and among those, it is the only one that also bears the CAC endorsement. While this coin is not fully struck, it is far better-struck than most survivors of this strike-challenged issue; in fact, the strike is sharp to the point that this 1923-S more resembles some other S-mint issue with a reputation for a bold strike, such as a 1915-S. A bit of softness shows at the letter tops of LIBERTY and just above the braid, but note how sharp the remainder of the hair is, as well as the arrow feathers and the date. The reverse is overall even better-struck than the obverse. UNITED STATES OF is sharp, while AMERICA is a bit soft. The horn, head, and face of the buffalo are sharp, but minor weakness appears at the rear of the ruff, and the tail is split but barely so. This piece had the good fortune, clearly, to have been struck from dies that were still fairly fresh front and back, and to have been impressed with sufficient pressure and proper die spacing to produce this marvelous piece. The surfaces are free of major marks, although a small dark spot just behind the front legs provides a pedigree marker. Attractive, even pinkish-golden patina caps the appeal. An unimprovable essential for Registry Set collectors. NGC ID# 22RW, PCGS# 3950

1924-D Buffalo Nickel, Dazzling MS66
Formerly Marvin Elkin/Jon/Lor Registry Set

- 4395 1924-D MS66 PCGS.** Better struck than most examples of this issue, but of course, still showing the flat spot at the front of the bison's head, probably a deficiency in the master die itself. The surfaces are bright and satiny with glistening mint luster beneath pale lilac and golden patina over each side. As one would expect from an MS66, there are no noticeable or mentionable abrasions. This is an unusual opportunity for the advanced Buffalo nickel collector. Population: 3 in 66, 0 finer (4/13).
Ex: Marvin Elkin Collection (the Jon/Lor PCGS Registry Set)/Long Beach Signature (Heritage, 6/2002), lot 5493. NGC ID# 22RY, PCGS# 3952

1925-D Buffalo Nickel
Conditionally Rare MS66

- 4396 1925-D MS66 NGC.** Broadly luminous with a touch of quicksilver to the luster. Lightly patinated peach and nickel-blue with quality preservation, this Premium Gem also has uncommonly well-defined devices that show just a touch of softness on the bison's shoulder and a fully outlined horn. Neither NGC nor PCGS has graded a Superb Gem example of this date (4/13). NGC ID# 22S3, PCGS# 3955

1926-S Buffalo Nickel, MS61
Lowest Mintage of the Series

- 4397 1926-S MS61 NGC.** The 1926-S Buffalo nickel claims the lowest mintage of the series, at 970,000 pieces, and Mint State examples are quite scarce. The present coin is a well-struck MS61 example, with some weakness on the reverse, due to worn dies. The surfaces are lustrous, under vivid gold and violet toning. NGC ID# 22S7, PCGS# 3959

1927-D Nickel, MS65
Lightly Toned

- 4398 1927-D MS65 PCGS.** Five cent production was on the rebound in Denver in 1927, a year that saw more than 5.7 million Buffalo nickels produced at the facility. Gems are scarce, however, and finer coins condition rarities. This MS65 example with quicksilver luster has orange and blue overtones and a quality strike aside from a touch of shoulder softness. Population: 62 in 65 (2 in 65+), 4 finer (4/13). NGC ID# 22S9, PCGS# 3961

1937-D Buffalo Nickel, MS63
Famous Three-Legged Variant

- 4399 1937-D Three-Legged MS63 NGC.** FS-901. This dramatic die-polishing error is one of the most famous and sought-after issues in 20th century coinage. The present coin is an attractive Select example with well-detailed design elements and satiny mint luster, under shades of champagne-gold and lavender-gray toning. NGC ID# 22SX, PCGS# 3982

**1937-D Buffalo Nickel, MS63
Celebrated Three-Legged Error**

- 4400 1937-D Three-Legged MS63 PCGS. FS-901.** A well-detailed Select specimen of this important series key, with just a touch of softness on the bison's shoulder and the Indian's hair. The mostly nickel-gray surfaces show a few hints of champagne-gold and ice-blue toning. Satiny mint luster adds to the considerable visual appeal. NGC ID# 22SX, PCGS# 3982

**Three-Legged 1937-D Nickel, MS63
First-Generation PCGS Holder
Gold CAC Label**

- 4401 1937-D Three-Legged MS63 PCGS. Gold CAC. FS-901.** A first-generation PCGS holder and a gold CAC label mean knowledgeable buyers will throw out the price guides for this "Select" Three-Legged nickel. Gold and nickel-sage shadings envelop each side, and though the quicksilver surfaces show minor marks, there are no singularly mentionable flaws. NGC ID# 22SX, PCGS# 3982

PROOF BUFFALO NICKELS

**1915 Buffalo Nickel, PR67
Distinctive Yellow and Pink Patina**

- 4402 1915 PR67 NGC.** The 1915 proof issues formed the last five-coin set until 1936. This Superb Gem example of the matte proof Buffalo nickel bearing that date is boldly toned yellow on the obverse with pink framing patina, the hues more subdued and streaking into one another on the carefully preserved reverse. NGC ID# 278U, PCGS# 3992

**1936 Buffalo Nickel, PR68
Satin Finish**

- 4403 1936 Type One—Satin Finish PR68 PCGS. Ex: Kontos.** It seems remarkable that PCGS has actually certified a single finer example, and the present specimen is literally one spot shy of the PR69 grade level. The surfaces are satiny and lustrous with light champagne toning and accents of gold, violet, and sea-green. Each and every design detail is bold, with incredible definition. There is seldom an opportunity to bid on an example of similar quality. Population: 30 in 68, 1 finer (4/13).
Ex: Central States Signature (Heritage, 4/2009), lot 1566.
From The MKJ Collection, Part II. NGC ID# 278X, PCGS# 3994

**1937 Buffalo Nickel, PR68
Only One Numerically Finer Coin at PCGS**

- 4404 1937 PR68 PCGS.** The 1937 proof Buffalo nickel employed the all-brilliant finish on all coins, rather than the less-popular Satin Finish used on some pieces the previous year. Only 5,769 proofs were struck, undoubtedly sufficient for collectors of the time but woefully inadequate for the numbers of collectors who would like an example today. This magnificent PR68 example displays razor-sharp definition on all design elements and the fields are deeply mirrored and flash strongly throughout the subtle iridescent shadings that blanket each side. The visual appeal is tremendous. Population: 12 in 68, 1 finer (4/13).
From The MKJ Collection, Part II. NGC ID# 278Z, PCGS# 3996

JEFFERSON NICKEL

1942-D Over Horizontal D Nickel, MS64
FS-501

- 4405** 1942-D/D D Over Horizontal D MS64 PCGS. FS-501. According to the *Cherrypickers' Guide*, the 1942-D D over Horizontal D "is the rarest of the major Jefferson nickel varieties in Mint State." As with the 1942/1 and 1942/1-D dimes and the 1943/2-P nickel, the error was likely caused by mint worker inexperience during wartime. A lustrous near-Gem with light silver-gray and almond-gold toning. Marks are confined to a slender line on the dome of Monticello. Population: 6 in 64 (1 in 64+), 7 finer (4/13). PCGS# 4015

PROOF JEFFERSON NICKELS

1939 Jefferson Nickel, PR68
Reverse of 1938

- 4406** 1939 Reverse of 1938 PR68 PCGS. A proof variant that shows the "wavy" steps on Monticello as seen in 1938. This is a truly Superb representative that has a colorful, rainbow-like toning scheme at the peripheries on each side. Beautifully original, there are no mentionable marks or spots. Population: 7 in 68, 0 finer (4/13). Ex: *New York Signature* (Heritage, 7/2004), lot 5689; *Dallas Signature* (Heritage, 11/2005), lot 2052. From The MKJ Collection, Part II. NGC ID# 279X, PCGS# 4176

1940 Jefferson Nickel, PR68
Tied for Finest Certified

- 4407** 1940 Reverse of 1940 PR68 PCGS. One of the finest certified 1940 Jefferson nickels at either of the leading grading services, this coin is destined for the ultimate Registry Set of Proof examples within this series. This amazing coin has exceptional polychrome toning, especially vibrant on the obverse. The devices are sharply rendered, and the pristine fields are deeply mirrored throughout. Overall eye appeal is incredible. From a meager proof mintage of only 14,158 pieces. Population: 2 in 68, 0 finer (4/13). Ex: *Dallas Signature* (Heritage, 11/2005), lot 2053; *FUN Signature* (Heritage, 1/2011), lot 4512. From The MKJ Collection, Part II. NGC ID# 22YC, PCGS# 4177

**1941 Jefferson Nickel, PR68
Registry Set Candidate**

4408 1941 PR68 PCGS. Ex: Tom Mershon Collection. Close examination with a loupe confirms the nearly perfect status of this coin as indicated by the grade. But the desirability of this piece is not limited to mere preservation of the surfaces. The untampered originality of the surfaces are demonstrated by the streaks of rose, ice-blue, and green iridescent toning seen over each side. Only 18,720 proofs were struck in 1941, but surprisingly few were set aside by contemporary collectors. In PR67, this date is relatively common with a total of 156 pieces certified by both of the major services. However, there is a steep drop off in PR68 with only this and two other coins that have been so graded (none are finer). Undoubtedly this proof will be avidly sought after by Registry Set collectors. Population: 3 in 68, 0 finer (4/13).

Ex: *Long Beach Signature* (Heritage, 9/2008), lot 864.

From *The MKJ Collection, Part II*. NGC ID# 27A2, PCGS# 4178

**1942-P Jefferson Nickel, PR68
Wartime Silver Issue**

4409 1942-P Type Two PR68 PCGS. Ex: Tom Mershon Collection. This silver issue has a different texture and striking quality than the previous nickel issues. Since silver is a softer metal it naturally strikes up better than nickel, a general characteristic that continues through the war years. This fabulous piece is brilliant in the centers and surrounded by thin bands of multicolored iridescence at the margins. Population: 11 in 68, 1 finer (4/13).

Ex: *Long Beach Signature* (Heritage, 9/2008), lot 868.

From *The MKJ Collection, Part II*. NGC ID# 27A4, PCGS# 4180

**1951 Jefferson Nickel, PR67
Dramatic Deep Cameo Surfaces**

4410 1951 PR67 Deep Cameo PCGS. The design elements of this incredible Superb Gem exhibit razor-sharp definition throughout and close inspection with a loupe reveals no mentionable distractions. The richly frosted devices contrast profoundly with the deeply reflective fields to produce a startling black-on-white cameo effect when the coin is tilted in the light. Eye appeal is terrific. Population: 10 in 67 Deep Cameo, 0 finer (4/13).

From *The MKJ Collection, Part II*. NGC ID# 22YD, PCGS# 94183

**Superb Gem Proof 1952 Jefferson Nickel
Deep Cameo Surfaces**

4411 1952 PR67 Deep Cameo PCGS. Jefferson nickels from the early 1950s are seldom seen with such a high degree of contrast between the mirrored fields and lustrous devices. The present example, with pleasing light gray surfaces and a hint of gold toning, is one of the finest Deep Cameo proofs certified by PCGS. Housed in a green label holder. Population: 10 in 67 Deep Cameo, 1 finer (4/13).

Ex: *Long Beach Signature* (Heritage, 9/2006), lot 1182.

From *The MKJ Collection, Part II*. NGC ID# 27A6, PCGS# 94184

**1956 Nickel, PR68 Deep Cameo
Significant Registry Coin**

4412 1956 PR68 Deep Cameo PCGS. Strongly reflective fields have just a touch of wateriness and the frost on the devices is crisp and insistent. Occasional hints of golden color visit each side, more visibly on the reverse. An important coin for the Registry collector of Jefferson nickels. Population: 6 in 68 Deep Cameo, 0 finer (4/13).

From *The MKJ Collection, Part II*. NGC ID# 22YG, PCGS# 94188

1961 Nickel, PR69 Deep Cameo
Registry-Level Quality

- 4413** 1961 PR69 Deep Cameo PCGS. Quality reflectivity with just a hint of golden color. The frost over the devices does not have the granular quality sometimes associated with the best examples, but the Deep Cameo qualities of this piece are plain. A tiny imperfection to the left of Jefferson's nose contributes to the grade. Population: 13 in 69 Deep Cameo, 0 finer (4/13).
From The MKJ Collection, Part II. NGC ID# 22YK, PCGS# 94193

1971 No S Nickel, PR69 Ultra Cameo
None Certified Finer

- 4414** 1971 No S PR69 Ultra Cameo NGC. The S mintmark was omitted on one of the dies shipped from the Philadelphia Mint to San Francisco for use in proof coinage in 1971. An estimated 1,655 No S proof nickels were struck before the error was noticed. This magnificent example displays brightly mirrored liquid fields, with razor-sharp, frosty devices and amazing cameo contrast. Census: 5 in 69 Ultra Cameo, 0 finer (4/13). NGC ID# 22YN, PCGS# 94204

EARLY HALF DIMES

1796 Draped Bust Half Dime, XF40
V-1, LM-1 Variety, 'LIKERTY'

- 4415** 1796 XF40 NGC. V-1, LM-1, R.3. A reported mintage of 10,230 Draped Bust half dimes was accomplished in 1796, with two die varieties for the date. This coin represents the more available LM-1 variety, with LI in LIBERTY close at the base. This attractive specimen shows light even wear on both sides with pleasing gray patina and only minor contact marks. Census: 8 in 40, 50 finer (4/13). NGC ID# 22ZW, PCGS# 4254

1800 Half Dime, Choice XF
V-1, LM-1

- 4416** 1800 XF45 NGC. CAC. V-1, LM-1, R.3. Rich golden-brown toning is predominant though splashes of blue-green and plum-mauve are also evident. This Heraldic Eagle half dime is minimally abraded and is well defined apart from softness on the reverse stars opposite the bust tip. An early die state without any evidence of the cud that eventually forms beneath the date. NGC ID# 2326, PCGS# 4264

BUST HALF DIME

1832 Half Dime, MS63
Very Rare V-14, LM-9.1

- 4417** 1832 MS63 PCGS. CAC. V-14, LM-9.1, R.7. A very rare variety that pairs the "Scarface" obverse of LM-6 with the reverse of LM-8. The second S in STATES lacks a die break, confirming the early die state of LM-9. The obverse is moderately prooflike while the reverse has cartwheel luster. Light golden toning visits unmarked surfaces. Among the finest known examples of LM-9, though the Stewart Witham discovery piece auctioned in 1977 was cataloged as Gem, and Heritage offered an NGC MS63 example in our 2006 FUN Signature (lot 1640) that realized \$4,600. NGC ID# 232E, PCGS# 4279

PROOF SEATED HALF DIME

1856 Half Dime, PR65 Cameo
Rare, Pre-1858 Proof Issue

4418 1856 PR65 Cameo PCGS. CAC. No record was kept of proof mintages in the years before the Mint began their official offerings in 1858, but production totals were undoubtedly small. Writing in 1988, Walter Breen estimated only 30-40 examples of the 1856 proof half dime were still extant, and some of them had been mishandled. This well-detailed Gem is one of the few survivors with cameo contrast, as the reflective fields and frosty devices provide a startling black-on-white flash when the coin is tilted in the light. Attractive accents of champagne-gold and ice-blue toning enhance the well-preserved surfaces. Population: 1 in 65 Cameo, 0 finer (4/13). PCGS# 84434

EARLY DIMES

Uncirculated 1800 Dime
Scarcer JR-2 Variety

4419 1800 MS60 NGC. JR-2, R.5. The two varieties of the year share the same obverse die but the reverses, though similar, differ. JR-2, the present and rarer variety, depicts the eagle "biting" a point of a star. The star is separate from the beak on JR-1. The present lightly toned example has a hint of chestnut patina near the borders while the centers remain brilliant. The strike is crisp aside from the eagle's breast feathers. The reverse is essentially unabraded, though the obverse has thin marks beneath the ear and through serifs of the IB in LIBERTY. Census: 1 in 60, 5 finer (4/13).
Ex: Long Beach Signature (Heritage, 6/2006), lot 1004, which realized \$25,300. NGC ID# 236H, PCGS# 4470

1803 Draped Bust Dime, XF45
Popular JR-3 Variety

4420 1803 XF45 PCGS. JR-3, R.4. The 1803 Draped Bust dime is more difficult to locate than its mintage of 33,040 pieces would suggest. Five die varieties are known for the date, with this coin representing the JR-3 variety, with stars 2 and 3 closer than stars 1 and 2, and the 3 in the date tilted left. A number of die cracks and clash marks are evident on both sides of this Choice XF specimen, with lightly abraded surfaces and a few hints of gold and amber toning. Population: 2 in 45, 13 finer (4/13). NGC ID# 236L, PCGS# 4473

**1807 Dime, JR-1, MS61
Final Draped Bust Issue**

- 4421 1807 MS61 NGC. JR-1, R.2.** The final year of the Draped Bust design saw a substantial mintage of 165,000 dimes, with a single die variety known for the date. The Mint was determined to make this pair of dies last as long as possible because the change of design was foreseen after this year. Like 90% of examples seen, this attractive Mint State specimen shows dramatic obverse clash marks, flat stars on the left, and a weak E in the motto because of excessive die use. The well-preserved surfaces display attractive shades of lavender and gold patina. Census: 9 in 61, 86 finer (4/13). NGC ID# 236T, PCGS# 4480

BUST DIMES

**1825 Dime, Flashy MS64
Better JR-1 Variety**

- 4422 1825 MS64 NGC. CAC. JR-1, R.4.** A scarce die marriage noteworthy for bold repunching on star 2 and the A in STATES. A moderately prooflike and nicely struck near-Gem with light golden toning at the borders. Free from noticeable contact and a quality selection to represent the Capped Bust type. Census: 13 in 64, 11 finer (4/13). NGC ID# 2374, PCGS# 4503

1831 Dime, White MS65, JR-1

- 4423 1831 MS65 NGC. JR-1, R.1.** A brilliant and well struck Gem that boasts dynamic luster and mark-free fields. Nearly pristine save for a minor mark on the cap near the B in LIBERTY. Undoubtedly among the finest JR-1 1831 dimes, though a Superb Gem appeared as lot 1604 in our 2008 Baltimore ANA Signature. Census for all 1831 varieties: 23 in 65, 16 finer (4/13). NGC ID# 237B, PCGS# 4520

SEATED DIMES

**1841 Dime, Colorful MS65
Liquid Underlying Luster**

- 4424 1841 MS65 PCGS. CAC.** This early Seated dime issue racked up a mintage of more than 1.6 million pieces, but Gems are condition rarities. This MS65 example has rich blue, violet, and lavender hues across well-defined devices and fields that glimmer with watery reflectivity. Population: 8 in 65, 1 finer (4/13). NGC ID# 2384, PCGS# 4579

**1851 Seated Liberty Dime, MS67
Possibly Finest Known, Ex: Eliasberg**

- 4425 1851 MS67 PCGS. CAC. Ex: Eliasberg.** Despite a substantial mintage of more than 1 million pieces, the 1851 Seated Liberty dime is an elusive date in high grade. This date may have been heavily melted in 1853, when the weight of most silver coinage was lowered to reflect the economic realities of the time.

The present coin was once a highlight of the famous Eliasberg Collection, a badge of distinction for any coin. The design elements are well-detailed and the flawless surfaces radiate vibrant mint luster under attractive shades of chestnut-gold and turquoise toning. Eye appeal is terrific. Housed in a green label holder. Population: 1 in 67, 0 finer (4/13).

Ex: Possibly H.S. Wilson Collection (Ben Green, 6/1906); John M. Clapp; Clapp Estate; Louis E. Eliasberg, Sr.; Eliasberg Collection (Bowers and Merena, 5/1996), lot 1142. NGC ID# 238L, PCGS# 4595

1877-CC Dime, Highly Lustrous MS66

- 4426** 1877-CC MS66 PCGS. Type Two Reverse with E in ONE further from the wreath. With a mintage of 7.7 million pieces, the 1877-CC is a natural choice for a Carson City type coin. Much original brilliance remains on each side with a scattering of pale golden here and there. No obvious marks are worthy of mention, and the mint luster is simply outstanding. NGC ID# 23AM, PCGS# 4683

1884 Seated Liberty Dime, MS68 Vivid Multicolor Toning

- 4427** 1884 MS68 NGC. This magnificent MS68 specimen exhibits sharply detailed design elements and vibrant frosty mint luster under vivid shades of champagne-gold and violet toning. Close inspection with a loupe reveals no visible surface flaws and the visual appeal is tremendous. Census: 3 in 68, 0 finer (4/13). NGC ID# 23AX, PCGS# 4692

1886-S Seated Liberty Dime, MS66+ Exceptional Luster and Eye Appeal

- 4428** 1886-S MS66+ PCGS. CAC. This high-end Premium Gem exhibits well-detailed design elements, with just a touch of softness on the ribbon bow. The brilliant surfaces radiate vibrant cartwheel mint luster on both sides, with just the slightest trace of pale gold toning. Eye appeal is terrific. Population: 6 in 66 (1 in 66+), 5 finer (4/13). NGC ID# 23B4, PCGS# 4697

PROOF SEATED DIME

1859 Dime, Brilliant PR66+ Cameo Final Year of the With Stars Type

- 4429** 1859 PR66+ Cameo PCGS. CAC. Stark field-to-device contrast is apparent on each side of this sharply struck, impressively preserved Premium Gem proof specimen. The surfaces are free of contact marks, with only microscopic hairlines noted on either side. An important date among type collectors, the 1859 is the final proof issue in the Stars Obverse Seated dime series. Population: 5 in 66 (2 in 66+) Cameo, 1 finer (4/13).
Ex: Baltimore Signature (Heritage, 3/2009), lot 864; Summer FUN Signature (Heritage, 7/2009), lot 365. PCGS# 84748

BARBER DIMES

1895-O Dime, Uncirculated Details Low-Mintage Issue

- 4430** 1895-O — Cleaning — PCGS Genuine. Unc. Details. A sharply defined stone-gray example with hints of wheat-gold toning. The luster is subdued but there are no consequential abrasions. The wreath displays minor incompleteness of strike. The low mintage 1895-O is key to a collection of business strike Barber dimes. NGC ID# 23DW, PCGS# 4807

1901-S Dime, MS66 Distinctly Toned

- 4431** 1901-S MS66 PCGS. CAC. Peach overtones are more prominent on the obverse of this otherwise silvery Premium Gem. Pleasingly detailed in the aggregate, the coin comes from an issue of fewer than 600,000 pieces that was little-saved at the time of release. Population: 7 in 66, 5 finer (4/13). NGC ID# 23EH, PCGS# 4826

PROOF BARBER DIMES

1904 Barber Dime, PR67 Cameo
Among the Finest Certified Examples

- 4432** 1904 PR67 Cameo NGC. A startling black-on-white cameo flash occurs when this coin is tilted in the light. This spectacular Superb Gem displays sharply detailed design elements with an unusual amount of mint frost and deeply mirrored brilliant fields. Eye appeal is tremendous. Census: 8 in 67 Cameo, 0 finer (4/13). PCGS# 84888

Superb Gem Cameo Proof 1904 Barber Dime
None Numerically Finer at Either Service

- 4433** 1904 PR67 Cameo NGC. Both sides of this example exhibit tremendous eye appeal, with the reverse arguably the more stunning. The cameo contrast is readily apparent. Subtle caramel and russet toning is present, primarily on the obverse along with a few splashes of jade and teal. An as-made lint mark appears at Liberty's jaw. Census: 8 in 67 Cameo, 0 finer (4/13). PCGS# 84888

MERCURY DIMES

1916-D Dime, Lightly Worn AU53
An Important Collector Coin

- 4434** 1916-D AU53 NGC. Demand is high and supply is short for the key-date 1916-D dime in lightly circulated but attractive condition. This AU53 example hits the mark with still-lustrous surfaces toned gold, peach, and blue, the obverse semireflective and the reverse offering a more traditional cartwheel effect. NGC ID# 23GY, PCGS# 4906

1921 Mercury Dime, MS67 Full Bands
None Certified Finer at Either Service

- 4435** 1921 MS67 Full Bands NGC. The 1921 Mercury dime boasts a low mintage of 1.2 million pieces, and this low production figure made the issue quite popular when the information was first widely disseminated in the 1930s. As a result, many specimens were removed from circulation and hoarded, making the issue fairly available in lower grades. Mint State coins are also more available than the mintage would suggest, but Superb Gems are very rare.

The present coin is a magnificent Superb Gem, with an exemplary strike that imparts full definition to the important bands on the fasces. The brilliant surfaces display booming mint luster, and breath-taking eye appeal. Census: 5 in 67 Full Bands, 0 finer (4/13). NGC ID# 23HE, PCGS# 4935

1942/1-D Mercury Dime, MS66 + Full Bands
Absolute Rarity and Conditionally Challenging Overdate

4436 1942/1-D MS66+ Full Bands PCGS. CAC. FS-101. Both the Philadelphia and Denver versions of the 1942/1 overdate Mercury dime are doubled die (or dual-hubbing-error) varieties, but the pickup points are different between the two. The 1942/1 Philadelphia shows a rather obvious (plain to a good pair of unaided eyes) 1 downstroke at the forepoints of the 2. The 1942/1-D is considerably harder to spot, and the pickup point is a little notch of doubling at the bottom of the 4 in the date, rather than the 2. (There are signs of a 1 under the 2, but they are far fainter than on the 1942/1 Philadelphia variety.)

One might think that the considerable difference in the two varieties would make the 1942/1-D scarcer overall. In point of fact, however, both the Philadelphia and Denver issues are rare in Mint State, just about evenly split between the two. The Denver coins are generally better-struck than the Philadelphia pieces, most of the Mint State pieces attaining Full Bands status while many of the P-mint coins fall short of Full Bands. This is just such a sharply struck Denver Mint dime. Undoubtedly of even more importance is the strength of the underlying 1 beneath the 2 in the date as well as the doubling on the 4. The surfaces are brilliant and exhibit bright, swirling mint frost that is undisturbed by the usually seen abrasions. A magnifier will be required to pick up even the smallest marks that are present on this Premium Gem. The + and CAC designations speak volumes about the quality of this exceptional overdate. Population: 14 in 66 (2 in 66+) Full Bands, 0 finer (4/13). NGC ID# 23K6, PCGS# 5041

PROOF MERCURY DIMES

1938 Mercury Dime, PR68 None Numerically Finer

- 4437 1938 PR68 PCGS.** In 1938 the interest in the new Jefferson nickel boosted the mintage of that issue to nearly 20,000 proofs, but the 1938 Mercury dime saw a modest production, based on Mint orders received, of 8,728 pieces. This marvelous Superb Gem offers a touch of streaky powder-gray and amber patina on the obverse, with a satiny silver-gray background. The reverse has a bit less color from the same palette, while adding a dab of charcoal. Despite small hints of color, silver-gray predominates. This piece is one of only six certified in this grade at PCGS, with one in 68+ and none finer (4/13).
Ex: Boston Signature (Heritage, 8/2010), lot 4570.
From The MKJ Collection, Part II. NGC ID# 27DJ, PCGS# 5073

1941 Mercury Dime, PR68 None Finer at PCGS

- 4438 1941 PR68 PCGS. CAC.** *Ex: Larry Shapiro.* A spectacular Superb Gem that boasts vibrant lemon-gold, cherry-red, and jade-green toning throughout the borders. The surfaces are exceptional. For the collector, obtaining a Gem proof is a reasonable goal, but locating one with such magnificent toning provides a challenge. Population: 18 in 68, 0 finer (4/13).
Ex: FUN Signature (Heritage, 1/2006), lot 2104; Central States Signature (Heritage, 4/2008), lot 744.
From The MKJ Collection, Part II. NGC ID# 27DM, PCGS# 5076

TWENTY CENT PIECES

1875-CC Twenty Cent, MS64 Old West Meets Odd Denomination

- 4439 1875-CC MS64 PCGS. CAC.** An attractive near-Gem example of the sole Carson City twenty cent issue readily available to collectors. Though softly struck at upper obverse and lower reverse, this near-Gem has pleasingly preserved surfaces that are light silver with faint canary-yellow and sky-blue accents. NGC ID# 23R6, PCGS# 5297

1875-S Twenty Cent Piece, MS66 Attractive Multicolor Toning

- 4440 1875-S MS66 PCGS.** The 1875-S twenty cent piece claims the largest mintage of the short-lived series, but survivors in MS66 condition are very scarce. This attractive Premium Gem displays well-detailed design elements and lustrous surfaces blanketed in shades of ice-blue, champagne-gold, and violet toning. Extensive die cracks run through the letters in the legend and denomination on the reverse. Population: 55 in 66 (1 in 66+), 5 finer (4/13). NGC ID# 23R7, PCGS# 5298

1875-S Twenty Cent Piece, MS66 Ideal Type Coin

- 4441 1875-S MS66 NGC.** The twenty cent piece was an unpopular odd denomination because it was so easily mistaken for the contemporary Seated Liberty quarter. This delightful Premium Gem represents the most available issue of the series and the one most often seen in type collections. The design elements are well-detailed and the well-preserved brilliant surfaces radiate vibrant mint luster. Census: 53 in 66, 7 finer (4/13). NGC ID# 23R7, PCGS# 5298

PROOF TWENTY CENT PIECES

1875 Twenty Cent, PR64 Cameo First-Year Proof

- 4442 1875 PR64 Cameo PCGS.** The first proof issue for this boondoggle of an odd denomination, faintly gold-toned over watery fields with lightly frosted but distinctly contrasting devices. A few hairlines and small contacts are visible around Liberty's figure but the arm's-length eye appeal is solid. Population: 19 in 64 Cameo, 10 finer (4/13). PCGS# 85303

1875 Twenty Cent Piece, PR64 Rare Deep Cameo Example

- 4443 1875 PR64 Deep Cameo PCGS.** Beautiful deep contrast between the frosted, fully struck devices and the near-"black" surfaces is immediately apparent on this coin, as might be expected from the PCGS designation. Light golden toning is visible in the peripheries, with hints of russet in the denticles. The grade appears to be determined by a few light markings in the fields; however, a mark near Liberty's knee appears to be a planchet flake and as struck. Difficult to find nicer with this degree of contrast. Population: 2 in 64 (1 in 64+) Deep Cameo, 2 finer (4/13).
Ex: Central States Signature (Heritage, 4/2008), lot 768.
From The MKJ Collection, Part II. PCGS# 95303

1875 Twenty Cent, PR64+ Deep Cameo Uncommonly Strong Contrast

- 4444 1875 PR64+ Deep Cameo PCGS. CAC.** Outstanding frost over sharply struck devices makes the most immediate impact on this Deep Cameo specimen. The reflectivity of the blue-tinged fields, while secondary in importance, is hardly an afterthought in the contrast. Light hairlines and contacts in the right obverse field contribute to the grade. Population: 2 in 64 (1 in 64+) Deep Cameo, 2 finer (4/13). PCGS# 95303

1876 Twenty Cent, PR66 Cameo Boldly Struck With Iridescent Patina

- 4445 1876 PR66 Cameo PCGS. CAC.** This issue is popular with many collectors not only for the odd, short-lived denomination, but also for the Centennial date which happened to intersect with the series. The 1876 twenty cent is seldom found at the high Premium Gem proof grade level, and fewer still are the pieces found with Cameo designation. This PR66 Cameo is one of only seven such at PCGS, and one PR67 Cameo is finer (4/13). The finest Deep Cameo at PCGS is a single PR66 piece. The present PR66 Cameo example displays a small light reddish area on each side, but the rest of each side is lavishly coated in deep patina that resolves under a light into beautiful iridescent aqua, rose, and pinkish tones. This piece is quite sharply struck, accentuating the piquant, "patternlike" design that is among the many appealing features of the issue. PCGS# 85304

1877 Twenty Cent Piece, PR64 Cameo Low-Mintage Proof-Only Issue

- 4446 1877 PR64 Cameo PCGS.** From a proof-only mintage of 510 pieces, the 1877 twenty cent piece is seldom encountered in high grade, with a Cameo designation. This attractive Choice specimen offers sharply detailed frosty devices that contrast boldly with the reflective fields. The pleasing surfaces show a few hints of pale gold and blue toning. Population: 29 in 64 (1 in 64+) Cameo, 9 finer (4/13). PCGS# 85305

1878 Twenty Cent Piece, PR65
Final Proof-Only Issue

- 4447** 1878 PR65 PCGS. Silver luster mingles underneath a mottled layer of patina on this Gem proof 1878 twenty cent, the last year of the strange and unpopular denomination. The centers offer copper hues, which transition intermittently to aqua at the rims. The strike is full throughout. Population: 28 in 65, 12 finer (4/13). From The MKJ Collection, Part II. NGC ID# 27H5, PCGS# 5306

EARLY QUARTER

1796 High 6 Quarter, VF20
Scarce, Single-Year Type

- 4448** 1796 VF20 ANACS. B-2, R.3. High 6. Only 6,146 quarters were struck in the first year of production for the denomination. Just two die pairings were used in this initial year, the High 6 variety being the more frequently seen of the two. The surfaces on this appealing mid-grade example are highlighted in russet and medium steel-gray shades, while the more accessible areas exhibit a somewhat glossy appearance. Only the slightest bluntness is noticed on the eagle's head, often an area of greater deficiency on the High 6 quarters we have examined. In short, the ideal collector type coin, one that combines history, rarity, popularity, and strong eye appeal. Ex: FUN Signature (Heritage, 1/2005), lot 30170; Long Beach Signature (Heritage, 2/2006), lot 912. NGC ID# 23RA, PCGS# 5310

BUST QUARTER

1821 Quarter, B-3, MS65
Sharp Example With Colorful Patina

- 4449** 1821 MS65 NGC. B-3, R.3 or R.2. The availability of the B-3 quarter die marriage of 1821 makes the issue a perfect one for type purposes, and the high eye appeal of this Gem neatly fits this piece into a desirable niche. Star 7 points to the headband, the last S in STATES is centered over (PLURIBU)S, and the first S is centered over P(L). Rust pits appear between the 2 of the denomination and the olive leaves. This piece tops the Condition Census in the Rea-Peterson-Karoleff-Kovach early quarters reference, tied with perhaps eight other examples. Mossy green and slate-blue compete with amber and pink patina on this near-unmarked Gem, which also boasts quite a sharp strike, save for a couple of the star centrils. We note that Tompkins lists the variety as R.2, while Rea *et al.* list it as R.3. NGC ID# 23RM, PCGS# 5331

SEATED QUARTERS

1838 No Drapery Quarter, MS65 Transitional Issue

- 4450 1838 No Drapery MS65 NGC.** The 1838 No Drapery quarters were struck after the earlier Capped Bust design was discontinued. The Philadelphia Mint coined 366,000 of the earlier design and 466,000 of these Seated quarters. High-grade examples are rarely encountered, with the typical survivor falling in the XF to AU range. Any Mint State piece is elusive, and Gem specimens are rare. This lovely example has brilliant silver surfaces and bold design features, showing only slight weakness on a few stars at the upper-left obverse. Census: 6 in 65, 3 finer (4/13). NGC ID# 23SE, PCGS# 5391

1839 Seated Liberty Quarter, MS64 No Drapery, Open Claws Reverse

- 4451 1839 No Drapery MS64 NGC.** This coin features the scarcer Open Claws reverse, Briggs A, and shows the diagnostic die breaks through T in UNITED and R in AMERICA. The design elements are well-detailed and the pleasing surfaces display vibrant mint luster under attractive shades of champagne-gold and violet-gray toning. Census: 7 in 64, 2 finer (4/13). NGC ID# 23SE, PCGS# 5392

1891-O Quarter, MS64 Last O-Mint Seated Issue

- 4452 1891-O MS64 NGC.** New Orleans struck a token quantity of 68,000 circulation strikes for the 1891 Seated quarters, the last of the series before the Barber design would be ushered in the following year. The majority of coins circulated far and wide in the Deep South in the era before the turn of the century. This near-Gem is one of three such submissions at NGC, and six are finer (4/13). Lustrous surfaces are largely medium gray with accents of pink and slate-blue. The strike is fairly well-impressed for an O-mint quarter, even though some of the right-side star centrils lack absolute definition. A few thin, undistracting marks account for the grade. NGC ID# 23VS, PCGS# 5525

PROOF SEATED QUARTERS

1857 Quarter, Deeply Toned PR65 Cameo Finest Certified at PCGS

- 4453 1857 PR65 Cameo PCGS.** Not only is this a conditionally scarce coin, it displays magnificent toning that provides a high degree of visual appeal. The 1857 quarter is rarely found in proof format with only 15-20 examples believed known. As a Cameo coin, it is even rarer, and this is the finest Cameo example certified at PCGS. Liberty is toned a shimmering reddish-gold color on this example, with iridescent deep teal and vibrant pink highlights near the top of her head and the cap. Those highlights repeat along the outer edges of the coin, with areas of red also present. The reverse displays light gold color primarily, however the outer edges are largely ringed by iridescent teal and orange. Population: 1 in 65 Cameo, 0 finer (4/13). PCGS# 85553

1880 Seated Liberty Quarter, PR65 Rare Deep Cameo Specimen

- 4454 1880 PR65 Deep Cameo PCGS.** The 1880 Seated Liberty quarter boasts the highest proof mintage of the series, at 1,355 pieces, but few survivors display the intense Deep Cameo contrast of this spectacular Gem. The surfaces are deeply mirrored and the design elements are frosty and sharply detailed. Population: 2 in 65 Deep Cameo, 4 finer (4/13).
From The MKJ Collection, Part II. PCGS# 95581

1884 Seated Liberty Quarter, PR67 Cameo None Finer at PCGS

- 4455 1884 PR67 Cameo PCGS.** A nominal proof mintage of 875 Seated Liberty quarters was produced in 1884 to accompany a small business-strike emission of 8,000 pieces. This incredible Superb Gem exhibits richly frosted design elements, with razor-sharp definition, that contrast noticeably with the deeply reflective fields. A few hints of champagne-gold toning enhance the tremendous eye appeal. Population: 7 in 67 Cameo, 0 finer (4/13). PCGS# 85585

BARBER QUARTERS

1898-S Barber Quarter, MS65 ★ Toned Prooflike Surfaces

- 4456 1898-S MS65 ★ NGC.** This spectacular Barber quarter exhibits razor-sharp definition on all design elements and reflective prooflike surfaces, under a spotty patina of sea-green, cobalt-blue, and amber hues. Visual appeal is tremendous. From a reported mintage of just over 1 million pieces, the 1898-S is rare in Mint State. Census: 9 in 65, 1 in 65 ★, 4 finer (4/13). NGC ID# 23YF, PCGS# 5621

1901-S Barber Quarter, Good 4 Sought-After Key Date

- 4457 1901-S Good 4 PCGS.** The 1901-S is a low-mintage key in the Barber quarter series and the issue is avidly sought-after, even in lower circulated grades. This well-worn specimen retains the outline of all major design elements, but LIBERTY has been effaced and the rims are worn flat in some areas. NGC ID# 23YR, PCGS# 5630

**1901-S Barber Quarter, VG8
Sought-After Key Issue**

4458 1901-S VG8 NGC. The key 1901-S Barber quarter is a prized issue in any grade, from a tiny mintage of just 72,664 pieces. This attractive VG8 specimen retains much deep detail on the central devices and the rims are still unbroken. The only distraction on the light gray surfaces is a shallow staple scratch behind Liberty's eye. Census: 16 in 8, 37 finer (4/13). NGC ID# 23YR, PCGS# 5630

**1897 Barber Quarter, PR67 Deep Cameo
Among the Finest Certified by PCGS**

4461 1897 PR67 Deep Cameo PCGS. A stunning degree of contrast between the deeply mirrored fields and richly frosted devices provides this piece with a fantastic degree of eye appeal on both sides. The coin remains brilliant overall with subtle hints of toning on portions of the upper reverse. A few tiny marks of Mint origin are present on the reverse, primarily at the ribbon. Population: 7 in 67 Deep Cameo, 0 finer (4/13). PCGS# 95683

Low-Mintage 1905-O Quarter, MS65+

4459 1905-O MS65+ PCGS. CAC. The New Orleans Mint was not known for high-volume coinage after the cancellation of the Morgan dollar, as this quarter from an issue with a mintage of 1.23 million pieces suggests. Swirling luster with a mix of green-gold and silver shades lends much to the eye appeal, outweighing an uneven peripheral strike. Population: 10 in 65 (1 in 65+), 11 finer (4/13). NGC ID# 23Z3, PCGS# 5640

**1901 Quarter, PR68
Boldly Toned**

4462 1901 PR68 NGC. A low-contrast but high-preservation example of this turn-of-the-century issue marked by noteworthy patina. The upper half of the obverse and the bottom margin of that side show speckled reddish-gold and blue-green toning, while the reverse has more even coverage with gold-to-green at the lower half with green-to-blue on top. The surfaces are near-immaculate. NGC ID# 242G, PCGS# 5687

PROOF BARBER QUARTERS

**1892 Barber Quarter, PR67 Deep Cameo
First Year of Design**

4460 1892 PR67 Deep Cameo PCGS. CAC. Type Two Reverse. The Barber design was introduced in 1892 and a generous proof mintage of 1,245 quarters was accomplished. This incredible Superb Gem exhibits profound contrast between the deeply mirrored fields and the sharply detailed frosty design elements. A few hints of gold and lavender toning enhance the terrific eye appeal. Population: 11 in 67 (1 in 67+) Deep Cameo, 2 finer (4/13). PCGS# 95678

**1902 Barber Quarter, PR67
Richly Toned and Highly Reflective**

4463 1902 PR67 PCGS. CAC. A shimmering and richly toned Superb Gem example with tremendous eye appeal, this piece features intermingled rainbow shades. The portrait of Liberty is gold in color overall, with the hair displaying hues of pink, blue, and violet that serve as highlights. The darker toning surrounding the portrait further accentuates the appearance. Population: 6 in 67, 0 finer (4/13). NGC ID# 242H, PCGS# 5688

1909 Quarter, Colorful Superb Gem Proof

4464 1909 PR67 PCGS. CAC. A beautiful Superb Gem proof, this piece displays highly reflective surfaces and attractive toning. The colors include shades of yellow, gold, copper, pastel blue, cherry, and golden-orange. A small mark on the reverse extends from the U in UNUM to the wing. Population: 16 in 67, 3 finer (4/13). NGC ID# 242R, PCGS# 5695

**1910 Barber Quarter, PR68
Beautiful Obverse Display**

4465 1910 PR68 NGC. Green-gold outer toning with a touch of violet at the upper reverse rim fades through blue on both sides, deeper on the obverse, with Liberty's cheek appearing purplish-rose. Sharply struck with a surprising amount of contrast under the patina, though not enough on the reverse for a Cameo designation. NGC ID# 242S, PCGS# 5696

**1913 Quarter, PR68 Cameo
None Finer at NGC**

4466 1913 PR68 Cameo NGC. Only 613 proof Barber quarters were struck in 1913 and the business-strike emission was also small. This spectacular MS68 specimen exhibits razor-sharp definition on all design elements, with deeply mirrored fields and bold field-device contrast. Census: 5 in 68 Cameo, 0 finer (4/13). PCGS# 85699

**1915 Barber Quarter, Toned PR67
Impeccable Strike and Preservation**

4467 1915 PR67 PCGS. The 1915 Barber quarter is the last proof entry in the series, as none were struck in 1916. The last-year Barber silver proof sets were produced to the extent of 450 coins each — including the dime, quarter, and half dollar — but this PCGS-certified Superb Gem is one of only 10 so graded by that service with just two finer (4/13). The surfaces show impeccable preservation, as expected, and the moderate patina on each side includes generous gold centers with ice-blue, pink, and violet accents. Fully struck throughout and a marvelous finale for the series enthusiast. NGC ID# 242X, PCGS# 5701

STANDING LIBERTY QUARTERS

**1916 Standing Liberty Quarter, VF35
Key First-Year Issue**

4468 1916 VF35 PCGS. The Standing Liberty design was introduced in 1916 with a famously low mintage of 52,000 pieces. Collectors prize examples of this date in all grades and conditions. This Choice VF specimen retains much original design detail and displays lightly abraded silver-gray surfaces, with a few traces of mint luster. NGC ID# 242Y, PCGS# 5704

**1916 Standing Liberty Quarter
Lustrous, Toned MS62 Full Head Example**

- 4469 1916 MS62 Full Head NGC.** The 1916 quarter dollar is a “must have” for completion of a Standing Liberty collection. This is a lovely MS62 example of Hermon MacNeil’s famous Standing Liberty design, representing the first year of issue, and an important key-date from a mintage of just 52,000 coins. This piece is highly lustrous and sharply detailed with outstanding reddish-gold, beige, and bluish-purple toning on both sides. The date is uncharacteristically bold, and there are fewer marks than what might be expected for the designated grade.
Ex: *Houston Signature (Heritage, 11/2007)*, lot 60558. NGC ID# 242Y, PCGS# 5705

**1917-S Type One Quarter, MS66 Full Head
Powerful Luster**

- 4470 1917-S Type One MS66 Full Head PCGS.** Unlike the Philadelphia Type One Standing Liberty quarters of 1917, their S-mint counterparts are elusive in better-than-Gem grades with Full Head. This Premium Gem has distinct peach and lavender-plum overtones across surfaces with powerful cartwheel luster. Population: 73 in 66 (3 in 66+) Full Head, 10 finer (4/13). NGC ID# 2433, PCGS# 5711

**1917-S Quarter, MS66 Full Head
In-Demand Type One Issue**

- 4471 1917-S Type One MS66 Full Head PCGS. CAC.** This 1917-S Standing Liberty quarter represents the final year of the short-lived Type One design, an important consideration for mintmark type collectors. This impressive Premium Gem is sharply detailed on the obverse, with Full Head definition. The reverse shows just a touch of softness on the eagle’s belly. Vibrant mint luster shines through delicate shades of ice-blue and champagne-gold toning. Population: 73 in 66 (3 in 66+) Full Head, 10 finer (4/13). NGC ID# 2433, PCGS# 5711

**1917-D Type Two Quarter, MS66 Full Head
Delicately Toned**

- 4472 1917-D Type Two MS66 Full Head PCGS.** Carefully preserved surfaces are largely pale silver with gold and orange overtones scattered through the fields. The strike on this first-year Type Two quarter is a technical Full Head with all rivets of the shield visible if weak. Population: 21 in 66 (1 in 66+) Full Head, 2 finer (4/13). NGC ID# 2435, PCGS# 5717

1918 Quarter, Beautifully Toned MS67

- 4473 1918 MS67 NGC. CAC.** Reddish-gold, electric-blue, magenta, yellow-green, and soft violet patination displays deeper hues on the obverse of this highly lustrous piece. The date is better struck than usually seen, though the 1s are a tad soft at the bottoms. Both sides are impeccably preserved. Census: 3 in 67, 2 finer (4/13).
Ex: *Houston Signature (Heritage, 12/2009)*, lot 609. NGC ID# 2437, PCGS# 5720

**1918/7 Standing Liberty Quarter, XF40
Vivid Toning and Luster**

4474 1918/7-S XF40 PCGS. FS-101. With the possible exception of the low-mintage 1916 Type One, the 1918/7 is the most sought-after issue in the Standing Liberty quarter series. This lightly worn example retains much of its original mint luster and displays pleasing gold and lavender toning. Housed in a green label holder. NGC ID# 243A, PCGS# 5726

**Choice AU 1918/7-S Quarter
Sought-After Series Key**

4475 1918/7-S AU55 PCGS. CAC. FS-101. This famous wartime hubbing error is one of the most sought-after issues in 20th century coinage. Since the overdate feature was not discovered until 1937, most overdated quarters had been in circulation for 20 years before collectors began to save them. This places a high premium on examples in AU or Mint State grades. This is a high-grade specimen from an earlier state of the dies. The diagnostic die chip is evident on the pedestal, just to the left of the lowest star on the right. The luster is a bit thin in the fields, accounting for the AU55 grade. The surfaces are surprisingly clean except for a shallow vertical mark across the belly of the eagle that extends into the lower field. Pale rose toning is seen over each side. Housed in a green label holder. NGC ID# 243A, PCGS# 5726

**1918/7 Standing Liberty Quarter, Unc Details
Prized Hubbing Error**

4476 1918/7-S —Artificial Toning — NGC Details. Unc. FS-101. The 1918/7 Standing Liberty quarter is a famous key issue, created when a 1917 obverse die was mistakenly given a second blow using the 1918-dated hub. The undertype 7 is plainly visible beneath the final digit of the date on this attractive specimen. The design elements are well-detailed and the lightly marked surfaces show some unnatural shades of pink and green toning. The overall appearance is still quite pleasing. NGC ID# 243A, PCGS# 5726

**1919 Standing Liberty Quarter, MS66+
Full Head Definition**

4477 1919 MS66+ Full Head PCGS. CAC. This high-end Premium Gem is sharply detailed in most areas, with Full Head definition, but a few shield rivets are soft. The lustrous surfaces are enhanced by shades of champagne-gold and ice-blue toning. No mentionable surface flaws are evident. Population: 67 in 66 (6 in 66+) Full Head, 15 finer (4/13). NGC ID# 243B, PCGS# 5729

**1919 Full Head Quarter, MS67
Thick Mint Luster**

4478 1919 MS67 Full Head NGC. Few finer examples of this date have been certified by either NGC or PCGS. This Superb Gem is a fully struck piece with incredible obverse and reverse definition. The surfaces are highly lustrous with brilliant silver color that is accented by faint gold toning. This date is actually considered a common one among those issues prior to 1925. Census: 11 in 67 Full Head, 2 finer (4/13).
Ex: *Central States Signature (Heritage, 5/2007)*, lot 569. NGC ID# 243B, PCGS# 5729

1919-D Quarter Dollar, MS65 Full Head
An Important Strike Rarity

4479 1919-D MS65 Full Head PCGS. The 1919-D Standing Liberty quarter is an important strike rarity. Jay Cline estimates that only 1% of this issue is struck with a Full Head. The present Gem displays the Full Head detail per Cline's criteria: there is a distinct line between Liberty's hair and forehead, temple, and neck; the three olive leaves are complete; and there is a hole in the hair where the ear is.

The bold strike transcends the Full Head. The chain mail is virtually complete, as are all but rivets 3 and 4 that show the usual softness. And most of the horizontal and vertical lines in the inner shield display some detail. The tops of the date numerals are just a trifle soft, a design flaw that would be corrected later in the series. Both sides yield pleasing luster and soft grayish-silver color. A small milling mark on the left (facing) knee and a couple on the end of the feathers of the upper-left (facing) wing might help identify the coin. Population: 9 in 65 Full Head, 6 finer (4/13). NGC ID# 243C, PCGS# 5731

1919-S Standing Liberty Quarter, MS65
Elusive Issue in High Grade

4480 1919-S MS65 NGC. The 1919-S Standing Liberty quarter is an elusive date in the context of the series, and examples in Gem condition are rare. This attractive Gem is well-detailed, but falls a little short of Full Head definition. Both sides display vibrant mint luster, and the brilliant surfaces show a few accents of light gold toning. Census: 34 in 65, 19 finer (4/13). NGC ID# 243D, PCGS# 5732

1919-S Quarter, Full Head Gem
Strong Rolling Luster

4481 1919-S MS65 Full Head PCGS. Not only does this 1919-S quarter qualify as a Full Head, it has full rivets as well, far from a guarantee for this San Francisco issue of 1,836,000 pieces. The obverse is pale silver with only the faintest hints of golden toning over rolling luster, while on the reverse the same hue is more overt, almost orange in the space between the eagle's wings. With excellent preservation and eye appeal, this is an important coin for the series enthusiast with a fondness for the issues that were little-appreciated in their own times. Population: 12 in 65 Full Head, 6 finer (4/13). NGC ID# 243D, PCGS# 5733

**1920-S Quarter, MS65 Full Head
Frosty, Untoned Example**

- 4482 1920-S MS65 Full Head PCGS.** This gleaming, frosty, silver-white Gem Full Head 1920-S Standing Liberty quarter shows no trace of perceptible color otherwise, but the eye appeal is abundant throughout both sides. The head of Liberty is well-struck and far within the Full Head context, and other strike details are sharp save for a couple of faint rivets on the shield. The eagle's wing feathers are boldly detailed, but the breast is a bit soft. The overall eye appeal is quite high, especially for those who favor untuned coins. Population: 17 in 65 (1 in 65+) Full Head, 6 finer (4/13). NGC ID# 243G, PCGS# 5739

**1926-S Standing Liberty Quarter
Full Head Near-Gem**

- 4483 1926-S MS64 Full Head PCGS.** Rich satin luster and brilliant surfaces provide this near-Gem Full Head example with a high degree of eye appeal. The coin displays minor incompleteness of strike, including several of the shield rivets. Numerous, as-made die polish lines are present on both sides, particularly on the reverse and clash marks also appear. Population: 20 in 64 Full Head, 26 finer (4/13). NGC ID# 243T, PCGS# 5759

**1927-S Standing Liberty Quarter, MS64
Key, Low-Mintage Issue**

- 4484 1927-S MS64 PCGS.** An originally toned and lustrous example of this famous low mintage rarity. Golden-brown patina graces the obverse border, with the remainder of the coin nearly brilliant. The date and mintmark are sharp, although the head is typically struck. The reverse field has a couple of moderate marks. Encapsulated in an old green label holder. Population: 71 in 64, 76 finer (4/13). Ex:: ANA Signature (Heritage, 8/2007), lot 764; Summer FUN Signature (Heritage, 7/2010), lot 3639. NGC ID# 243W, PCGS# 5764

**1927-S Quarter, MS65+
Low-Mintage Condition Rarity**

- 4485 1927-S MS65+ PCGS.** In recent years the 1927-S Standing Liberty quarter has gained a large part of the notoriety it so richly deserves. Its mintage is among the lowest issues in the entire series, at 396,000 coins, and the typical bourse floor is apt to yield few (or no) examples in Mint State; in fact, most survivors appear to grade no more than Very Good to Very Fine. This Gem shows surfaces that are quite frosty and bright snow-white, complemented by the faintest suggestion of gold patina. The strike is insufficient for a Full Head designation, but much eye appeal is present. There are few marks of significance. Non-Full Head quarters offer good value in today's marketplace, and some mighty appealing (and well-struck overall) sets can be put together for a fraction of the cost of a Full Head assemblage. Population: 40 in 65 (2 in 65+), 36 finer (4/13). NGC ID# 243W, PCGS# 5764

WASHINGTON QUARTERS

1932-D Washington Quarter, MS65 Capstone to a Registry Set

4486 1932-D MS65 PCGS. “Gem 1932-D Washington quarter graded by PCGS.” Could there be any sweeter music to the ears of series fans? While the 1932 Philadelphia issue was quite common in earlier days, the 1932-S and, particularly, the 1932-D slipped through the cracks due to their low mintages at a time when collecting coins by mintmark was not yet popular. This Gem 1932-D would form the capstone of a fine Registry Set; most 1932-D quarters, even in Mint State, usually grade no better than MS63. The paucity of marks on this recently graded example catapults it to the MS65 level, a piece showing silvery centers with deep amber-russet rim patina. Population: 64 in 65, 1 finer (4/13). NGC ID# 2448, PCGS# 5791

1934-D Quarter, MS67 Medium Motto Variety

4487 1934-D Medium Motto MS67 PCGS. CAC. Subtle honey-gold and aquamarine tints ensure the originality of this sharply impressed Premium Gem. Essentially immaculate and an excellent value relative to the few graded finer. The underlying mint luster is superlative and strongly enhances the overall appearance of this Superb quarter. The Medium Motto or Type Two is the same hub used in 1935. Breen estimated that about 28 million pieces were coined. Obviously during this Depression year few people were keeping an eye on hub changes in the Mint, and as a result it was only chance that accounts for the few high-grade examples that are known today. Population: 5 in 67, 0 finer (4/13). NGC ID# 244C, PCGS# 5796

**1934-D Heavy Motto Quarter, MS67
Tied for Finest Graded**

4488 1934-D Heavy Motto MS67 PCGS. CAC. Neither the *Guide Book* nor the *Cherrypickers' Guide* lists (yet) the Heavy Motto variety of the 1934-D, but it is crucial to Registry Set variety collectors. This MS67 example is one of only three in this top grade at PCGS (4/13). The surfaces alternate between untoned silver areas and attractive mottled toning in shades of saffron, amber, and russet, the toning deepest on the date and the upper legends on the reverse. Both the profile of Washington and the eagle high points are notably free of mentionable abrasions. The CAC endorsement adds further to the desirability. An example in this same grade with the CAC sticker sold in our FUN 2013 Signature for \$15,275. PCGS# 85796

**1936-D Washington Quarter, MS67
None Numerically Finer at PCGS**

4489 1936-D MS67 PCGS. The 1936-D is a scarce date in the Washington quarter series, and this Superb Gem is equal to the finest pieces that have ever been certified. This beautiful Superb Gem has splendid gold toning near the borders, framing the highly lustrous centers. Population: 11 in 67 (1 in 67+), 0 finer (4/13). NGC ID# 244H, PCGS# 5801

**1937-S Quarter, MS67
Lightly Toned**

4490 1937-S MS67 PCGS. Golden-brown dots at the margins give way to pale yellow and eventually silver-cream hues at the centers of this Superb Gem from an issue of fewer than 1.7 million pieces. Smooth, carefully preserved surfaces make up for the minor softness of detail seen at the interiors. A significant coin for Registry enthusiasts. Population: 24 in 67 (2 in 67+), 0 finer (4/13). NGC ID# 244M, PCGS# 5805

**1950-D/S Quarter, MS67
Interesting Variety in Top Grade**

4491 1950-D/S MS67 PCGS. CAC. FS-601. The curve of the undermintmark S is visible at the top left and top side of the subsequent D, one of several fun *Cherrypickers'* varieties known for this issue. This Superb Gem example is one of a mere two known at PCGS, and none are finer (4/13). The surfaces are silvery throughout both sides, with just a light blush of toning, thorough luster, and excellent eye appeal. As demanded of the grade, there are no singular marks anywhere, and the strike is as sharp as ever seen on the issue. This is an essential for Registry Set variety collectors, and the CAC sticker provides added attraction. NGC ID# 245U, PCGS# 5843

**1963-D Quarter, Nicely Toned MS67
Surprisingly Scarce in High Grades**

4492 1963-D MS67 PCGS. With a mintage in excess of 135 million pieces it is a wonder that so few Superb examples have been certified of the 1963-D, and none are finer. This is a well-preserved piece whose softly frosted mint luster has a significant presence of golden-rose toning around the margins. Population: 5 in 67, 0 finer (4/13). NGC ID# 246T, PCGS# 5875

PROOF WASHINGTON QUARTERS

**1936 Quarter, Superb Gem Proof
Ex: Mershon**

4493 1936 PR67 PCGS. Ex: Tom Mershon Collection. Impressive reflectivity with rich silver-gray patina that drapes much of the centers. Deeper orange and tan shadings appear at parts of the margins. An excellent specimen from the first proof Washington quarter issue. Population: 8 in 67, 0 finer (4/13).
Ex: *Long Beach Signature* (Heritage, 9/2008), lot 913.
From *The MKJ Collection, Part II*. NGC ID# 27HN, PCGS# 5975

**1937 Washington Quarter, PR68
Tied for Finest Certified at PCGS**

4494 1937 PR68 PCGS. CAC. The 1937 proof Washington quarter boasts a mintage of just 5,542 pieces, the smallest proof output of any denomination that year. The Washington design was relatively new in 1937, but the motifs were not perceived as attractive or artistic, and the demand for single proof examples was quite small. The great majority of the coins were sold as part of complete proof sets. The date enjoys much greater popularity with present-day collectors.

The present coin is a magnificent PR68 example, with deeply mirrored surfaces and razor-sharp definition on all design elements. Attractive traces of aquamarine toning add to the stunning eye appeal on both sides. Housed in a green label holder. Population: 2 in 68, 0 finer (4/13).

From *The MKJ Collection, Part II*. NGC ID# 27HP, PCGS# 5976

1938 Washington Quarter, PR68
Tied for Finest Certified at PCGS

4495 1938 PR68 PCGS. A lovely Superb Gem proof, this 1938 quarter is fully brilliant with deeply mirrored fields and satiny devices, enhanced by delicate gold toning. It is one of the finest examples that PCGS has ever certified, a wonderful candidate for the advanced Registry collector. Population: 3 in 68, 0 finer (4/13).
From The MKJ Collection, Part II. NGC ID# 27HR, PCGS# 5977

1939 Washington Quarter, PR68
Attractive Multicolor Toning

4496 1939 PR68 PCGS. Ex: Michael Fuller Collection. Iridescent marigold-yellow, radish-red, and lime-green toning enriches this delightfully mirrored and intricately struck Superb Gem. Unlike most Washington quarters from the era, this specimen exhibits sharp definition on the central design elements and peripheral legends. It would be a challenge to find another specimen with equally beautiful patina. Population: 3 in 68, 0 finer (4/13).
Ex: Dallas Signature (Heritage, 11/2006), lot 774; Houston Signature (Heritage, 11/2007), lot 60936; Summer FUN Signature (Heritage, 7/2010), lot 3927.
From The MKJ Collection, Part II. NGC ID# 27HS, PCGS# 5978

1941 Washington Quarter, PR68
Single Finest Certified at PCGS

4497 1941 PR68 PCGS. CAC. Only 15,287 proof Washington quarters were struck in 1941, using the Variety B reverse, and this magnificent coin is one of the finest survivors. The design elements exhibit razor-sharp definition throughout, with exceptional eye appeal. The deeply reflective surfaces on this piece — the *sole finest certified at PCGS* — could pass for a looking-glass, despite the most imperceptible hints of lime, pink, and gold that appear on the obverse at certain angles. As expected of the grade, even a loupe reveals no sign of contact. Population: 1 in 68, 0 finer (4/13).
From The MKJ Collection, Part II. NGC ID# 27HU, PCGS# 5980

EARLY HALF DOLLARS

1795 O-119 Half Dollar, XF Details
Distinctive Obverse Die Lump

4498 1795 2 Leaves — Repaired — Genuine PCGS. XF Details. O-119, R.4. Most easily attributable by the vertical die lump above star 15. The reverse is only used on the O-119. The fields appear to have been smoothed, explaining the Repair qualifier on the insert. The devices are well-defined, and the central devices are lighter in color against the deeper gray fields.

1795 2 Leaves Half, O-105a, AU55
Iridescent Rim Toning

4499 1795 2 Leaves AU55 NGC. CAC. O-105a, R.4. The obverse shows two points of star 1 joining Liberty's lowest hair lock, and star 2 lies completely across the end of the second-lowest curl. In this die state, a wispy die crack runs from the B of LIBERTY faintly to the head, other cracks encircle many of the stars and date, and a crack joins the rim and star 15 to the bust tip. This Choice AU example, certified as O-105a by NGC, offers lovely original rim patina in iridescent blue, pink, and purple shades contrasting against silvery centers. Like most of the 1795 varieties save for a couple, this die pairing is rated R.4 or "very scarce," although it is not quite to the R.5 or "rare" level. An attractive and unperturbed example. PCGS# 6052

1806 No Stem Half Dollar, AU55
O-109, Pointed 6

4500 1806 Pointed 6, No Stem AU55 NGC. O-109, R.1. Steel-gray and tan-gold toning encompass this briefly circulated Draped Bust half. A richly detailed example of the No Stem variety, an oversight by the die engraver, likely Robert Scot. Light obverse hairlines are noted in addition to thin lines on Liberty's neck and near the E in UNITED and cloud 3. PCGS# 6073

BUST HALF DOLLARS

1810 Capped Bust Half Dollar, MS65
Condition Census O-107 Example

4501 1810 MS65 NGC. O-107, R.3. The 1810 Capped Bust half dollar claims a substantial mintage of more than 1.2 million pieces, with 10 die varieties known for the date. This coin represents the O-107 variety with a wide date and the C in AMERICA broadly recut. The O-107 is reasonably available in lower grades, but examples in Gem condition are very rare. Currently, NGC has graded only seven 1810 half dollars in MS65, including all varieties, with only two coins finer (4/13). This coin is the finest NGC example of the O-107 variety by a full three grade points.

The present coin is a delightful Gem with vibrant mint luster under attractive shades of gold, gray, magenta, and violet patina. The central design elements are well-detailed but a touch of softness shows on the stars on the left. Eye appeal is terrific. Coins of this quality are seldom offered publicly and the discerning collector should bid accordingly. NGC ID# 24ET, PCGS# 6095

1811 Capped Bust Half, MS67+
Finest Certified at PCGS
Popular O-110a Variety

4502 1811 Small 8 MS67+ PCGS. CAC. O-110a, R.2. A substantial mintage of just over 1.2 million Capped Bust half dollars was accomplished in 1811, with 10 obverse and 10 reverse dies combining to produce a total of 13 separate die varieties for the date. This high-end Superb Gem represents the O-110a variety, with the letters in the date slanted to the left and a die break from the edge near the olive leaves through the top of UNITED on the reverse. The O-110a is not difficult to locate in lower Mint State grades, but it is extremely rare in MS67 and virtually unobtainable any finer.

The Capped Bust half dollars were the largest U.S. silver coins after production of silver dollars was suspended in 1804. Most years saw large mintages, with a high proportion of the coins being used as bank reserves, and relatively few actually circulating. This trend was reversed when silver dollar coinage resumed after 1840. The larger silver dollars then took over the role of currency reserves and many half dollars were released into circulation in later years..

Collectors prized the Capped Bust halves from the time coin collecting first became popular in the 1850s. An example of the 1811 appeared as early as the A.C. Kline Sale (Moses Thomas & Sons, 6/1855), lot 291. The popularity of the date has grown continually over the years, with higher and higher prices realized at succeeding offerings. Recent sales include the magnificent MS68 NGC coin in lot 3844 of the FUN Signature (Heritage, 1/2009), which realized \$92,000.

This coin is a spectacular high-end Superb Gem and the single finest specimen certified at PCGS (4/13). The design elements exhibit razor-sharp definition in most areas, with just a touch of softness on the lefthand stars. The well-preserved surfaces are brightly lustrous, with no mentionable flaws. A few hints of pale gold and lavender patina enhance the incredible eye appeal. This coin is a candidate for the finest collection or Registry Set. PCGS# 6097

1812/1 Large 8 Half, O-101
Rare *Guide Book* Variety

- 4503** 1812/1 Large 8 VF25 PCGS. O-101, Low R.5. O-101 is the sole 1812 Large 8 overdate and thus receives its own *Guide Book* listing. Since the variety is rare, it commands a remarkable premium over the typical 1812 half dollar. The present evenly circulated representative displays cream-gray high points and deep gunmetal fields. A loupe fails to locate any detractions. NGC ID# 24EX, PCGS# 6102

1813 Half Dollar, MS64
O-103, Easily Attributable

- 4504** 1813 MS64 PCGS. O-103, R.2. An early die state without the usually-seen die break within the upper half of the 3 in the date. Overton-103 is readily attributed by the die lump near the crest of the eagle's left (facing) wing. This olive-green and pearl-gray half dollar is lustrous and nearly unabraded. The strike is intricate save for a few left-side stars. Struck from clashed dies. Population: 20 in 64, 4 finer (4/13). NGC ID# 24EZ, PCGS# 6103

1821 Capped Bust Half, MS64
Obverse Die Crack, O-103a

- 4505** 1821 MS64 PCGS. CAC. O-103a, R.3. The 1821 Capped Bust half dollar claims a mintage of more than 1.3 million pieces, with seven die varieties for the date. This coin represents the somewhat scarce O-103a variety, with the distinctive die crack through the date and curl into the right obverse field. This well-detailed Choice example displays vibrant mint luster and vivid shades of gold, gray, and violet toning. Population: 20 in 64, 4 finer (4/13). NGC ID# 24FF, PCGS# 6128

1834 Half Dollar, Multicolor MS65
O-116, Small Date, Small Letters

- 4506** 1834 Small Date, Small Letters MS65 PCGS. O-116, R.1. Overton-116 is interesting for its repunched bust tip. An outline of the left border of the bust truncation is noted near star 1. The die engraver would likely have been amazed if told that 179 years later collectors would cherish such features on early Federal coinage. This is a lustrous and exceptionally preserved half dollar bathed in dappled autumn-brown, ocean-blue, and gunmetal-gray toning. Population: 9 in 65, 1 finer (4/13). PCGS# 6166

PROOF BUST HALF DOLLAR

1836 Lettered Edge Half, Near-Gem Proof, O-106 Important 'Beaded Border' Reverse Variety First We Have Ever Offered

4507 1836 Lettered Edge PR64 NGC. O-106, R.7 as a proof. At least five different 1836 Lettered Edge Overton half dollar varieties are known in proof format. The O-101 shows a triple dentil over the right side of the final S, the O-106 has a beaded border on the reverse (and other diagnostics described below), the O-108 has the 8 punched over a misplaced 3, the O-109 shows an extra point on star 7, and the O-116 displays the blundered 50/00 denomination.

This proof striking is certified by NGC as O-106 and "Beaded Reverse." The Overton reference notes that "this reverse is the only reverse in the lettered edge series that has a raised edge with beaded segments," a format similar to (but different die pairing from) that used on the later Reeded Edge Bust half proofs of 1836. The Reeded Edge Bust halves are notable as the first U.S. coinage struck under steam power, but as far as we know all of those pieces were struck with the same pair of dies — proofs and business strikes alike — the Beistle 19-Y combination showing a short, jagged die crack down from the denticle past the second S of STATES and die doubling on 50 CENTS.

Returning to the 1836 Lettered Edge O-106 reverse die, the 5 in the denomination also displays a "fancy" (Breen's term) flag on top, the first T in STATES is lower than the other letters, and many of the vertical lines extend upward into the horizontal stripes.

Although we have offered proof strikes of the 1836 Lettered Edge several times in the past, this is the first proof example of the O-106 that has appeared since we began our Permanent Auction Archives in 1993. The fully reflective fields on both sides of this coin mark it as a no-questions proof, although the Beaded Border reverse obviously puts it at the nexus of steam-powered coinage. Mint Director Robert Patterson wrote to George Newbold in 1836, "We are getting rid of Blood-power as soon as we can."

This near-Gem shows a crisp strike throughout both sides; the obverse stars are mostly flat save for the last four which are sharp, a diagnostic (as opposed to strike weakness) seen on all business strikes as well. The surfaces show excellent overall preservation, despite a few light field hairlines and a couple of contact marks on the cheek and lower bust. Pinkish-copper tones prevail on both sides.

Between NGC and PCGS there are 15 examples of the 1836 Lettered Edge in all proof grades, nearly all uncertified as to variety. For all proof varieties, NGC has seen four submissions in this grade with one finer (4/13). This is an important early proof half dollar from one of the most historic and momentous years in American coinage history. PCGS# 6221

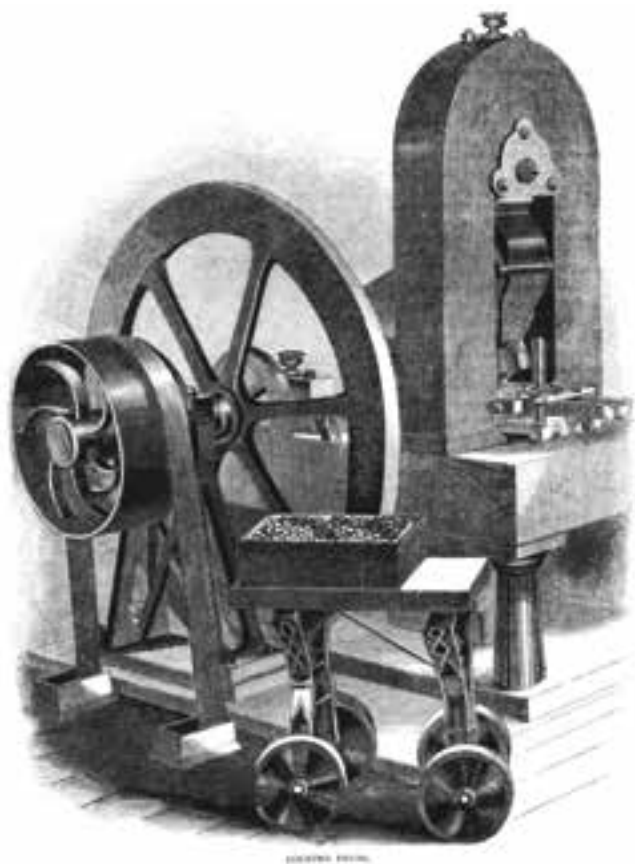

REEDED EDGE HALF DOLLARS

1837 GR-18 Reeded Edge Half, MS65 Extensive Die Cracks

4508 1837 MS65 NGC. GR-18, R.1. A new die variety reference for the Reeded Edge half dollars struck from 1836 to 1839 was published in July 2012, the result of decades of research by the author, Dick Graham. *A Registry of Die Varieties of Reeded Edge Half Dollars 1836-1839*, provides detailed written descriptions, commentary, and photographs, simplifying the attribution process for this underappreciated series. We believe that these coins will gain substantially in popularity, and that now is a good time to begin a specialized collection.

This pleasing Gem has diagnostic obverse and reverse die cracks, including heavy cracks in the shield. Sharply struck, it exhibits ivory luster with splashes of delicate gold toning and frosty mint surfaces. Census: 41 in 65 (1 in 65+), 11 finer (4/13). NGC ID# 24G4, PCGS# 6176

1837 Reeded Edge Half, MS65 Ideal Type Coin

4509 1837 MS65 NGC. CAC. For type collectors seeking an example of the popular Reeded Edge half dollar, with the denomination expressed as 50 CENTS on the reverse, the 1837 issue is the obvious choice. This interesting design type was only struck in 1836 and 1837, and the 1836 claims a mintage of just 1,200 pieces, with a hefty price tag in all grades and conditions. Thankfully, the 1837 is not too difficult to locate in lower Mint State grades, but examples in Gem condition are rare.

The present coin is a delightful Gem, with sharply detailed design elements and well-preserved surfaces. Vivid shades of champagne-gold, dove-gray, and lavender patina visit the surfaces of both sides. Much original mint luster shines through the toning and eye appeal is quite strong. Census: 41 in 65 (1 in 65+), 11 finer (4/13). NGC ID# 24G4, PCGS# 6176

SEATED HALF DOLLARS

1840-O Seated Liberty Half Dollar, MS64 Dramatic Die Cracks on Reverse

- 4510** 1840-O MS64 NGC. WB-103, Small O. The 1840-O Seated Liberty half dollar is a better date in the series, from a mintage of 855,100 pieces. Randy Wiley and Bill Bugert list the WB-103 variety as high R.7 in Mint State grades. This interesting Choice example shows a dramatic network of die cracks on the reverse. The die must have been close to failure when this coin was struck. The design elements are remarkably detailed for a coin struck from such an advanced state of the dies. A few hints of gold and violet toning enhance the pleasing surfaces. Census: 5 in 64, 1 finer (4/13). NGC ID# 24GN, PCGS# 6235

1849-O Half Dollar, MS64 Among the Finest of This Heavily Circulated Issue

- 4511** 1849-O MS64 PCGS. CAC. Wholly original steel-violet surfaces with flashes of blue-green iridescence at the borders. The majority of peripheral stars are poorly defined and, like many 1849-O halves, the obverse of this piece appears to have been struck from a die with moderate to heavy amounts of rust. Population: 8 in 64, 1 finer (4/13).
Ex: Baltimore Signature (Heritage, 7/2003), lot 7555. NGC ID# 24HF, PCGS# 6263

1853 Arrows and Rays Half, Toned Near-Gem One-Year-Only Type Coin

- 4512** 1853 Arrows and Rays MS64 PCGS. CAC. Gold-to-gray toning occupies much of each side, while the upper left obverse arc has cool blue hues. Well-defined overall, if soft on the rightmost obverse stars, and a pleasing near-Gem example of the one-year Arrows and Rays type. PCGS has graded 21 examples as MS65 or finer (4/13). NGC ID# 24JJ, PCGS# 6275

1854-O Arrows Half Dollar, MS65 Richly Toned

- 4513** 1854-O Arrows MS65 PCGS. CAC. Impressive luster for the time with a frosty swirl under blue, green, peach, and gray patina. The stars are bluntly struck, not uncommon on New Orleans Seated silver, but interiors are better-defined. A great example of the No Motto, With Arrows design type. Population: 19 in 65, 14 finer (4/13). NGC ID# 24JM, PCGS# 6280

1856-O Seated Half, MS65 Ideal O-Mint Type Coin

- 4514** 1856-O MS65 NGC. WB-104, Recut 6. The 1856-O is one of the more frequently encountered No Motto halves after 1855, although it is less available than the 1858-P and 1858-O. More than 2.65 million pieces were struck, but Gems are infrequently seen and always in demand as an O-mint type coin. The striking details on this piece are very well defined for a New Orleans product from this era. Satiny mint luster is also present with an overlay of variegated golden-gray, rose, and lilac toning over each side. A rarely seen O-mint half and a special find in Gem condition. Census: 16 in 65, 3 finer (4/13).
Ex: New York Signature (Heritage, 6/2005), lot 5709; Long Beach Signature (Heritage, 9/2005), lot 3224. NGC ID# 24HP, PCGS# 6288

1861-O Half Dollar, MS65 Likely a CSA Issue

- 4515** 1861-O MS65 PCGS. A well struck chestnut-gold and stone-gray Gem with unabraded and lustrous surfaces. The present half dollar was likely struck by New Orleans prior to the seizure of the facility by the state of Louisiana. The reverse is from Randal E. Wiley's Die B (*Gobrecht Journal*, 11/2005) while the obverse die is unlisted in that article. Population: 9 in 65, 5 finer (4/13). NGC ID# 24J8, PCGS# 6303

**1863 Seated Liberty Half, MS65
In-Demand Civil War Issue**

- 4516 1863 MS65 NGC.** From a smallish Civil War mintage of 503,200 pieces, the 1863 Seated Liberty half dollar is seldom encountered in Gem condition. This stunning Gem exhibits sharply detailed design elements throughout, with vibrant satiny mint luster and traces of light lavender toning. Eye appeal is extraordinary. Census: 24 in 65, 3 finer (4/13). NGC ID# 24JB, PCGS# 6309

**1879 Half Dollar, MS67
Popular, Low-Mintage Date**

- 4517 1879 MS67 PCGS. CAC.** Despite the low mintage of 4,800 business strikes, the 1879 half dollar is available in most grades. Randy Wiley and Bill Bugert (1993) attribute this to their being saved at or near the time of issue by collectors because of anticipated low mintages. The lower production was likely due to the implementation of the Bland-Allison Act of 1878, requiring mints to purchase vast amounts of silver bullion and produce large quantities of Morgan dollars.

While the certified population reveals the 1879 to be abundant in Mint State through the Premium Gem level, MS67 pieces such as the current offering are elusive. Vibrant luster exudes from light silver-gray surfaces, and both sides are fully struck, with the sole exception of the eagle's left (facing) claw. A handful of grade-consistent ticks do not take away from the coin's superior eye appeal. Population: 15 in 67 (1 in 67+), 2 finer (4/13). NGC ID# 24KS, PCGS# 6361

**1881 Prooflike Half Dollar, MS66
Dazzling, Brilliant Surfaces**

- 4518 1881 MS66 Prooflike NGC.** Only 10,000 circulation strikes were produced of the 1881 half dollar, some of which are "first strikes" that exhibit nearly undiminished reflectivity in the fields from the initial die polish. This is such a coin that is brilliant throughout and shows strong prooflike mirroring with moderate field-device contrast. It takes close examination and a good light source to see the slight cartwheel effect in the fields that distinguishes this from a proof. This is the only four coins certified as MS66 Prooflike by NGC (4/13). PCGS# 86363

**1884 Half Dollar, MS65+
Low Business Strike Mintage**

- 4519 1884 MS65+ NGC.** Well-defined, as the business strike 1880s half dollars are wont to be, with a degree of watery reflectivity glimmering in gold-touched silver fields. NGC's Gem-plus designation is a testament to the piece's remarkable all-around preservation. One of 4,400 business strikes produced. NGC ID# 24KX, PCGS# 6366

1884 Seated Dollar, MS67
Low-Mintage Later Date

- 4520 1884 MS67 NGC. Delicate golden tints are the only significant color on this otherwise silvery Superb Gem. The strike is crisp and the fields semireflective, as expected for a low-mintage issue of only 4,400 business strikes. For the entirety of the 1880s the half dollar was struck only at Philadelphia in near-nominal quantities, as the various Mints were kept busy striking the Morgan silver dollars mandated by the Bland-Allison Act. This carefully preserved example, despite coming from an issue with a low mintage, is well-suited to the top tier of type collections. NGC ID# 24KX, PCGS# 6366

1889 Half Dollar, MS66
Semireflective Fields

- 4521 1889 MS66 PCGS. Pale silver surfaces have a dusting of gray on the obverse and golden glimmers across much of the reverse. This late-date Seated half is semireflective and pleasingly preserved, though two small depressions are noted below Liberty's visible foot. Population: 10 in 66, 0 finer (4/13). NGC ID# 24L4, PCGS# 6371

PROOF SEATED HALF DOLLARS

1857 Half Dollar, PR64
Popular Pre-1858 Issue

- 4522 1857 PR64 NGC. CAC. This auction is unusually rich in proof 1857 half dollars, a pre-1858 issue with a few dozen specimens known at most. This near-Gem example has several faint hairlines (not including a holder scratch affecting the right-center obverse), but these generally are well-hidden by peach and lavender-blue toning over glimmering surfaces. NGC ID# 27TG, PCGS# 6411

Rare 1857 Half Dollar, PR66
Ex: Garrett, Kaufman

- 4523 1857 PR66 NGC.** The Phil Kaufman 1857 proof half dollar ranks in the top two or three of the 70 coins certified by NGC and PCGS. An unknown number of 1857 proofs were struck. Previous researchers have estimated that between 13 and 16 pieces may exist. We believe the number to be considerably higher and estimate that between 25 and 45 proofs actually survive.

The Kaufman 1857 proof half dollar displays beautiful cobalt-blue, lavender, violet, and yellow-gold toning over both sides, being just a shade or two deeper on the reverse. The surfaces are fully struck throughout. Each side exhibits noticeable field-motif contrast, especially when the coin is rotated under a light source. As might be expected for the Superb Gem designation, the surfaces are impeccably preserved. Indeed, we are hard-pressed to locate pedigree identifiers for future catalogers and researchers.

Ex: Professor Anthon Collection, Part V (Cogan/Bangs, 10/1884), lot 239; John Work Garrett Collection; The Johns Hopkins University (Stack's 3/1976), lot 226; Phil Kaufman; ANA Signature (Heritage, 7-8/2008), lot 1829; The Greensboro Collection, Part II (Heritage, 1/2013), lot 5764. NGC ID# 27TG, PCGS# 6411

1859 Seated Liberty Half, PR64
Rare Example With Cameo Surfaces

- 4524 1859 PR64 Cameo PCGS. CAC.** A fairly generous mintage of 800 proof Seated Liberty half dollars was achieved in 1859, but some of these undoubtedly went unsold and were melted after the end of the year. This impressive Choice example displays sharply detailed frosty design elements that contrast boldly with the deeply mirrored fields. A few hints of light gold toning visit the pleasing surfaces. Population: 11 in 64 Cameo, 4 finer (4/13). PCGS# 86413

1859 Half Dollar, Brilliant PR65 Cameo
Type One Reverse

- 4525 1859 PR65 Cameo NGC. Type One Reverse.** This brilliant Gem exhibits frosty devices and legends that demonstrate strong contrast with the mirrored fields. The strike is precise and there are no remotely mentionable detractions. 1859 is the first year with a recorded proof mintage (800 pieces) though many were melted by the Treasury as unsold. Census: 8 in 65 Cameo, 3 finer (4/13). PCGS# 86413

1861 Seated Half, PR66 Cameo
Fully Struck and Well-Preserved

- 4526 1861 PR66 Cameo NGC.** This coin boasts remarkable preservation for a large proof coin that is now 152 years old, struck in the first year of the Civil War hostilities. Both the 1860 and 1861 half dollars saw largish (for the era) proof emissions of 1,000 pieces each, minus approximately half that number melted as unsold at year's end. Most certified survivors grade no better than Choice proof, however. This Premium Gem Cameo example shows notable eye appeal in the form of excellent preservation and a full strike throughout. Field-device contrast is perceptible, despite light patina in shades of amber and pinkish-gold, with light blue rim accents. A great example of this early Seated half proof. Census: 2 in 66 Cameo, 0 finer (4/13). PCGS# 86415

1864 Half Dollar, PR66
Needle-Sharp Strike

- 4527 1864 PR66 PCGS. CAC.** Only 470 proof examples were struck of the 1864 half dollar, and few survive today in such pristine condition as this Premium Gem example with the CAC endorsement. Most certified examples top out in PR63 or PR64. This PR66 specimen is one of four so graded at PCGS, which has seen but a single PR67 finer. The rather dark patina under a light resolves into beautiful blue predominating against pinkish accents, and the strike, as expected, is impeccable, needle-sharp throughout both sides. No mentionable signs of contact mar the excellent eye appeal on either side. NGC ID# 27TR, PCGS# 6418

1864 Half Dollar, Gem Cameo
Deep Peripheral Toning

- 4528 1864 PR65 Cameo NGC.** The peripheries of this spectacular Gem are awash in shades of violet and green, while the centers remain brilliant silver. The sharply rendered frosty devices contrast boldly with the deeply mirrored fields, but even the stunning Cameo effect seems secondary to the vivid play of colors. NGC has graded four coins in PR65 Cameo, with a single specimen finer, while PCGS has seen only two examples in this exalted grade, with none finer (4/13). Ex: Long Beach Signature (Heritage, 9/2010), lot 4159. PCGS# 86418

**1864 Seated Half, PR66 Deep Cameo
Fully Struck Throughout**

- 4529 1864 PR66 Deep Cameo PCGS.** Intense contrast between fields and devices is the calling card of this Premium Gem proof 1864 Seated half, one of a reported 470 pieces struck. The silver-white surfaces are basically untoned save for the merest whisper of gold, but basically the devices present as silver-white while the fields show profound reflectivity and jet-black depth. The eye appeal of this piece is simply immense, despite a few minor field hairlines that appear strictly under a loupe. The strike is full throughout both sides, and a tiny curlicue lintmark appears just under the eagle's chin. Population: 2 in 66 Deep Cameo, 0 finer (4/13). PCGS# 96418

**1865 Gem Cameo Half Dollar
Ex: Jules Reiver Collection**

- 4530 1865 PR65 Cameo NGC.** Ex: Jules Reiver Collection. This desirable Cameo Gem features impressive white on black contrast and lovely peripheral peach, rose, and navy-blue toning. An argument could be made for an Ultra Cameo designation as the contrast is extremely pronounced on both sides. This piece is well struck, and thorough evaluation locates only a small number of barely perceptible hairlines. A truly wonderful representative from one of the most important years in American history that included Lincoln's assassination and the end of the Civil War. Census: 6 in 65 (1 in 65+) Cameo, 9 finer (4/13).
Ex: *FUN Signature (Heritage, 1/2006)*, lot 21349, which realized \$5750. PCGS# 86419

**1866 Seated Liberty Half, PR66
None Numerically Finer at PCGS**

- 4531 1866 Motto PR66 PCGS.** The Motto IN GOD WE TRUST was featured for the first time on regular-issue coinage in 1866 and only 725 proof Seated Liberty half dollars were struck. Bold reflectivity remains on this fields of this Premium Gem proof featuring toning in numerous shades of green, red, yellow, orange, and gray. Population: 5 in 66, 0 finer (4/13). NGC ID# 27TZ, PCGS# 6424

**1869 Half Dollar, PR66 Cameo
Deeply Contrasted**

- 4532 1869 PR66 Cameo PCGS.** Plenty of perceptible field-device contrast emanates from each side of this Premium Gem Cameo proof 1869 half dollar, from a recorded production of 600 coins. The central areas are silver with a light wash of amber and copper-gold color that deepens noticeably at the rims, a beautiful effect. Minute doubling or repunching shows on a few of the left-side stars, and the strike is far superior to most examples, some of which show GOD weak on the reverse. The few visible signs of contact, on Liberty's left (facing) thigh and calf and in the right lower obverse field, are quite trivial and undistracting. Population: 3 in 66 Cameo, 1 finer (4/13). PCGS# 86427

**1872 Seated Half, PR65 Cameo
Lightly Toned, Strongly Contrasted**

- 4533 1872 PR65 Cameo NGC. CAC.** A fairly generous proof mintage of 950 Seated Liberty half dollars was struck in 1872, but few survivors can match the quality of this spectacular Gem. This coin exhibits razor-sharp details on all design elements, and the frosty devices contrast boldly with the deeply reflective fields. The surfaces are mostly brilliant, but the fields are visited by hints of gold and lavender toning. Census: 5 in 65 Cameo, 5 finer (4/13). PCGS# 86430

**1874 With Arrows Half Dollar
Colorful Gem Proof**

- 4534 1874 Arrows PR65 NGC.** This richly toned second-year With Motto, Arrows proof half offers pale green outer toning that shifts to blue and violet with dotted peach toning appearing in parts of the centers. Boldly mirrored through the patina and impressively preserved, an outstanding collector coin from its short-lived type. NGC ID# 27UV, PCGS# 6435

**1877 Seated Half, Partially Toned PR65
Only 510 Proofs Struck**

- 4535 1877 PR65 PCGS. CAC.** The 1877 half dollar is a study in contrasts. More than 8.3 million pieces were struck for circulation, but only 510 proofs were produced. Remarkably few of the proofs have survived in Gem or finer grades. This is a deeply mirrored example that retains much brilliance with scattered green and reddish-russet patina over each side. The strike is pinpoint-sharp throughout, and there are no obvious contact marks. Population: 7 in 65, 3 finer (4/13). NGC ID# 27UC, PCGS# 6438

**1880 Half Dollar, Richly Toned PR66 ★
Deeply Reflective Fields**

- 4536 1880 PR66 ★ NGC. CAC.** Splendid lemon-gold, cherry-red, and ocean-blue toning covers this crisply struck Premium Gem. For proofs and business strikes combined, fewer than 10,000 pieces were struck. NGC has awarded three proof 1880 halves with a ★ designation, the present piece and two others graded PR66 Cameo (4/13). Ex: Long Beach Signature (Heritage, 9/2008), lot 2271. NGC ID# 27UF, PCGS# 6441

**1881 Half Dollar, PR67
Deep and Gorgeous Patina**

- 4537** 1881 PR67 NGC. A dusky and intriguingly toned Superb Gem proof from a mintage of 975 pieces. The obverse is mildly contrasted through a thick veil of silver-gray edged in gold and blues, the latter range far more prominent. On the reverse, cerulean and violet shades are all-encompassing save for hints of a more blue-green hue at the left rim. NGC ID# 27UG, PCGS# 6442

**1881 Seated Half, PR65 Cameo
Brilliant Surfaces Throughout**

- 4538** 1881 PR65 Cameo NGC. CAC. The decade of the 1880s is a highly collectible one for half dollars and quarters. The dates are almost to a one have low-production numbers, and they can occasionally be located in well-preserved condition. This is a brilliant example of this low total-mintage date with strong contrast evident between the fields and devices. The strike details are complete throughout. Census: 18 in 65 Cameo, 17 finer (4/13). PCGS# 86442

**1882 Half Dollar, PR66
Richly Toned**

- 4539** 1882 PR66 PCGS. Glimmers of reflectivity filter through rich patina, at times pale gray, peach, lavender, and blue in turn. Sharply detailed with all the eye appeal discerning collectors have come to expect for this proof issue of 1,100 specimens, though only minimal contrast persists through the toning. Population: 20 in 66, 2 finer (4/13). NGC ID# 27UH, PCGS# 6443

**1885 Half Dollar, PR66
Toned With Flashy Obverse**

- 4540** 1885 PR66 PCGS. Flashy when tilted at certain angles to the light, this Premium Gem comes alive with green-gold and blue hues on the obverse and peach and azure on the reverse. Modestly contrasted but fantastically appealing, one of 930 specimens produced. Population: 7 in 66 (1 in 66+), 3 finer (4/13). NGC ID# 27UL, PCGS# 6446

**1885 Half Dollar, Richly Toned PR66
Remarkably Low Total Mintage**

- 4541** 1885 PR66 NGC. CAC. Struck near the nadir of total mintages for Seated coinage in the 1880s, only 930 proofs were produced plus an additional 5,200 strikes for circulation. The deep mirrored fields on this example are partially subdued by the medium intensity golden-rose and blue toning on each side. The strike is full throughout, and there is a small planchet flake that resembles a dot of color just above the eagle's head. Census: 19 in 66, 7 finer (4/13). NGC ID# 27UL, PCGS# 6446

**1885 Gem Cameo Proof Half Dollar
Distinctive Peripheral Color**

- 4542** 1885 PR65 Cameo PCGS. CAC. Strong cameo contrast is seen between the fields and devices on each side of this glassy-mirrored proof. Each side is well-matched in appearance with a near-brilliant center that is surrounded by thin rings of russet and cobalt-blue at the margins. This low-mintage proof displays considerable eye appeal for the grade. Population: 14 in 65 (1 in 65+) Cameo, 1 finer (4/13). PCGS# 86446

1886 Half Dollar, Deeply Toned PR66
Only 886 Proofs Struck

- 4543** 1886 PR66 PCGS. CAC. As with other dates from the 1880s, the 1886 had a low total production because the various mints were primarily focused on churning out silver dollars under the provisions of the Bland-Allison Act. The 1886 follows that tradition with 5,000 circulation strikes and 886 proofs produced. Deep blue and rose-colored patina covers each side of this example, toning of sufficient depth that it partially subdues the mirrors in the fields. Held under a light, though, the mirrors jump to life. Pinpoint strike definition. Population: 16 in 66, 2 finer (4/13). NGC ID# 27UM, PCGS# 6447

1888 PR66 Half Dollar
Popular, Low-Mintage Date

- 4544** 1888 PR66 PCGS. CAC. Dusky rose, golden-brown, aqua, and cream-gray envelopes this sharply struck Premium Gem. Subtle remnants of a fingerprint in the right obverse field is barely worthy of passing mention. A low-mintage date, since the Mint was legislatively obligated to strike inordinate numbers of silver dollars during the era.
Ex: *Central States Signature* (Heritage, 4/2008), lot 1179. NGC ID# 27UP, PCGS# 6449

1888 Seated Half, PR67 Cameo
Distinctive Peripheral Toning

- 4545** 1888 PR67 Cameo NGC. Only 832 Seated Liberty half dollars were struck in 1888, and this magnificent Superb Gem is one of the finest survivors. The sharply detailed design elements are richly frosted and contrast boldly with the deeply mirrored fields. Crescents of cobalt-blue and lime-green toning grace the peripheries. Census: 3 in 67 Cameo, 0 finer (4/13). PCGS# 86449

1890 Seated Half, Ultra Cameo PR66
Peripherally Toned

- 4546** 1890 PR66 Ultra Cameo NGC. The Mint Act of Sept. 25, 1890, permanently did away with the three cent nickel and the gold one dollar and three dollar denominations. The Seated Liberty silver coinage designs had been in circulation for five-plus decades, and their cookie-cutter resemblance led to a minimal sale of silver proof sets in 1890, only 590 each of the dime through silver dollar. This half dollar exhibits remarkably deep, flashy mirrors in the fields, complementing strong mint frost on the devices. The surfaces are brilliant, save for a light golden ring around the margins of each side. A small Mint-made planchet flake appears in the reverse field by the rim at 4 o'clock. Census: 2 in 66 Ultra Cameo, 5 finer (4/13). PCGS# 96451

1891 Half Dollar, PR67 ★ Cameo
Extraordinary Quality

- 4547** 1891 PR67 ★ Cameo NGC. The margins offer light gold toning, while the fields and devices are brilliant. Both major devices are thickly frosted, and the eye appeal is exemplary. The fletchings, claws, and HALF DOL exhibit minute die doubling. A mere 600 proofs were struck, with only 2 finer examples graded by NGC (4/13).
Ex: *Central States Signature* (Heritage, 4/2008), lot 1183. PCGS# 86452

BARBER HALF DOLLARS

1895-S Barber Half, MS65+
Conditionally Rare in This Grade

4548 1895-S MS65+ NGC. This high-end Gem Barber half displays brilliant well-preserved surfaces with just a wisp of lavender toning and few signs of contact. The design elements are sharply detailed throughout and both sides radiate ample mint luster. Eye appeal is outstanding. Census: 11 in 65 (1 in 65+), 6 finer (4/13). NGC ID# 24LU, PCGS# 6473

1903-O Barber Half Dollar, MS65
Multicolor Toning, Vibrant Luster

4549 1903-O MS65 NGC. Splashes of dark gray toning appear on the obverse of this beautifully toned Gem. Both sides have lovely gold at the center that gradually changes to russet, blue, and green near the borders. Faint hairlines are noted on the obverse and trivial marks appear on both sides. Census: 9 in 65, 4 finer (4/13). NGC ID# 24MK, PCGS# 6496

1904 Barber Half Dollar, MS66
Tied for Finest at NGC

4550 1904 MS66 NGC. This high quality '04 half dollar and the Hugon MS66 specimen were both offered at the 2005 FUN Sale...when it rains, it pours. A hard, satiny brilliance is effectively coated in golden-lilac patina and flashes of blue iridescence are also seen along the lower obverse periphery. Population: 2 in 66, 0 finer (11/04). Ex: FUN Signature (Heritage, 1/2005), lot 7455. NGC ID# 24MM, PCGS# 6498

1906-O Barber Half, MS67
Underrated, Third-Finest at PCGS

4551 1906-O MS67 PCGS. CAC. The 1906-O Barber half dollar is far more elusive in the highest Mint State grades than is generally realized outside of specialist circles. In August 2010 when we offered the complete Dr. and Mrs. Stephen L. Duckor Collection of Barber halves, this single piece was graded MS67 PCGS while the Duckor coin was the only one marginally finer, at MS67+ PCGS. Today a second example has joined the ranks at MS67+ PCGS, while this piece remains the sole MS67 at that service (4/13). This coin boasts phenomenal eye appeal and technical quality. Pale ice-blue and jade hug the rim on each side, the centers ceding to rose-gray and silver-gray. The star centrils are fully struck, and the right (facing) shield corner on the reverse displays only trivial weakness. A couple of inconsequential marks appear to have kept this piece from the MS67+ level. The last time we handled an MS67 PCGS piece was the John C. Hugon Collection sale in 2005, a coin that realized \$27,600, but we believe that coin has been regraded and is a different piece from the present example. NGC ID# 24MW, PCGS# 6506

1906-S Barber Half, MS66
Darkly Toned but Lustrous

4552 1906-S MS66 PCGS. CAC. The well-preserved surfaces of this spectacular Premium Gem are blanketed in attractive shades of golden-brown, gray, and violet toning. The design elements are sharply detailed in most areas, with just the slightest softness on the eagle's claw and shield point. Vibrant mint luster adds to the ample eye appeal. Population: 3 in 66, 5 finer (4/13). NGC ID# 24MX, PCGS# 6507

1907-O Half Dollar, MS66
Lustrous and Colorful

- 4553** 1907-O MS66 PCGS. CAC. Richly toned in greens and blues, the former prevailing at the margins and the latter the centers. Generous swirling luster under the patina brings this well-struck Premium Gem to life. A great late-date New Orleans half dollar. Population: 6 in 66 (1 in 66+), 2 finer (4/13). NGC ID# 24N2, PCGS# 6510

1908-O Barber Half, Richly Toned MS66

- 4554** 1908-O MS66 PCGS. CAC. Produced in large numbers, the 1908-O Barber half dollar is an available date in lower grades, but the issue is a formidable rarity in Premium Gem condition. Like most New Orleans issues of the era, this coin shows a touch of softness on the central devices. The well-preserved surfaces radiate vibrant mint luster, under attractive shades of natural blue, gray, and golden-brown toning. Population: 17 in 66, 13 finer (4/13). NGC ID# 24N6, PCGS# 6514

1909-S Half Dollar, MS66
Conditionally Rare

- 4555** 1909-S MS66 NGC. FS-501. Faintly gold-tinged at parts of the margins but otherwise light silver, this satiny S-mint half dollar comes from an underrated issue of fewer than 1.8 million pieces. Slight blending of detail is noted on Liberty's hair, but the eagle's talons are reasonably sharp. Conditionally rare this fine. Though undesignated as such, this appears to be an example of the inverted mintmark *Cherrypickers'* variety. NGC ID# 24NA, PCGS# 6518

1912-D Half Dollar, Toned MS66
Ex: Duckor, Price

- 4556** 1912-D MS66 PCGS Secure. CAC. Ex: Duckor/Price. Dappled golden-gray toning evenly drapes this smooth and coruscating Premium Gem. The 1912-D is one of only a few dates in the entire Barber half dollar series that can be called common in higher grades. However, according to David Akers, "well struck, attractively toned Gem quality examples like this one are not easy to locate as evidenced by the Eliasberg coin which was both more weakly struck and lower quality than this specimen." Here is an important opportunity for the connoisseur of high-grade Barber coinage. Population: 15 in 66 (1 in 66+), 0 finer (4/13). Ex: Dr. Thaine B. Price (*David Akers*, 5/1998), lot 187; Dr. and Mrs. Steven L. Duckor Barber Half Collection (*Heritage*, 8/2010), lot 3236, which realized \$5,750. NGC ID# 24NH, PCGS# 6525

1914 Barber Half, Gem Uncirculated
Low-Mintage Issue

- 4557** 1914 MS65 NGC. The 1914 Barber half dollar (124,610 pieces coined) is one of the lowest mintage silver issues produced in the 20th century. Gems are elusive, and the present example is one of only 19 MS65 examples known to NGC and PCGS (4/13). Uncommonly well struck for the type, the surfaces radiate intense mint frost and display wisps of autumn-gold toning. The reverse is well preserved, and the obverse has only faint grazes on the portrait and right obverse field. Ex: Mike Crudginton Collection/FUN Signature (*Heritage*, 1/2001), lot 7837; ANA Signature (*Heritage*, 7-8/2008), lot 619. NGC ID# 24NN, PCGS# 6530

1915 Barber Half, MS65
Final Date of the Series

- 4558** 1915 MS65 PCGS. CAC. From a small mintage of 138,000 pieces, the 1915 Barber half dollar represents the last date of the popular series, an important consideration for type collectors. This impressive Gem displays well-preserved lustrous surfaces under shades of lavender, gray, gold, and blue toning. Population: 16 in 65, 4 finer (4/13). NGC ID# 24NR, PCGS# 6532

PROOF BARBER HALF DOLLARS

1893 Barber Half, PR66 Cameo Attractively Toned

- 4559 1893 PR66 Cameo PCGS. CAC.** Only 792 proof Barber half dollars were struck in 1893 and few survivors display the eye appeal of this delightful Premium Gem. The design elements exhibit sharp definition throughout and the fields display deep mirrorlike surfaces. Toning that includes shades of aquamarine and champagne-gold adds to the outstanding visual appeal. Population: 21 in 66 (3 in 66+) Cameo, 5 finer (4/13). PCGS# 86540

1897 Barber Half, PR66 Cameo Tremendous Eye Appeal

- 4560 1897 PR66 Cameo PCGS. CAC.** Both sides of this Premium Gem example display a pleasing degree of cameo contrast. The coin exhibits a sharp strike with well-defined design details. Light almond-gold color adds to the visual appeal. A thin, as-made line from the planchet appears on Liberty. Population: 11 in 66 (3 in 66+) Cameo, 5 finer (4/13). PCGS# 86544

1898 Barber Half, PR67 Spectacular Multicolor Toning

- 4561 1898 PR67 PCGS.** This darkly toned Superb Gem displays a vivid patina of lavender, gray, blue, and champagne-gold hues on both sides. The design elements exhibit pinpoint definition throughout and deeply reflective fields shine through the toning. No mentionable surface flaws are evident and eye appeal is outstanding. Population: 9 in 67, 0 finer (4/13). NGC ID# 24P2, PCGS# 6545

1898 Barber Half, PR67 Cameo Only 735 Pieces Struck

- 4562 1898 PR67 Cameo PCGS. CAC.** Only 735 proof Barber half dollars were struck in 1898. This magnificent Superb Gem is sharply detailed throughout, with richly frosted design elements that contrast boldly with the deeply reflective fields. The surfaces show a few hints of pale gold and lavender toning with outstanding eye appeal. Population: 7 in 67 (2 in 67+) Cameo, 2 finer (4/13). PCGS# 86545

1901 Half Dollar, PR66 Cameo Rim-Toned Beauty

- 4563 1901 PR66 Cameo PCGS. CAC.** The 1901 issues were the last in the proof Barber half dollar series for which contrast was the rule and not the exception. This Premium Gem example is clearly contrasted with lightly patinated silver interiors and toned margins, the color far more obvious on the reverse where gold, amber, and mahogany hues hug the rims. Population: 13 in 66 (3 in 66+) Cameo, 10 finer (4/13). PCGS# 86548

1903 Barber Half, PR67 Colorful Specimen

- 4564 1903 PR67 NGC.** This deeply, distinctly toned Superb Gem proof has primarily blue, green, and violet hues across each side. The obverse has colors blending into each other with a touch of peach toward the right, while the reverse exhibits a more concentric pattern with rose in the middle and orange northeast of that. NGC ID# 24P7, PCGS# 6550

**1905 Half Dollar, PR67
Lightly Contrasted**

4565 1905 PR67 NGC. Though struck in the brilliant era for proofs, this Superb Gem has a modicum of contrast on each side. Minimally toned and impressively preserved, this is one of the best survivors to emerge from an issue of just 727 pieces. NGC has graded only three specimens as PR68 or better (4/13). NGC ID# 24P9, PCGS# 6552

**1905 Half Dollar, PR67
Deep Patina**

4566 1905 PR67 PCGS. CAC. Liquid multicolor toning drapes impressively preserved surfaces. Bold sides have dusky gold-green and orange outer toning with blue and violet on the interiors, the obverse adding a window of near-silver centered on Liberty's cheek. One of 727 specimens struck. Population: 12 in 67, 1 finer (4/13). NGC ID# 24P9, PCGS# 6552

**1907 Half Dollar, Cameo PR66
Distinctly Contrasted**

4567 1907 PR66 Cameo PCGS. CAC. Dappled green-gold and silver-gray toning is deeper on the reverse, while the obverse has a prominent spot of dusky orange that appears between the 1 in the date and the nearest star. Excellent reflectivity and distinct contrast, a rarity for post-1901 proof Barber coinage. Population: 4 in 66 Cameo, 3 finer (4/13). PCGS# 86554

**1908 Barber Half Dollar, PR67
Only 545 Proofs Struck**

4568 1908 PR67 PCGS. Pastel shades of toning, including blue, green, yellow, pink, and violet, appear on this Superb Gem example. The coin exhibits a sharp strike, with boldly defined design elements. A wide swath of champagne toning on the reverse reveals a high degree of reflectivity and enhances the eye appeal. Only 545 proof examples were struck. Population: 8 in 67, 3 finer (4/13). NGC ID# 24PC, PCGS# 6555

WALKING LIBERTY HALF DOLLARS

**1917-D Walking Liberty Half, MS65
Better Date, Popular Obverse Mintmark**

4569 1917-D Obverse MS65 PCGS. The 1917-D Walking Liberty half dollar with the prominent obverse mintmark represents a two-year design type that is extremely popular with collectors. This delightful Gem exhibits well-detailed design elements and vibrant mint luster, under vivid shades of gold, gray, and violet toning. Population: 75 in 65 (3 in 65+), 5 finer (4/13). NGC ID# 24PR, PCGS# 6570

**1917-D Walking Liberty Half, MS65
Obverse Mintmark, Challenging Type**

4570 1917-D Obverse MS65 PCGS. CAC. Silver centers are lightly blue-tinged, while the border-toning occupying much of each side ranges from green-gold to orange. The obverse mintmark on Walking Liberty half dollars lasted just two years, and this Gem from the final Denver issue has strong luster and eye appeal. Population: 75 in 65 (3 in 65+), 5 finer (4/13). NGC ID# 24PR, PCGS# 6570

**1917-D Reverse Mintmark Half, MS65
Elusive in This Grade**

4571 1917-D Reverse MS65 NGC. Fewer examples of the 1917-D Reverse Mintmark half dollar seem to have been put back compared to its Obverse Mintmark counterpart; the novelty of the new design had likely worn off before the Reverse Mintmark coins appeared. The 1917-D Reverse issue is elusive in Mint State and quite rare in Gem condition. Soft, satiny luster abounds on each side of this eye-appealing Gem, showing lighter centers surrounded by glints of pinkish-gold and deeper charcoal-brown rim accents. The strike is bold overall, including on Liberty's head and branch hand, along with the eagle feathers on the reverse. Census: 24 in 65 (1 in 65+), 4 finer (4/13). NGC ID# 24PS, PCGS# 6571

**1929-S Walking Liberty Half Dollar, MS66+
Only One Numerically Finer Coin at PCGS**

4572 1929-S MS66+ PCGS. CAC. This high-end Premium Gem exhibits well-detailed design elements with just a touch of the typical softness on the centers. Close inspection with a loupe reveals no mentionable surface flaws and shades of champagne-gold and ice-blue toning enhance the terrific eye appeal. Population: 41 in 66 (1 in 66+), 1 finer (4/13). NGC ID# 24RD, PCGS# 6590

**1936 Half Dollar, MS68
Bold Toning and Luster**

4573 1936 MS68 NGC. Uncommonly bright with powerful luster through green-to-gold patina. Though Liberty's branch hand is soft, the impressive all-around preservation makes up for any deficiencies in the strike. A magnificent Depression-era Philadelphia piece. NGC has graded five examples in MS68 with none finer (4/13). NGC ID# 24RM, PCGS# 6598

**1936-S Half Dollar, MS67
Silver-White, Untoned Example**

4574 1936-S MS67 PCGS. Although the 1936-S Walking Liberty half dollar is seen more frequently than earlier S-mints in the series, it is seen in Gem condition far less often than some issues such as the 1937-S or 1940-S. Superb Gems such as the present piece are quite rare, and even Premium Gem 1936-S halves are seldom seen. This silver-white example shows no trace of patina on either side, with frosty luster and excellent eye appeal over surfaces that are essentially immaculate. The head of Liberty is a bit on the soft side, but elsewhere the strike is strong, including the eagle's feathers on the reverse. One of the few finest survivors of the issue. Population: 8 in 67, 0 finer (4/13). NGC ID# 24RP, PCGS# 6600

**1937-S Half Dollar, MS67+
Finest Available Registry Set Candidate**

4575 1937-S MS67+ PCGS. CAC. Spectacular shades of ice-blue, sea-green, and gray patina blanket the obverse of this high-end Superb Gem, while the reverse remains mostly brilliant. The design elements are well-detailed, with some separation evident between Liberty's thumb and fingers. Vibrant mint luster adds to the terrific eye appeal. Population: 26 in 67 (1 in 67+), 0 finer (4/13). NGC ID# 24RT, PCGS# 6603

**1938-D Half Dollar, MS67
Among the Finest Certified**

4576 1938-D MS67 PCGS. CAC. The 1938-D Walking Liberty half dollar has the third lowest mintage (491,600 pieces) behind only the 1921-P and 1921-D, and is consequently prized by collectors. It was recognized as a mintage rarity early on, evidenced by the PCGS population exceeding 4,600 pieces in all grades. Mint State coins are plentiful through the Gem level, after which the population numbers drop significantly. In MS67, the grade of the present coin, PCGS and NGC have seen only 50 specimens and none finer.

Intense luster cascades over both sides, each of which displays speckles of light brown toning, especially around the borders. The design elements are well brought up, save for the usual softness on the branch hand. As expected, the surfaces have been well cared for, enhancing the coin's overall eye appeal. Population: 33 in 67 (2 in 67+), 0 finer (4/13). NGC ID# 24RV, PCGS# 6605

**1945-S Half Dollar, MS67
Frosty and Conditionally Elusive**

4577 1945-S MS67 PCGS. Knob S. Finding a nice Gem 1945-S Walking Liberty half will be an easier task than locating a comparable 1942-S, 1943-S, or 1944-S, but a Superb Gem 1945-S is truly a conditional rarity, a level where PCGS has seen only 13 submissions (with likely duplications thrown in). The frosty silver-white surfaces of this MS67 PCGS-graded piece show just a slight blush of toning, almost imperceptible. The head is decently well-struck, but the branch hand is weak, as usual on the issue. The reverse is a bit soft on the eagle's right (facing) leg but well-detailed elsewhere, and contact marks are at a minimum on both sides. NGC ID# 24SH, PCGS# 6626

**PROOF WALKING LIBERTY
HALF DOLLARS**

**1936 Half Dollar, Premium Gem Proof
One of 3,901 Specimens Struck**

4578 1936 PR66 PCGS. CAC. This first-year proof Walking Liberty half has the look of a much newer coin, as its fields gleam like chrome without more than the faintest suggestion of patina. Only a touch of wateriness to the fields indicates the Mint's relative inexperience with proof coinage after two decades of metaphorical rust. NGC ID# 27V4, PCGS# 6636

**First-Year Proof 1936 Walking Liberty Half
Attractive PR66 Example**

4579 1936 PR66 PCGS. CAC. Chromelike reflectivity is silver in the centers with bold splashes of blue, violet, and antique-gold at the left obverse and bottom reverse. Great detail and eye appeal for this first proof Walking Liberty half dollar issue, mintage 3,901 pieces. PCGS has graded 28 examples as PR67 or finer (4/13). NGC ID# 27V4, PCGS# 6636

**1936 Walking Liberty Half, PR66
First Year for Modern Proofs**

4580 1936 PR66 NGC. CAC. A pleasingly preserved example of the first proof Walking Liberty half dollar issue to see mass release, one of just 3,901 specimens sold. Well-defined, if a trifle shallow in the mirrors, with significant gray, green-gold, and blue toning stretching across each side. NGC has graded 75 examples as PR67 or finer (4/13). NGC ID# 27V4, PCGS# 6636

**1936 Walking Liberty Half, PR67
None Numerically Finer at NGC**

4581 1936 PR67 NGC. A spectacular Superb Gem example of the first proof Walking Liberty half dollar, this coin displays fully struck design elements and deeply reflective fields. The Mint used an all-brilliant finish for proofs of this era, so the devices show only modest amounts of mint frost. No mentionable distractions are evident and eye appeal is outstanding. The type was issued in proof format for just seven years, though the designs were resurrected decades later for the silver eagle series in various formats, including brilliant proof. Census: 75 in 67 (1 in 67+), 0 finer (4/13). NGC ID# 27V4, PCGS# 6636

1936 Half Dollar, PR67
Popular First-Year Proof Issue

4582 1936 PR67 PCGS. Collectors never tire of the 1936 Walking Liberty half proof issue. Not only is it the first of its kind, it is also the lowest-mintage proof in the series by a considerable margin, and the optimal representation of the beautiful Adolph A. Weinman design. The Superb Gem level is about as high as practicably obtainable. Like most examples, this is a low-contrast piece with just a light touch of rim toning. The strike is full throughout, however (back to that popularity point again), and there are no mentionable signs of contact. Population: 27 in 67, 1 finer (4/13). NGC ID# 27V4, PCGS# 6636

1936 Walking Liberty Half Dollar, PR67
Only One Finer PCGS Example

4583 1936 PR67 PCGS. The Philadelphia Mint resumed proof set offerings in 1936, after a hiatus of two decades. Only 3,901 Walking Liberty half dollars were produced, and few specimens can match the quality and appeal of this spectacular Superb Gem. The fields shimmer with illimitable depth of reflectivity. At first the coin appears to be brilliant, but when closely inspected a hazy gray-golden patina is apparent. A short arc of russet toning is located between 11 and 12 o'clock on the obverse rim. Simply spectacular quality. Population: 27 in 67, 1 finer (4/13).
Ex: Long Beach Signature (Heritage, 5/2007), lot 631.
From The MKJ Collection, Part II. NGC ID# 27V4, PCGS# 6636

1937 Half Dollar, PR68
Impeccable Preservation

4584 1937 PR68 NGC. The second-year proof 1937 Walking Liberty half dollar issue saw about a 50% increase over the first-year 1936 — 5,700 proofs compared to 3,900. At the PR68 grade level, however, the 1936 is nearly unobtainable — PCGS has graded a single example of the 1936 in PR68, NGC has graded none — while the 1937 in PR68 is merely extremely difficult. This example is one of 19 such submissions at NGC, and none are finer (4/13). The surfaces on this piece display extraordinary preservation for an issue that was often mishandled by collectors unaccustomed to proof coinage. The barely toned surfaces show the desired full strike, and there are simply no mentionable impairments. NGC ID# 27V5, PCGS# 6637

1937 Walking Liberty Half, PR68
None Finer at PCGS

4585 1937 PR68 PCGS. CAC. Only 5,728 proof Walking Liberty half dollars were struck in 1937, the second year of the Mint's revived commercial proof offerings. This coin is one of the finest survivors from that tiny mintage, both in terms of technical quality and eye appeal. Khaki-gold and ruby-red tints adorn the margins of this magnificent PR68 example, while the centers offer only a whisper of ice-blue and olive patina. A pinpoint-sharp specimen with satiny reflective surfaces and immaculate preservation. The CAC label confirms the outstanding eye appeal. Population: 10 in 68, 0 finer (4/13).

Ex: FUN Signature (Heritage, 1/2008), lot 2156; Houston Signature (Heritage, 12/2008), lot 1517.

From The MKJ Collection, Part II. NGC ID# 27V5, PCGS# 6637

1938 Walking Liberty Half, PR68
Among the Finest Certified

4586 1938 PR68 PCGS. A stunning proof with excellent field/device contrast that falls just shy of a Cameo designation. The surfaces have pale heather toning on both sides with a semi-circular crescent of gold and iridescent toning at the left obverse and reverse. Population: 12 in 68, 0 finer (4/13).

Ex: Houston Signature (Heritage, 12/2008), lot 1521.

From The MKJ Collection, Part II. NGC ID# 27V6, PCGS# 6638

1939 Walking Liberty Half, PR68
None Numerically Finer at PCGS

4587 1939 PR68 PCGS. CAC. A pearl-like iridescence covers portions of this example, with attractive rainbow-colored toning appearing in portions of the fields. Splashes of light brown color are also present. The piece exhibits a sharp strike and displays brilliant luster. Population: 28 in 68, 0 finer (4/13). NGC ID# 27V7, PCGS# 6639

1942 Half Dollar, PR68
Sharply Detailed and Well-Preserved

4588 1942 PR68 PCGS. The mirrored surfaces are thinly patinated with a veil of soft grayish-blue and yellow-gold color, and are devoid of any distracting contact marks. An exacting strike leaves complete definition on the design features, enhancing the coin's splendid eye appeal. Very scarce in this level of preservation. Population: 38 in 68, 1 finer (4/13).

Ex: Baltimore Signature (Heritage, 7/2003), lot 7965; Houston Signature (Heritage, 12/2008), lot 1531.

From The MKJ Collection, Part II. NGC ID# 27V9, PCGS# 6642

FRANKLIN HALF DOLLAR

Full Bell Lines 1949-D Half, MS66
None Finer at PCGS

4589 1949-D MS66 Full Bell Lines PCGS. Distinctly toned gold-orange at the obverse margins with dots of crimson at parts of the rims, carryover from the deep edge hues visible through the holder, and satiny medium-gray prevailing elsewhere. The strike is decidedly above-average for the date. Population: 31 in 66 Full Bell Lines, 0 finer (4/13). NGC ID# 24SU, PCGS# 86654

PROOF FRANKLIN HALF DOLLARS

1951 Half Dollar, PR66 Deep Cameo
Border-Toned Beauty

4590 1951 PR66 Deep Cameo PCGS. Blue and reddish-gold toning occupies the borders, more prominently on the reverse, while the silver interiors offer excellent contrast between mirrors and frost. This Deep Cameo Premium Gem proof is among the best survivors from the second proof Franklin half dollar issue. Population: 15 in 66 (1 in 66+) Deep Cameo, 1 finer (4/13). NGC ID# 27VB, PCGS# 96692

1953 Half Dollar, PR68 Cameo
Great Registry Coin

4591 1953 PR68 Cameo PCGS. Lightly frosted on the devices and mirrored in the fields, all silver without significant color or patina. A high-quality specimen of its 60-year-old issue and one of the best-preserved in the PCGS *Population Report*, which lists only five examples at PR68 Cameo and no Cameo coins finer (4/13). *From The MKJ Collection, Part II. NGC ID# 27VD, PCGS# 86694*

1954 Franklin Half, PR68 Deep Cameo
Among the Few Finest Known

4592 1954 PR68 Deep Cameo PCGS. Those who do not specialize in Franklin halves would likely be quite surprised to discover how few Deep Cameo examples exist for many proof issues in the series. In general, it took an early strike from fresh dies, both front and back, as well as the luck of excellent subsequent preservation to make the grade. The present 1954 is one of only five submissions at PCGS in Deep Cameo, and none are finer (4/13). Under a light, the surfaces easily show jet-black-fields contrasting against silver-white devices. Contact marks are virtually nonexistent. A Registry Set essential, one which we note is missing in this grade from several of the finest PCGS Sets. PCGS# 96695

1961 Doubled Die Reverse Half, PR67
Seldom Seen Doubling on Proofs

4593 1961 Doubled Die Reverse PR67 PCGS. FS-801. The reverse doubling is readily evident on the UN in UNITED, on every letter in E PLURIBUS UNUM, and the HA of HALF. Each side is fully brilliant with deeply mirrored fields. A sharp strike is visible on all the design elements. Population: 11 in 67, 0 finer (4/13).
Ex: Central States Signature (Heritage, 5/2007), lot 3183.
From The MKJ Collection, Part II. PCGS# 6689

PROOF KENNEDY HALF DOLLAR

1964 Kennedy Half, PR68 Deep Cameo
Popular Accented Hair Variety

4594 1964 Accented Hair PR68 Deep Cameo PCGS. A marvelous example of this first-year variety, one that was issued early in the year before the new Kennedy half design was modified to deemphasize the wavy hair below President Kennedy's part. It was rumored that the President's widow, Jacqueline Kennedy, disliked the strong detail in the hair. A practiced eye can spot the strong, incisive hair detail that marks the variety with little problem, but the easiest identifier, as noted in *Cherrypickers'* fourth edition, volume two, is the broken bottom-left serif on the I of LIBERTY. Few coins indeed can match the quality of the present silver-white, near-flawless specimen, and the contrast between the inky-black fields and crisply frosted devices is remarkable. Population: 8 in 68 Deep Cameo, 0 finer (4/13).
Ex: FUN Signature (Heritage, 1/2008), lot 2239; FUN Signature (Heritage, 1/2009), lot 3919.

EARLY DOLLARS

1795 Flowing Hair Dollar, VF35
Three Leaves, B-5, BB-27 Variety

- 4595** 1795 Flowing Hair, Three Leaves VF35 PCGS. B-5, BB-27, R.1. Bowers-Borckardt Die State III. The large "bar" in the left obverse field, near the top curl, identifies this coin as a representative of the available BB-27 variety. This Choice VF specimen retains much of its original design detail but, like nearly all examples of BB-27, it was softly struck on the centers. The pleasing surfaces show a scattering of minor contact marks and a few hints of pale gold and pink toning. NGC ID# 24WZ, PCGS# 6852

1795 Flowing Hair, Three Leaves Dollar, VF35
B-7, BB-18

- 4596** 1795 Flowing Hair, Three Leaves VF35 NGC. B-7, BB-18, R.3. Bowers-Borckardt Die State I. A sizeable majority of Three Leaves 1795 Flowing Hair dollars are the B-5, BB-27 variety. B-7 is comparatively scarce, and can be identified by two die flaws near the left ribbon end. This representative displays rich golden-brown and gunmetal-gray toning. Void of adjustment marks, though there are a few minor marks on the field beneath the chin and inconspicuous abrasions throughout the reverse border. NGC ID# 24WZ, PCGS# 6852

1795 Dollar, B-5, BB-27, XF45
Original and Appealing

- 4597** 1795 Flowing Hair, Three Leaves XF45 PCGS. B-5, BB-27, R.1. Bowers-Borckardt Die State II. The 1795 Flowing Hair, Three Leaves variety known as the B-5, BB-27 is a boon to all numismatists, as without it, the type would be considerably less available. The obverse style is generally known as the Head of 1795, with pointed bust tip far from star 15. The well-known diagnostic on the obverse is the extra bar of metal that appears behind the middle hair curls. This Choice XF early dollar displays gorgeous eye appeal with iridescent rim toning contrasting against dove-gray (obverse) and pinkish-gray (reverse) centers with a totally original appearance. The die crack from the olive-stem tip is just beginning to form. NGC ID# 24WZ, PCGS# 6852

1795 B-5, BB-27 Flowing Hair Dollar, AU55
Well-Detailed for the Type

4598 1795 Flowing Hair, Three Leaves AU55 PCGS. CAC. B-5, BB-27, R.1. Die State III. This is the most common of all the 1795 varieties. It is most easily distinguished by the “bar” behind Liberty’s head, and the reverse has three leaves beneath each wing, 13 berries, and four leaves below the first S of STATES. This intermediate die state shows a light die crack from the end of the left stem to the border. While a commonly encountered die state, most examples in this state display better central definition than earlier and later states.

The importance of this variety as a type coin for 1795 is explained in Bowers’ *Silver Dollars and Trade Dollars of the United States:* “Due to the depth of the Miss Liberty portrait in the die, the resultant coins were in high relief. Because of this, the hair wore quickly at the center of the obverse, with the result that pieces grading VF or lower usually have little detail still remaining. On some (but not all) higher grade coins, usually Die State III in EF or finer preservation, the hair detail at the center of the obverse and the eagle’s breast feathers are well defined.”

The surfaces retain much brightness and luster even through the several layers of blue, gray, and rose-colored toning that is splashed over each side. As mentioned above, the central details are better preserved than usually seen. The only detractor is a barely perceptible, straight hairline scratch across the center of the obverse, running from star 6 to star 12. This will be invisible to online viewers, and in-person viewers will require magnification; nevertheless, for the sake of full disclosure we want all potential bidders to know all features of this piece.

Ex: *National Money Signature* (Heritage, 3/2007), lot 864; *FUN Signature* (Heritage, 1/2008), lot 2916. NGC ID# 24WZ, PCGS# 6852

1795 Two Leaves Dollar, B-1, BB-21, XF
The ‘1795/1195’ Obverse

4599 1795 Flowing Hair, Two Leaves XF40 PCGS. CAC. B-1, BB-21, R.2. Bowers-Borckardt Die State I. The obverse die shows five prominent curls in back of Liberty’s head with a faint extra curl below the third from the top. A point of star 1 just touches the lowest curl. The 7 in the date repunched over an erroneous 1 has led to this obverse being called “1795/1195” in some of the literature, the die also used to strike BB-22 and BB-23. The Two Leaves reverse shows 19 berries arranged nine left, 10 right. This XF example shows the early die state with lowest curl still attached. The coin offers nice, original surfaces with only moderate wear but no mentionable distractions. The medium gray color and CAC endorsement add to the strong collector appeal. NGC ID# 24WZ, PCGS# 6853

**1795 Bust Dollar, VF35
Off Center, B-14, BB-51**

- 4600** 1795 Draped Bust, Off Center VF35 PCGS. B-14, BB-51, R.2. Bowers-Borckardt Die State I. The Draped Bust obverse replaced the Flowing Hair motif in 1795, with two die varieties known for the date and type. The bust of Liberty is off center on this coin, identifying the BB-51 variety. This Choice VF specimen retains much of the interior detail on the devices and the lightly abraded surfaces display pleasing golden-brown and blue-steel patina. PCGS# 96858

**1796 Draped Bust Dollar, VF35
Large Date, Small Letters, B-5, BB-65**

- 4601** 1796 Large Date, Small Letters VF35 PCGS. B-5, BB-65, R.2. Bowers-Borckardt Die State II. The available BB-65 variety is easily identified by a large die lump between I and C in AMERICA. This pleasing Choice VF specimen retains much of its original design detail and shows no sign of adjustment marks. The light gray surfaces show a couple of planchet voids on the obverse but only minor abrasions are present. Population: 28 in 35, 69 finer (4/13). PCGS# 6861

**1798 Draped Bust Dollar, VF20
Small Eagle, 13 Stars, B-1, BB-82**

- 4602** 1798 Small Eagle, 13 Stars VF20 PCGS. B-1, BB-82, R.3. Bowers-Borckardt Die State III. The Small Eagle reverse was retired in 1798 and the combination of that reverse with the 13 stars obverse easily identifies the BB-82 variety. This moderately worn VF specimen displays problem-free dove-gray surfaces with a rim bruise at 10 o'clock on the obverse and some heavy adjustment marks on the reverse. NGC ID# 24X5, PCGS# 6867

**1798 Small Eagle Dollar, 13 Stars
B-1, BB-82, XF40, Popular Variety**

- 4603** 1798 Small Eagle, 13 Stars XF40 PCGS. B-1, BB-82, R.3. Bowers-Borckardt Die State II, lowest curl on the obverse is incomplete due to die lapping. The 1798 Small Eagle silver dollars fall into two groups based on the reverse die, showing either 15 stars (B-2, BB-81) or 13 stars as on the present variety. All other 1798 dollars are of the Heraldic Eagle design type. The present example is quite attractive for the grade, showing sandy-pink color over surfaces with only a few scattered, trivial marks. This coin would make a nice example for a collector working on a date set or major variety set of early silver dollars. Population: 29 in 40, 37 finer (4/13). NGC ID# 24X5, PCGS# 6867

**1798 Heraldic Eagle Dollar, XF45
Four Berries, B-8, BB-125**

- 4604** 1798 Large Eagle, Pointed 9, Four Berries XF45 PCGS. B-8, BB-125, R.2. Bowers-Borckardt Die State I-II. An unusually early die state of this available Heraldic Eagle Bolender variety. Repunching is visible on stand of the 7 in the date, a feature unrecorded in the standard references. The evenly struck and well defined surfaces display rich walnut-brown and olive-gray toning. Liberty's cheek, curls, and drapery show minor wear. Light marks are present but of no importance for the grade. NGC ID# 24X6, PCGS# 6873

**1798 Draped Bust Dollar, XF45
Rare B-26, BB-114 Variety**

- 4605 1798 Large Eagle, Pointed 9 XF45 NGC. B-26, BB-114, R.5.** Bowers-Borckardt Die State V. An extensive network of die cracks on both sides indicates this coin was struck from a late (nearly terminal) state of the dies. The BB-114 variety is identified by the die crack that starts under the 9 in the date and extends through the two inner points of star 1, together with the reverse star touching the upper point of the eagle's beak. The surviving population of BB-114 numbers no more than 35-60 examples in all grades and this Choice XF specimen is probably in the lower reaches of the Condition Census for the variety. Pleasing shades of gold and bluish-gray toning blanket the surfaces of both sides, with traces of mint luster underneath. The central reverse was softly struck and some light adjustment marks are visible above the eagle's head. A rare prize for the student of die varieties and die states. NGC ID# 24X6, PCGS# 6873

**1799 Dollar, Colorful AU55
7x6 Stars, B-16, BB-158**

- 4606 1799 7x6 Stars AU55 NGC. B-16, BB-158, R.2.** Bowers-Borckardt Die State III. A well struck Large Eagle type coin with only a hint of wear on Liberty's cheek and shoulder. Caramel-gold, lime-green, and ice-blue toning adorns both sides. Smooth aside from a cluster of thin marks on the lower left obverse field. NGC ID# 24X7, PCGS# 6878

**1799 Draped Bust Dollar, AU55
B-5, BB-157 Variety**

- 4607 1799 7x6 Stars AU55 NGC. B-5, BB-157, R.2.** Bowers-Borckardt Die State II. The clash marks above the date, the imperfect U in UNITED, and the points of the last two stars on the right touching the clouds identify the popular BB-157 variety. This well-detailed Choice AU example shows traces of mint luster under dark gray and amber patina. NGC ID# 24X7, PCGS# 6878

1799 Draped Bust Dollar, MS63
Condition Census Example
Scarce B-6, BB-162 Variety

4608 1799 7x6 Stars MS63 PCGS. B-6, BB-162, R.4. Bowers-Borckardt Die State III. This magnificent 1799 Draped Bust dollar is the finest specimen of the BB-162 variety listed in the PCGS Population Report and it occupies the second position in Q. David Bowers list of Notable Specimens in his new *Encyclopedia of United States Silver Dollars 1794-1804* (2013 edition). This coin should be a cornerstone in an advanced collection of early dollar varieties.

Production of Draped Bust dollars reached a record high in 1799, with a reported mintage of 423,515 pieces. Including the 1799/8 overdates, 22 die varieties are known for the date. This coin represents the scarce BB-162 variety, with the indented upper right corner of the 1 in the date and the leaf pointing to the center of the upright of I in AMERICA. The hardy obverse die was used previously to strike the BB-156, BB-157, and BB-161 varieties, and was used again on BB-163 and BB-164. This was the only use of the reverse die.

In the Haseltine Type Table Collection (John W. Haseltine, 11/1881), lot 135, Haseltine labeled this variety "very scarce." M.H. Bolender evaluated it as R.5, but a few more specimens have surfaced since he did his work in the early 1950s. Today, numismatists believe 300-500 examples survive in all grades, with most grading no better than VF. Mint State specimens are rare.

The coin offered here is a spectacular Select specimen, well-centered and sharply detailed, with no adjustment marks or planchet flaws. Both sides are darkly toned in attractive shades of russet-gold and steel-blue, with vibrant mint luster underneath. Thin die cracks show at the obverse rim, opposite the bust point and through stars 9-13. Another crack is seen on the reverse through OF, the wing, AMER, to the leaf. Eye appeal is terrific. Students of die varieties and die states will find no finer example for a major collection. Population: 1 in 63, 0 finer (4/13).

Ex: FUN Signature (Heritage, 1/1997), lot 5303; May Sale (Superior, 5/2003), lot 2727; Pre-Long Beach Auction (Ira and Larry Goldberg, 5/2009), lot 614; Los Angeles ANA Sale (Bowers and Merena, 8/2009), lot 1656; Pre-Long Beach Auction (Ira and Larry Goldberg, 5/2010), lot 982; Baltimore Sale (Stack's Bowers, 3/2012), lot 4116; Baltimore Sale (Stack's Bowers, 6/2012), lot 3018.

Note: In his new reference Bowers lists this coin as the specimen in Stack's sale of the Cornell University Collection in May 1975, lot 910, but the plate does not match. NGC ID# 24X7, PCGS# 6878

1799 Draped Bust Dollar, MS63
Popular 7x6 Stars, B-16, BB-158 Variety
Attractive Multicolor Toning, Nice Luster

4609 1799 7x6 Stars MS63 PCGS Secure. B-16, BB-158, R.2. Bowers-Borckardt Die State I. Mint records indicate 423,515 Draped Bust dollars were struck in 1799, the largest mintage of the series. However, many of these coins may have been dated 1798, being struck from dies of the previous year that were still serviceable. Similarly, some 1799-dated coins may have been struck in 1800. Experts estimate the actual mintage of 1799-dated coins was probably about 395,000 examples, give-or-take 10%.

A total of 22 die varieties are known for the year, with three varieties displaying a distinctive 1799/8 overdate. The present coin represents the BB-158 variety with the numerals 1 and 7 closely spaced in the date and the U in UNITED missing the upper-left serif. The BB-158 was the only use of the obverse die, but this variety did have a remarriage. The hardy reverse die was first used to strike the early die states of this variety, then combined with another obverse to strike BB-159, then remarried with this obverse to strike the later die states of BB-158, and later used to strike BB-160 and BB-161. While the BB-158 is not difficult to locate in circulated grades, Mint State examples are quite rare.

The present coin is a delightful Select example with well-detailed design elements that show intricate detail on the strands of Liberty's hair and the eagle's feathers. Much original mint luster remains, beneath a dark patina of attractive blue, gray, amber, and champagne-gold hues. The well-preserved surfaces show only minor signs of contact and no adjustment marks are evident. Visual appeal is outstanding. Population: 11 in 63 (1 in 63+), 16 finer (4/13). NGC ID# 24X7, PCGS# 6878

1800 Bust Dollar, XF45
Popular B-16, BB-187 Variety

- 4610** 1800 XF45 NGC. CAC. B-16, BB-187, R.2. Bowers-Borckardt Die State IV. The bold clash marks at the date identify the late die state of the BB-187 variety. This attractive Choice XF specimen retains much of its original interior design detail and traces of mint luster shine through the pleasing gray and blue-steel patina. NGC ID# 24X9, PCGS# 6887

1800 Bust Dollar, XF40
Famous AMERICA1, B-19, BB-192 Variety

- 4611** 1800 AMERICA1 XF40 PCGS. B-19, BB-192, R.2. Bowers-Borckardt Die State II. The famous AMERICA1 reverse and the position of the obverse stars with star 1 closer to the curl than star 7 is to L identifies the BB-192 variety. The lightly abraded surfaces of this attractive XF specimen display pleasing gray and blue-steel patina and the design elements retain much of their original detail. Population: 11 in 40, 33 finer (4/13). PCGS# 6892

1802 Dollar, B-6, BB-241
A Choice AU Example

- 4612** 1802 AU55 PCGS. CAC. B-6, BB-241, R.1. Bowers-Borckardt Die State III, the most commonly seen state with significant lapping to the hair curls at the back of Liberty's head. The 1802 B-6/BB-241 is among the most accessible early Bust dollar die pairs, yet even it becomes challenging in the AU and Mint State grades. This example is warmly lustrous under gold-orange and green patina with occasional glimpses of silver and a few dots of deep color on the obverse. Both sides are well-defined for the date with only minor wear and marks. An excellent type coin for the collector who values eye appeal over a grade in the 60s. NGC ID# 24XB, PCGS# 6895

1803 Small 3 Dollar, Toned XF40
B-4, BB-254

- 4613** 1803 Small 3 XF40 NGC. B-4, BB-254, R.3. A majority of 1803 dollars are the Large 3 BB-255. BB-254 is scarce and seen less often than another Small 3 variety, BB-252. The present XF example displays dusky golden-brown and steel-blue toning. Lightly marked overall despite a few unimportant obverse bumps. NGC ID# 24XD, PCGS# 6900

GOBRECHT DOLLARS

1836 Original Gobrecht Dollar, Proof Details Judd-60, Die Alignment I

- 4614** 1836 Name on Base, Judd-60 Original, Coin Alignment, Pollock-65, R.1, PCGS Genuine. Proof. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (the center of Liberty's head is opposite the D in DOLLAR). The die scratch is very faint above the eagle's wing, but is an indication this dollar came from the second striking period for Die Alignment I pieces. In our opinion, this coin has the details of a VF specimen that has been cleaned. The surfaces are peppered with numerous small abrasions and there are several larger ones on the reverse. The fields and recesses of the devices are charcoal-gray with sharply contrasting near-brilliant high points. PCGS# 11225

1836 Gobrecht Dollar, Deeply Mirrored PR60 Judd-60, Die Alignment I

- 4615** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1, PR60 NGC. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (the center of Liberty's head is opposite the D in DOLLAR). This is an extraordinary Gobrecht dollar. It lacks the diagonal die clash line above the eagle's wing, indicating it was one of the first 400 struck in the first striking period. However, it also does not show the chip above the A. After consultation with John Dannreuther, his best guess is up to 200 coins may have been produced before the chip appeared.

What is so riveting about this particular coin is the depth of mirroring in the fields. It initially reminded us of the Korein-47 proof that is now in the ANS. That coin is now graded PR64 Cameo. This piece lacks the frost on the devices that the Korein coin has, but it displays mirrors in the fields that are much deeper than usually seen on DAI 1836 dollars. Undoubtedly this is because of the early die state.

This is a brilliant coin that has obviously been cleaned at some point. However, in spite of the hairlines present, the fields display extraordinary depth of reflectivity. There also is no trace of high-point friction, and there is just the slightest softness of strike, seen only on the highest portion of the eagle's breast feathers. It is hard to imagine a PR60 Gobrecht with more to offer than this coin. In fact, most higher graded dollars lack the depth of mirroring seen here. PCGS# 11225

1839 Gobrecht Dollar, Lightly Toned PR64
Judd-104 Restrike, Rare Die Alignment III

4616 1839 Name Omitted, Judd-104 Restrike, Pollock-116, R.3, PR64 PCGS. Silver. Reeded Edge. Die Alignment III (head of Liberty opposite the N in ONE after a coin turn). After many years of controversy, much of the contention about 1839 Gobrecht dollars seems to have died down. The controversy has mostly surrounded the existence or non-existence of Die Alignment I or soaring eagle 1839 dollars. The fact that none have emerged seems to render the point moot. However, none doubt the rarity of the Die Alignment III dollars. These pieces have a coin turn, and the eagle flies level. It is generally thought these dollars were produced during a later striking period, perhaps as late as the 1870s. This particular piece shows the expected die cracks but they are very light, indicating an early restriking period. Die cracks on the reverse of all Gobrecht dollars is light, some might justifiably say microscopic, but on this piece the only apparent crack is through the bottom of the letters LLAR, and another connecting crack between D and O.

No mintage figures exist for the restrike 1839 dollars. Estimates range widely. The groundbreaking Revisionists, James Gray and Mike Carboneau, estimated a mintage of approximately 100 Type III 1839 dollars. Saul Teichman approaches the matter somewhat differently without estimating the mintage, but he estimates that only 18 to 20 pieces exist today in this alignment. Type III dollars are almost always found in high grades, another indication of a later striking period.

This is such a high-grade piece. The fields show remarkable depth of reflectivity, mirroring that is not found on coins struck in the 1830s. Strike details are also complete on each side, including Liberty's hair, obverse stars, Liberty's foot and sandal, and all the eagle's plumage. Each side displays light gray-golden toning with just a hint of powder-blue around the margins. There are no obvious or detracting contact marks on either side of this exceptional Gobrecht dollar. PCGS# 11446

SEATED DOLLARS

1844 Seated Dollar, Conditionally Rare MS64 Only One Certified Coin Finer

4617 1844 MS64 PCGS. CAC. The year 1844 saw a significant drop in silver dollar production (20,000 business strikes) from the previous three years, resulting from scant supplies of silver bullion. This issue can be located in circulated grades with relatively little difficulty. Mint State pieces, on the other hand, are rare. PCGS has graded just 35 Uncirculated examples, including the present near-Gem (one of two MS64s), and an MS65 (5/13). NGC has seen a solitary MS64 and none finer.

Whispers of reddish-gold, gray, lavender, and electric-blue adhere to both sides, each of which exhibits well-struck design elements. A milling mark on Liberty's chin will aid in the identification of this particular coin.

As Bowers (1993) notes, business strikes of 1844 have "four tiny vertical stripes composing each large vertical stripe on the obverse shield, whereas all other business strikes in the Liberty Seated series from 1840 to 1873 have just three stripes. The feature is considered to be a doubled die." NGC ID# 24YE, PCGS# 6930

1871-CC Seated Dollar, AU50 Low-Mintage Key Date

4618 1871-CC AU50 NGC. The 1871-CC Seated Liberty dollar claims the lowest business-strike mintage of the series, at 1,376 pieces. Most of the coins seem to have circulated locally in the 19th century. The date is elusive in all grades and conditions, although not quite as rare as the 1873-CC, which has a slightly higher mintage but suffered more from melting.

This attractive AU specimen is well-detailed, with minimal traces of wear and only minor abrasions. The surfaces are lightly toned in a mottled pattern of champagne-gold and lavender-gray hues. High-grade specimens are seldom available and this coin should find a home in a fine collection of Seated dollars. Census: 2 in 50, 19 finer (4/13). NGC ID# 24ZH, PCGS# 6967

PROOF SEATED DOLLARS

1865 Seated Dollar, PR64+ Cameo Contrasted Through Toning

4619 1865 PR64+ Cameo PCGS. CAC. A boldly appealing Seated dollar specimen struck the year the Civil War ended. Light gray, gold, and orange patina lights up through reflectivity across each side, while the margins offer cooler hues such as sea-green and blue. Distinctly frosted devices offer attractive contrast. Population: 14 in 64 (1 in 64+) Cameo, 9 finer (4/13). PCGS# 87008

1865 Seated Dollar, PR65 Cameo
Rare Mix of Preservation and Contrast

- 4620** 1865 PR65 Cameo PCGS. With just 500 specimens struck for this end-of-the-Civil-War proof Seated dollar issue, the date already is decently challenging despite a sizable survival rate. Should the collector demand at least Cameo-level contrast and Gem-grade preservation, the options dwindle drastically. This PR65 Cameo specimen, however, checks off all the boxes. Its patina, pale silver-blue with streaks of orange, scarcely dampens the strong contrast between flashy mirrors and boldly struck, impressively frosted devices. Great all-around eye appeal. Population: 9 in 65 Cameo, 0 finer (4/13). PCGS# 87008

1868 Seated Liberty Dollar, PR65
Only 600 Examples Struck

- 4621** 1868 PR65 NGC. Shades of lavender-gray, ice-blue, and champagne-gold toning enhance the considerable eye appeal of this impressive Gem. The design elements are sharply detailed and the deeply reflective fields shine through the patina. Only 600 proof Seated Liberty dollars were struck in 1868. Census: 25 in 65, 47 finer (4/13). NGC ID# 252P, PCGS# 7016

1869 Seated Dollar, PR66
Deeply Toned Example

- 4622** 1869 PR66 PCGS. CAC. Notwithstanding the reported mintage of 423,700 1869 Seated Liberty dollars for circulation and 600 proofs, the issue is especially elusive in high grade in either format, especially so in the higher Mint State grades. Apparently most of those coins were either melted at some point or exported to the Orient, which in the end amounts to virtually the same fate. The present Premium Gem proof is deeply toned, but under a light the patina resolves into appealing shades of blue, pink, and rose. The strike is full throughout both sides, and to us the deep toning merely reinforces the originality of this example, among the few finest at PCGS. Population: 7 in 66, 0 finer (4/13). NGC ID# 252R, PCGS# 7017

Choice Proof 1872 Silver Dollar

- 4623** 1872 PR64 NGC. The stone-gray surfaces transform to golden-brown and lime-green when rotated beneath a light. This well struck near-Gem has attractive eye appeal. A loupe reveals faint hairlines beneath the toning. IN GOD WE TRUST is die doubled, as often seen on the Motto type. Housed in a prior generation holder. Just 950 proofs were struck. NGC ID# 252U, PCGS# 7020

TRADE DOLLARS

1875-S Trade Dollar, MS65 Frosty and Sharply Struck

- 4624 1875-S MS65 PCGS.** Type One Reverse. Large S. The new Type Two dies, showing the ribbon ends pointing downward (rather than left) and lacking a berry under the right (facing) eagle's claw, apparently arrived rather late in the year in San Francisco, and thus form a minority of the 4 million-plus Trade dollars struck there in 1875. This Gem is a superb type coin with largely silver-white surfaces complemented by a touch of iridescent patina, most prominent at the upper-left obverse rim. Frosty luster, a sharp strike, and a lack of mentionable marks put this piece among the finest survivors. A great addition to a type or S-mint set. Population: 24 in 65, 11 finer (4/13). NGC ID# 2536, PCGS# 7039

1877-CC Trade Dollar, MS62 Strong Eye Appeal for the Grade

- 4625 1877-CC MS62 PCGS.** Although the 1877-CC Trade dollar claims a respectable mintage of 534,000 pieces few high-grade examples were saved for numismatic purposes. As a result, Mint state coins are quite elusive today. This attractive MS62 specimen is well-detailed, with vibrant mint luster and a scattering of minor handling marks that explain the grade. Population: 31 in 62, 40 finer (4/13). NGC ID# 253D, PCGS# 7045

1877-S Trade Dollar, MS65 Seldom Seen So Fine

- 4626 1877-S MS65 PCGS. CAC.** Large S. The 1877-S Trade dollar saw what what by far the largest mintage in the series, at nearly 10 million pieces. The introduction of the Morgan dollar in the following year would ultimately doom the series, even though both 1878-S Morgan and Trade dollars were struck. The very ubiquity of the 1877-S Trade dollar at one time likely relegated it to circulation as "nothing special." Today, however, the average certified survivor is only Choice AU. Gems such as this piece, certified in a PCGS green-label holder, are seldom seen. The obverse is mostly untuned silver-gray with a light blush of rose, while the reverse displays deeper orange and amber hues. Generous luster prevails on both sides, and the strike is quite bold, if a touch short of full. A pair of diagonal marks on the lower part of Liberty's rock are among few signs of contact. Population: 26 in 65, 7 finer (4/13). NGC ID# 253E, PCGS# 7046

1877-S Trade Dollar, Toned MS65

- 4627 1877-S MS65 PCGS. CAC.** Large S. Attractive rose-red, powder-blue, jade-green, and tobacco-brown shades visit portions of this lustrous Gem, though light chestnut-tan toning is more prevalent. The strike is uncommonly intricate for a commercial issue Trade dollar, with needle-sharp definition on the eagle's legs and Liberty's hair. Marks are refreshingly few, and those that exist are inconsequential. Minor lapping is limited to the leaves and berries of Liberty's branch. Slight obverse die doubling is seen on wheat grains near the T in LIBERTY and the ribbon border near BER. An outstanding silver type coin. Population: 26 in 65, 7 finer (4/13). NGC ID# 253E, PCGS# 7046

1878-S Trade Dollar, MS65 Last Business-Strike Issue

- 4628 1878-S MS65 NGC.** The year 1878 saw the last business-strike mintage of Trade dollars with a token mintage at the Carson City facility and a whopping production of more than 4 million pieces at the San Francisco Mint. Few specimens were saved by contemporary collectors, however, and S-mint coins are quite elusive at the MS65 level. This lustrous Gem exhibits well-detailed design elements under attractive shades of bluish-gray and greenish-gold patina. Census: 24 in 65, 15 finer (4/13). NGC ID# 253G, PCGS# 7048

PROOF TRADE DOLLARS

1873 Trade Dollar, Near-Gem Proof First-Year Issue

- 4629 1873 PR64 NGC.** At the end of the Seated dollar series, a replacement appeared in the form of the Trade dollar, although the design was not intended for domestic circulation. Of course, contemporary collectors still desired proof examples for their cabinets. Although just shy of Gem quality, this is a delightful proof with lovely heather, lilac, and blue toning that deepens near the borders. NGC ID# 27YJ, PCGS# 7053

First-Year 1873 Trade Dollar Colorful Near-Gem Proof

- 4630 1873 PR64 PCGS. CAC.** The Trade dollar made its proof debut in 1873, and this richly toned near-Gem is among the better-preserved survivors from an issue of 865 specimens. Peach inner hues give way to blue and violet at the margins with touches of green at parts of the rims. Population: 36 in 64, 7 finer (4/13). NGC ID# 27YJ, PCGS# 7053

1873 Trade Dollar, PR65 Toned First-Year Coin

- 4631 1873 PR65 NGC.** This dusky-yet-delightful Gem proof has gold, peach, and blue overtones across surfaces that still gleam at the correct angles to the light. A faint fingerprint is noted just above the ocean behind Liberty's foot. The 1873 Trade dollars mark the ill-fated denomination's debut in both business-strike and proof formats. NGC ID# 27YJ, PCGS# 7053

**1874 Trade Dollar, PR65
Spectacular Multicolor Toning**

- 4632 1874 PR65 NGC.** Both sides of this impressive Gem are blanketed in spectacular shades of cobalt-blue and pale gold toning. The design elements are sharply rendered and the deeply mirrored fields shine through the patina. Only 700 proof Trade dollars were coined in 1874. Census: 16 in 65, 9 finer (4/13). NGC ID# 27YK, PCGS# 7054

**1879 Trade Dollar, PR64
Hidden Cameo Contrast**

- 4633 1879 PR64 PCGS. CAC.** A stunning Choice proof, this 1879 Trade dollar features gorgeous gold, russet, and blue toning over deeply mirrored fields and lustrous devices that combine to provide excellent contrast. The depth of toning prevents a cameo designation of this beauty. PCGS has graded just 62 finer proofs (4/13). NGC ID# 27YR, PCGS# 7059

**1879 Trade Dollar, PR65 Cameo
Lightly Toned, Quality Contrast**

- 4634 1879 PR65 Cameo PCGS. CAC.** The 1879 proof Trade dollars were the first made in a year without business strikes. This Cameo Gem specimen has prominent frost-and-mirror contrast through a layer of distinctly golden patina that shows a dot of reddish-brown below Liberty's foot. Population: 13 in 65 Cameo, 13 finer (4/13). PCGS# 87059

**1879 Trade Dollar, PR66+ Deep Cameo
Finest Deep Cameo at PCGS**

- 4635 1879 PR66+ Deep Cameo PCGS. CAC.** Stunning silver-on-black contrast is the hallmark of this Deep Cameo Trade dollar, certified PR66+ by PCGS and with the CAC approval. The surface preservation is impeccable and the strike full throughout, making this piece an excellent potential acquisition to represent the type. Few Deep Cameos are certified at PCGS in any grade; the second-finest is a PR65, and there are none finer (4/13). The 1879 proof Trade dollar mintage in and of itself was a nominal 1,541 coins, but the issue stands out as the first of several proof-only emissions that would mark the eventual end of the series. PCGS# 97059

**1880 Trade Dollar, PR64+
Toned Boldly at Borders**

- 4636 1880 PR64+ PCGS. CAC.** Distinctly toned electric-blue at the borders with a fade to medium-gray toward the centers. Reflectivity is strong, if a touch watery, and details are strong save for a couple of stars. Generally well-preserved aside from hairlines; the holder has a scratch below Liberty's outstretched arm that should not be taken as damage to the coin. NGC ID# 27YS, PCGS# 7060

1881 Trade Dollar, PR65
Proof-Only Mintage of 960 Pieces

- 4637 1881 PR65 PCGS.** The 1881 Trade dollar is a proof-only issue with a reported mintage of 960 pieces. This memorable Gem displays sharply detailed design elements and deeply mirrored fields that show only a few scattered signs of contact. Traces of sea-green, gray, and violet toning visit the surfaces of both sides. Population: 38 in 65, 12 finer (4/13). NGC ID# 27YT, PCGS# 7061

1881 Trade Dollar, Gem Cameo Proof
Ample Field Toning

- 4638 1881 PR65 Cameo NGC.** The most heavily produced U.S. silver proof of the 19th century, the 1881 Trade dollar remains a collector favorite as its 1,987 specimens are the sole examples of the date available. This Cameo Gem proof is well-contrasted through blue, green, violet, and gold patina that drapes reflective fields but leaves frosted devices largely silver. Census: 20 in 65 Cameo, 24 finer (4/13). PCGS# 87061

1882 Trade Dollar, PR65
Darkly Toned Reflective Fields

- 4639 1882 PR65 NGC.** No business-strike Trade dollars were produced in 1882 but a mintage of 1,097 proofs was struck to satisfy collector demand. This colorful Gem displays attractive shades of blue, green, and gray patina on both sides. The design elements are well-detailed and the brightly reflective fields shine through the toning. Census: 63 in 65, 36 finer (4/13). NGC ID# 27YU, PCGS# 7062

1883 Trade Dollar, Colorful PR65

- 4640 1883 PR65 PCGS.** A richly toned specimen of the last broadly distributed proof Trade dollar issue, modestly contrasted through a rich drape of interior peach patina with blue-to-violet hues around much of the borders. As impressively preserved as it is eye-catching. Population: 48 in 65, 18 finer (4/13). NGC ID# 27YV, PCGS# 7063

1883 Trade Dollar, PR66 Cameo
High-End Survivor

- 4641 1883 PR66 Cameo PCGS.** The 1883 Trade dollar, struck to the proof-only extent of 979 pieces, is the last obtainable year for the series, as the 1884 and 1885 are great (and celebrated) rarities that seldom appear at auction. The year 1878 was the last in which coins were struck for circulation, the same year that the Morgan dollar's introduction sealed the series' fate. This Premium Gem Cameo proof example of the 1883 is untuned silver-white on the obverse and beautifully patinated aqua-blue on the reverse, with plenty of field-device contrast appearing throughout each side. The strike is quite bold even if not absolute, showing minor softness on Liberty's hair. The few contact marks that determine the grade are scattered and inconsequential. Population: 10 in 66 Cameo, 2 finer (4/13). PCGS# 87063

MORGAN DOLLARS

1878 8TF Dollar, Multicolor MS66

- 4642 1878 8TF MS66 PCGS. CAC. VAM-17.** Dramatic lemon-gold, powder-blue, and cherry-red toning fills the obverse and dominates the reverse border. The obverse center remains brilliant. This highly lustrous Premium Gem has smooth fields and only subtle contact on the portrait. It would be an arduous task to find another eight tailfeather dollar with such vibrant multicolor patina. Population: 35 in 66 (1 in 66+), 2 finer (4/13). NGC ID# 253H, PCGS# 7072

1878 7/8TF Tripled Blossoms Dollar, AU58 VAM-44A, 'Number One Morgan Dollar Variety'

- 4643 1878 7/8F Tripled Blossoms AU58 PCGS. CAC. VAM-44A, R.7.** A Top 100 Variety. The Top 100 Guide refers to VAM-44 as "the Number One Morgan dollar variety." The cotton bolls are prominently die tripled, and the eagle's legs are doubled. VAM-44A is the later die state of VAM-44 with a bold clashed N (from IN) in front of Liberty's neck. Designated as VAM-44 on the PCGS insert. Toned medium silver-gray, though glimpses of olive-gold toning adorn portions of the reverse border. Lightly abraded and highly collectible. Population: 8 in 58, 5 finer (4/13). PCGS# 133829

1878-CC Morgan Dollar, MS66 First-Year Branch Mint Issue

- 4644 1878-CC MS66 PCGS.** This deeply toned Carson City Morgan dollar represents the first year of the design, an issue that is always in demand from mintmark type collectors. A sharply detailed Premium Gem, this coin displays vivid shades of golden-brown, gray, and turquoise patina, with satiny mint luster underneath. PCGS has graded only five numerically finer examples (4/13). NGC ID# 253M, PCGS# 7080

1879-CC Morgan Dollar, MS62 A Challenging Early Date

- 4645 1879-CC MS62 NGC.** Gold-to-gray overtones show hints of peach on this strongly lustrous 1879-CC dollar. A degree of striking softness on the hair over the ear is typical for the issue, and this piece, though lightly abraded, has considerable eye appeal for one of the more challenging dates in its series. NGC ID# 253T, PCGS# 7086

1880-CC Morgan Dollar, Lightly Toned Deep Mirror Prooflike Gem

- 4646 1880-CC MS65 Deep Mirror Prooflike PCGS.** A delicate layer of patina, wispy gray with hints of gold and blue, scarcely impedes the impressive mirrors of the fields. Richly frosted devices offer solid detail and the all-around visual appeal is impressive. An apparent flaw at the upper left obverse is in the plastic of the case, not on the coin. Population: 25 in 65 Deep Mirror Prooflike, 2 finer (4/13). NGC ID# 2542, PCGS# 97101

1880/79-CC Morgan Dollar, MS66 Reverse of 1878

- 4647 1880/79-CC Reverse of 1878 MS66 PCGS. CAC. VAM-4.** A Top 100 Variety. Most 1880-CC dollars are overdates, but few examples show the undertype 79 as plainly as this spectacular MS66 example. This coin also features the Reverse of 1878, with the parallel arrow feather, which is much more difficult to locate than its Reverse of 1879 counterpart. The design elements are well-detailed and the lustrous surfaces show hints of golden-tan toning. Population: 62 in 66 (2 in 66+), 0 finer (4/13). NGC ID# 253Z, PCGS# 7108

1880/79-CC Dollar, Thickly Frosted MS66+
Reverse of 1878

- 4648** 1880/79-CC Reverse of 1878 MS66+ PCGS. CAC. VAM-4. A Top 100 Variety. All 1880-CC dollars with the 1878 Reverse are scarce, and most tend to come baggy. This general tendency sets this piece apart as the surfaces are notably free from any significant or detracting abrasions, leaving the thick cartwheel mint luster virtually undisturbed. The strike details are complete throughout and the surfaces are brilliant. Population: 62 in 66 (2 in 66+), 0 finer (4/13). NGC ID# 253Z, PCGS# 7108

1881-CC Dollar, MS67
Satiny and Lightly Toned

- 4649** 1881-CC MS67 PCGS. A gorgeous Superb Gem example of this popular lower-mintage Carson City Morgan dollar issue, satinfrosted with a significant cartwheel effect and delicate golden overtones gracing light gray surfaces. The 1881-CC dollar is available for a price even in Superb Gem but seldom seen finer; PCGS has graded only three non-Prooflike pieces as MS68 or better (4/13). NGC ID# 2547, PCGS# 7126

1882-O/S Morgan Dollar, MS64+
Popular VAM-4

- 4650** 1882-O/S MS64+ PCGS. CAC. Strong. VAM-4. A Top 100 Variety. The 1882-O/S Morgan dollar is known in several VAM varieties. This coin represents the VAM-4 "O over S recessed" variety, which is difficult to locate in high grade. This high-end Choice example is sharply detailed throughout, with well-preserved brilliant surfaces and vibrant mint luster. PCGS has graded two numerically finer examples (4/13). NGC ID# 254D, PCGS# 7138

1884-S Morgan Dollar, Moderately Toned MS62
A Key Condition Rarity in the Series

- 4651** 1884-S MS62 PCGS. The 1884-S Morgan dollar saw a mintage of 3.2 million pieces. Unlike most other contemporary issues where large quantities were bagged and relegated to storage until the great Treasury releases of the 1960s, most 1884-S Morgans went into circulation in the 19th century. Others were probably melted under terms of the 1918 Pittman Act. The 1884-S is therefore very difficult to locate in Mint State grades, all levels of which are considered keys in the series.

The present MS62 example displays a melange of medium-intensity gray, reddish-brown, light russet, and beige toning, interspersed with whispers of sea-green. The surfaces are a bit on the dull side, a characteristic of the issue. While the eagle's breast feathers exhibit the typical weakness, the design elements are somewhat better struck than usually seen on surviving examples, including a fair amount of detail in the hair over Liberty's ear. This piece is sure to generate spirited bidding as finer Uncirculated specimens are highly elusive. NGC ID# 254P, PCGS# 7156

1889 Morgan Dollar, MS66+
Lustrous, Well-Preserved Surfaces

4652 1889 MS66+ PCGS. CAC. This high-end Premium Gem exhibits well-detailed design elements with just a touch of softness on the hair strands above Liberty's ear. The brilliant surfaces display vibrant cartwheel mint luster on both sides and no mentionable distractions are evident. Eye appeal is outstanding. PCGS has graded only five numerically finer examples (4/13). NGC ID# 2558, PCGS# 7188

1889-CC Morgan Dollar, AU53
Popular in All Grades

4653 1889-CC AU53 NGC. CAC. A popular issue in every grade, the 1889-CC is the key to Carson City Morgan dollars. This pleasing AU example has light high point wear with untuned silver-gray surfaces and a few trivial marks on each side, none of any consequence. Considerable frosty mint luster remains on each side. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, AU58
Seldom Found With Nearly Complete Luster

4654 1889-CC AU58 PCGS. The 1889-CC Morgan dollar issue is even rarer than the low mintage of 350,000 pieces would suggest, as many survivors were apparently melted later. Unlike the earlier 1882-CC through 1885-CC issues, none of the 1889-CC dollars were found in the GSA sales and, once the numismatic market absorbed that fact, the issue rapidly assumed its position as the key to the CC dollars. Many low-grade survivors show various surface difficulties; Rusty Goe writes that "there is a shortage of problem-free circulated pieces in the VG to XF range, resulting in many collectors being placed on waiting lists." Of course, AU examples are in even shorter supply, especially pieces such as this that clearly approach mint condition. There is just the slightest trace of friction on this coin with almost complete mint luster. Each side is brilliant and the fields show slight semireflectivity, as often encountered. Generally the strike is strong, the only exception being the hair detail over Liberty's ear and the eagle's plumage. NGC ID# 2559, PCGS# 7190

**1891 Dollar, MS65
Cartwheel Luster**

4655 1891 MS65 PCGS. This modestly toned 1891 Morgan dollar has minimally toned silver surfaces and a lovely cartwheel effect around well-struck devices frosted on their high points. Only a few minor marks, such as a barely perceptible line of reed impressions behind Liberty's head, contribute to the grade. NGC ID# 255G, PCGS# 7204

**1891-CC Dollar, Prooflike Gem
Uncommonly Appealing**

4656 1891-CC MS65 Prooflike PCGS. Distinctly reflective and surprisingly well-preserved for a later Carson City dollar, this Prooflike Gem has eye appeal in spades. Predominantly silver surfaces show arcs of gold, orange, rose, and violet toning along the upper obverse and lower reverse rims. Population: 14 in 65 Prooflike, 2 finer (4/13). NGC ID# 255H, PCGS# 7207

**1891-S Morgan Dollar, MS66
Conditionally Challenging in Higher Grades**

4657 1891-S MS66 PCGS. CAC. The 1891-S Morgan dollar is very scarce in MS66 condition and finer examples are very rare. This impressive Premium Gem exhibits well-detailed design elements and brilliant surfaces that show just a few hints of pale gold toning. Close inspection reveals only the most inconsequential signs of contact and eye appeal is outstanding. Population: 64 in 66 (1 in 66+), 7 finer (4/13). NGC ID# 255K, PCGS# 7210

**1892-CC Dollar, Minimally Toned MS65
Pronounced Cartwheel Luster**

4658 1892-CC MS65 PCGS. A late-date Carson City dollar with frosty devices at the center of a gleaming cartwheel swirl. Pale silver surfaces show only faint, occasional skiffs of patina. While the 1892-CC Morgan is available for a price in MS65, finer examples are challenging; PCGS has graded just 26 pieces as MS66 or better (4/13). NGC ID# 255M, PCGS# 7214

**1892-O Morgan Dollar, MS65
Strong Cartwheel Effect**

4659 1892-O MS65 PCGS. Frosty silver with a decent strike for the date, though minor softness is noted at the central obverse. This Gem has a few small marks but otherwise shows only minor luster grazes and chatter. Very rare any finer with just five MS66 and better pieces certified by PCGS (4/13). NGC ID# 255N, PCGS# 7216

**1893-CC Morgan Dollar, MS63
Low-Mintage Final Issue**

4660 1893-CC MS63 PCGS. The 1893-CC Morgan dollar claims a modest mintage of 677,000 pieces and few examples were saved for numismatic purposes, making the issue scarce in high grade. This attractive Select specimen is sharply detailed and lustrous, with a scattering of minor contact marks on both sides that explains the grade. NGC ID# 255S, PCGS# 7222

Key-Date 1893-S Morgan Dollar
Pleasingly Toned VF25

- 4661 1893-S VF25 PCGS.** An attractively toned midrange representative of the popular type issue, silver-blue and peach-gold on the obverse with more intense versions of those colors and a degree of violet on the reverse. Due to the circulation patterns of silver dollars in the late 19th century on the West Coast, VF is the most common range for 1893-S dollar survivors. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, XF40
Desirable Circulated Piece

- 4662 1893-S XF40 PCGS Secure.** Though distinctly worn on the high points, this key-date Morgan dollar retains considerable glimmering luster through gold-accented silver-blue fields. A distinct step above the VF range which is most common for the 1893-S and appealing despite wispy grade-contributor abrasions. NGC ID# 255U, PCGS# 7226

1893-S Dollar, Original XF45

- 4663 1893-S XF45 PCGS. CAC.** In *A Buyer's Guide to Silver Dollars and Trade Dollars of the United States*, Q. David Bowers says of the 1893-S issue: "Specimens are highly desired in all grades, from well worn on up. ... The 1893-S is not an 'impossible' rarity is because thousands of worn specimens survive."

Even those thousands of coins, though, are no match for the unceasing demand for the issue. This coin's strong suit is its originality. Each side has medium-gray toning. Only slight friction is noted, and there are no obvious abrasions on either side. NGC ID# 255U, PCGS# 7226

1894-S Morgan Dollar, MS65+
Very Rare in Finer Grades

- 4664 1894-S MS65+ PCGS. CAC.** The 1894-S Morgan dollar claims a smallish mintage of 1.2 million pieces and the issue was generally well-produced. The date is challenging at the Gem level, however, and finer specimens are very rare. This high-end Gem exhibits well-detailed design elements and lightly marked lustrous surfaces that are blanketed in attractive champagne-gold toning. PCGS has graded 12 numerically finer examples (4/13). NGC ID# 255X, PCGS# 7232

**1896 Dollar, Smooth MS67
Among the Finest**

- 4665 1896 MS67 PCGS Secure. CAC.** Ex: Simpson Collection. A magnificent Superb Gem Morgan dollar, with all the qualities a discerning collector looks for in building the finest Registry Set. The mostly brilliant centers yield to a lovely ring of golden-brown toning at the rims, further enhancing the coin's eye appeal. The mint luster is frosty and vibrant, and the design details are sharply defined throughout. The surfaces are incredibly well preserved. Currently, no coin has been certified in higher numeric grades by PCGS or NGC (4/13).
Ex: *Long Beach Signature* (Heritage, 9/2010), lot 4698. NGC ID# 2562, PCGS# 7240

**1896-O Morgan Dollar, MS63
Sharply Detailed and Lustrous**

- 4666 1896-O MS63 PCGS.** The 1896-O Morgan dollar claims a substantial mintage of 4.9 million pieces, but quality control was not a priority and few high-grade specimens have survived. This attractive Select specimen exhibits unusually sharp definition on all design elements and the lightly marked fields are brightly lustrous. PCGS has graded only 29 numerically finer examples (4/13). NGC ID# 2563, PCGS# 7242

**1896-S Dollar, MS64
Scarce Any Finer**

- 4667 1896-S MS64 PCGS.** Distinctly toned with light waves of green-gold, blue, and orange as well as a few dots of deeper reddish color. Interior detail is above-average for the date, if a trifle soft on the hair over Liberty's ear. A shallow scrape at the top of the eagle's breast contributes to the grade. PCGS has certified just 68 examples as MS65 or finer (4/13). NGC ID# 2564, PCGS# 7244

**1897 Morgan Dollar, MS67
None Certified Finer**

- 4668 1897 MS67 PCGS.** The 1897 Morgan dollar is seldom encountered in MS67 condition, despite the reported mintage of 2.8 million pieces. This magnificent Superb Gem offers virtually pristine brilliant surfaces with vibrant mint luster on both sides and sharply detailed design elements throughout. An interesting network of spidery die cracks can be seen on the upper reverse. Population: 18 in 67, 0 finer (4/13). NGC ID# 2565, PCGS# 7246

**1898 Morgan Dollar, MS67
Prime Registry Set Candidate**

- 4669 1898 MS67 PCGS.** The 1898 Morgan dollar was produced in large numbers and the date is reasonably available in grades up to the Gem level. Premium Gems are scarce and MS67 pieces, like the present coin, are rare. This spectacular Superb Gem displays vibrant mint luster and sharply detailed design elements combined with well-preserved brilliant surfaces that show no mentionable signs of contact. Population: 41 in 67 (1 in 67+), 0 finer (4/13). NGC ID# 2568, PCGS# 7252

**1900-O/CC Dollar, MS66
Late-State VAM-8B Dies**

- 4670 1900-O/CC MS66 PCGS. CAC. VAM-8B.** A Top 100 Variety. This late state of the VAM-8 die pair has clash marks before Liberty's face as well as the rust spots in the mintmark area. This is a marvelous example of the last "Carson City" Morgan dollar issue, decently detailed and warmly lustrous with a minimally toned reverse and pale green-to-gold toning across much of the obverse. NGC ID# 256G, PCGS# 7268

1901 Morgan Dollar, MS62
Challenging Date in High Grade

4671 1901 MS62 PCGS. The 1901 Morgan dollar was produced in large numbers but production values were low and the issue is seldom encountered in high grade. This attractive MS62 specimen features sharply detailed central design elements, but the peripheral devices are a little soft. The pleasing surfaces are lustrous and show a scattering of minor contact marks that explain the grade. NGC ID# 256J, PCGS# 7272

1921-D Morgan Dollar, MS67
Only One Finer Coin at NGC

4672 1921-D MS67 NGC. The Morgan dollar design was pressed into service for one more year in 1921 because the Peace design was not quite ready when silver dollar production commenced. The Denver Mint struck more than 20 million examples. This spectacular Superb Gem is well-detailed and lustrous with some areas of reflective die polish on the reverse. Examples in MS67 condition are very rare. Census: 6 in 67, 1 finer (4/13). NGC ID# 256Y, PCGS# 7298

PROOF MORGAN DOLLARS

1882 Morgan Dollar, PR66+ Deep Cameo
Silver-on-Black Contrast

4673 1882 PR66+ Deep Cameo PCGS. Deep contrast of the silver devices against night-black, reflective fields is the chief attribute of this PR66+ Deep Cameo 1882 Morgan dollar, certified by PCGS. This is a great coin for collectors who prefer their proof Morgans with deep contrast but little evidence of other color. The Plus grade in our opinion is more than warranted, as this piece is definitely in the top echelon of PR66 survivors of this issue. In an interesting numismatic twist, the proof mintage of 1,100 coins complements the 11 million coins issued for circulation of the 1882. Any Gem proof Morgan is rare, as we have pointed out before, but this piece's eye appeal far surpasses that level. A loupe is needed to see the scattered, tiny flecks of gold and gray color, but the fully struck surfaces are free of any mentionable contact. Population: 8 in 66 (2 in 66+) Deep Cameo, 1 finer (4/13). PCGS# 97317

1890 Morgan Dollar, PR66 Ultra Cameo
Mintage 590 Proofs

4674 1890 PR66 Ultra Cameo NGC. The year 1890 marked the lowest calendar-year output for proof Morgan dollars at 590 pieces. (Both the Eight Tailfeathers and Seven Tailfeathers versions of the 1878 have lower proof mintages, but together they outnumber the 1890.) This is among the best-contrasted specimens of the proof 1890 dollar, boldly mirrored with excellent frost on the devices that is thick enough to be prominent but thin enough to let the details show through. The interiors present as close to black-and-white, though small areas of rim toning are noted at the bottoms of both sides and the top of the reverse. PCGS# 97325

1895 Morgan Dollar, PR63
Longtime Collector Favorite

4675 1895 PR63 PCGS. The saying goes in numismatics to “buy the keys first,” and collectors of circulation-strike Morgan dollars eagerly pursue the 1889-CC, the 1893-S, and other issues that are conditionally rare, such as the 1886-O, 1896-O, 1884-S, and 1901 Philadelphia. But for the 1895 Morgan dollar, the choice is rather more stark: either leave a gaping hole in the collection for the nonexistent business strikes, or purchase one of the few proofs made, most of which likely survive to this day. The 1895 Morgan dollar proof, in and of itself, is neither more rare nor less rare than any other proof in the series — although any Gem proof or finer, regardless of date, is a condition rarity. Rather, it is the absence of business strikes, combined with legions of collectors of this series, that makes the demand for the proof 1895 dollar so extraordinary.

While we have no hard data to back this up, it would be surprising to us if the Morgan dollar were *not* America’s most popular coin to collectors. It is certainly avidly pursued in all grades. This piece strikes a nice balance for the collector of this popular series. A few light hairlines account for the PR63 grade, but there are none of the contact marks usually seen on proofs in this grade. The surfaces cannot be termed brilliant, but they are not far from it. Just the lightest hint of speckled brown patina is seen over each side and is just marginally deeper around the margins. The fields are deeply reflective and, with a little imagination, modest contrast can be seen between the fields and devices.

From The MKJ Collection, Part II. NGC ID# 27ZR, PCGS# 7330

1895-O Branch Mint Proof Dollar, PR66 Cameo Finest of Only Five Known Pieces

4676 1895-O PR66 Cameo NGC. VAM-3. The existence of a branch mint proof 1895-O dollar was unknown and unsuspected until recently. In Walter Breen's comprehensive 1977 proof *Encyclopedia*, he mentions the existence of an 1895-O quarter and half dollar, but no mention of a dollar. Wayne Miller's 1986 dollar reference mentions many known, probable, and even definitely-not-proofs. The Anita Maxwell Trust Collection of Silver Dollars, sold in our 1995 ANA auction, had eight branch mint proofs, but no 1895-O. At that time none were even rumored to exist. Today five examples have been certified by NGC: two non-Cameo coins, one Cameo, and two Specimen strikes. Of those five coins, this is the highest graded.

Wayne Miller refers to a lightly hairlined coin he once owned that others (himself excluded) believed to be a branch mint proof. Otherwise the traditional literature on Morgan dollars is silent about the existence of proof 1895-O dollars. One must assume these pieces were considered by Miller and others as Deep Mirror Prooflike coins. But even the most casual glance at this coin shows this is clearly not a business strike Morgan dollar. It does, however, follow the pattern of almost all other known branch mint proof dollars (except the 1879-O); it was struck from known circulation dies. There is nothing special about the VAM-3 variety. It is notable only for slight doubling at the top of the 5 in the date. But as with other branch mint proofs, this coin was adapted from existing dies. New Orleans Mint personnel obviously had a need for special strikes for some occasion or person(s), and they specially treated the VAM-3 dies. However, unlike some branch mint proofs, especially those from New Orleans, this piece shows no trace of die rust.

The die characteristics on this piece and we assume on the other 1895-O proof and specimen strikes, are:

1. Incomplete die polish in the field immediately between the upper and lower folds in the cap.
2. Evidence of heavy die lapping, most easily seen on the lowest curl and truncation of the neck of Liberty around the designer's initial, making that portion of the curl seem to "float."
3. Several other spotty areas of die polish on the obverse: in front of the eye, within the ear, below the ear, and several other patches of polish are scattered throughout the hair.
4. The reverse die was also heavily lapped. Several of the peripheral letters, especially the I in UNITED are attenuated.
5. Incomplete die polish is seen between the eagle's neck and right (facing) wing, within and around the bowknot, and around the berries in the first cluster just right of the bowknot.

These characteristics are roughly equivalent to what may be found on Philadelphia proofs of the same era. Not only is that remarkable when compared to P-mint coins, but it is unprecedented in our experience among branch mint proof strikings.

In the July 2007 *Numismatist*, Neil Berman wrote a column titled "Morgan Proofs and Specimens" in which he laid out the general guidelines for branch mint proofs and briefly reviewed those he had seen. For the general guidelines, he wrote:

"These pieces display bold detail for the date, although weak strikes are acceptable on those issues that typically are not sharp. Proof and specimen examples exhibit square or wire rims because of the extra pressure put on the planchet during the striking process. Since the U.S. Mint did not dump these Morgans into sacks following their manufacture, they are devoid of bagmarks, although other damage can be present. Such coins should exhibit deeply reflective proof fields (a result of the specially polished planchets and polished dies). Lastly, all the coins have mintmarks.

"A lack of any one of these characteristics does not disqualify a coin from being a proof or specimen, but the absence of several certainly puts the coin in question. *Keep in mind that the equipment at the branch mints was inferior to that at the Philadelphia Mint; consequently, their products tended to be of lesser quality.*" [Emphasis ours.]

This dollar meets all the criteria set forth above, except for squared rims. The lack of squared rims was certainly not from a lack of striking pressure, though. Unlike most 1895-O dollars, which are poorly struck, this piece has an absolutely full strike. That means complete hair detail over the ear as well as full feather definition on the eagle. The fields show extraordinary depth of mirroring, quite unlike that seen on Morgan dollars of other dates that are Deep Mirror Prooflike. Die polishing is complete from rim to rim, except for the minute areas noted above. And as Berman noted in his column, this piece lacks bag marks. There are contact marks, as one would expect to see on a proof, but it lacks the tiny abrasions Morgan dollars display that were housed for years or decades in canvas bags. The most obvious contact mark is a shallow, angling abrasion just behind the mouth of Liberty. On the reverse, there are three shallow planchet defects in the field below ED of UNITED. Otherwise, the surfaces are brilliant with no evidence of color on either side. The devices are nicely frosted, yielding noticeable field-device contrast on both sides. In-person inspection of this dollar will remove any doubt from a prospective bidder's mind. As Walter Breen used to say, "It carries its own credentials."

Ex: ANA Auction (*Stack's Bowers*, 8/2011), lot 7452.

1898 Morgan Dollar, PR65
Only 735 Proofs Struck

- 4677 1898 PR65 PCGS. CAC.** Richly toned, the forest-green obverse is framed in orange-gold tints, while the reverse displays vivid peripheral bands of fire-red, peach, and electric-blue patination. A window of brilliance occupies the central reverse. This exactly struck Gem has smooth surfaces and undeniable eye appeal. Only 735 proofs were struck, an insufficient quantity to satisfy collector demand. Population: 18 in 65, 17 finer (4/13).
Ex: *Dallas Signature* (Heritage, 12/2005), lot 2651; *Milwaukee ANA Signature* (Heritage, 8/2007), lot 2526. NGC ID# 27ZW, PCGS# 7333

1900 Morgan Dollar, PR65 Cameo
Generous Toning and Contrast

- 4678 1900 PR65 Cameo NGC.** This turn-of-the-century charmer has strong contrast despite rich patina occupying all but the silvery centers. Lush gold-to-orange hues turn to violet at the rims, and the mirrors around the well-frosted devices remain strong. Great eye appeal from late in the Cameo era for proof Morgan dollars. Census: 14 in 65 Cameo, 31 finer (4/13). PCGS# 87335

PEACE DOLLARS

1921 Peace Dollar, MS66
Attractive Deep Toning

- 4679 1921 MS66 PCGS. CAC.** Dark shades of golden-brown, violet, lavender, and amber toning visit the surfaces of this spectacular Premium Gem. Like virtually all examples of this date, the details of Liberty's hair are a little soft, due to the high relief of the design. Vibrant mint luster is evident, under the patina. PCGS has graded only seven numerically finer specimens (4/13). NGC ID# 2U4E, PCGS# 7356

1922-S Peace Dollar, Highly Lustrous MS66
Scarce High-Grade S-Mint Issue

- 4680 1922-S MS66 NGC.** The 1922-S Peace dollar is an uncommon coin to find in such a superior state of preservation. Only 21 coins have been so graded by both of the major services, and of course none are finer (4/13). The strike details on this piece are unusually strong for an S-mint Peace dollar; in particular, almost all of the eagle's feathers are present. The surfaces overall are exceptionally clean as well, with no singularly mentionable abrasions on either side. The mint frost swirling around the coin is unimpeded by the abrasions that usually accompany '22-S dollars. Pale rose-golden toning appears throughout.
Ex: *Palm Beach Signature* (Heritage, 3/2006), which realized \$8,050. NGC ID# 257E, PCGS# 7359

1923-D Peace Dollar, MS67
Single Finest Certified Example
Must-Have Registry Set Candidate

4681 1923-D MS67 PCGS. The 1923-D Peace dollar claims a nominal mintage of just over 6.8 million pieces and few examples were known to contemporary collectors. It seems that the majority of the issue was not released into circulation until years later, and an article in the July 1925 edition of *The Numismatist* revealed that collector E.S. Thresher had been diligently searching for an example for more than two years without success. When collecting Peace dollars became widespread in the 1930s, the first issue of the series to be considered a rare date was the 1923-D. By 1938, Q. David Bowers reports Uncirculated specimens were selling for a healthy premium of from \$12.50 to \$20. Fortunately for present-day collectors, the Treasury began releasing bags of 1923-D Peace dollars in the autumn of 1938, and the issue has been reasonably available since that time.

The long period of storage did have its effect on most examples of the 1923-D, however. While the issue is often seen with good luster, most examples show extensive surface marks from coin-to-coin contact in the Mint's canvas storage bags. The dies seem to have been used too long, as well. Many specimens, including the coin offered here, show an extensive network of die breaks on the obverse. The 1923-D is often softly struck on the central reverse, due to improper spacing of the dies.

While PCGS and NGC have combined to certify just over 100 examples of the 1923-D in MS66, the present coin is the only MS67 specimen seen at either service (4/13). The ivory surfaces of this delightful Superb Gem are enhanced by shades of gold and amber toning in selected areas, with vibrant mint luster throughout. Close inspection with a loupe reveals no mentionable distractions on the pristine surfaces. The strike shows some of the typical softness on the central reverse, but details are sharp in other areas. Eye appeal is terrific for this important better date. This coin should find a home in the finest collection or Registry Set. NGC ID# 257G, PCGS# 7361

**1924-S Peace Dollar, MS65
Frost-Accented Devices**

4682 1924-S MS65 NGC. A partial golden overtone shows patches of rose and blue-green. Underlying luster is intense with a hint of frostiness on the high points of the central devices. If not for an abrasion at the corner of Liberty's mouth and another above the word ONE on the reverse, this would be a candidate for an even finer designation. NGC ID# 257K, PCGS# 7364

**1925 Peace Dollar, MS67
Sharply Detailed and Lustrous**

4683 1925 MS67 PCGS. CAC. The 1925 Peace dollar claims a prodigious mintage of more than 10 million pieces, but the issue is very scarce in MS67 condition. This spectacular Superb Gem exhibits razor-sharp definition on all design elements with vibrant mint luster, under attractive shades of champagne-gold toning. Population: 84 in 67, 1 finer (4/13). NGC ID# 257L, PCGS# 7365

**1925 Peace Dollar, MS67
Only One Finer Coin at PCGS**

4684 1925 MS67 PCGS. CAC. This magnificent Peace dollar exhibits razor-sharp definition on all design elements and vibrant mint luster on both sides. The well-preserved surfaces are blanketed in attractive shades of champagne-gold toning and close inspection reveals no mentionable surface flaws. Population: 84 in 67, 1 finer (4/13). NGC ID# 257L, PCGS# 7365

**1934-D Peace Dollar, MS66+
Blatant Eye Appeal**

4685 1934-D MS66+ PCGS. CAC. Micro D. Even Gem-certified 1934-D Peace dollars are available with little difficulty, but Premium Gems are considerably more elusive, by about an order of magnitude — a level where PCGS has seen 61 submissions. The present MS66+ is one of only two such at PCGS, and there are two MS67 coins finer at that service (4/13). The surfaces of this piece are largely untuned silver-white, with just a touch of rose near the rims. The blatant eye appeal is a product equally of the thoroughgoing luster and the excellent overall preservation. A single nick on the eagle's back is the only mark in a focal area. NGC ID# 257Y, PCGS# 7376

**1934-S Peace Dollar, MS64
Elusive Key Issue**

4686 1934-S MS64 PCGS. The 1934-S Peace dollar is a key date and the rarest issue in the series in Mint State condition. This impressive Choice example displays vibrant mint luster and well-detailed design elements that complement the well-preserved brilliant surfaces. Eye appeal is terrific. NGC ID# 257Z, PCGS# 7377

**1934-S Dollar, MS64+
Thick Cartwheel Luster**

- 4687 1934-S MS64+ PCGS. CAC.** Still the king of the Peace dollar series, even though trumped in value by several S-mints in high grade. This + coin certainly deserves that designation and will make collectors of this series sit up and take notice. Each side is completely brilliant, and the mint luster is thick and frosted. There are no obvious abrasions on either side of this impressive '34-S. NGC ID# 257Z, PCGS# 7377

**1934-S Peace Dollar, MS65
First S-Mint Issue in Six Years**

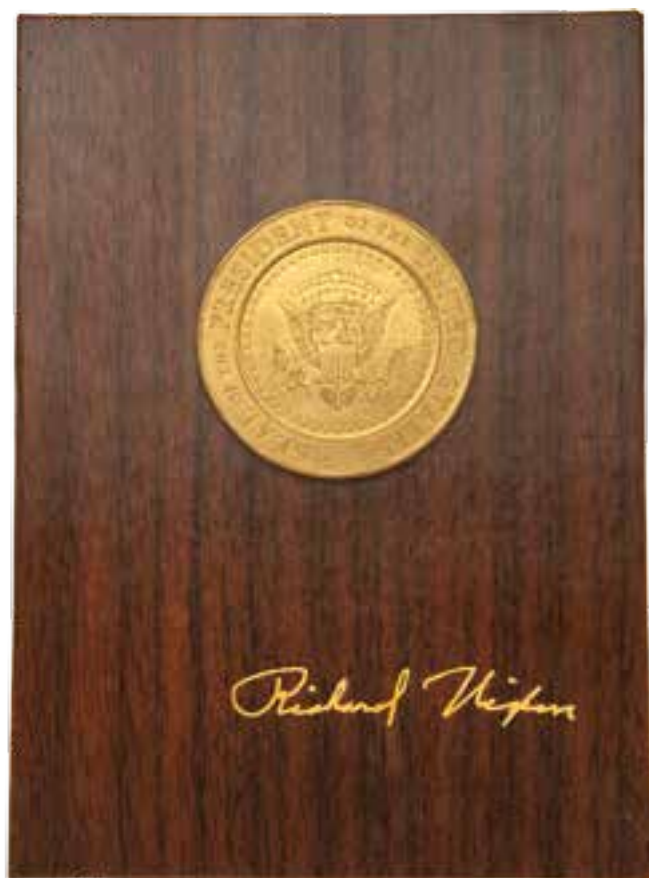

- 4688 1934-S MS65 PCGS.** This San Francisco issue of just over a million pieces was struck in the first year of a short-lived revival for the design and denomination. This Gem is gold-gray overall with a "stripe" of deeper crimson color down from the top of the obverse and a similar dot under the word WE, while the reverse has reddish-orange elements at the lower left reverse margin. NGC ID# 257Z, PCGS# 7377

EISENHOWER DOLLAR

**1973-D Eisenhower Dollar, MS67
Notable Registry Coin**

- 4689 1973-D MS67 PCGS.** After forty years, PCGS has graded just 11 1973-D Eisenhower dollars as MS67 with none finer (4/13), making this Superb Gem a Registry collector essential. Faint glimmers of gold grace otherwise nickel-white surfaces awash in cartwheel luster. One of the "cleanest" Eisenhower dollars this cataloger has seen. NGC ID# 258B, PCGS# 7413

PROOF EISENHOWER DOLLAR

1971-S Silver Clad Eisenhower Dollar Type One Reverse, Third Example Certified Distinctive Nixon-Themed Packaging PR68 Ultra Cameo

4690 1971-S Silver — Type One/Low Relief Reverse, Doubled Die Obverse — PR68 Ultra Cameo NGC. Band-certified in the black Treasury plastic holder of issue, as is a regular or “Type Two” 1971-S Silver Eisenhower Dollar, PR67 Cameo NGC, included for comparison purposes. The two pieces also come with distinctive packaging, a variation on the cardboard “Brown Box” that has a gold-colored plastic replica of the Seal of the President of the United States and embossed facsimile signature “Richard Nixon” below.

As reported by Charles Morgan and Hubert Walker in *Coin Week* on March 7, 2013, the Type One Silver 1971-S dollar appeared in the special packaging on eBay with a story (unverified) about how it was distributed at a presentation ceremony with President Nixon and the widowed Mrs. Eisenhower in attendance. Discoverer Andy Oskam found that the coin showed the so-called “Low Relief” or Type One reverse, which (compared to the more familiar Type Two) has more intricate detail on the eagle’s breast feathers and clearly defined islands in the Caribbean Sea on the background Earth.

This reverse is associated with the *business strike* silver-clad and copper-nickel-clad 1971-S Ike dollars as well as certain 1972 copper-nickel Ikes, but this is only the third certified example of a *proof* 1971-S silver-clad Eisenhower with the Type One reverse. Early speculation had the Doubled Die Obverse as an FS-103, but close examination does not show an immediate match in the *Cherry-pickers’ Guide* and NGC does not attribute the doubled die. This intriguing Eisenhower dollar offers an exciting opportunity for the vanguard collector of the series. (Total: 2 coins)

Type One Reverse

Type Two Reverse

ERROR

2000-P Sacagawea Dollar, AU58 Struck on an Anthony Dollar Planchet

- 4691 2000-P Sacagawea Dollar — Struck on an Anthony Dollar Planchet — AU58 PCGS. This transitional off metal error presumably occurred late in 1999, when the Philadelphia Mint was striking clad Anthony dollars for immediate needs of commerce and stockpiling manganese alloy Sacagawea dollars for their much-promoted early 2000 release. Lustrous and untoned with only a hint of wear on the cheekbone. A few ticks are near the LI in LIBERTY.

GOLD DOLLARS

1849 Gold Dollar, MS65 First-Year Open Wreath Variant

- 4692 1849 Open Wreath MS65 NGC. Breen-6004. The “Near Stars” variety, formerly known as the Large Head before John Dannreuther noted that the “Small” and “Large” Heads are the same size. Gold dollars were struck for the first time in 1849, with all four active mints producing the denomination. This coin represents the Open Wreath variety, with the ends of the wreath far from the numeral. The design elements are well-detailed and the lustrous yellow and rose-gold surfaces show few signs of contact. Census: 41 in 65, 11 finer (4/13). NGC ID# 25B9, PCGS# 7502

1855 Type Two Gold Dollar, MS64 Lustrous and Better-Struck Than Usual

- 4693 1855 MS64 NGC. The revamping of the gold dollars in 1854 resulted in the so-called Type Two design, introduced midway through the year with the so-called Indian Princess motif. The coins were 2 mm larger than the Type One coins, and the planchets were correspondingly thinner to keep a constant weight and gold content. The Indian Princess design was virtually identical to that of the three dollar gold denomination, launched in 1854. Although the three dollar pieces struck up fairly well, the Type Two gold dollars featured a high-relief design that produced poor strikes. Bowers writes in the *Expert's Guide to Collecting & Investing in Rare Coins* that the “deepest part of the obverse (the high-relief portrait of Miss Liberty) was, in the coining press, opposite the date digits in the reverse die, and there was not enough metal flow on the thin planchet to fill both areas.” The redesigned Type Three dollars remained the same size as the Type Two coins but had a shallower relief.

This is a remarkably sharp example of the Type Two design. Only slight high-point softness is seen on the top of the headdress and OLL, opposing areas of the obverse and reverse designs. The surfaces are bright and highly lustrous, and the fields display the usual die clashing common to Type Twos. NGC ID# 25C4, PCGS# 7532

1855-C Gold Dollar, AU53
Sole Type Two Dollar From Charlotte

4694 1855-C AU53 PCGS. Variety 2. As the only Charlotte Mint issue of the Type Two design, the 1855-C is key to a type set from the North Carolina facility. From the meager mintage of 9,803 pieces, PCGS has certified just 130 examples. The present lot has an above average strike though Liberty's curls are softly defined. The wheat-gold surfaces display glimmers of luster along with occasional unobtrusive abrasions. Population: 12 in 53, 20 finer (4/13). NGC ID# 25C5, PCGS# 7533

1855-O Type Two Gold Dollar, AU58
High-Visibility New Orleans Dollar

4695 1855-O AU58 NGC. CAC. Variety 2. The New Orleans Mint omitted gold dollar production in 1854, and as a result, the 1855-O is the only Type Two issue from the facility. The mintage of 55,000 pieces is certainly small but sufficient for the determined collector to acquire an example. The present apricot-gold near-Mint representative displays minor hairlines from momentary circulation but is otherwise unabraded. NGC ID# 25C7, PCGS# 7535

1859-D Gold Dollar, Better Struck MS62
Only Three Finer at PCGS

4696 1859-D MS62 PCGS. Variety 11-N. CAC. One of two known varieties, with the 9 in the date under the left side of the A in DOLLAR. The 1859-D is among the most frequently encountered D-mint Type Three gold dollars, along with the 1858-D. The average certified survivor, however, only grades About Uncirculated; Mint State pieces are rare. Bowers writes that in the early years of the Civil War many Southerners hid gold coins, thus accounting for the survival of many of the high-grade Dahlonega, Charlotte, and New Orleans gold coins dated from the late-1850s.

The apricot-gold surfaces of this MS62 example exhibit somewhat better strike detail than usually seen. This is especially apparent on the headdress and in the date where the 18 and 9 are relatively strong; only the 5 is weak, one of very few pieces that are weak only on this numeral. Population: 14 in 62, 3 finer (4/13). NGC ID# 25CN, PCGS# 7553

1861-D Gold Dollar, MS63
Key to the Gold Dollar Series

4697 1861-D MS63 PCGS. CAC. Variety 12-Q. The 1861-D has long been considered the “King of the Gold Dollars.” Its reputation is derived not only from the small and unrecorded mintage, but also from the fact that the entire issue was struck under the auspices of the Confederacy. As such, it has both historic and numismatic significance. All of the coins of this issue were struck from a single pair of dies, in May, 1861, a month after the Dahlonega mint was seized by the Confederacy. The exact mintage is unknown, but is often estimated to be between 1,000 and 1,500 pieces. Aside from its historical significance, the 1861-D is also the most elusive D-mint gold dollar in terms of overall availability.

The obverse of the currently offered coin was struck from the already defective 1860 die, and, like that previous issue, the U in UNITED is diagnostically weak, as are the rims. In this case, the U is nonexistent, while the letters NI and ICA, in AMERICA, are indistinct, as is the O in DOLLAR on the reverse. A pair of roller marks (as struck) extend diagonally through the center of the reverse, and a rough-textured planchet streak (as struck), that covers the left side of the R, in DOLLAR, could be used in the future as a pedigree marker. The irregular strike and planchet roughness can undoubtedly be attributed to production by “amateur minters,” as Winter terms the remaining mint personnel. Lightly abraded for the grade, this is an important coin from both numismatic and historical perspectives. Population: 6 in 63, 2 finer (4/13). NGC ID# 25CV, PCGS# 7559

1866 Gold Dollar, MS67
Seldom Seen So Fine

4698 1866 MS67 PCGS. The post-Civil War mintage of the 1866 gold dollars climbed a bit to 7,100 pieces compared to 3,725 for the 1865, but few examples indeed of the 1866 attain the Superb Gem level of the present coin; even Gems are seldom seen. Many examples show severe die clashing, although this example shows some interesting clashing combined with die cracks running radially through the obverse fields to connect with the C in AMERICA and the N in UNITED. None of these affect the technical grade or the market appeal, in our opinion, and the eye appeal is great overall. The well-frosted surfaces are notably free of post-Mint contact, and the strike is sharp throughout both sides. Some diagonal planchet striations that appear on the reverse are as made. An elegant coin with lots of eye appeal and numismatic interest. Population: 6 in 67 (2 in 67+), 2 finer (4/13). NGC ID# 25D2, PCGS# 7565

1869 Gold Dollar, MS66
Exceptional Quality and Eye Appeal

4699 1869 MS66 PCGS. Only 5,920 business-strike gold dollars were struck in 1869, making this date scarce-to-rare in all grades. This spectacular Premium Gem exhibits sharply detailed design elements and well-preserved lemon-yellow surfaces with vibrant mint luster on both sides. Eye appeal is tremendous. Population: 2 in 66, 12 finer (4/13). NGC ID# 25D5, PCGS# 7568

1870-S Gold Dollar, MS62
Last Branch Mint Gold Dollar

4700 1870-S MS62 PCGS. From a mintage of just 3,000 pieces, the famous 1870-S gold dollar has a surviving population of 125-170 examples in all grades. This attractive MS62 example exhibits well-detailed design elements and partially prooflike yellow-gold surfaces. Housed in a green label holder. Population: 16 in 62, 16 finer (4/13). NGC ID# 25D7, PCGS# 7570

1884 Gold Dollar, MS67
Well-Preserved Prooflike Surfaces

4701 1884 MS67 NGC. CAC. A meager mintage of 5,230 gold dollars was reported for 1884, making the date scarce-to-rare in all Mint State grades. This incredible Superb Gem displays prooflike greenish-gold surfaces with no mentionable signs of contact. The design elements are sharply detailed throughout and eye appeal is extraordinary. Census: 13 in 67, 6 finer (4/13). NGC ID# 25DN, PCGS# 7585

PROOF GOLD DOLLARS

1876 Gold Dollar, PR66+ Deep Cameo One Finer at PCGS

4702 1876 PR66+ Deep Cameo PCGS. CAC. Some references give the total mintage of the 1876 gold dollar as 45 proofs (Garrett and Guth) and some 25 to 35 (Bowers), the difference perhaps lying in the number that may have been melted as unsold at the end of the year. Breen's older *Proof Encyclopedia* gives the number as "probably two dozen survivors, some impounded, others dulled, badly cleaned, or impaired."

Bowers notes that, 1876 being America's Centennial year, many of the visitors to Philadelphia's Centennial Exposition made side trips to the Mother Mint in that same city. This may explain both the greater survival of the issue compared to most other dates from the decade of the 1870s (the 1875 is a great proof-only rarity) as well as Breen's comment about impaired survivors; true collectors would stand a better chance of preserving their coins well than casual buyers stopping by the Philadelphia Mint on a once-in-a-lifetime visit.

In any case, the present example is remarkable for its high aesthetic and technical quality, clearly among the few finest survivors of the issue. The medium yellow-gold devices are thickly frosted and provide optimal contrast against the midnight-black, reflective fields. Some "Longacre doubling" appears on the obverse, most prominent at UNI and ICA. The reverse die is rotated a few degrees clockwise with respect to the obverse. A loupe reveals only a few minor field hairlines but no singular contact, along with a somewhat "pebbly" texture, as made, on Liberty's cheek, a trait that does not affect the grade. This piece offers superlative eye appeal in keeping with the grade. Among Deep Cameo coins graded at PCGS, this sole PR66+ is bested only by a single PR67 (5/13). NGC ID# 25EK, PCGS# 97626

1884 Gold Dollar, PR67 Cameo
Tied for Finest at PCGS

4703 1884 PR67 Cameo PCGS. CAC. Despite a published mintage of 1,006 proof gold dollars dated 1884, complementing a small business-strike mintage of 5,230 pieces, only a fraction of that number of proofs are known today, Bowers putting the estimate at 100 to 140 pieces. The author writes in his *Guide Book* on the series:

“For this and other high-mintage Proofs through 1889, it is likely that jewelers, who had an insatiable demand for gold dollars, but who could not get them through banking channels, simply paid a small premium and bought Proofs—which were then incorporated into bracelets, brooches, etc.”

This Superb Gem Cameo PCGS example is among the finest survivors of the issue at that service, tied with three other Cameos for this ultimate grade (4/13). The finest Deep Cameo at PCGS is a single PR65 example, although NGC has certified 11 submissions in PR67 Cameo with two finer. A slight orange-peel texture is visible in the fields, but the surfaces overall are impeccable and deeply contrasted. The bold date repunching on the reverse is characteristic of the issue. NGC ID# 25EU, PCGS# 87634

EARLY QUARTER EAGLES

1807 Quarter Eagle, BD-1, AU58
Final Capped Bust Right Issue

4704 1807 AU58 NGC. BD-1, R.3. Bass-Dannreuther Die State a/b. The Capped Bust Right design was retired after 1807 and the final mintage of quarter eagles was a modest 6,812 pieces. Only one die variety is known for the date and the surviving population numbers about 250-350 examples in all grades. High-grade specimens are very scarce. This was obviously the only use for the obverse die, but the reverse was a remarkably resilient die for the time. It had been used previously to strike all the quarter eagles in 1805 and 1806, and was used to coin all the dimes and quarter eagles in 1807, as well.

This attractive near-Mint specimen displays lustrous, lightly abraded yellow-gold surfaces with a small rim bruise at 5 o'clock on the obverse. Close inspection with a loupe reveals a few faint adjustment marks on Liberty's bust tip. The design elements are well-detailed, but the hardy reverse die was beginning to show its age. Something caused a small depression at the juncture of the shield and eagle's neck. Eye appeal is quite strong for the grade. Census: 32 in 58, 42 finer (4/13). NGC ID# 25FC, PCGS# 7656

1825 Quarter Eagle, Unc Details
Sharp Example of BD-2

4705 1825 — Tooled — PCGS Genuine. UNC Details. BD-2, High R.4. Bass-Dannreuther Die State a/a, neither bulged on the obverse nor cracked on the reverse. The BD-2 is the most available of three die pairs for the 1825 quarter eagle, though still very scarce regardless of grade. On this unworn example, a line on the cheek and parts of the fields show tooling, a misguided attempt to efface a relative handful of long marks. (One such line, hidden in the lower hair, went untouched.) Despite these unfortunate post-striking occurrences, the coin retains considerable eye appeal at arm's length, particularly on the semireflective reverse with its strong detail and bright yellow-gold color. NGC ID# 25FG, PCGS# 7664

1827 Quarter Eagle, AU55
Sole Die Pair for the Year

4706 1827 AU55 PCGS. BD-1, R.5. Bass-Dannreuther Die State a/c. The entire mintage of quarter eagles in 1827 was accomplished using a single die pair. Obviously a new obverse was required to carry the date 1827, but even so, some examples struck during the year may have borne other dates, as was common Mint practice at the time. Bass-Dannreuther estimate that of the reported 2,800 pieces struck, anywhere from none to nearly 40% may have been dated other than 1827. The reverse die was, in fact, carried over from usage in both 1825 and 1826. This piece shows buildup in some of the peripheral devices and light field chatter from a short spate in circulation. A few singular marks are confined to the reverse, namely a patch of thin scrapes below the olive stem, a longer mark into the right field from the top arrowhead, and a couple of scrapes in the shield interior. The surfaces display deep orange-gold color with a couple of scattered daubs of violet. NGC ID# 25FJ, PCGS# 7666

1829 Quarter Eagle, BD-1, High R.4

4707 1829 MS63 PCGS. BD-1, High R.4. Bass-Dannreuther Die State a/a, showing none of the die injuries that would be required for the theoretical States b that would suggest why both dies in the pair were retired. This Select example of an issue that is very scarce regardless of grade has pale and radiant yellow-gold surfaces with well-defined portrait detail. Though Liberty's face and the surrounding fields show scattered wispy abrasions, this remains an important and conditionally rare representative of the first Small Denticles/Close Collar quarter eagle issue. Population: 11 in 63 (1 in 63+), 8 finer (4/13). NGC ID# 25FK, PCGS# 7669

1830 Quarter Eagle, AU55
Lustrous and Unabraded

4708 1830 AU55 PCGS. BD-1, R.4. Like many quarter eagle dates from the 1820s and 1830s, only a single die pairing was needed to produce the small complement of 4,540 pieces; half eagles were the preferred and largest-available gold denomination, as well as the one requested by the vast majority of gold depositors. More than \$630,000 face value in half eagles was struck in 1830, compared to a tad more than \$11,000 in quarter eagles. This Choice AU 1830 two and a half displays generous luster remaining on orange-gold surfaces with reddish accents. There are no singular marks, and the eye appeal is high. NGC ID# 25FL, PCGS# 7670

CLASSIC QUARTER EAGLES

1836 Classic Quarter Eagle, MS63
Script 8, Variety 11

4709 1836 Script 8 MS63 PCGS. Breen-6143, Variety 11, R.2. A beautiful butter-gold example of the Classic type. Satiny and carefully preserved. The centers show the inexactness of strike usual for the type, though the remainder of the design is well impressed. A late die state with a bisecting obverse crack between 4:30 and 11 o'clock. Population: 32 in 63 (1 in 63+), 16 finer (4/13). NGC ID# 25FU, PCGS# 7694

1836 Two and a Half, MS63
Script 8, Head of 1835

- 4710** 1836 Script 8 MS63 NGC. Breen-6143, Variety 11, R.2. A lustrous olive-gold example with minimal marks and moderate inexactness of strike at the centers. Breen (1988) describes various portrait styles on 1836 quarter eagles, including the Heads of 1834, 1835, and 1837. The differences are minor and reminiscent of Christian Gobrecht's tinkering with the designs on 1839 cents. Variety 11 has a Head of 1835 but is more interesting for its lengthy obverse die cracks. Census: 57 in 63, 21 finer (4/13). NGC ID# 25FU, PCGS# 7694

1836 Block 8 Quarter Eagle, MS63
Rarely Seen in Uncirculated Grades

- 4711** 1836 Block 8 MS63 NGC. Breen-6144, Variety 15, R.2. Head of 1837. This final portrait style of 1836 shows a slightly "thinner" version of the Head of 1835 with the hair curl near star 6 all but gone. While Classic quarter eagles and fives are common in VF-XF grades because of the greatly enhanced mintages for this type, surprisingly few Mint State coins were set aside. This bright, lustrous example shows the usual softness of strike on the hair of Liberty and the reverse shield. The yellow-gold color shows just the slightest hint of reddish patina. Census: 57 in 63, 21 finer (4/13). Ex: *Long Beach Signature* (Heritage, 5/2008), lot 2967. PCGS# 97694

1838 Two and a Half, MS62
Underappreciated Classic Issue

- 4712** 1838 MS62 NGC. Breen-6146, Variety 19, R.2. The sole die pair used to strike the low mintage of 47,030 pieces. The green-gold surfaces are uncommonly free from contact though the upper reverse field displays a couple of unimportant marks. The strike is generally sharp though the first five letters in LIBERTY are slightly soft. Census: 18 in 62, 24 finer (4/13). NGC ID# 25FY, PCGS# 7696

LIBERTY QUARTER EAGLES

1843-O Quarter Eagle, MS61
Elusive Large Date, Plain 4 Variety

- 4713** 1843-O Large Date, Plain 4 MS61 PCGS. CAC. Variety 1. The 1843-O Large Date, Plain 4 is much scarcer overall than its Small Date, Crosslet 4 counterpart. The 1 in the date virtually fills the entire space between the rim and the forward bust truncation, and the O mintmark on the reverse appears repunched at the lower side. The yellow-gold surfaces of this Mint State example show gleaming luster with the normally seen strike weakness on the central hair curls and the lower left leg of the eagle. Each side shows only a few thin hairline scrapes away from the focal points, including a couple of straight-line marks below the denomination on the reverse. Population: 5 in 61, 4 finer (4/13). NGC ID# 25GS, PCGS# 7732

**1846-D Quarter Eagle, MS61
Elusive Mint State Example**

4714 1846-D MS61 NGC. Variety 7-L (formerly 7-K). The 1846-D Liberty quarter eagle claims a mintage of 19,303 pieces and is one of the more available D-mint issues. The 1846-D is very rare in Mint State, however, as few examples were saved by contemporary collectors. This attractive MS61 specimen retains much original mint luster and exhibits sharply detailed design elements, with a minimum number of contact marks for the grade. Census: 4 in 61, 6 finer (4/13). NGC ID# 25H3, PCGS# 7742

**1861 Liberty Quarter Eagle, MS65+ ★
New Reverse, Ideal Type Coin**

4717 1861 New Reverse, Type Two MS65+ ★ NGC. The 1861 New Reverse quarter eagle is a plentiful issue and a favorite choice of type collectors and Civil War aficionados. This remarkable example exhibits sharply detailed design elements throughout with partially prooflike greenish-gold surfaces that show a few hints of lilac and no mentionable distractions. Census for Type Two: 8 in 65 (1 in 65+), 2 in 65+ ★, 3 finer (4/13). NGC ID# 25JX, PCGS# 7794

**1853-D Quarter Eagle, AU58
Rare Low-Mintage Issue**

4715 1853-D AU58 NGC. Variety 17-N (formerly 16-M). The 1853-D Liberty quarter eagle claims a low mintage of just 3,178 pieces, making it scarce-to rare in all grades. This lightly circulated example exhibits well-detailed design elements, with some of the usual softness on the eagle's leg and shield. The pleasing orange-gold surfaces are lightly abraded. Census: 12 in 58 (1 in 58+), 6 finer (4/13). NGC ID# 25HW, PCGS# 7768

**1854-C Two and a Half, MS61
Higher Grade for This Scarce C-Mint**

4716 1854-C MS61 NGC. Variety 1. An apricot-gold example of this low-mintage Charlotte issue. A minimal mintage of 7,295 pieces suggests bullion depositor preference for the half eagle denomination. This piece is unabraded and displays the usual C-mint incompleteness of strike on the central reverse. The obverse has a railroad rim between 9 and 4 o'clock, as struck. Shallow strike-throughs (as made) cause a slightly granular surface on the fields near the bust tip and behind the eagle's neck. Census: 8 in 61, 10 finer (4/13). NGC ID# 25HY, PCGS# 7770

**1865 Quarter Eagle, AU55
Rare in All Grades**

4718 1865 AU55 NGC. The 1865 quarter eagle touts one of the lowest mintages for the Liberty Head series (1,520 circulation strikes) and is very rare in all grades. NGC has certified just 17 examples, none of which are in Mint State. Some of the graded pieces are likely resubmissions.

The present Choice AU offering possesses deep apricot-gold patination, along with traces of luster in the recessed areas. Solidly struck, though the eagle's breast and left (facing) leg feathers are a tad soft. Distributed light marks are individually insignificant. A minute spot on the rim above the D in UNITED might help to pedigree the coin. Census: 4 in 55, 7 finer (4/13). NGC ID# 25K5, PCGS# 7801

1881 Liberty Quarter Eagle, MS60
Only 640 Examples Struck

- 4719 1881 MS60 PCGS.** The 1881 Liberty quarter eagle claims one of the smallest mintages of the series at a mere 640 pieces. This attractive Mint State example is sharply detailed on the obverse, but the reverse shows a touch of softness on the eagle's leg. The pleasing green and orange-gold surfaces show prooflike reflectivity in sheltered areas and eye appeal is quite strong for the grade. Population: 2 in 60, 12 finer (4/13). NGC ID# 25L5, PCGS# 7833

1901 Quarter Eagle, MS67
Well-Preserved Lustrous Surfaces

- 4720 1901 MS67 PCGS.** The 1901 Liberty quarter eagle is a plentiful issue from a mintage of 91,100 pieces. Of course, the date becomes rare at the exalted MS67 level. This impressive Superb Gem exhibits well-detailed design elements and pristine peach-gold surfaces with vibrant satiny mint luster. Population: 11 in 67, 1 finer (4/13). NGC ID# 25LS, PCGS# 7853

1907 Quarter Eagle, Satiny MS67
Ideal Type Selection

- 4721 1907 MS67 PCGS.** Well-defined and satiny with butter-yellow and apricot surfaces that show a single coppery dot at the top of the reverse. This exquisitely preserved Superb Gem is ideal for a 20th century gold type collection or date run of the Liberty series. Population: 72 in 67 (2 in 67+), 1 finer (4/13). NGC ID# 25LY, PCGS# 7859

PROOF LIBERTY QUARTER EAGLES

1900 Quarter Eagle, PR67 Ultra Cameo
Gorgeous Gold Proof Type Coin

- 4722 1900 PR67 Ultra Cameo NGC.** The first U.S. proof quarter eagle issue to top 200 specimens struck, the 1900 is popular among type collectors for its availability in better grades. Though resubmissions undoubtedly are at play with the NGC *Census Report*, the date is the most accessible in the series at PR67 and finer Ultra Cameo grades (4/13). Of course, those coins remain rare in an absolute sense, and the Superb Gem offered here is a delicate and delightful beauty. Gold-frost devices, exquisitely detailed, rise from gleaming fields that range from pale canary-yellow to black, depending on the angle to the light. NGC ID# 288P, PCGS# 97926
-

1901 Quarter Eagle, PR66 Cameo
Great 20th Century Gold Proof

- 4723 1901 PR66 Cameo PCGS.** The 1901 quarter eagle issues are positioned not only at the start of a new century but at the end of a U.S. Mint era. The next year, Mint proof practice changed to de-emphasize field-to-device contrast, leading to a short-lived “brilliant era” of gold proofs before the Renaissance of American Coinage and matte processes took hold. This Cameo Premium Gem proof of the 1901 two and a half has a mix of pale yellow and richer orange shadings in the fields, the reverse showing the hues as almost concentric. Richly frosted central devices are sharply struck, while fields with a hint of “orange-peel” texture are reflective and carefully preserved. Population: 1 in 66 Cameo, 1 finer (4/13). NGC ID# 288R, PCGS# 87927

INDIAN QUARTER EAGLES

1908 Indian Quarter Eagle, MS66
Ideal First-Year Type Coin

- 4724 1908 MS66 NGC.** The innovative incuse Indian design was introduced in 1908 with a substantial mintage of 564,821 quarter eagles. The issue is very scarce at the MS66 level and virtually unobtainable any finer. This spectacular Premium Gem is sharply detailed and brightly lustrous with well-preserved green and rose-gold surfaces. Census: 63 in 66, 3 finer (4/13). NGC ID# 288Y, PCGS# 7939

1911 Quarter Eagle, MS65
Great Orange-Gold Color

- 4725 1911 MS65 NGC.** Though overshadowed by its lower-mintage and higher-visibility Denver counterpart, the 1911 Philadelphia quarter eagle is notable for being elusive in Gem and a definite rarity any finer. This MS65 example has a bold strike and rich orange-gold luster that has a touch of frostiness on the highest design elements. NGC ID# 2893, PCGS# 7942

1911 Indian Quarter Eagle, MS65+
Excellent Date Set Candidate

- 4726 1911 MS65+ NGC. CAC.** The 1911 Indian quarter eagle is much easier to locate than its Denver Mint counterpart, making it an important issue for date set collectors. This high-end Gem is sharply detailed throughout, with vibrant mint luster and well-preserved greenish-gold surfaces. NGC has certified six numerically finer examples (4/13). NGC ID# 2893, PCGS# 7942

1911-D Quarter Eagle, Satiny Surfaces
Uncirculated Details

- 4727 1911-D — Scratches — NGC Details. Unc.** Upon first glance, this key date quarter eagle appears to be a Select or better Mint State example, but close inspection reveals a rectangular-shaped scratch on the Indian's jaw. The strike is good though the eagle's shoulder and portions of the headdress exhibit minor blending of detail.

**1911-D Two and a Half
Uncirculated Sharpness**

4728 1911-D — Cleaning — PCGS Genuine. Unc Details. Strong D. This intricately struck key date two and a half is nearly devoid of marks and has attractive eye appeal despite a mildly luminous appearance. The Indian type is the only pre-1933 Federal gold series that is readily completed by date and mintmark, and its popularity pressures the lowest mintage issue, the 1911-D. NGC ID# 2894, PCGS# 7943

**1911-D Indian Quarter Eagle, MS61
Sought-After Key Issue**

4729 1911-D MS61 NGC. The 1911-D Indian quarter eagle is the low-mintage key to the series. This attractive Mint State example displays sharply detailed design elements and vibrant mint luster on both sides. The pleasing yellow and rose-gold surfaces show a scattering of minor contact marks that explain the grade. NGC ID# 2894, PCGS# 7943

**1911-D Quarter Eagle, MS62
Sharply Impressed Mintmark**

4730 1911-D Strong D MS62 PCGS. The strongly defined mintmark is only the beginning of this coin's attributes of quality. Each side is draped in deep reddish tinged orange-gold color and the mint luster is abundantly evident throughout. The only mark of note is a long, arcing abrasion in the field above the eagle's wing. NGC ID# 2894, PCGS# 7943

**1911-D Two and a Half, MS63
Well-Defined Mintmark**

4731 1911-D Strong D MS63 PCGS. The pronounced wire rim that is visible on the upper-right obverse of all examples of the 1911-D quarter eagle is diagnostic for the issue. The 1911-D was the first time that the fledgling Denver Mint had struck the new Indian Head quarter eagles after its opening five years previously, in 1906, yet the wire rim was not a problem on the larger 1911-D half eagles and eagles. The 55,680 examples struck of the 1911-D quarter eagle made it an instant rarity, one that was compounded when few were saved in Uncirculated condition — perhaps only 5% to 7%, or 2,500 to 3,500 examples survive in all Mint State grades, a number far fewer than the number of collectors who desire a specimen of the issue.

The mintmark is well-defined, as indicated by the Strong D indication on the insert, with strong outlining of the letter. The remainder of the coin is well-struck also, and there are only slight abrasions that interrupt the satiny mint luster. NGC ID# 2894, PCGS# 7943

**1911-D Strong D Quarter Eagle, MS64
Remarkably Clean Surfaces**

4732 1911-D Strong D MS64 PCGS. The Denver Mint struck four denominations of gold coins for the first time in 1911, namely the Indian Head quarter eagle, half eagle, and eagle, and the Saint-Gaudens double eagle. The Indian Head coins were all low-mintage rarities within their series, although the double eagle was struck in relatively plentiful numbers. The 1911-D quarter eagle, like its other gold counterparts, is usually a well-struck issue, although some examples show strike softness at the center obverse in the Indian's headdress, or on the lowest ornament on the necklace. (Are those bear claws? We believe so but have never seen any "official" description or documentation to confirm it.)

As indicated on the insert, the mintmark is strong and uniform on all sides. The strike details elsewhere are also boldly defined. What is perhaps most remarkable, though, are the extraordinarily clean surfaces. This piece could easily fit into an otherwise Gem set of quarter eagles. NGC ID# 2894, PCGS# 7943

**1914 Indian Quarter Eagle, MS64
Nice Luster and Color**

4733 1914 MS64 NGC. The 1914 Indian quarter eagle is not too difficult to locate in MS64 condition, but the issue becomes very scarce in higher grades. This attractive Choice example exhibits sharply detailed design elements and well-preserved yellow and rose-gold surfaces, with vibrant mint luster and ample eye appeal. NGC ID# 2898, PCGS# 7946

**1915 Quarter Eagle, MS65
Conditionally Rare in Finer Grades**

4734 1915 MS65 NGC. From a mintage of 606,000 pieces, the 1915 Indian quarter eagle is reasonably available in grades up to the Gem level, but it is a prime condition rarity in finer grades. This delightful Gem sharply detailed and brightly lustrous, with well-preserved orange-gold surfaces. NGC has certified eight numerically finer examples (4/13). NGC ID# 289A, PCGS# 7948

THREE DOLLAR GOLD PIECES

**1856-S Three Dollar, MS61
One of 34,500 Pieces Made**

4735 1856-S MS61 NGC. Small S. After Dahlonega and New Orleans began the branch mint production of the three dollar gold denomination in 1854, stopping after that year, the San Francisco Mint picked up the torch, producing its first three dollar coins in 1855. This example comes from the second year of production, 1856, in a short run that includes only three more dates: 1857-S, 1860-S, and the unique 1870-S. Though its rich yellow-gold surfaces show several short pinscratches on the reverse, it is well-defined with strong all-around eye appeal for the MS61 designation. NGC ID# 25M9, PCGS# 7975

1857 Three Dollar Gold, MS63
Elusive Date in High Grade

- 4736 1857 MS63 PCGS.** The 1857 three dollar gold piece claims a mintage of 20,891 pieces, a number that was probably indicative of the demand for the denomination at the time. This well-detailed Select specimen shows just a touch of softness on the ribbon bow, with bright satiny mint luster and a few minor contact marks on both sides. Population: 21 in 63 (1 in 63+), 5 finer (4/13). NGC ID# 25MA, PCGS# 7976

1859 Three Dollar, Semireflective MS64

- 4737 1859 MS64 PCGS.** Better-defined than usually seen. The characteristic “swirl” of luster is present but softer than usually seen, offset by semireflectivity in the fields. Yellow-gold surfaces show touches of orange at certain angles and glimpses of blue at others. An eye-appealing near-Gem. Population: 15 in 64, 7 finer (4/13). NGC ID# 25MD, PCGS# 7979

1859 Three Dollar, MS66
Tied for Finest Graded

- 4738 1859 MS66 NGC.** By 1859 the bloom was off the rose for the three dollar gold series — if, indeed, there was much to begin with — and collector enthusiasm had waned greatly since the debut offering of the 1854 pieces. The 1859 mintage of business strikes was meager, at 15,589 coins, but far-lower production figures were in the offing.
- The early circulation strikes in the series were saved in numbers far fewer than those of later issues, where even-lower mintages garnered dealer and collector interest. (There were also many more of both in the 1880s than in the late 1850s.) Bowers estimates that only 70 to 90 Mint State examples survive of this issue. The present Premium Gem is among the few finest ever seen; both NGC and PCGS have seen only two submissions each at this grade level, and none are finer (4/13). The apricot-gold surfaces boast generous luster and great eye appeal throughout both sides, showing a mix of the prooflike reflectivity and frosty areas typical of these coins. There are simply no mentionable distractions on this stunning coin. NGC ID# 25MD, PCGS# 7979
-

1860 Three Dollar Gold, MS63
Low-Mintage Pre-Civil War Issue

4739 1860 MS63 PCGS. The 1860 three dollar gold piece claims a mintage of 7,036 pieces and survivors in MS63 condition are rare. This attractive Select example displays well-detailed design elements with just a touch of softness on the ribbon bow and the lustrous surfaces are free of large or distracting surface marks. Population: 16 in 63, 16 finer (4/13). NGC ID# 25ME, PCGS# 7980

Choice AU 1863 Three Dollar Gold
Important Civil War-Era Issue

4740 1863 AU55 PCGS. As the relatively low mintage of 5,000 circulation strikes would seem to indicate, the 1863 three dollar piece is scarce in all grades. Clash marks are present on both sides of this Choice AU example. The coin displays yellow-gold color, with areas of peach present, particularly in the protected areas. Population: 35 in 55, 56 finer (4/13). NGC ID# 25MJ, PCGS# 7984

1878 Three Dollar, MS65
Reddish-Orange With Olive Accents

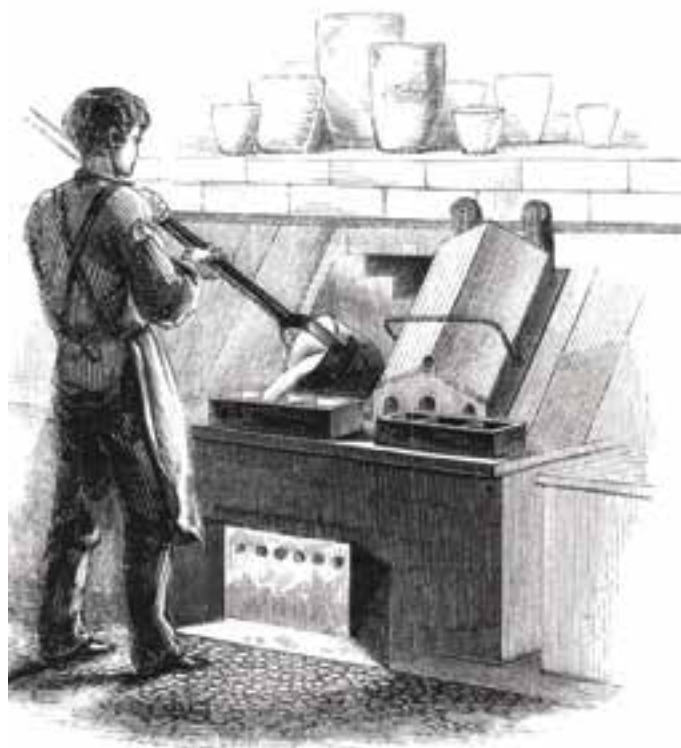

4741 1878 MS65 PCGS. The 1878 three dollar gold was the last of three great high-mintage issues struck during the series' run from 1854 through 1889. In the case of the 1878, the Mint struck large numbers of the issue anticipating a great demand for the long-awaited "parity" between gold coins, silver coins, and paper currency which was scheduled to occur at the end of the year, marking the first time that the three mediums of exchange would be freely interchangeable at banks since the start of the Civil War. In fact, when parity was actually achieved in late 1878, there was no increased demand for gold coins. When the American populace realized that *they could exchange their paper currency for gold or silver coins anytime they wished*, they chose the more-convenient medium of paper. (This is the same reason why one dollar Presidential and Susan B. Anthony coins do not circulate today; they never will, unless one dollar bills are discontinued.)

This Gem 1878 three shows deep reddish-orange tints on both sides with accents of olive and copper. The few marks are scattered and small. This piece offers much eye appeal and would make a great addition to a high-grade type set. NGC ID# 25MZ, PCGS# 8000

1879 Three Dollar Gold, MS63
Prooflike Surfaces

- 4742 1879 MS63 NGC. Production of three dollar gold pieces dropped dramatically after the large mintage of 1878, as the Philadelphia Mint struck only 3,000 pieces in 1879. This attractive Select example exhibits well-detailed design elements and prooflike orange-gold surfaces. Only minor contact marks are evident and the coin actually shows some elements of contrast when tilted in the light. NGC ID# 25N2, PCGS# 8001

MELTING-ROOM.—POURING OUT THE METAL.

1881 Three Dollar Gold, MS61
Only 500 Pieces Struck

- 4743 1881 MS61 NGC. From a remarkably low mintage of just 500 business-strike examples, the 1881 three dollar gold piece is a rare issue in all grades. The low mintage creates intense collector demand and the surviving Mint State population numbers no more than 20-30 pieces, despite inflated population data that suggests a larger supply. As a result, many collectors opt to buy a proof to represent this date.

The present coin is an attractive MS61 example with well-detailed design elements and pleasing yellow-gold surfaces that show traces of prooflike reflectivity in sheltered areas. The fields show a minimum number of contact marks for the grade. Census: 17 in 61, 20 finer (4/13). NGC ID# 25N4, PCGS# 8003

1882 Three Dollar Gold, MS63
Only 1,500 Pieces Struck

- 4744 1882 MS63 PCGS. Only 1,500 three dollar gold pieces were struck in 1882 and collectors have always prized the issue because of the low mintage. This attractive Select specimen exhibits well-detailed design elements and prooflike yellow-gold surfaces with a few minor contact marks that explain the grade. Population: 39 in 63, 44 finer (4/13). NGC ID# 25N5, PCGS# 8004

1885 Three Dollar, AU55
Only 801 Business Strikes Minted

4745 1885 AU55 PCGS. Portions of this Choice AU example display prooflike surfaces, adding to the eye appeal of this lovely example. The piece exhibits rich butter-gold color, with hints of yellow and orange also present. A small gray spot appears below the first 8 in the date and an as-made strike through is present above the feathers in Liberty's crown. NGC ID# 25N8, PCGS# 8007

1888 Three Dollar Gold Piece, MS65
Colorful Surfaces

4746 1888 MS65 PCGS. UNITED is strongly die doubled, as seen on all business strikes of this low mintage (5,000 pieces) issue. The rare proofs for the date are from a different obverse die without any doubling. This is an originally toned Gem with peach-gold peripheries and mint-green centers. The strike is crisp throughout, with good definition on the wreath ribbon and nearby leaves. The reverse is nearly pristine, and the obverse is smooth aside from a cluster of minute marks beneath the bust truncation. Certified in a green label holder. Population: 88 in 65 (3 in 65+), 34 finer (4/13). NGC ID# 25NB, PCGS# 8010

1889 Three Dollar Gold, MS63
In-Demand Final Date

4747 1889 MS63 PCGS. The unpopular three dollar gold denomination was discontinued after 1889 when a small mintage of 2,300 pieces was accomplished. Fortunately, the 1889 enjoys a relatively high survival rate, as many collectors saved the final date as a keepsake. This attractive Select example displays vivid orange-gold surfaces with satiny mint luster and sharply detailed design elements. Visual appeal is quite strong. NGC ID# 25NC, PCGS# 8011

1889 Three Dollar Gold, MS64
Partially Prooflike Fields

4748 1889 MS64 PCGS. As the final date of the denomination the 1889 three dollar gold piece is an important issue to type collectors and series specialists alike. This sharply detailed Choice example displays lightly marked orange-gold surfaces that show prooflike reflectivity in sheltered areas. Population: 58 in 64 (1 in 64+), 42 finer (4/13). NGC ID# 25NC, PCGS# 8011

PROOF THREE DOLLAR GOLD PIECES

1872 Three Dollar Gold, PR62
Mintage 30 Pieces

4749 1872 PR62 NGC. With 30 pieces struck and even fewer survivors, the 1872 three dollar gold piece is a significant rarity, though it is more affordable than proof-only dates such as the 1875 and 1876. While this PR62 example has taken its share of contact, including a line pointing to the left side of the coronet and a small cut on the cheek, the reverse presents well with only a small scuff to the left of the 1 in the date for an individually mentionable flaw. A worthwhile opportunity for the enthusiast of this odd-denomination series. Census: 2 in 62, 2 finer (4/13). NGC ID# 28AC, PCGS# 8035

1876 Three Dollar, PR65 Cameo Celebrated Proof-Only Issue

4750 1876 PR65 Cameo NGC. Like its celebrated older sibling, the 1876 three dollar gold piece is also a proof-only issue. The 1875 proof three was struck in the recorded amount of 20 coins, while the 1876 saw a larger mintage of 45 pieces. During this era of Mint history, however, it was customary to report the number of proofs minted, but not the number that were usually melted as unsold after the calendar year ended.

In the case of rarities such as proof-only issues, however, another scenario played out in many cases, and the same applies to pattern issues. They were apt to be produced for collectors and the well-connected as delicacies in the case of pattern issues. Rare regular issues such as the proof-only threes of 1875 and 1876 were also apt to be restruck or to have seen a second batch struck within the same year. This is mentioned for those purists who object that the term “restrick” should be reserved for coins struck again at a date later than that borne on the coinage. That is apparently what happened with both the 1875 and 1876 proof threes; the restricks show die rust on the obverse, as does this piece under a loupe. Bowers notes that the rusted obverse die does not necessarily indicate that the pieces were struck after 1876; remember, the date is on the reverse of this design, so the obverse die used could have rusted before 1876. The “restricks” of the 1875 are identifiable by an obverse die of 1873-74.

This piece is an essentially pristine coin with the only mentionable contact marks located in the lower left of the obverse. Copious contrast is seen between the reflective, jet-black fields and the well-frosted golden-yellow devices. A loupe reveals the faint traces of die rust, most prominent seen is a small “dot” behind the eye, with scattered other areas on the cheek, neck, and lower hair. The lower inside leaf within the wreath on the reverse is thin, as usually seen. The fields show a few slight hairlines that likely determine the grade, but the eye appeal is top-notch. Census: 8 in 65 (1 in 65+) Cameo, 1 finer (4/13). NGC ID# 28AJ, PCGS# 88040

1889 Three Dollar, PR63 Cameo
Last Year of Denomination

4751 1889 PR63 Cameo PCGS. CAC. The three dollar gold denomination limped along for more than a third of a century before an 1890 act put it out of its misery. The last coins with a face value of three dollars, 2,300 business strikes and 129 proofs, had been struck the year before. This Select Cameo proof from that final date has clear and considerable contrast between yellow-orange fields and moderately frosted devices. The obverse has a field scuff to the left of Liberty's nose and light hairlines, but the reverse with its date and denomination displays well. Population: 3 in 63 Cameo, 15 finer (4/13). NGC ID# 28AY, PCGS# 88053

1879 Flowing Hair Stella, PR66 Ultra Cameo
One of the Finest Examples Known
A Noble But Impractical Idea for International Coinage

4752 1879 PR66 Ultra Cameo NGC. The precise number of 1879 Flowing Hair stellas produced will almost certainly never be known. It is generally thought that there was an initial quantity of 15 or 25 pieces struck, followed by a second much larger production that was offered to congressmen only — outraging collectors of the era. The congressional offering was for three-piece sets along with two silver pattern dollars, Judd-1617/1618 and Judd-1626/1627, at the Mint's production cost of \$6.10. (Note that the face value of the sets was \$6.)

Judging from the available numismatic evidence — and there is little documentation other than the coins themselves — the quarter-century from roughly 1859 to 1884 was the peak of various Mint shenanigans aimed at enriching facility insiders and their coin-dealer cronies outside.

Among the more infamous numismatic hijinks were:

- The restriking of (and production of fantasy pieces and mules of) Gobrecht dollars dated 1836, 1838, and 1839 (circa 1875-76);
- Restrikes of the 1804 silver dollars (circa 1858-59);
- Concoction of the 1879-dated “Schoolgirl” and “Washlady” and like patterns for the exclusive benefit of Mint officials (circa 1879);
- Production of the limited-edition 1879 Coiled Hair and 1880 Flowing Hair/Coiled Hair stellas and other patterns, again for the private profit of Mint officials; and
- Clandestine production and distribution of 1884 and 1885 Trade dollars (circa 1885). (The 1884 Trade dollars were legitimately produced, but the 10 pieces struck, out of 875 proof sets, all went to the Mint's favored coin dealer, William Idler.)

In particular, the production of many of the 1879- and 1880-dated patterns, completely unpublicized and for the sole apparent purpose of lining the pockets of government officials, created consternation and furor in the numismatic fraternity, a *cause célèbre* that inspired one of the most prominent and trusted numismatists of the era, W. Elliot Woodward, to pen the passage below. Woodward was writing in the October 1880 catalog of the Ferguson Haines Collection concerning a rare 1802 half dime (the passage is quoted from Bowers' *Rare Silver Dollars Dated 1804 and the Exciting Adventures of Edmund Roberts*):

“This piece is undoubtedly the rarest of the American silver series — not only that, but it must remain so, as the dies are no longer in existence.

“Judging from my own experience, I believe that the purchaser of an 1804 dollar, or any one of many of the rarest of United States coins, has no guarantee that the son of some future director or chief coiner of the Mint will not, at an unexpected moment, place a quantity on the market. ‘What man has done man may do,’ and the ways of the Mint are past finding out, though transactions, such as restriking 1804 dollars, 1827 quarter dollars and rare half cents, and speculations in rare experimental coins designed, engraved, and struck at the expense of the government, have been too frequent not to be well understood. What the lords of the Treasury will do next is ‘what no feller can find out.’ We will wait and see.

“In these days of investigation, an inquiry into the past operations of the Mint at Philadelphia, or rather into the past conduct of some of its officials, would, if properly conducted, be fruitful in results; and, if properly reported, would furnish what Horace Greeley used to call ‘mighty interesting reading.’

“As government is fond of illustrating its reports, as a frontispiece, is suggested a view of a son of a late official of the Mint, as he appeared at the store of the writer, when on a peddling expedition from Philadelphia to Boston, he drew from his pocket rolls of ‘God Our Trust’ patterns, and urged their purchase at wholesale, after sundry sets had been dispersed at \$100 to collectors of rare coins, with the assurance that only a *very few* had been struck, and that the dies were destroyed.

“Should, however, an investigation be ordered, it is to be hoped it will not be entrusted to that committee which requires 618 sets of the goloid coinage [this refers to the 1879 Flowing Hair stellas], costing nearly \$4,000 for the metal alone, before it can decide whether to recommend the acceptance or rejection of the most stupid humbug and most stupendous swindle that has lately been honored with official attention.”

“Stupid humbug” and “stupendous swindle” sounds like a harsh way to describe what has become one of American numismatic's most popular and highly priced coins. But then, Woodward and other 19th century dealers, were given to inflammatory language and accusations. Such well-known dealers as Woodward, Édouard Frossard, Edward Cogan, and Ebenezer Mason regularly exchanged printed barbs that today would surely warrant a well-founded libel case. What Woodward overlooked was the legitimate need for the four-dollar patterns we know as stellas. They were struck as a means to form a stable form of international currency, a noble but impractical idea.

This is a remarkably well-preserved example that has deeply mirrored fields on each side and strongly contrasting, frosted devices. The usual die striations are seen over the central obverse device of Liberty, as seen on all 1879 stellas we have examined. There are no obvious pedigree identifiers in terms of contact marks. The only possible identifier is a wavy lint mark to the right of the upright of the star in the field above the E in ONE on the reverse. This is one of the most attractive stellas known, one that will undoubtedly realize an extremely strong price when it is hammered down. Census: 3 in 66 Ultra Cameo, 1 finer (4/13). NGC ID# 28AZ, PCGS# 98057

EARLY HALF EAGLES

1800 Half Eagle, Choice AU
Scarcer BD-2 Variety

- 4753** 1800 AU55 NGC. BD-2, High R.3. A scarce die variety from the final full year of the Adams' administration. This apricot-gold representative displays substantial luster, and is lightly abraded aside from a brief mark near obverse star 2 and a few wispy hair-thin vertical lines on Liberty's neck. The central reverse displays moderate mint-made adjustment marks. NGC ID# 25NW, PCGS# 8082

1803/2 Half Eagle, AU58
Popular Overdate, BD-1

- 4754** 1803/2 AU58 NGC. BD-1, R.4. Bass-Dannreuther Die State a/b. The BD-1 is among four die pairings known for the 1803 half eagles, all of them 1803/2 overdates (even though no 1802 half eagles are known that are not themselves 1802/1 overdates). All four 1803/2 varieties are rated either R.4, very scarce, to R.5, rare, in Bass-Dannreuther. On the obverse of the BD-1, the T in LIBERTY lacks its right foot or serif, and the 3 in the date just barely avoids grazing the lower bust drapery. The reverse is a carryover from 1802, showing a star that is pointing directly to, but not touching, the eagle's upper beak. The T's in UNITED and STATES are also missing the serif. Since this die was first used — even though extensively cracked — for the 1802/1 BD-7, those cracks dominate the reverse and are not much further advanced here. One runs through the tops of TED, while the second appears through the arrowheads, (faintly, due to strike weakness on the left claw and left side of the shield) through the shield, ribbon, and to star 12. This is a lovely bright yellow-gold piece that shows few marks of any import and excellent eye appeal. A few planchet adjustment marks on the obverse are well-hidden within Liberty's cap. NGC ID# 25NY, PCGS# 8084

1803/2 Half Eagle, MS61
Imperfect T, BD-1 Variety

4755 1803/2 MS61 NGC. BD-1, R.4. Bass-Dannreuther Die State b/c. A nominal mintage of 33,506 Capped Bust Right half eagles was accomplished in 1803, all struck from dies overdated 1803/2. Four die varieties are known for the date, three using the present obverse die with an imperfect T in LIBERTY. This coin represents the scarce BD-1 variety, with the reverse star near and pointing to the upper part of the eagle's beak. The reverse die was used the year before to strike the BD-7 variety of 1802. The surviving population of 1803 BD-1 numbers no more than 150-200 examples in all grades and the variety probably accounted for 7,500-12,500 pieces of the reported mintage.

The present coin is an attractive Mint State specimen with well-detailed design elements that show a touch of softness on the eagle's claw and arrows. The bright orange-gold surfaces have a partially prooflike appearance in sheltered areas and show only minor signs of contact. Visual appeal is strong for the grade. Census: 40 in 61 (1 in 61+), 91 finer (4/13). NGC ID# 25NY, PCGS# 8084

1805 Capped Bust Right Five, AU58
Perfect 1, BD-1 Variety

4756 1805 AU58 PCGS. CAC. BD-1, High R.3. Bass-Dannreuther Die State a/a. A nominal mintage of 33,183 half eagles was accomplished in 1805 but some of the coins may have been dated 1804, or even earlier. Five die varieties are known for the date, with this coin representing the BD-1 variety with a perfect 1 in the date and the leaf touching 1 in AMERICA. The BD-1 variety has a surviving population of 175-225 examples in all grades and probably accounted for 10,000-15,000 pieces of the reported mintage.

The present coin is a lightly circulated specimen from an early state of the dies. Only a trace of wear can be detected on the high points of the design and the devices are well-detailed, with just a touch of softness on the arrows and junction of the shield and eagle's wing. The pleasing yellow-gold surfaces are brightly lustrous and show only minor signs of contact. Eye appeal is quite strong for the grade. NGC ID# 25P4, PCGS# 8088

1806 Capped Bust Right Five, MS62
Guide Book Knobbed 6 Variety, BD-6

4757 1806 Round Top 6, 7x6 Stars MS62 NGC. BD-6, R.2. Bass-Dannreuther Die State d/e. The 1806 Capped Bust Right half eagle claims a mintage of 64,093 pieces, with six die varieties known for the date. Five of those varieties feature a Pointed 6 in the date, but this coin represents the single variety with a Knobbed 6, the BD-6. BD-6 is an available issue in the context of early half eagles, with a surviving population of 600-900 pieces in all grades. Mint State specimens are very scarce, however.

The present coin is well-detailed in most areas, with a touch of softness at the juncture of the shield and eagle's wing on the reverse. The brightly lustrous surfaces show only a few small signs of contact, but the left obverse rim exhibits some minor adjustment marks. Visual appeal is quite strong for this popular early half eagle. Census: 62 in 62, 86 finer (4/13). NGC ID# 25P5, PCGS# 8089

1806 Capped Bust Right Five, MS64
Round Top 6, BD-6 Variety
Extremely Rare in Finer Grades

4758 1806 Round Top 6, 7x6 Stars MS64 PCGS. BD-6, R.2. Bass-Dannreuther Die State d/e. The half eagles of 1806 were produced in large numbers and survivors are relatively available in lower Mint State grades. As such, they are widely collected by type collectors seeking a representative of the Capped Bust Right design of 1795-1807. Six die varieties are known for the date, with five varieties featuring a Pointed 6 in the date. This coin represents the BD-6 variety which is distinguished by its Round Top 6. The BD-6 is also the most available variety, with a surviving population of 600-900 examples in all grades. This variety probably accounted for 35,000-50,000 pieces of the reported 64,093 coin mintage for the date.

This was the only use of the obverse die, but with a mintage that might have reached 50,000 pieces, it was certainly durable for its time. The reverse die was also used to strike the very rare BD-5 variety of 1806. The obverse die was apparently used in the anvil position, an unusual arrangement among early half eagles. This position resulted in the obverse showing sharper details than the reverse on most examples seen, including this coin.

This impressive Choice example exhibits well-detailed design elements and pleasing greenish-gold surfaces with softly frosted mint luster and a minimum number of abrasions. In fact, the only flaws that we see that keep this coin from an almost unprecedented MS65 grade are a contact mark in the left obverse field and two very shallow, almost imperceptible, diagonal adjustment marks in the center of the reverse. Housed in a green label holder. Population: 35 in 64 (1 in 64+), 2 finer (4/13).

Ex: *Baltimore Signature* (Heritage, 7/2003), lot 10266. NGC ID# 25P5, PCGS# 8089

**1810 Half Eagle, AU55
Small Date, Tall 5, BD-1**

- 4759** 1810 Small Date, Tall 5 AU55 NGC. BD-1, High R.3. Bass-Dannreuther Die State b/b. Actually an intermediate die state that shows the die crack under OF to the eagle's wing but has none of the rust lumps characteristic of Die State c/c. This Choice AU example shows just a trace of wear on the well-detailed design elements and retains much of its original mint luster. Census: 8 in 55, 59 finer (4/13). NGC ID# 25PE, PCGS# 8106

**1812 Five Dollar, XF40
Scarcer Narrow 5 D BD-2**

- 4760** 1812 XF40 NGC. BD-2, High R.4. The "Narrow 5D" variety, easily the scarcer of the two known die pairs for the date. This marigold-yellow example displays minor mint-made adjustment marks on the left obverse margin, but post-strike abrasions are minimal. We note a thin line on the bust truncation and a couple of faint marks on Liberty's neck. The curls exhibit moderate wear but the wing plumage and shield are sharp. NGC ID# 25PL, PCGS# 8112

**1812 Capped Bust Left Half Eagle, MS63
Popular Wide 5D, BD-1 Variety**

- 4761** 1812 MS63 NGC. BD-1, R.3. Bass-Dannreuther Die State b/b. Only one obverse and two reverse dies were used to coin the reported mintage of 58,087 Capped Bust Left half eagles in 1812, resulting in just two known die varieties for the date. This coin represents the more available BD-1 variety, easily recognized by the Wide 5D in the denomination. Probably 300-450 examples of the BD-1 variety have survived in all grades, and Mint State specimens are rare. The obverse die was also used to strike the BD-2 variety of this date and this was the only use of the reverse die.

The present coin is a delightful Select specimen with well-detailed design elements and vibrant mint luster. Close inspection reveals a few minor adjustment marks on the eagle's neck and the dies seem to have been lapped, resulting in a touch of softness on the reverse. Only minor signs of contact are evident and eye appeal is quite strong. Census: 27 in 63, 34 finer (4/13). NGC ID# 25PL, PCGS# 8112

1834 Capped Bust Left Five, XF40
Motto, Crosslet 4, BD-2 Variety
Rare Old-Tenor Gold

4762 1834 Capped Head, Crosslet 4 XF40 PCGS. BD-2, R.5. Bass-Dannreuther Die State b/b. The Capped Bust Left design, with the motto E PLURIBUS UNUM on the reverse, was replaced by the Classic Head type partway through the year in 1834. The older style half eagles had an intrinsic value that was greater than their face value, resulting in mass hoarding and melting of the coins as soon as they were issued. To correct this situation and allow the coins to actually circulate, the Classic Head half eagles were of lighter weight and reduced gold content. The measure was a success, but it resulted in even more melting of the old-tenor gold pieces, making the 1834 a very scarce issue today.

According to Mint records, 50,141 Capped Bust Left half eagles were struck in the first part of the year, with four die varieties known for the date and type. Two varieties used a Plain 4 in the date and two used a Crosslet 4. This coin represents the BD-2 variety, with a Crosslet 4 and the lowest curl of Liberty's hair open. The BD-2 has a small surviving population of 45-55 examples in all grades, but it is still the most available 1834 variety. It probably accounted for 20,000-25,000 pieces of the reported mintage. This was the only use of the obverse die, but the reverse was also used to coin the BD-3 variety of this date.

The present coin is an attractive XF specimen, with well-detailed design elements that show little actual wear. The lightly abraded yellow-gold surfaces show a few traces of prooflike reflectivity in sheltered areas. An arcing die crack through stars 9-13 and another from the denomination through MERICA identifies the die state. Altogether, a pleasing example of this rare date and type. Population: 1 in 40, 8 finer (4/13).

Ex: *Baltimore Signature* (Heritage, 7/2008), lot 2971, realized \$45,000. PCGS# 8161

CLASSIC HALF EAGLES

1836 Classic Head Five, Lustrous MS61

- 4763** 1836 MS61 NGC. Breen-6509, McCloskey 4-C, R.3. Second Head, Large Date. From a mintage of well over a half-million pieces, this is the second-most common issue of the Classic Head half eagle type. This Mint State example boasts shimmering luster and light greenish coloration. Numerous small marks define the grade.
Ex: *Dallas Signature* (Heritage, 11/2007), lot 1703. NGC ID# 25RY, PCGS# 8174

1837 Classic Five, McCloskey 2-B Well-Defined Near-Mint Example

- 4764** 1837 AU58 PCGS. CAC. Large Date, Large 5, Breen-6512, McCloskey 2-B, R.2. The most accessible of three 1837 half eagle die pairs, distinguished by a Block 8 date and a solitary curl at the forehead. Apricot-gold luster is dusky and understated but near-intact, and the definition is better than often seen on this series notorious for weak central strikes. Population: 16 in 58, 38 finer (4/13). NGC ID# 25RZ, PCGS# 8175

1838-C Five Dollar, VF35 First Year of Facility

- 4765** 1838-C VF35 PCGS. CAC. Breen-6517, Variety 1, R.4. The half eagle became the flagship denomination of the Charlotte and Dahlonega Mints, both of which began coinage in 1838. The 1838-C comes in two die varieties, which share the same obverse. We know Variety 1 was struck first since examples of Variety 2 develop a crack through star 5. The present orange-gold piece is minimally abraded and shows moderate wear on the wingtips. Unimportant obverse laminations are noted near stars 2 and 4. NGC ID# 25S5, PCGS# 8177

LIBERTY HALF EAGLES

1839-D Five Dollar, AU50 Obverse Mintmark Style

- 4766** 1839-D AU50 PCGS. Variety 2-A. The mintmark is tilted slightly to the left at the top. The 1838-D and 1839-D half eagles (of different designs, one Classic Head, one Liberty Head) are always popular and highly collectible as examples of the two-year Obverse Mintmark style, and this piece is a particularly nice representative of the Liberty Head variant. The surfaces show the expected high-point wear, marked as a slight color change on surfaces that are largely lustrous yellow-gold. Contact marks are scattered and minor, however, the most obvious a couple of thin scrapes in the obverse fields, away from the focal points, and some short ticks near the date. Much eye appeal persists. Population: 12 in 50, 26 finer (4/13). NGC ID# 25S9, PCGS# 8193

1842-C Half Eagle, AU58 Underrated Large Date Variant

- 4767** 1842-C Large Date AU58 NGC. Variety 1. Although the Large Date 1842-C Liberty half eagle is more available than its Small Date counterpart, it is still a scarce and underrated date in the series. This attractive near-Mint specimen displays well-detailed design elements and lightly abraded greenish-gold surfaces that retain much of their original mint luster. Census: 31 in 58 (2 in 58+), 10 finer (4/13). NGC ID# 25SW, PCGS# 8209

1842-D Large Date Five, XF40 Scarcer D-Mint Issue

- 4768** 1842-D Large Date XF40 NGC. Variety 9-G. A pleasing example with lightly marked fields and moderate, even wear over both sides. The yellow-green devices display a strike that is slightly stronger than the norm for this Dahlonega issue. The mintage of 21,691 pieces indicates this issue should be more easily found than it actually is. Census: 3 in 40, 16 finer (4/13).
Ex: *Denver ANA Signature* (Heritage, 8/2006), lot 1822. NGC ID# 25SY, PCGS# 8211

1844-D Half Eagle, MS62
Unlisted Large D Mintmark

- 4769 1844-D MS62 PCGS. Unlisted Large D Variety.** The reverse die is unlisted and exhibits a larger mintmark than the Medium D typically encountered on the 1844-D. Although most Dahlonega collectors collect either by type or date, rare die varieties may command significant premiums in the future, especially if they have more distinct characteristics than mere positional differences of the date or mintmark. The present yellow-gold example is free from bagmarks though the right obverse field has a patch of hairlines. The centers show incompleteness usual for the remote Southern facility. Population: 5 in 62, 4 finer (4/13). NGC ID# 25T9, PCGS# 8221

1850-D Five Dollar, Choice AU
Above Average Quality for the Issue

- 4770 1850-D AU55 PCGS. Variety 28-S (formerly 24-P).** The 1850-D is conditionally rare, given its median grade of XF45 at PCGS. The present Choice AU Dahlonega example has lemon-gold surfaces with portions of mint luster surrounding the devices on each side. An above average strike is seen on each side, and no marks are noticeable aside from a single diagonal line on the cheek. Population: 15 in 55, 10 finer (2/13).
Ex: Central States Signature (Heritage, 4/2006), lot 2703; Long Beach Signature (Heritage, 9/2009), lot 1576. NGC ID# 25U3, PCGS# 8245

1851-D Five Dollar, MS60
Very Rare in Mint State

- 4771 1851-D MS60 NGC. Variety 31-P (formerly 26-R)** The first 1 in the date joins a denticle and the second 1 is close to the neck. The base of the first 1 is repunched. The upright of the mintmark is over the left serif of the E in FIVE, and is away from both the stem and the feather.

The yellow-gold surfaces of this MS60 specimen exhibit strong definition in the stars, the hair atop Liberty's head, and the bun. The mintmark is bold and the eagle's wing feathers are stronger than usually seen on this issue. Liberty's curls around the face and the eagle's legs show the typical weakness. Both sides reveal fewer marks than might be expected for the designated grade. NGC ID# 25U7, PCGS# 8248

1851-O Half Eagle, AU58
Only Two Finer Coins at NGC

- 4772 1851-O AU58 NGC. Variety 2.** The 1851-O half eagle claims a mintage of just 41,000 pieces and the issue is scarce-to-rare in all grades. This attractive near-Mint specimen exhibits well-detailed design elements with a touch of the typical softness on the eagle's claws and tail. The pleasing green and orange-gold surfaces retain much original mint luster. Census: 19 in 58, 2 finer (4/13). NGC ID# 25U9, PCGS# 8249

1853-D Half Eagle, Borderline Uncirculated

- 4773 1853-D Large D AU58 NGC. Variety 34-Y (formerly 29-V). This Southern gold type coin displays substantial peach-tinged luster at the borders while the centers are wheat-gold. Impressively unabraded despite its brief encounter with antebellum commerce. The strike is sharp for a Dahlonega product though the left-side stars are a bit soft. NGC ID# 25UF, PCGS# 8255

1854 Liberty Five, MS64
Among the Finest Certified

- 4774 1854 MS64 NGC. From a mintage of 160,675 pieces, the 1854 Liberty half eagle is virtually impossible to locate in grades above the MS64 level. This impressive Choice example displays well-detailed design elements with a touch of softness on the eagle's head. The lustrous orange-gold surfaces show a few hints of lilac and a couple of minor contact marks. Census: 6 in 64, 0 finer (4/13). NGC ID# 25UG, PCGS# 8256

1854-D Half Eagle, MS62
Previously Unlisted Large D Variety

- 4775 1854-D Large D MS62 NGC. Variety 36-AA (previously unlisted). The 1854-D Liberty half eagle claims a mintage of 56,143 pieces and the issue is one of the more available half eagles from the Dahlonega Mint. The surviving population probably numbers 225-250 pieces in all grades, but Mint State examples are very rare. This impressive MS62 example is sharply detailed and lustrous, with bright orange-gold surfaces. Census: 19 in 62, 5 finer (4/13). NGC ID# 25UK, PCGS# 8258

1858-D Half Eagle, MS61
Just Outside the Condition Census

- 4776 1858-D MS61 PCGS. CAC. Variety 42-GG. The 1858-D is usually only found in XF or AU grades. Uncirculated pieces are seldom encountered. The mintage was only 15,362 pieces and it is estimated that today between 200 and 250 individual coins are extant. This piece is just outside the Condition Census, which ranges from MS62 to MS65 (predictably the Duke's Creek coin). This issue is known for problem-ridden surfaces, but that is not the case here. Each side is remarkably clean and lustrous for the grade, and the surfaces display original reddish tinted gold color with a subtle mixture of lilac. NGC ID# 25V9, PCGS# 8278

1866-S With Motto Five, AU50
Lower-Mintage Issue

- 4777 1866-S Motto AU50 NGC. In 1866 the motto IN GOD WE TRUST was added to the reverse of the Liberty Head gold coins, and the first half eagles coined of this design included 34,920 pieces minted in San Francisco. This pleasing example has good luster with rich honey-gold color. A few grade-consistent surface marks are evident on each side.
Ex: Long Beach Signature (Heritage, 2/2007), lot 4578. NGC ID# 25W2, PCGS# 8312

**1868 Liberty Half Eagle, Near-Mint Example
Scarce in High Grades**

4778 1868 AU58 PCGS. A near-Mint example from a scarce issue with a low mintage of 5,700 coins, all struck in mid-January 1868 and apparently all from one pair of dies. A second die pair was used for the few proofs that were struck the following month. Surviving examples are scarce at all grade levels. This well-struck representative displays straw-gold color. Population: 4 in 58, 2 finer (4/13). NGC ID# 25W5, PCGS# 8315

**1883-CC Half Eagle, AU58
Excellent Eye Appeal**

4781 1883-CC AU58 PCGS. Variety 1-A. A lemon-gold Borderline Uncirculated rare date Carson City five with hints of green-gold along the obverse margin. Well struck and minimally abraded. Luster dominates all of the design aside from the open fields. Given the five-figure cost for one of the handful of Mint State pieces, the value provided by the present coin is irrefutable. Population: 18 in 58, 3 finer (4/13). NGC ID# 25XL, PCGS# 8362

**1870-S Half Eagle, AU55
Low-Mintage Key**

4779 1870-S AU55 NGC. Mintage of half eagles was severely limited at the San Francisco Mint in 1870 with only 17,000 examples struck. This issue is unknown in Mint State and Choice AU specimens are very rare. This lightly circulated example displays well-detailed design elements and lightly abraded yellow and rose-gold surfaces. Census: 12 in 55, 3 finer (4/13). NGC ID# 25WB, PCGS# 8321

**1886 Liberty Half Eagle, MS65
Conditionally Very Rare at This Level**

4782 1886 MS65 NGC. Despite a substantial mintage of 388,300 pieces the 1886 Liberty half eagle is quite difficult to locate in high grade. This delightful Gem is sharply detailed except for a touch of softness on some of the stars. The pleasing yellow and rose-gold surfaces are brightly lustrous and show only minor signs of contact. Census: 2 in 65, 1 finer (4/13). NGC ID# 25XU, PCGS# 8369

**1881 Half Eagle, MS66
Semireflective Luster**

4780 1881 MS66 NGC. Exacting detail through the centers and on the peripheral stars alike. Pale yellow interiors are semireflective, while deeper orange tones and a few small coppery areas are present at the margins. Despite a mintage of more than 5.7 million pieces, better-than-Gem coins are rare. NGC has certified only one example as MS67 or better (4/13). NGC ID# 25XD, PCGS# 8354

PROOF LIBERTY HALF EAGLE

1904 Half Eagle, PR66 Cameo
Abundant Contrast

4783 1904 PR66 Cameo NGC. Few examples of the 1904 half eagle appear at the Premium Gem proof level and far fewer still in Cameo, as the Mint had two years previously changed its method of proof manufacture to one of little to no contrast. The proof mintage was 136 pieces, but today NGC has seen only eight in PR66 Cameo with six Cameos finer (4/13). The inky-black fields of this Premium Gem produce abundant contrast against well-frosted devices. The eye appeal is ample, and there are no signs of contact on either side of this fully struck proof. A subtle orange-peel effect occurs in the fields. NGC ID# 28DA, PCGS# 88499

INDIAN HALF EAGLES

1909-O Five Dollar, Choice AU
Low-Mintage Series Key

4784 1909-O AU55 NGC. The last gold coin issued in New Orleans and the only O-mint Indian Head five, the 1909-O half eagle has acquired a legendary cachet, but one that is nonetheless quite well-deserved. Despite the mintage of 34,200 coins, even examples in the lower Mint State grades are seldom obtainable. Many collectors opt for a nice XF or AU example, a grade level where a few hundred certified examples likely survive. The issue is fairly well-struck overall, but in the higher circulated grades, finding a nice example with good luster remaining and a bold mintmark may be challenging; the mintmark is weak on many examples. The mintmark on this piece is well-defined, and the surfaces are original and uncleaned although a bit choppy. NGC ID# 25ZK, PCGS# 8515

1909-O Half Eagle, AU58
The Last New Orleans Gold Issue

4785 1909-O AU58 NGC. The 1909-O is not the sole key to the Indian half eagle series, but due to its unusual status within the series, it is among the most celebrated. It is the last O-mint gold coin struck and the only New Orleans Indian Head issue of any denomination, making it a conspicuous anachronism; the mint would permanently suspend coinage operations later in the same year. Most collectors choose an example in the AU58-MS62 grade range, as higher-graded examples are quite expensive. This near-Mint State coin shows much remaining luster and brightness overall. Mentionable marks include some ticks in the field before the Indian's cheek, along with an angling scrape through US in TRUST on the reverse. The mintmark is bold. NGC ID# 25ZK, PCGS# 8515

Mint State 1909-O Half Eagle
Only O-Mint Indian Five
Sought-After Low-Mintage Key

4786 1909-O MS61 PCGS. CAC. Variety 1. Though its half eagle and double eagle gold coins are plenty famous today, for much of its post-Civil War history, the U.S. Mint in New Orleans was the “Silver Dollar Mint.” Reopened in 1879 after the end of Reconstruction and closed in 1909, New Orleans saw its greatest use in striking the Morgan dollars mandated by the Bland-Allison Act. In fact, for the years 1880 to 1890, it coined the silver dollar denomination to the exclusion of all others. After that New Orleans added minor silver coinage and ten dollar gold eagles to its output, but the end of the Morgan dollar in 1904 and the outdated facilities made the New Orleans Mint less and less viable. Coinage ceased after the 1909 issues and did not resume before minting operations were decommissioned in 1911.

It is precisely because the half eagles and double eagles struck in post-Civil War New Orleans were such small afterthoughts that they are popular with modern collectors. One such issue is the 1909-O half eagle with its self-consciously modern sunken-relief design that suggests a future in which the antiquated New Orleans Mint had no place. Only 34,200 pieces were struck in the last year of operations, and its status as a one-year type coin makes it one of the most popular New Orleans issues of any denomination.

The present coin is a very scarce Mint State example, with well-detailed design elements and brightly lustrous surfaces that display mingled shades of green and orange-gold patina, with occasional highlights of rose. A scattering of minor contact marks on both sides explains the grade. Population: 23 in 61, 40 finer (4/13). NGC ID# 25ZK, PCGS# 8515

1910-S Indian Five, MS62
Underrated Early Series Issue

4787 1910-S MS62 PCGS. CAC. The 1910-S Indian half eagle is an underrated date that is much more elusive in high grade than one would expect from its mintage of 770,200 pieces. This attractive MS62 specimen is well-detailed and lustrous, with pleasing orange and greenish-gold surfaces that show a scattering of grade consistent contact marks. PCGS has graded 46 numerically finer examples (4/13). NGC ID# 28DM, PCGS# 8519

1910-S Indian Half Eagle, MS63
Seldom Encountered Finer

4788 1910-S MS63 PCGS. CAC. Although it was produced in large numbers, the 1910-S Indian half eagle is surprisingly hard to locate in high grade. This attractive Select specimen exhibits well-detailed design elements and pleasing greenish-gold surfaces with vibrant mint luster and hints of rose. Population: 22 in 63 (2 in 63+), 24 finer (4/13). NGC ID# 28DM, PCGS# 8519

1911-D Half Eagle, MS62
Second-Rarest Indian Five

4789 1911-D MS62 NGC. CAC. The 1911-D Indian half eagle has been somewhat overshadowed by its more famous quarter eagle counterpart but the five dollar coin is an elusive issue in its own right. From a low mintage of 72,500 pieces, the 1911-D is the second-rarest Indian half eagle in absolute terms. The present coin is an attractive MS62 specimen with well-detailed design elements that show just a touch of softness on some peripheral design elements. The bright yellow and greenish-gold surfaces show a few traces of amber toning and slightly granular mint luster on both sides. A few minor surface marks are present, the worst being a short scratch above E in E PLURIBUS. Census: 54 in 62 (1 in 62+), 39 finer (4/13). NGC ID# 28DR, PCGS# 8521

1912 Indian Five, MS64+
Very Scarce Any Finer

4790 1912 MS64+ PCGS. CAC. The 1912 Indian half eagle is not too difficult to locate in lower Mint State grades, but it becomes very scarce at the Gem level. This high-end Choice example seems like a good balance of quality and value, with sharply detailed design elements and lustrous surfaces that show only minor contact marks. NGC ID# 28DS, PCGS# 8523

**1913-S Five Dollar, MS63+
Above-Average Strike**

4791 1913-S MS63+ PCGS. CAC. The 1913-S five dollar is difficult to locate above the MS62 level. PCGS has graded 48 pieces as MS63, but only the present offering rates the MS63+ level of preservation, with 17 examples finer (4/13). Gems are virtually unobtainable.

The lustrous surfaces of the present specimen display yellow-gold coloration, and the design features exhibit much better definition than usually encountered on this issue. The headdress and eagle's plumage are sharp, as are the peripheral elements. The one exception is the mushy mintmark, which is characteristic of the date. NGC ID# 25ZP, PCGS# 8526

**1914-D Indian Five, MS64+
Elusive in Higher Grades**

4792 1914-D MS64+ NGC. The reported mintage for the 1914-D Indian half eagle was 247,000 pieces and the issue can only be called scarce in MS64 condition. However, the population drops off dramatically at the Gem level, so this high-end Choice specimen would be difficult to improve upon. The lustrous yellow and greenish-gold surfaces show only minor signs of contact and the design elements are sharply detailed. NGC has graded 16 numerically finer examples (4/13). NGC ID# 28DV, PCGS# 8528

**1915-S Half Eagle, MS62
Rare Any Finer**

4793 1915-S MS62 PCGS. CAC. The 1915-S half eagle is a challenging issue with a low-six-figures mintage and so-so survival rate, Select and better coins being condition rarities. This MS62 example is well-defined for the type with moderately abraded but luminous yellow-orange surfaces that show skeins of copper-violet. NGC ID# 25ZR, PCGS# 8531

**1916-S Indian Half Eagle, MS63
Final Branch Mint Five**

4794 1916-S MS63 PCGS. A smallish mintage of 240,000 Indian half eagles was achieved at the San Francisco Mint in 1916, the final branch mint issue of the design. No half eagles were struck between 1916 and 1929 at any U.S. mint. This well-detailed Select example displays pleasing orange-gold surfaces with ample mint luster and only minor signs of contact. NGC ID# 28DY, PCGS# 8532

EARLY EAGLES

1797 Ten Dollar, XF Details Large Eagle Reverse, BD-4

- 4795** 1797 Large Eagle XF40 PCGS Genuine — Filed Rims — XF Details. BD-4, High R.4. The die crack rising through the last 7 in the date and the Large Eagle reverse with long, thick neck on the eagle are sufficient to make the attribution, since this was the only 1797-dated obverse die used with this reverse. Despite the PCGS caveat, this piece offers much to commend itself. The surfaces show considerable detail remaining, and the rim filing appears limited to a small area beneath the date. The color is an attractive yellow-orange. A few notable marks appear on the reverse, including at the right wing and right shield corner, a rim nick at the C of AMERICA, and a couple of the clouds below TAT. NGC ID# 25ZY, PCGS# 8559

1797 Heraldic Eagle Ten, BD-2 AU Details

- 4796** 1797 Large Eagle — Repaired, Improperly Cleaned — NCS. AU Details. BD-2, High R.4. Bass-Dannreuther Die State b/b. A wire brush was used to smooth the left and right obverse field, and the profile also has a blurry appearance. The reverse is moderately granular and displays horizontal hairlines across the stars. The reverse rim has minor damage at 4:30. Still an affordable example of this better early eagle die variety. NGC ID# 25ZY, PCGS# 8559

1799 Large Stars Ten, VF25 PCGS, BD-10 Only Two Large Stars Varieties

- 4797** 1799 Large Stars Obverse VF25 PCGS. BD-10, R.3. One of only two Large Stars varieties of the 1799 gold eagle, and easily the more common of the two. A leaf tip on the reverse is connected to the lower right foot of I in AMERICA, identifying this piece as an example of B-10 rather than B-9 (the other Large Stars die pair). Typically worn for the grade, this green-gold coin shows a number of small blemishes on each side, but a magnifier will be needed to see most of them. Minimal verdigris nestles near a few of the peripheral devices. For VF type purposes on an early eagle, this piece would be an ideal candidate, especially if the 1799 date is desired. Ex: Central States Signature (Heritage, 5/2007), lot 2328. NGC ID# 2623, PCGS# 8562

1799 Early Ten Dollar Rare BD-2, Small Stars Obverse

- 4798** 1799 Small Stars Obverse PCGS Genuine. BD-2, High R.5. Bass-Dannreuther Die State d/c. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been damaged and has graffiti. The obverse is moderately hairlined and has a few small roundish digs on the portrait. The obverse field has brief, faded scratches near the I in LIBERTY and stars 4, 8, and 12. Cursive initials, perhaps JEG, are pinscratched on the upper reverse field. PCGS# 98562

LIBERTY EAGLES

1838 Eagle, AU
First-Year Issue, Two-Year Type

4799 1838 AU50 NGC. The 1838 eagle was the first of the denomination coined since President Jefferson discontinued the series some 34 years earlier, in 1804. The new Christian Gobrecht design that debuted in 1838 is accordingly a first-year issue of a two-year type, as the design with sharp rear truncation on the bust continued over to some 1839-dated pieces. This AU NGC-certified piece would make a perfect type coin. Only modest wear appears on surfaces that display considerable luster remaining amid the attractive medium-gold coloration. A scattering of marks appear, none particularly severe, the most blatant a couple just behind Liberty's mouth. Census: 11 in 50, 21 finer (4/13). NGC ID# 262D, PCGS# 8575

1838 Eagle, AU58
Sharply Struck Example

4800 1838 AU58 NGC. The 1838 Liberty Head eagles were the first of the new Christian Gobrecht design, as the last ten dollar gold pieces previously struck for circulation (rather than for presentation purposes) had been dated 1804. The Large Letters (Head of 1838) design would be carried over into a second and final year in 1839. Most 1838 eagles average no better than Choice XF. This near-Mint example is considerably finer, both technically and aesthetically. The medium orange-gold surfaces gleam with intense luster and show scarcely a mark on either side. The strike is quite sharp overall, including the star centrils, the hair, the beads in the bun, and the eagle feathers on the reverse. An excellent coin to represent this fleeting subtype. NGC ID# 262D, PCGS# 8575

**1839 Eagle, Type of 1838, AU58
Two-Year Design Type**

- 4801 1839 Type of 1838, Large Letters AU58 NGC.** The Liberty Head eagles by Christian Gobrecht debuted in 1838 with the new design carried over to some 1839-dated pieces. The 1839-dated pieces showing the 1838-style head are also called Large Letters, while the later pieces are called Type of 1840 or Small Letters. In point of fact, though, the size difference in the letters is minuscule; the Type of 1840 is actually an entirely different type that shows many variations from the Type of 1838. Chief among them are the mostly covered ear on the Type of 1838 — it is uncovered on the Type of 1840 — and a much sharper rear bust truncation that is over star 13 on the Type of 1838. As expected, this piece shows just a touch of high-point rub on Liberty's cheek and the reverse devices. Generous mint luster remains over rich reddish-gold surfaces with lots of eye appeal. A few scattered ticks are consistent with a short spell in circulation. Census: 27 in 58, 16 finer (4/13). NGC ID# 262E, PCGS# 8576

**1844-O No Motto Ten, AU58
Repunched Mintmark, Misplaced Digits**

- 4802 1844-O AU58 PCGS. CAC. Variety 1.** The mintmark is repunched within the loop, and misplaced date digits are within the dentils beneath the 84 in the date. The present lemon-gold New Orleans ten has a sharp strike and only a trace of wear on the coronet tip and the hair above the ear. Struck from clashed dies. Population: 8 in 58, 4 finer (4/13). NGC ID# 262T, PCGS# 8591

**1845-O Liberty Ten, XF45
Repunched Date**

- 4803 1845-O Repunched Date XF45 PCGS. CAC. Variety 1.** The 1845-O Liberty eagle is a scarce issue from a mintage of 47,400 pieces. This attractive Choice XF specimen shows the 8 and 4 in the date repunched south. The well-detailed design elements are sharper at the center than the peripheries and the pleasing orange-gold surfaces are moderately abraded for the grade. Population: 4 in 45, 4 finer (4/13). PCGS# 88593

**1855-O Liberty Eagle, AU50
Scarce Underrated Issue**

- 4804 1855-O AU50 NGC. Variety 2** From a mintage of just 18,000 pieces, the 1855-O Liberty eagle is an underrated issue with a surviving population of 80-90 examples in all grades. This attractive AU specimen retains much of its original mint luster and the pleasing yellow-gold surfaces are lightly abraded. The well-detailed design elements show a touch of wear on the high points. Census: 15 in 50, 41 finer (4/13). NGC ID# 263M, PCGS# 8617

1859-S Eagle, AU53
Underappreciated Antebellum Issue

4805 1859-S AU53 PCGS. Only about 25,000 eagles were struck for the entire year 1859 at three different mints, and all are low-mintage rarities today. The still-shiny San Francisco Mint contributed only 7,000 pieces to the total, and it is an underappreciated issue outside of a few well-heeled series specialists — a trait it has in common with many S-mint eagles of the 1850s and 1860s. This AU53 PCGS example offers a nice original look, showing a bold strike and just a few minor handling marks amid generous luster and appealing orange-gold color. The giant S mintmark is characteristic but still oddly out of place. Minor high-point wear shows on Liberty's brow and hair and the top of the eagle's wings on the reverse. A great coin to represent this Western antebellum issue. Population: 3 in 53, 1 finer (4/13). NGC ID# 2643, PCGS# 8630

1867-S Liberty Ten, AU53
Only 9,000 Pieces Struck

4806 1867-S AU53 NGC. Only 9,000 Liberty eagles were struck at the San Francisco Mint in 1867, making the issue extremely elusive in high grade. This lightly circulated example shows just a touch of wear on the well-detailed design elements and a scattering of minor abrasions on the pleasing orange-gold surfaces. Census: 5 in 53, 5 finer (4/13). NGC ID# 264M, PCGS# 8652

1868 Ten Dollar, MS60
One of Three Certified in Mint State

4807 1868 MS60 NGC. Most certified examples of the 1868 eagle grade no better than Choice XF to AU. NGC and PCGS combined have seen only three examples in Mint State, including this MS60 piece and one other tied at NGC, while PCGS has seen one MS62 (5/13). The mintage of the issue was 10,630 pieces, but fortunately it enjoyed a high survival rate compared to most eagles from the decade of the 1860s (all of them low-mintage issues, save for the 1861 Philadelphia). The auburn-gold surfaces of this piece retain full luster but show a liberal scattering of small- to medium-sized contact marks, in concert with the grade. The strike is fairly well-executed on this piece. NGC ID# 264N, PCGS# 8653

1870 Liberty Ten, AU55
Elusive Low-Mintage Date

4808 1870 AU55 PCGS. From a remarkably low mintage of 3,990 pieces, the 1870 Liberty eagle is a scarce-to-rare issue in all grades. This well-detailed Choice AU specimen displays pleasing orange-gold surfaces with traces of prooflike reflectivity in sheltered areas. Housed in a green label holder. Population: 7 in 55, 3 finer (4/13). NGC ID# 264T, PCGS# 8657

**1877-S Liberty Ten, AU58
Only Two Finer Coins at NGC**

4809 1877-S AU58 NGC. The 1877-S Liberty eagle is a scarce issue from a low mintage of 17,000 pieces. The 1877-S is usually seen in XF grades today, but examples in near-Mint condition are rare. This attractive AU58 specimen displays well-detailed design elements and lustrous greenish-gold surfaces that show a scattering of minor contact marks. Census: 10 in 58, 2 finer (4/13). NGC ID# 265H, PCGS# 8679

**1890 Ten Dollar, MS63
Five-Figure Mintage**

4810 1890 MS63 PCGS. The 1893 ten dollar saw a limited mintage of only 57,980 business strikes and Select and better examples are condition rarities. This MS63 example is lightly abraded but attractive thanks to softly lustrous yellow-orange surfaces that show modest patina. Population: 22 in 63 (1 in 63+), 1 finer (4/13). NGC ID# 266R, PCGS# 8717

**1903-S Ten Dollar, MS66
Underrated Condition Rarity**

4811 1903-S MS66 PCGS. Just a touch of satin adds a new dimension to the bold cartwheel luster gracing this yellow-orange Premium Gem with faint green touches in the reverse fields. Interior detail is excellent, though the stars closest to the tip of the coronet show a degree of softness in the centers. Population: 16 in 66, 3 finer (4/13). NGC ID# 267X, PCGS# 8754

1904-O Eagle, Lustrous MS64

4812 1904-O MS64 PCGS. Variety 1. Motto New Orleans tens tend to be low mintage conditional rarities. The 1904-O fits that pattern as only about 3% of the certified population exceeds the MS63 grade. The present green-gold piece is boldly struck and lustrous with a scattering of small mint-made strike-throughs on the central reverse field. A faint vertical graze on the cheek determines the grade. Population: 12 in 64, 7 finer (4/13). NGC ID# 267Z, PCGS# 8756

PROOF LIBERTY EAGLES

1899 Eagle, PR67 Ultra Cameo Finest We Have Offered in Four Years

4813 1899 PR67 Ultra Cameo NGC. The 1899 eagle saw a proof production that was slightly higher by a couple of dozen pieces over the previous couple of years, and it appears a tad more frequently at auction than some of the earlier dates in the series. Garrett and Guth remark that “hardly any were spent (unlike in previous years),” although that is obviously guesswork and deduction extrapolated from the various market data.

What is more important than conjecture and extrapolation regarding numbers of survivors is, simply, that this piece represents one of the few finest examples remaining of the issue. PCGS has seen two in the grade of PR67 Deep Cameo with none finer; NGC accounts for two in PR67 Ultra Cameo, including the present coin, with one PR67 ★ Ultra Cameo and one PR68 ★ Ultra Cameo finer, making six grading events in all in PR67 and PR68. How many of those top-graded submissions in Ultra/Deep Cameo represent *different coins* is equally a matter for conjecture.

This piece exhibits medium yellow-gold device high points that are thickly frosted and contrast starkly against the reflective, jet-black fields on both sides, well into the Ultra Cameo contrast level rather than a “just made it” coin. The strike is full front and back. It requires a strong loupe to see two tiny marks beneath Liberty’s chin and a small tick in the right obverse field near star 12, picayune signs of contact that are undistracting but which will serve as pedigree markers. The reverse shows a small indent, as made, at the tip of the olive stem.

This is the first example of this date in the PR67 grade level we have offered since our FUN Signature (Heritage, 1/2009), lot 4119, where a PR67 ★ Ultra Cameo NGC example brought \$74,750. Two PR68 examples we have handled brought \$149,500 and \$138,000, respectively (5/2008, lot 3458; 1/2012, lot 4994). NGC ID# 28G6, PCGS# 98839

1904 Liberty Eagle, PR66 Cameo
Finest Certified at PCGS
Ex: Trompeter

4814 1904 PR66 Cameo PCGS. CAC. According to Mint records, 108 proof Liberty eagles were struck in 1904, a generous mintage in the context of the series but certainly small in absolute terms. The survival rate for the issue seems to be quite low, with PCGS and NGC combining to certify a total of 79 examples in all grades, including an unknown number of resubmissions and crossovers (4/13). Few numismatists systematically collected large denomination gold coins in the early 20th century, and proofs of the era commanded only small premiums when offered at auction. Since ten dollars was a lot of money in the hard times of the Great Depression, it is likely that many examples were just spent by their owners to obtain daily necessities. A number of 1904 proof eagles are known in impaired condition today.

The present coin is the finest example certified at PCGS by a full two grading points (4/13). The Mint switched to an all-brilliant finish for proof coins in 1902, and few proofs of this time period exhibit the cameo contrast that collectors prized in earlier years. The devices of this delightful Premium Gem display an unusual amount of mint frost, which contrasts dramatically with the deeply mirrored fields to produce a startling black-on-gold cameo flash when the coin is tilted in the light. The design elements exhibit razor-sharp detail throughout and no mentionable distractions are evident on the well-preserved lemon-yellow surfaces. Eye appeal is tremendous. Like the 1904 proof double eagle offered elsewhere in this catalog, this coin was once a highlight of the famous Trompeter Collection, possibly the finest collection of proof gold ever formed. It should find a new home in the finest contemporary collection or Registry Set.

Ex: Ed Trompeter; *FUN Signature* (Heritage, 1/1999), lot 8266, realized \$55,200. NGC ID# 28GB, PCGS# 88844

INDIAN EAGLES

1907 Wire Rim Ten, MS63 Remarkable Color and Bright Mint Luster

- 4815 1907 Wire Rim MS63 PCGS.** Depending on the source, the usual mintage of the 1907 Wire Rim tens is given as either 500 struck, or 542 struck and 70 melted, leaving a net distribution of 472 pieces; in either case, the difference is insignificant. The grade distribution of the survivors is interesting: Since these coins were handed out as VIP souvenirs at the time of their minting, some show evidence of rough handling over the last 100-plus years, likely by non-numismatists. PCGS has graded a couple of examples at the VF35 grade level. But others have clearly been carefully preserved, including some remarkable high-grade examples. This Select piece shows the usual bright mint luster. However, rather than the normally seen even yellow color, this coin displays deeper reddish-gold with hints of lilac interspersed. A few widely scattered contact marks explain the grade, but this Wire Rim ten presents much better than the grade would indicate. NGC ID# 268B, PCGS# 8850

1908 No Motto Ten Dollar Lustrous Select Example

- 4816 1908 No Motto MS63 PCGS. CAC.** Yellow-gold luster has a touch of orange and is mostly soft with a cartwheel effect, though a touch of slickness appears on high points such as Liberty's cheek. Abrasions on her neck and in the field to the left of her profile contribute to the grade. Unlike the No Motto twenties of 1908, the 1908 No Motto ten had a small mintage, just 33,500 pieces. NGC ID# 28GG, PCGS# 8853

1909 Indian Eagle, MS64 Better Early Series Date

- 4817 1909 MS64 NGC.** The 1909 Indian eagle claims a smallish mintage of 184,789 pieces, making it a better date in the series. Examples in MS64 condition are very scarce and finer grades are rare. This impressive Choice example is well-detailed and lustrous, with well-preserved yellow and rose-gold surfaces. Census: 55 in 64, 30 finer (4/13). NGC ID# 28GM, PCGS# 8862

1909 Saint-Gaudens Ten, MS64 Canary-Gold Luster

- 4818 1909 MS64 PCGS. CAC.** Canary-gold luster has a touch of orange on this satin-bright near-Gem from the second year of With Motto coinage. While the hair below the headdress shows softness, the eagle's form is well-defined with no trace of wear. The few abrasions generally are minor and wispy. Population: 77 in 64, 25 finer (4/13). NGC ID# 28GM, PCGS# 8862

**1909-S Ten Dollar, MS64+
Scarce in Mint State**

4819 1909-S MS64+ PCGS. CAC. The 1909-S ten dollar was virtually impossible to obtain in Uncirculated condition prior to a hoard of about 60 Mint State pieces discovered in 1977. Since then, a few other small hoards have substantially raised the Mint State population. Despite these discoveries, the issue is still scarce in Mint State.

The present high-end near-Gem is one of six so graded by PCGS, with 28 finer (4/13). It is a refreshingly unabraded representative with attractive lime-green and apricot toning. The mintmark is lightly repunched. Except for the lower feathers of the headdress the design elements are well impressed. NGC ID# 28GP, PCGS# 8864

**1910 Indian Eagle, MS65
Well-Preserved Lustrous Surfaces**

4820 1910 MS65 PCGS. The 1910 Indian eagle boasts a mintage of 318,500 pieces and the date is reasonably available in grades up to the MS65 level. However, the issue is very scarce in Gem condition. This well-detailed Gem displays vibrant mint luster and pleasing orange-gold surfaces that show traces of rose. Population: 57 in 65 (1 in 65+), 25 finer (4/13). NGC ID# 28GR, PCGS# 8865

**1911 Indian Eagle, MS65
Underrated Issue in High Grade**

4821 1911 MS65 PCGS. The 1911 Indian eagle boasts a substantial mintage of 505,500 pieces, but the date is surprisingly elusive at the MS65 level. This impressive Gem exhibits sharply detailed design elements and vibrant mint luster on both sides, with well-preserved orange-gold surfaces that show a few highlights of green. Population: 76 in 65 (1 in 65+), 33 finer (4/13). NGC ID# 28GT, PCGS# 8868

**1911 Indian Eagle, MS65
Sharply Detailed Specimen**

4822 1911 MS65 NGC. This delightful Gem exhibits excellent striking definition, particularly on the often-weak hair over Liberty's ear. Each side has bright wheat-gold luster with hints of deeper sun-yellow over parts of the reverse. Pleasingly preserved and devoid of overt abrasions, a coin with top-notch eye appeal. NGC has graded 56 numerically finer examples (4/13). NGC ID# 28GT, PCGS# 8868

**1915 Saint-Gaudens Ten
A Satiny Gem**

4823 1915 MS65 NGC. Gold-orange obverse luster has a touch of satin to its rolling luster. The reverse is a touch deeper with copper spots below and to the right of E PLURIBUS UNUM. With excellent detail and few significant marks, this 1915 eagle displays well. NGC has graded just 26 examples as MS66 or better (4/13). NGC ID# 28H5, PCGS# 8878

**1915-S Eagle, MS63
Elusive in Mint State**

- 4824 1915-S MS63 PCGS.** The 1915-S eagle is more difficult to obtain in high grades than most of its S-mint counterparts from the decade of the teens, save for the ultra-elusive 1913-S. Abrasions are usually the problem, since a well-preserved 1915-S is an attractive and well-made coin, usually showing good luster and a bold strike. This Select example is one such, offering lovely, generous luster on reddish-orange surfaces that are well-struck and display excellent eye appeal. A couple of stray marks on Liberty's cheek and one thin mark in the left obverse field appear to be the grade determinants, although a peppering of light contact appears on the reverse. Population: 29 in 63, 29 finer (4/13). NGC ID# 28H6, PCGS# 8879

**1926 Indian Eagle, MS66
None Certified Finer at NGC**

- 4825 1926 MS66 NGC.** A spectacular Premium Gem with sharply detailed design elements and vibrant mint luster throughout. The well-preserved orange-gold surfaces display a few highlights of rose and eye appeal is outstanding. The 1926 Indian eagle is a borderline condition rarity in MS66 and neither NGC nor PCGS has graded any coins in higher numeric grades (4/13). NGC ID# 28H9, PCGS# 8882

**1932 Eagle, MS66
Frosty and Appealing**

- 4826 1932 MS66 PCGS.** The anachronistic 1932 Indian Head eagle, struck during the depths of the Great Depression, has always been an oddball issue since few people at the time could afford to obtain such a coin, much less keep it. Fortunately, it did not suffer the mass meltings that many of its twenty dollar counterparts did, and today it is extremely popular as one of the only gold coin issues from the 1930s that is affordable in high grades. This Premium Gem certified by PCGS displays excellent eye appeal due to the lack of marks, frosty luster, and super orange-gold color. Population: 96 in 66 (3 in 66+), 1 finer (4/13). NGC ID# 28HB, PCGS# 8884

**1932 Eagle, MS66
Depression-Era Issue**

- 4827 1932 MS66 PCGS.** Areas of bright yellow-gold serve as highlights on this attractive Premium Gem example displaying generous mint luster. The design elements exhibit a pleasing level of detail. A few small contact marks pose little distraction, if any. PCGS has awarded a numerically finer grade to a single example (4/13). NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1851-O Double Eagle, AU50
Nice Color and Luster

- 4828 1851-O AU50 PCGS. Variety 1.** The still-lustrous surfaces are on the yellow side of sun-gold with glimpses of orange. Both sides host well-struck devices with light, even wear across the high points. With few overt abrasions, this coin possesses considerable eye appeal for the grade. Population: 73 in 50, 93 finer (4/13).
Ex: Long Beach Signature (Heritage, 2/2009), lot 2996.
From The MKJ Collection, Part II. NGC ID# 268J, PCGS# 8905

1854 Small Date Double Eagle, AU58
Nice Luster and Color

- 4829 1854 Small Date AU58 PCGS.** Two different size logotypes were used to impress the date on double eagle dies in 1854. This coin represents the more available Small Date variant. The design elements are sharply detailed, showing just a touch of wear on the high points. The pleasing surfaces show a scattering of minor contact marks with vibrant mint luster on both sides. Population: 51 in 58, 22 finer (4/13). NGC ID# 268P, PCGS# 8911

1854 Liberty Twenty, AU58
Popular Small Date Variant

- 4830 1854 Small Date AU58 NGC. CAC.** Two major varieties of the Liberty double eagle were struck in 1854, with this coin representing the more available Small Date type. This well-detailed near-Mint specimen shows just a trace of wear on the high points of the design and the pleasing surfaces are lightly abraded for the grade. The orange-gold surfaces retain much of their original mint luster, with highlights of green and rose. NGC has graded 32 numerically finer examples (4/13). NGC ID# 268P, PCGS# 8911

1854 Small Date Twenty, MS60
Attractive Color and Mint Luster

- 4831 1854 Small Date MS60 PCGS.** The mintage is unknown for the Small and Large Date variants of the 1854 twenty, but undoubtedly the majority of the 757,899 pieces struck were of the Small Date variety. However, the Small Date is not common, especially in mint condition. Only three other pieces have been graded MS60 by PCGS with 18 finer (4/13). The mint luster varies slightly in color, deepening somewhat around the margins. The strike is strong overall, and only small to medium-sized abrasions are seen. NGC ID# 268P, PCGS# 8911

1861-S Double Eagle, AU58
Ample Remaining Luster

- 4832 1861-S AU58 PCGS. CAC.** A faint orange overtone is more prominent on the reverse of this near-Mint representative with generous remaining luster. Natural striking softness on the hair below the coronet blends with just a touch of wear. Both the luster and the weakness of the surrounding stars suggest the AU grade range for this modestly abraded coin with a few rim faults. Population: 35 in 58, 13 finer (4/13). NGC ID# 269K, PCGS# 8935

1862-S Twenty Dollar, MS61
Far Finer Than Usually Seen

4833 1862-S MS61 PCGS. CAC. A peppering of smaller abrasions on this Mint State 1862-S double eagle is accompanied by a few larger marks, most notably just above the 2 in the date, but overall the surfaces retain considerable eye appeal. Most of the large mintage in excess of 850,000 coins saw heavy circulation in the antebellum West of San Francisco and its environs, and today Mint State examples are seldom seen. The MS61 PCGS example at hand is about the upper echelon for survivors; that service has seen five in this grade with only nine finer (4/13), the highest-graded a lone example in MS63. The attractive auburn-gold color, generous luster, and CAC endorsement are added enticements. NGC ID# 269N, PCGS# 8938

S.S. Brother Jonathan 1865-S Twenty
Lightly Patinated Near-Gem

4835 1865-S MS64 NGC. Ex: S.S. Brother Jonathan, inventory number unknown. The *Brother Jonathan* sale took place in May 1999 and was responsible for the dispersal of most of the high-grade 1865-S double eagles on the market. This example has been transferred from a PCGS holder to an NGC, but even without the *Brother Jonathan* pedigree on the holder, the balance of probabilities would have pointed to a shipwreck origin for this near-Gem. Boldly lustrous, lightly patinated surfaces shift from yellow to orange depending on the angle to the light. Minor striking softness affects the hair below Liberty's coronet, but the overall eye appeal is solid. NGC ID# 269V, PCGS# 8944

1864 Double Eagle, Choice AU
Former Rarity in the Type One Series

4834 1864 AU55 PCGS. CAC. Medium orange-gold color is evenly distributed across both sides with generous mint luster showing around the devices. Numerous small abrasions are spread over each side. Higher graded examples of this Type One issue are marginally more available than previously because of the discovery of several dozen Mint State pieces in the salvage of the *S.S. Republic*. NGC ID# 269S, PCGS# 8941

**1866-S No Motto Twenty, AU
Second-Rarest S-Mint in the Series**

4836 1866-S No Motto AU50 PCGS. The 1866-S No Motto twenties are an issue that resembles the mythical 1895 Morgan dollar business strikes, one that is notable for its *absence*. When the new With Motto reverse motif debuted in the Liberty Head series in this year, the dies were delayed in their shipment from the Philadelphia Mint die shop to faraway San Francisco. An estimated 120,000 pieces of the No Motto type were struck in the interim, but the issue is, overall, far rarer than that figure would lead one to believe. In fact, they are rarer than any other S-mint twenty of the design, save for the 1861-S Paquet Reverse coins.

Perhaps most of the coins were melted once the new dies arrived; a less-likely explanation is that they slipped quietly into circulation. Anything in XF or AU is finer than the typical survivor, but far fewer are known today than if they had all been pressed into circulation. Likely no more than 200 examples exist in all grades.

The present AU50 PCGS example, for the most part, shows light field chatter with a few larger signs of contact consistent with a short spate in circulation, as opposed to the heavy, extensive handling marks that many survivors show. Considerable luster remains on deep orange-gold surfaces that show no singular distractions. A nice example of this seldom-seen issue. We believe the population data for this issue are particularly rife with resubmissions, but: Population: 16 in 50, 20 finer (4/13). NGC ID# 269W, PCGS# 8945

**1866 Double Eagle, AU58
First Type Two Issue**

4837 1866 AU58 NGC. CAC. The Type Two design was introduced in 1866 with the addition of the motto *IN GOD WE TRUST* on the reverse. This attractive AU58 example retains most of its original mint luster, with well-detailed design elements and lightly abraded yellow and rose-gold surfaces. NGC has graded 41 numerically finer example (4/13). NGC ID# 269X, PCGS# 8949

**1867 Double Eagle, MS62
Seldom-Seen Type Two Date**

4838 1867 MS62 PCGS. This seldom-seen Type Two date has a mintage just north of a quarter-million pieces but few Mint State survivors. Yellow-orange luster is intense with a bold cartwheel effect, while the light abrasions that account for the grade have surprisingly little impact on the eye appeal. Population: 40 in 62 (1 in 62+), 1 finer (4/13). NGC ID# 269Z, PCGS# 8951

1869 Double Eagle, MS61
Seldom Seen in Mint State

4839 1869 MS61 PCGS. This coin offers far more eye appeal than the grade might imply, showing a few relatively minor luster grazes in the obverse fields. The surfaces are not unabraded, but those abrasions are less in both number and severity than one would expect, putting this piece in a minority for the issue. Generous mint luster emanates from each side, and the reddish-orange coloration visible throughout adds to the allure. The strike is boldly detailed throughout. PCGS has seen nine submissions in this grade with 15 finer (4/13). A great example of this Type Two double eagle, struck to the extent of 175,000 pieces — about one-fourth that of the 1869-S. NGC ID# 26A5, PCGS# 8955

1873-S Open 3 Twenty, MS61
Conditionally Elusive

4841 1873-S Open 3 MS61 PCGS. CAC. The large mintage of 1,040,600 double eagles in 1873 San Francisco was divided into a majority of Close 3 coins and a minority of Open 3s, the latter considerably scarcer. The variety achieved a *Guide Book* listing only in the year 2000, but more-recent interest in double eagles overall is responsible for a surge in popularity. Mint State examples of the scarcer Open 3 are few and far between. This MS61 piece shows the expected myriad scattered abrasions that determine the grade, amid full luster, a good strike, and attractive orange-gold coloration. Population: 23 in 61, 4 finer (4/13). NGC ID# 26AM, PCGS# 8979

1871-S Liberty Twenty, MS60
Very Scarce Type Two Example

4840 1871-S MS60 PCGS. Like most Type Two twenties from the San Francisco Mint, the 1871-S claims a large mintage but high-grade survivors are seldom encountered. This attractive Mint State example is well-detailed and lustrous, with pleasing orange-gold surfaces that show only minor contact marks. Population: 15 in 60, 40 finer (4/13). NGC ID# 26AC, PCGS# 8962

1875-CC Double Eagle, AU58
Nice Type Two Branch Mint Issue

4842 1875-CC AU58 PCGS. Variety 1-A. From a mintage of 111,151 pieces, the 1875-CC Liberty double eagle is one of the most available Carson City issues and a favorite choice of mintmark type collectors. This attractive near-Mint example exhibits well-detailed design elements and lustrous orange-gold surfaces that show a scattering of minor contact marks. NGC ID# 26AT, PCGS# 8974

**Prooflike Mint State 1876 Twenty
Light Motto Subtype**

- 4843** 1876 MS61 Prooflike NGC. CAC. Light Motto. This flashy and crisply struck representative has an interesting straw-shaped strike-through (as made) above the eagle's left (facing) wing. Small marks are distributed but are consistent with the grade. The Light Motto is a rays subtype seen only on 1876 Philadelphia twenties. The facility also struck Heavy Motto pieces that year. Census: 12 in 61 Prooflike, 3 finer (4/13). PCGS# 78976

1876-CC Twenty Dollar, MS61

- 4844** 1876-CC MS61 PCGS. CAC. **Variety 3-A.** Double eagle production at Carson City crested in 1876. 138,411 pieces were struck, using at least nine die pairs, though the production was less than one-tenth the mintage at San Francisco that year. Later during the 19th century, volume exports of gold coins to Europe became commonplace. As a result, the 1876-CC is readily collectible today in XF and AU grades. However, relatively few pieces remained in Uncirculated condition by the time of export, and perhaps none received numismatic consideration as PCGS has yet to grade any examples above MS62 (4/13). The present Mint State representative displays cartwheel sheen and is nicely struck. The scattered minor marks are consistent with the designated grade. NGC ID# 26AW, PCGS# 8977

**1878-CC Twenty Dollar, AU
Low Mintage CC Date**

- 4845** 1878-CC AU50 NGC. **Variety 1-A.** The usual die marriage for the issue, though a very rare second variety is known, despite a mintage of just 13,180 pieces. This moderately marked honey-gold double eagle is crisply struck and displays light wear on Liberty's curls. Luster individually outlines obverse stars and dominates much of the reverse. NGC ID# 26B4, PCGS# 8986

**1878-CC Double Eagle, AU Details
Scarce Low-Mintage Issue**

- 4846** 1878-CC — Removed From Jewelry — NGC Details. AU. **Variety 1-A.** A few minor crimps on the rims and an unnaturally bright patina indicate this coin has been removed from a jewelry setting. The 1878-CC Liberty double eagle is one of the most challenging dates in the Carson City series, with a limited mintage of 13,180 pieces. This well-detailed greenish-gold specimen shows a touch of wear on the high points and lightly abraded surfaces. NGC ID# 26B4, PCGS# 8986

**1878-S Liberty Double Eagle, MS62
Vibrant Mint Luster, Bright Color**

- 4847** 1878-S MS62 NGC. From a large mintage of 1.7 million pieces, the 1878-S Liberty double eagle was widely dispersed in foreign trade, and few high-quality examples were saved for numismatic purposes. This attractive MS62 specimen displays vibrant mint luster and well-detailed design elements, with pleasing yellow and greenish-gold surfaces. Census: 78 in 62, 8 finer (4/13). NGC ID# 26B5, PCGS# 8987

Rare 1879-O Double Eagle
AU Sharpness

- 4848 1879-O — Repaired — PCGS Genuine. AU Details. Variety 1.** After a gap of 18 years caused by the Civil War, the New Orleans Mint reopened in 1879. Its primary purpose was to coin silver dollars to fulfill the burdensome Bland-Allison Act. Ten dollar pieces were also struck, irregularly and in small quantities. During its second stint of operations, New Orleans issued double eagles only in 1879, perhaps to signify its return to business. Just 2,325 pieces were struck, and survivors are both rare and coveted. The present example is more affordable than most despite showing only slight wear. Both sides are glossy from cleaning, and the obverse cheek, neck, and field are extensively smoothed, likely from an attempt to remove traces of struck-in grease. NGC ID# 26B8, PCGS# 8990

1880 Liberty Double Eagle, MS61
Partially Prooflike Surfaces

- 4849 1880 MS61 NGC.** Mintage of double eagles was sharply reduced at the Philadelphia Mint in 1880 with only 51,420 business-strike examples struck. Accordingly, the date is scarce in all grades and rare in Mint State. This attractive MS61 specimen features well-detailed design elements and partially prooflike lemon-yellow surfaces that show the expected number of minor contact marks for the grade. Census: 25 in 61, 8 finer (4/13). NGC ID# 26BA, PCGS# 8992

1882-CC Double Eagle, MS60
Minimally Abraded

- 4850 1882-CC MS60 PCGS. Variety 1-A.** The first C in the mintmark is higher than the second, and the right side of the second C is over the center of the left upright of the D in DOLLARS. This issue is quite available in grades from Very Fine to About Uncirculated. Mint State pieces are much more difficult to come by. Most Uncirculated pieces graded by PCGS are in the MS60 to MS62 range; the two MS63 coins are the finest graded by that service. The yellow-gold surfaces of this MS60 specimen exhibit well struck design features and a good amount of luster. A few minute marks do not significantly detract from the coin's eye appeal. Fewer contact marks are seen than is typical for this issue. Population: 4 in 60, 57 finer (4/13). NGC ID# 26BF, PCGS# 8997

1890-CC Liberty Double Eagle, AU58
Popular Mintmark Type Coin

- 4851 1890-CC AU58 NGC. Variety 1-A.** From a substantial mintage of 91,209 pieces, the 1890-CC Liberty twenty is one of the more available issues from the Carson City Mint and a popular choice of mintmark type collectors. This lightly circulated example displays well-detailed design elements and lustrous orange-gold surfaces with highlights of green. NGC ID# 26BY, PCGS# 9014

1892-CC Double Eagle, AU55
Pleasing Color and Luster

- 4852 1892-CC AU55 PCGS. Variety 1-A.** A charming Choice AU specimen of this late-series Carson City issue with well-detailed design elements and vivid greenish-gold surfaces that retain almost all of their original mint luster. Only minor surface flaws are present, the worst being some reeding marks on Liberty's cheek. NGC ID# 26C6, PCGS# 9020

1904 Liberty Twenty, MS66
Only One Numerically Finer at NGC

- 4853 1904 MS66 NGC.** The 1904 Liberty twenty is the most plentiful date of the series and the number one choice of type collectors searching for a Type Three double eagle. However, the 1904 becomes quite scarce at the MS66 level, and NGC has graded only one coin in higher numeric grades (4/13). This spectacular Premium Gem exhibits well-detailed design elements and vibrant mint luster to complement the well-preserved orange-gold surfaces. Eye appeal is outstanding. NGC ID# 26CY, PCGS# 9045

1904 Liberty Double Eagle, MS66
Rare in Higher Grades

- 4854 1904 MS66 PCGS.** The 1904 Liberty double eagle claims a huge mintage of more than 6.2 million pieces, making it the most available date of the series. Although it usually trades as a type coin, the 1904 is a prime condition rarity in grades above MS66. This sharply detailed Premium Gem exhibits well-preserved surfaces with vivid orange-gold patina and vibrant mint luster. PCGS has graded only two finer examples (4/13). NGC ID# 26CY, PCGS# 9045

1904 Double Eagle, MS66
Extremely Rare Any Finer

- 4855 1904 MS66 PCGS.** The 1904 Liberty double eagle was produced in large numbers and many high-quality examples have survived to satisfy the demands of both date and type collectors today. This stunning Premium Gem exhibits well-detailed design elements and vibrant mint luster throughout. The vivid green and orange-gold surfaces show few signs of contact. PCGS has graded two numerically finer examples (4/13). NGC ID# 26CY, PCGS# 9045

1904 Twenty Dollar Liberty, MS66
Archetypal Type Coin

- 4856 1904 MS66 PCGS.** There are type coins and then there are archetypal type coins, those that represent the ultimate in the coiner's art and produced in sufficiently plentiful quantities to stand for the best and brightest of the various U.S. coin series. Such coins would include the Morgan dollars from 1879-S to 1882-S, the 1908 No Motto Saint-Gaudens twenty, the 1932 ten dollar Indian, and the 1904 Liberty Head double eagle, of course. With more than 6 million examples manufactured in 1904 at Philadelphia alone, this issue is the zenith of the Liberty Head double eagle. Pieces can be found in all grades up through MS66. The present coin is nonetheless at the top rank of surviving members, with deep sunset-orange patination untroubled by even the most minuscule distraction. Pieces in finer grade are few and far between. Ex: Long Beach Signature (Heritage, 9/2007), lot 3968. NGC ID# 26CY, PCGS# 9045

1906-S Liberty Twenty, MS64+
Very Rare in Higher Grades

- 4857 1906-S MS64+ PCGS. CAC.** Despite the mintage of more than 2 million pieces, the 1906-S Liberty double eagle is very rare in grades above the MS64 level. This high-end Choice example is especially desirable, considering how elusive this issue is in Gem condition. The design elements are well-detailed and the orange-gold surfaces are well-preserved and lustrous. PCGS has graded only three numerically finer example (4/13). NGC ID# 26D6, PCGS# 9051

**1907 Liberty Twenty, MS65
Gem-Quality Last-Year Issue**

4858 1907 MS65 PCGS. The year 1907 is one that numismatists sometimes call a "split-design year," one which is demarcated by the retirement of an old coin motif and the introduction of a new. This allows numismatists to commemorate 1907 with just a single Liberty Head twenty, if desired; and, of course, the sky is the limit if one chooses to obtain one of the various Saint-Gaudens-designed coins of the same year. This Gem 1907 Liberty Head will do quite nicely for many numismatists, one of only 14 so graded at PCGS with none finer (4/13). Rich luster gleams from orange-gold surfaces that are not only well-struck but equally well-preserved, with eye appeal high and marks simply a nonissue. NGC ID# 26D7, PCGS# 9052

Choice 1907-S Twenty Dollar

4859 1907-S MS64 NGC. CAC. A peach-gold near-Gem from the final year of the long-lived Liberty type. Boldly struck and thoroughly lustrous with a clean reverse and no more than the expected number of faint obverse marks. A common issue in typical Uncirculated condition but scarce in the present quality. Housed in a prior generation holder. NGC ID# 26D9, PCGS# 9054

PROOF LIBERTY DOUBLE EAGLE

Superb Gem Proof 1904 Double Eagle
Rare Example With Cameo Contrast
Finest Known Specimen, Possibly Ex: Trompeter

4860 1904 PR67 Cameo NGC. The 1904 Liberty double eagle is a common date in business-strike format, but proofs are rare in absolute terms, and high-grade Cameo proofs are extremely elusive. Heritage Auctions is pleased to offer the single finest certified example of this rare issue, with profound cameo contrast and impeccable surface quality.

Mintage of proof Liberty double eagles was severely reduced in 1904, with a meager total of 98 pieces struck, compared to the 158 examples produced the previous year. The 1904 has a decent survival rate, but it is doubtful that more than 55-60 examples are extant in all grades and conditions. Because the Mint switched to a new finish for proof coins in 1902 few examples display the frosty devices of earlier years. As Jeff Garrett and Ron Guth wrote in their *Encyclopedia of U.S. Gold Coins*, "Most of the examples seen also have very little, if any, cameo surfaces." Unfortunately, population data for the 1904 has been wildly distorted by resubmissions and crossovers.

Unlike the typical 1904 proof, this coin exhibits richly frosted design elements and deeply mirrored fields that produce a startling black-on-gold cameo flash when the coin is tilted in the light. The design elements are sharply detailed in all areas except for a touch of softness on the eagle's talons on the reverse. The well-preserved lemon-yellow surfaces are virtually pristine, with no mentionable distractions on either side. Eye appeal is incredible. Although the absence of pedigree markers makes plate matching difficult, we believe this coin was once a highlight of the Ed Trompeter Collection, probably the finest and most complete collection of U.S. proof gold ever assembled. Census: 1 in 67 Cameo, 0 finer (4/13). NGC ID# 26ES, PCGS# 89120

HIGH RELIEF DOUBLE EAGLES

MCMVII High Relief Double Eagle Wire Rim, VF Details

- 4861** 1907 High Relief, Wire Rim — Damage — PCGS Genuine. VF Details. The High Relief MCMVII double eagle ranks among the rarest gold types, and has perhaps the most fascinating back story of any American numismatic issue. The present example was presumably carried as a pocket piece by a wealthy collector during the early 20th century. The high points exhibit wear commensurate with the VF level, and the obverse field has a few minor and faded scratches. The reverse has an unimportant rim ding at 3 o'clock. NGC ID# 26F2, PCGS# 9135

High Relief 1907 Twenty Dollar AU58 Sharpness, Wire Rim

- 4862** 1907 High Relief, Wire Rim — Rim Filed, Cleaned — ANACS. AU58 Details. A sharply struck high relief double eagle with coruscating butter-gold surfaces. Wear is minimal though evident beneath a loupe on the crest of the front wing. There are no patches of hairlines or obvious file marks, and the coin presents well despite the ANACS disclaimers. Worthy of in-person evaluation by the experienced numismatist. NGC ID# 26F2, PCGS# 9135

1907 High Relief Double Eagle, AU58 Almost Complete Wire Rim

- 4863** 1907 High Relief, Wire Rim AU58 NGC. Light handling should not be unexpected on a High Relief twenty. The coins were an instant collectible when they were issued, and immediately sold for more than face value. The natural reaction of a non-collector would be to feel the texture of the finely detailed devices, struck in the unprecedented High Relief format. This piece shows just the slightest high-point friction and loss of luster in the fields. Each side is yellow-gold and there are no obvious contact marks, suggesting private handling rather than time spent in actual circulation. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty, MS64
Lustrous Wire Rim Variant

- 4864 1907 High Relief, Wire Rim MS64 PCGS.** Augustus Saint-Gaudens' approach toward sculpting is one that may not be widely known to the non-artist or non-sculptor. In his *Reminiscences* from 1913, his son Homer stated, "after he had built up a careful nude of the Victory, he could cut remorselessly into her body to give a natural appearance to her drapery." This subtractive process working in clay, resulted in a figure that could approximate the "wet linen" appearance of marble statues from Classical Greece. The result was a figure that appears to simulate the Nike of Samothrace in the Louvre. This figure of Liberty was one that Saint-Gaudens used on the Sherman group which stands at the entrance to Central Park, and he later adapted to the striding figure of Liberty seen on the High Relief double eagle from 1907. This is a magnificent example of this subtractive sculpting process, one that renders Liberty more of a sculptural figure, especially when seen in High Relief as here. The surfaces display a light, hazy gray patina with the usual strong underlying satiny finish. There are no mentionable contact marks on either side. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty Dollar, MS64
Bright, Satiny Surfaces

- 4865 1907 High Relief MS64 ANACS.** This coin was certified with no mention of a Wire Rim or Flat Rim. It looks to us more like a Flat Rim coin, which is to say it has only a trace of a wire rim remaining. The "problem" of extruded metal was vigorously pursued by Mint Director Leach, but never completely eliminated. This is a wonderful, satiny High Relief with very few contact marks to warrant the grade. In spite of 3-5 blows from a hydraulic press, there is just a bit of striking softness evident at the tops of the lettering on the upper reverse, but it is evident nowhere else. NGC ID# 26F2, PCGS# 9135

**Gem 1907 Wire Rim High Relief Twenty
Subtle Reddish Patina**

4866 1907 High Relief, Wire Rim MS65 PCGS. CAC. It is widely believed that the relationship between Augustus Saint-Gaudens and President Roosevelt started with the "Genesis Letter" of December 1904 (Heritage, 8/2012), lot 5433. That famous letter sharply criticizes the current circulating coinage, and asks the Secretary of the Treasury if it would be possible to employ Saint-Gaudens to "give us a coinage that would have some beauty." In fact, the president and sculptor were acquainted years previously from their mutual involvement on the Park Commission, a committee that made suggestions about how to best realize Major L'Enfant's vision for the capital from a hundred years before. In a letter from Saint-Gaudens to the president, dated August 15, 1903, the sculptor reveals Roosevelt's appreciation for the Sherman monument: "I don't know how to thank you for your more than kind words about the 'Sherman' and my other work." The fact that President Roosevelt had seen the Sherman group and had taken the time to favorably comment on it may go a long way toward explaining why Saint-Gaudens chose to adapt the figure of Liberty from the Sherman for the central figure on the obverse of the twenty dollar gold piece. Eleven years of work on the Sherman by Saint-Gaudens and his staff of artisans, coupled with a presidential endorsement, assured a favorable public reception of the double eagle when it was released in high relief in 1907.

This piece was obviously well-received and well-preserved by generations of collectors. There are no obvious or mentionable contact marks on either side of this reddish-tinted Gem. The wire rim is complete around the obverse, but almost missing around the reverse. NGC ID# 26F2, PCGS# 9135

SAINT-GAUDENS DOUBLE EAGLES

1908 Saint-Gaudens Double Eagle, MS65 First Year With Motto

4867 1908 Motto MS65 PCGS. This delightful Gem represents the first year of the Motto design, an important consideration for type purposes. The design elements are sharply detailed throughout and the vivid orange-gold surfaces radiate vibrant mint luster. No mentionable distractions are evident and eye appeal is outstanding. Population: 64 in 65, 13 finer (4/13). NGC ID# 26F8, PCGS# 9147

1908-D With Motto Twenty, MS66 Rare This Fine

4868 1908-D Motto MS66 PCGS Secure. CAC. Theodore Roosevelt, who had commissioned Augustus Saint-Gaudens to redesign the eagle and double eagle, did not believe the use of IN GOD WE TRUST on coinage showed proper reverence, and so the motto does not appear on the High Relief and early Regular Relief versions of the twenty. Congress passed a law mandating the motto, however, and Roosevelt signed it in 1908. This example comes from the first Denver example of the With Motto design, lightly patinated yellow-orange with softly swirling luster enhancing remarkably well-preserved surfaces. Population: 25 in 66, 3 finer (4/13). NGC ID# 26F9, PCGS# 9148

1909/8 Double Eagle, MS64 First Major Dual-Hub Overdate Error

4869 1909/8 MS64 PCGS. FS-301. The 1909/8 twenty dollar is the first of the dual-hubbing errors that resulted in overdates well-known to (and much-beloved by) collectors today, including the 1918/7-D nickel, 1918/7-S quarter, 1942/1-P and -D dimes, and the 1943/2-P nickel. Coin dealer Edgar Adams first published this variety in 1910. The present near-Gem displays bountiful luster over orange-gold, frosty surfaces that show only a few scattered, trivial marks confined mostly to the reverse. A high-end example with lots of eye appeal. Note that the number of Gem submissions is far fewer than that of near-Gems. Population: 96 in 64 (2 in 64+), 22 finer (4/13). NGC ID# 26FC, PCGS# 9151

Popular 1909/8 Double Eagle, MS64

4870 1909/8 MS64 PCGS. FS-301. The 1909/8 is in demand at all grade levels, although most are Uncirculated or nearly so. It was created when the mint engraver used a 1908 hub and a 1909 hub to create at least one die. It can be located with minimal trouble in MS63 and lower grades. Near-Gems are scarce, but can be obtained with patience and searching. Anything finer is quite rare.

The orange-gold surfaces of the present near-Gem offering yield well-struck design elements, including Liberty's facial features and fingers and the panes of the Capitol building as well as the eagle's plumage. The few minute marks scattered about are within the parameters of the designated grade. NGC ID# 26FC, PCGS# 9151

1909-S Double Eagle, MS65+ Conditionally Rare Any Finer

4871 1909-S MS65+ PCGS. The 1909-S Saint-Gaudens double eagle is readily available in all grades up to the Gem level, but the population drops off precipitously in MS66. This high-end Gem displays remarkably clean orange-gold surfaces, with well-detailed design elements and bright mint luster. PCGS has graded eight numerically finer examples (4/13). NGC ID# 26FE, PCGS# 9153

1910 Saint-Gaudens Twenty, MS65 Condition Rarity in Higher Grades

4872 1910 MS65 PCGS. The 1910 Saint-Gaudens double eagle claims a substantial mintage of 482,000 pieces, but the issue is a prime condition rarity in grades above the Gem level. This well-detailed MS65 specimen displays lustrous orange-gold surfaces with highlights of rose. The fields are remarkably free of distractions and eye appeal is quite strong. PCGS has graded only four numerically finer examples (4/13). NGC ID# 26FF, PCGS# 9154

Gem 1910 Twenty Dollar Only Four Numerically Finer at PCGS

4873 1910 MS65 PCGS Secure. This Gem possesses a high degree of visual appeal on both sides. The coin displays rich butter-gold color with areas of peach and bright yellow-gold highlights. A few small olive-green spots are present. The design elements display a sharp level of detail and both sides exhibit minimal abrasions. PCGS has awarded higher numeric grades to a mere 4 examples (4/13). NGC ID# 26FF, PCGS# 9154

**1911-D Double Eagle, MS67
Great Type Coin**

4874 1911-D MS67 NGC. The 1911-D Saint-Gaudens twenty is among few mintmarked issues in the series that can be found at the Superb Gem level, even though less than four dozen examples are certified at NGC and PCGS combined. The issue is also, fortunately, one that is generally well-produced, so the subsequent preservation is critical to finding high-quality survivors. This MS67 NGC specimen displays lavish luster throughout, with lighter orange-gold margins ceding to deeper khaki-gold in the interior. The strike is quite sharp throughout both sides, including the mintmark and date, Liberty's sandal, the Capitol dome, and all eagle feathers. No relevant marks appear on either side. A great type coin. Census: 33 in 67, 0 finer (4/13). NGC ID# 26FK, PCGS# 9158

**1913-D Saint-Gaudens Twenty, MS65
Conditionally Rare in Finer Grades**

4875 1913-D MS65 PCGS. The 1913-D claims a respectable mintage of 393,500 pieces, and it can only be called scarce in MS65 condition, but the issue is a prime condition rarity in grades above the Gem level. This well-detailed Gem displays vibrant mint luster and vivid orange-gold surfaces with outstanding eye appeal. PCGS has graded five numerically finer examples (4/13). NGC ID# 26FP, PCGS# 9162

**1913-S Twenty Dollar, MS64
Low-Mintage Early Series Issue**

4876 1913-S MS64 PCGS. Only 34,000 Saint-Gaudens double eagles were struck at the San Francisco Mint in 1913. The issue is scarce in MS64 condition and finer grades are rare. This impressive Choice example is well-detailed and lustrous, with pleasing orange-gold surfaces. Housed in a green label holder. PCGS has graded 23 finer examples (4/13). NGC ID# 26FR, PCGS# 9163

**1913-S Twenty, MS64
Only 34,000 Pieces Struck**

4877 1913-S MS64 PCGS. CAC. The 1913-S boasts the third lowest mintage in the Saint-Gaudens double eagle series with a mere 34,000 pieces, behind only the 1907 High Relief and the 1908-S. While Choice survivors are not quite as difficult as the brief production would imply, their extreme difficulty as Gem helps to sustain their popularity. This is a frosty, reddish-tinged example with a few minor blemishes on the high points of Liberty's robe. Ex: *Central States Signature (Heritage, 5/2004)*, lot 10458. NGC ID# 26FR, PCGS# 9163

**1914 Double Eagle, MS64
Popular Low-Mintage Date**

4878 1914 MS64 NGC. From a low mintage of 95,200 pieces, the 1914 Saint-Gaudens double eagle is quite elusive in grades above the Choice level. This attractive MS64 example displays well-detailed design elements and vibrant mint luster on both sides. The pleasing yellow and rose-gold surfaces show only a few minor contact marks. NGC has graded 24 numerically finer specimens (4/13). NGC ID# 26FS, PCGS# 9164

1914-D Saint-Gaudens Twenty, MS66
Only One Numerically Finer PCGS Example

4879 1914-D MS66 PCGS. Although the 1914-D Saint-Gaudens double eagle is available in grades up to the Gem level, they are quite scarce in higher grades. This lovely Premium Gem example displays pleasing luster and light pumpkin-gold color. Population: 63 in 66, 1 finer (4/13). NGC ID# 26FT, PCGS# 9165

1914-S Saint-Gaudens Twenty, MS66
Only One Finer Coin at NGC

4880 1914-S MS66 NGC. The 1914-S Saint-Gaudens double eagle was produced in large quantities and remains a plentiful issue in lower Mint State grades. However, the 1914-S becomes scarce in MS66 condition and finer coins are virtually unobtainable. This sharply detailed Premium Gem displays well-preserved orange-gold surfaces with vibrant mint luster and outstanding eye appeal. NGC has graded one numerically finer example (4/13). NGC ID# 26FU, PCGS# 9166

1915-S Saint-Gaudens Twenty, MS66
Extremely Rare in Finer Grades

4881 1915-S MS66 PCGS. The 1915-S Saint-Gaudens double eagle claims a substantial mintage of 567,500 pieces, but the issue becomes scarce at the MS66 level, and finer coins are virtually unobtainable. This sharply detailed Premium Gem displays vivid orange-gold surfaces that show few signs of contact.. Vibrant mint luster adds to the exceptional eye appeal. PCGS has graded no coins in higher numeric grades (4/13). NGC ID# 26FW, PCGS# 9168

1916-S Double Eagle, MS66
None Numerically Finer at PCGS

4882 1916-S MS66 PCGS. The 1916-S Saint-Gaudens double eagle claims a large mintage of 796,000 pieces and the issue can be located in grades up to the Premium Gem level with some patience. However, the 1916-S is extremely rare above MS66. This well-detailed Premium Gem displays vivid orange-gold surfaces that radiate vibrant mint luster. Eye appeal is terrific. PCGS has graded no coins in higher numeric grades(4/13). NGC ID# 26FX, PCGS# 9169

1922-S Double Eagle, MS64+
Rare Any Finer

4883 1922-S MS64+ PCGS. Yellow-gold surfaces have a distinctly orange tint on the obverse, less so on the reverse. A handful of light marks on the lustrous surfaces leave this attractive coin "so close, yet so far" from a fully Gem designation. PCGS has certified just 15 coins as MS64 or better (4/13). NGC ID# 26G4, PCGS# 9174

**1924 Saint-Gaudens Twenty, MS67
Only Two Finer Coins at NGC**

- 4884 1924 MS67 NGC.** The 1924 Saint-Gaudens double eagle was produced in large numbers and the issue is easily located in most Mint State grades but the population thins out appreciably at the MS67 level, and finer grades are virtually unobtainable. This delightful Superb Gem is well-detailed and brightly lustrous, with well-preserved orange-gold surfaces. NGC has graded only two numerically finer examples (4/13). NGC ID# 26G7, PCGS# 9177

**1925-S Twenty, Lustrous MS62
Challenging San Francisco Issue**

- 4885 1925-S MS62 NGC.** Like other San Francisco issues from the 1920s, the 1925-S is rare today despite a high mintage. Most pieces remained in Treasury vaults until they were sent to the smelters following the 1933 gold recall. Over subsequent years, examples trickled in from European holdings, where they had been loosely stored as bullion. The present lustrous reddish-gold representative possesses vivid luster and a nice strike. As expected, minor marks are present, though only an unobtrusive abrasion beneath the left shoulder clasp merits mention. NGC ID# 26GC, PCGS# 9182

**1926-S Twenty Dollar, Sharply Struck MS64+
An Excellent High-Grade Choice**

- 4886 1926-S MS64+ PCGS. CAC.** The 1926-S twenty dollar is relatively available through the near-Gem level of preservation, though Gem and finer examples are highly elusive. The present MS64+ offering is therefore an excellent choice for the collector desiring a high-quality piece without paying MS65 or better money. While the PCGS population figures list 339 MS64 coins, only 36 pieces rate MS64+. Additionally, the present high-end near-Gem has been given the CAC label.

Lustrous, medium yellow-gold surfaces display well-struck design elements, including Liberty's facial features, fingers and toes, the panes of the Capitol building, and the eagle's plumage. A few scattered, minute marks are in concert with the designated grade, and some light die cracks, as usually seen, are noted on the obverse. NGC ID# 26GE, PCGS# 9185

**1927 Saint-Gaudens Double Eagle, MS67
Exceptional Type Coin**

- 4887 1927 MS67 NGC.** The 1927 Saint-Gaudens double eagle is an available date and a favorite choice of type collectors. This spectacular Superb Gem exhibits well-detailed design elements and vibrant mint luster throughout. The well-preserved surfaces are a vivid orange-gold color, with highlights of rose. Eye appeal is terrific. Census: 50 in 67, 0 finer (4/13). NGC ID# 26GG, PCGS# 9186

**1929 Twenty, Unc Details
First of the Scarce Late Dates**

4888 1929 —Scratch — PCGS Genuine. Unc Details. The Philadelphia double eagles from 1927 to 1929 offer a remarkable illustration of the effects of 1930s mass melting on the surviving populations. The 1927, mintage just under 3 million pieces, is a famous type coin. The 1928, with more than 8.8 million coins produced, is less common than the 1927 but still accessible in a variety of grades. The 1929 emerges as the first Philadelphia melt rarity, with known examples numbering in the hundreds rather than the tens of thousands.

This piece has one unfortunate scratch on the reverse at the forefront of the eagle's breast. Otherwise the mint luster is thick and vibrant with an even, light reddish tinge. Well, but not quite fully struck. NGC ID# 26GL, PCGS# 9190

COMMEMORATIVE SILVER

**1900 Gem Lafayette Dollar
DuVall 1-B Variety**

4889 1900 Lafayette Dollar MS65 PCGS. DuVall 1-B. Blended golden-brown and apple-green patina encompasses this satiny and sharply struck silver dollar. Evaluation beneath a lens reveals only infrequent inconspicuous abrasions. All Lafayette dollars were coined on a single day, December 14, 1799, which was the exact centennial of Washington's death. NGC ID# 28N8, PCGS# 9222

**1900 Lafayette Dollar, MS65
Lustrous and Lightly Toned**

4890 1900 Lafayette Dollar MS65 PCGS. DuVall 1-B. The Lafayette dollar was actually struck in 1899 from hand-made dies and was the first legal tender coin to depict an American president. This impressive Gem exhibits well-detailed design elements and vibrant mint luster under pleasing shades of amber, lavender-gray, and chestnut-gold patina. NGC ID# 28N8, PCGS# 9222

**1900 Lafayette Dollar, MS65
Scarce DuVall 3-D Variety**

4891 1900 Lafayette Dollar MS65 PCGS. DuVall 3-D. Deep ocean-blue and rose-red toning enriches this coruscating and crisply struck representative. Inconspicuous marks near Washington's nose and STATES OF AMERICA are all that deny an even higher grade. A scarce die pairing, attributed at a glance by the shape and position of the branch beneath the statue. NGC ID# 28N8, PCGS# 9222

**1900 Lafayette Dollar, MS65
Only Classic Silver Dollar Commemorative**

4892 1900 Lafayette Dollar MS65 PCGS. CAC. DuVall 2-C. The 1900 Lafayette dollar is the only silver dollar in the classic commemorative series. This impressive Gem features well-detailed design elements and bright mint luster, under attractive shades of sea-green and lavender-gray toning. The well-preserved surfaces are free of mentionable distractions. NGC ID# 28N8, PCGS# 9222

**Lafayette Commemorative Dollar, MS65
Nicely Toned Example**

4893 1900 Lafayette Dollar MS65 PCGS. CAC. DuVall 2-C. Golden-brown and powder-blue toning compete for territory throughout this lustrous and crisply struck silver dollar. The obverse field is well-preserved, as are the cheeks and necks of the dual portraits. A vertical graze on Washington's forehead and minor contact on the reverse field are all that limit the grade. NGC ID# 28N8, PCGS# 9222

**1936 Arkansas Half Dollar, MS67
Among the Finest Certified**

4894 1936 Arkansas MS67 PCGS. CAC. The 1936 Arkansas half dollar claims a small distribution of 9,660 pieces and this spectacular Superb Gem is one of the finest surviving examples. The design elements are well-detailed, showing just a touch of the typical softness on the central reverse. The surfaces are lustrous and well-preserved, with traces of golden-tan, gray, and amber patina. Population: 9 in 67, 0 finer (4/13). NGC ID# 28HZ, PCGS# 9237

**1939-S Arkansas Half Dollar, MS67
Low-Distribution Silver Commemorative**

4895 1939-S Arkansas MS67 PCGS. CAC. From a low distribution of 2,105 pieces, the 1939-S Arkansas half dollar is a very rare issue in Superb Gem condition. This magnificent specimen is sharply detailed and lustrous, with light golden-tan toning. Close inspection reveals no mentionable distractions. Population: 10 in 67 (1 in 67+), 0 finer (4/13). NGC ID# 28JC, PCGS# 9251

**1922 With Star Grant Half, MS65
Pleasing Peripheral Patina**

4896 1922 Grant With Star MS65 NGC. In an accidental reward for mercenary instinct, the beneficiaries of the Grant commemoratives who requested With Star and No Star varieties for the gold dollars received two varieties of *half* dollars as well. This Gem of the rarer With Star type has peach and gold outer toning with luminous silver centers. NGC ID# 28KC, PCGS# 9307

**1922 Grant With Star Half Dollar
Lightly Toned Gem**

4897 1922 Grant With Star MS65 NGC. The obverse has pale yet distinct patina, primarily faint silver-blue with more overt gold-orange hues. The reverse color, where seen, is hardly an echo of the opposite side's toning. Softly struck with a few isolated marks but no serious "clumping" of eye-distracting abrasions. NGC ID# 28KC, PCGS# 9307

**With Star 1922 Grant Half, MS65
An Accidental Commemorative Rarity**

4898 1922 Grant With Star MS65 NGC. The obverse of this With Star Grant half is distinctly toned antique-gold over parts of otherwise silver-white surfaces. The small reddish dots on that side carry over to the otherwise minimally toned reverse. Softly struck with a "bald spot" on Grant's head but pleasingly preserved. The original request from the Grant commemoratives' beneficiary was for No Star and With Star gold dollars, and the With Star half dollars were an unexpected bonus. NGC ID# 28KC, PCGS# 9307

**Superb Gem 1928 Hawaiian Half
Smooth, Lustrous Surfaces**

4899 1928 Hawaiian MS66 PCGS. The Hawaiian half dollar ranks among the most challenging of all commemorative issues in all grades, and Gem or finer examples are particularly elusive. Both sides of this sharply struck example are brightly lustrous with satiny silver surfaces beneath splendid gold toning. Critical examination reveals pristine surfaces that are free of all but the most trivial surface marks on each side. Although 86 similarly graded MS66 examples of this issue have been certified by PCGS (2/07), just two finer coins has been graded by this service.
Ex: Charlotte Signature (Heritage, 3/2007), lot 1469. NGC ID# 28KE, PCGS# 9309

1935 Hudson Half, MS67
Largely Untoned Example

4900 1935 Hudson MS67 PCGS. There are some elements of whimsy on the Hudson commemorative half dollars that are worth appreciating. The Chester Beach design shows the ship of Henry Hudson, the *Half Moon*, along with a quarter moon showing a bump intended to symbolize the Man in the Moon. The reverse shows a figure of Neptune riding backwards on a spouting whale, along with a mermaid — or at least a merperson — tootling on a conch shell. This piece shows mostly untoned silver luster with soft luster and just a touch of golden rim toning. Both sides are sharply struck and free of mentionable distractions. Population: 10 in 67, 0 finer (4/13). NGC ID# 28KE, PCGS# 9312

1935 Hudson Half, MS67
Key Commemorative Design Type

4901 1935 Hudson MS67 PCGS. CAC. At the time of its issue, likely few people outside of the Hudson River Valley cared anything about the 1935 Hudson commemorative half — at least, in a positive way. The sesquicentennial observance of the founding of Hudson, New York — a town of 14,000 people at the time — was commemorated by the attractive design of Chester Beach. Coin dealers were the primary purchasers of the 10,000 or so coins distributed, and speculation drove the prices up afterward.

Today the issue is much more popular as one of the three key design types in the complete commemorative set, along with the 1928 Hawaiian and the 1935 Old Spanish Trail. Silvery areas dominate the obverse, with more golden patina appearing on the reverse. Both sides show focal points — the whale, the sails of the *Half Moon* — that are notably free of contact marks. Population: 10 in 67, 0 finer (4/13). NGC ID# 28KE, PCGS# 9312

1921 Missouri Half Dollar, MS65
2x4 in Field

4902 1921 Missouri 2x4 MS66 PCGS. The Missouri ranks among the scarcest silver commemorative types, and the 2x4 variety is more elusive than its Plain counterpart. Mintmark varieties did not exist within the series until the Oregon Trail was introduced in 1926. However, in 1921, distributors for the Missouri and Alabama state centennial issues came up with the idea of field symbol varieties to increase sales. This is a satiny and well preserved Gem with medium olive-gold toning. NGC ID# 28KR, PCGS# 9331

**1939 Oregon Trail Half Dollar, MS68
Tied for Finest Certified at NGC**

- 4903** 1939 Oregon MS68 NGC. CAC. The Oregon Trail half dollar is one of the most attractive and popular designs of the silver commemorative series. This magnificent MS68 example is one of the finest pieces extant, with razor-sharp definition on all design elements and pristine lustrous surfaces under attractive shades of champagne-gold and ice-blue toning. Census: 4 in 68, 0 finer (4/13). NGC ID# 28L9, PCGS# 9352

**1915-S Panama-Pacific Half, MS67
Vibrant Luster, Vivid Toning**

- 4904** 1915-S Panama-Pacific MS67 PCGS. CAC. Hints of violet, lavender-gray, and amber patina enhance the impeccably preserved surfaces of this spectacular Superb Gem. The design elements are well-detailed and both sides radiate vibrant mint luster. Eye appeal is outstanding. Population: 82 in 67 (3 in 67+), 3 finer (4/13). NGC ID# 26H7, PCGS# 9357

**1915-S Panama-Pacific Half Dollar
Toned Superb Gem**

- 4905** 1915-S Panama-Pacific MS67 PCGS. CAC. FS-502. The mintmark is lightly but widely repunched north. Sea-green and lavender toning embraces this satiny and beautifully preserved Superb Gem. The strike is precise and the eye appeal is undeniable. Virtually unobtainable any finer. Population: 82 in 67 (3 in 67+), 3 finer (4/13). NGC ID# 26H7, PCGS# 9357

**1926 Sesquicentennial Half, MS66
Top-Grade Example**

- 4906** 1926 Sesquicentennial MS66 NGC. Only a handful of Premium Gem Sesquicentennial halves are certified at each service in this top grade, as the low relief of the design means that many examples either show too many surface marks and/or generally unattractive eye appeal. Although Bowers' 2008 commemorative coins *Guide Book* mentions some "pricey MS67" coins, those now do not appear in either the NGC or PCGS population data. NGC has seen 12 submissions with none finer, PCGS eight with none finer (4/13). This is the first MS66 NGC example we have offered since 2001, although more-recent MS66 PCGS coins at Heritage Auctions have brought well into the five figures.

This marvelous coin suffers from neither too many consequential marks nor the typical subpar eye appeal. On the contrary, only a few scattered minor ticks appear on presidents Coolidge and Washington, and bountiful silver-gray patina with pink highlights contributes to generous eye appeal. A top-notch coin. NGC ID# 28LM, PCGS# 9374

1951 Washington-Carver Half, MS67
Lightly and Evenly Toned

4907 1951 Washington-Carver MS67 PCGS. CAC. Some of the Washington-Carver half dollars were struck from silver obtained by melting down remaining unsold examples of the earlier Booker T. Washington commemorative halves; this should have been taken as a bad omen, but it was not. Nonetheless, of the 110,000-plus 1951 Washington-Carver halves, it is estimated that 90,000 of them were melted, for a net distribution around 20,000 pieces. This piece is one of only two to receive this grade at PCGS, and none are finer (4/13). Both sides show the high points and all areas to be devoid of mentionable contact, with surfaces that are pinkish-gray in the centers to light jade near the rims. A beautiful coin. NGC ID# 28MS, PCGS# 9430

1952 Washington-Carver Commemorative Half, MS67
Highly Lustrous With Subtle, Mottled Toning

4908 1952 Washington-Carver MS67 PCGS. The massively struck and widely distributed 1952 Washington-Carver half dollar is always available in lower grades. Some were even spent in circulation (this writer remembers receiving one in change). However, very few were preserved in Superb condition. This brightly lustrous example is draped in multicolored, mottled toning over each side, and there are none of the usually troubling abrasions present. NGC ID# 28MV, PCGS# 9434

1952 Washington-Carver Half, MS67
Mottled Patina

4909 1952 Washington-Carver MS67 PCGS. The Washington-Carver commemorative half issue was one that lasted far too long, from 1951 through 1954, and it featured an uninspired design. It was also a follow-on to the Booker T. Washington halves, many of which were later melted to make the Washington-Carver pieces. The 1952 saw the largest net distribution of the series by far, at about 1.1 million pieces. This Superb Gem shows softly lustrous surfaces with mottled patina in attractive shades of pinkish-gray, jade, and ice-blue. Both sides are notably free of mentionable contact, making this piece one of the few finest known. Population: 14 in 67 (1 in 67+), 0 finer (4/13). NGC ID# 28MV, PCGS# 9434

**1952 Washington-Carver Half, MS67
Great Eye Appeal**

- 4910 1952 Washington-Carver MS67 PCGS. CAC.** The 1952 Washington-Carver half dollar saw the largest distribution by far of the various series issues, meaning the largest number remaining after unsold examples were melted. The net number disbursed was slightly more than 1.1 million pieces. Nonetheless, the issue has attained conditional rarity status, as Superb Gem examples of the 1952 have recently traded in the range of \$8,225-\$13,500. This piece displays great eye appeal over pristine surfaces that are mostly pinkish with accents of jade and blue. A top-notch example with the CAC endorsement, to boot. Population: 14 in 67 (1 in 67+), 0 finer (4/13). NGC ID# 28MV, PCGS# 9434

COMMEMORATIVE GOLD

**1903 Louisiana Purchase Gold Dollar, MS67+
Jefferson Obverse, Finest Certified at NGC**

- 4911 1903 Louisiana Purchase/Jefferson MS67+ NGC. CAC.** The 1903 Louisiana Purchase gold dollar was offered in both proof and Uncirculated formats, with half of the coins featuring the portrait of Thomas Jefferson on the obverse and the other half displaying a bust of William McKinley. This high-end Superb Gem Jefferson specimen exhibits sharply detailed design elements and vibrant mint luster throughout, with pristine yellow-gold surfaces. Census: 89 in 67 (1 in 67+), 0 finer (4/13). NGC ID# 26HA, PCGS# 7443

**1904 Lewis and Clark Dollar, MS66+
Key Gold Commemorative**

- 4912 1904 Lewis and Clark MS66+ PCGS. CAC.** From a small distribution total of 10,025 pieces, the 1904 Lewis and Clark gold dollar is one of the key issues in the gold commemorative series, only slightly more available than its 1905 counterpart. This high-end Premium Gem is sharply detailed throughout, with vibrant mint luster and well-preserved lemon-yellow surfaces. PCGS has graded 18 numerically finer examples (4/13). NGC ID# 26HC, PCGS# 7447

**1904 Lewis and Clark Dollar, MS67
Only One Graded Finer at PCGS**

- 4913 1904 Lewis and Clark MS67 PCGS.** The Lewis and Clark gold dollars of 1904 and 1905 were extremely unpopular after the hype and overpromotion associated with Farran Zerbe and the 1903 Louisiana Purchase-Jefferson and McKinley dollars. Each issue, 1904 and 1905, had a net distribution of only 10,000 pieces, give or take. Today the Superb Gem level is the finest practically obtainable for a 1904 Lewis and Clark, and they are pricey even there; PCGS has seen a single MS68 finer (4/13). Deep reddish-orange color complements vibrant mint luster over surfaces that are virtually pristine on this piece, a coin with excellent eye appeal and high aesthetic beauty. NGC ID# 26HC, PCGS# 7447

**1905 Lewis and Clark Gold Dollar, MS66
Scarcer Than the 1904, Seldom Seen Finer**

4914 1905 Lewis and Clark MS66 PCGS. CAC. Grade-for-grade the 1905 Lewis and Clark gold dollar is a tad pricier than its 1904 counterpart, even though the net distributions were virtually identical. That disparity widens as the higher grade levels of MS66 and MS67 are reached, the latter being theoretically obtainable but practically not. This Premium Gem with CAC endorsement will provide a more than acceptable alternative, showing flashy surfaces in medium apricot-gold with no more than a couple of the most minute ticks appearing in the fields and on the device high points. Population: 70 in 66, 3 finer (4/13). NGC ID# 26HD, PCGS# 7448

**1915-S Panama-Pacific Quarter Eagle, MS65
Rich Yellow-Orange Color**

4915 1915-S Panama-Pacific Quarter Eagle MS65 NGC. With a net mintage of only 6,749 pieces, the Panama-Pacific quarter eagle is the "middle child" of its gold commemorative series, more elusive than the dollars but more accessible than the famous fifties. This Gem has rich yellow-orange color with softly swirling luster and a hint of frost on the softly struck devices. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle, MS66
Attractive Orange-Gold Highlights**

4916 1915-S Panama-Pacific Quarter Eagle MS66 NGC. Issued singly and as part of five-coin sets, the 1915-S Panama-Pacific quarter eagle, commemorating the opening of the Panama Canal, had a distribution of only 6,749 pieces. This lovely Premium Gem displays satiny mint luster and attractive orange-gold surfaces, with fiery-orange highlights. NGC ID# 26HK, PCGS# 7450

**1922 Grant No Star Gold Dollar, MS67
Exceptional Eye Appeal**

4917 1922 Grant No Star MS67 NGC. CAC. The Grant is the only example from the era of classic commemoratives in which the same design was used for two different denominations. This Superb Gem example displays attractive yellow-gold color overall with hints of peach also present. NGC has awarded higher numeric grades to a mere 4 examples (4/13). NGC ID# 26HJ, PCGS# 7458

PROOF COMMEMORATIVE GOLD

Proof 1903 McKinley/Louisiana Purchase Gold Dollar

4918 1903 Louisiana Purchase/McKinley — Filed Rims — PCGS Genuine. Proof, Unc. Details. Only 100 proofs were struck of each of the McKinley and Jefferson types in 1903. The present specimen has a bold radial die crack though the final A in LOUISIANA, a promising topic for research of the rare proof variety. The honey-gold surfaces are satiny and intricately struck. McKinley's cheek displays faint marks and a patch of faint hairlines is noted on the reverse near 11 o'clock. PCGS# 7483

MODERN BULLION COINS

1988 One-Ounce Gold Eagle, MS70
Tied With Seven Others for PCGS Finest

- 4919** 1988 One-Ounce Gold Eagle MS70 PCGS. A technically flawless business-strike example of the one-ounce gold American Eagle issue bearing an 11-character Roman numeral date, MCMLXXXVIII. Color is pale yellow with only occasional variations toward apricot. Of close to half a million pieces, only eight have received the top grade from PCGS (4/13).
From The Twilight Collection. NGC ID# 26PC, PCGS# 9824

2009 Ultra High Relief Twenty, MS70 Prooflike
Gleaming Example of Popular Modern Issue

- 4920** 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike NGC. The popular modern manifestation of the early 20th century coinage vision of Augustus Saint-Gaudens, offered here as a technically perfect example with Prooflike-level reflectivity in its deeply curved fields. The holder design permits viewing of the lettered-and-starred edge. PCGS# 506602

TERRITORIAL GOLD

C. Bechtler With Star Five Dollar, MS61
K-20, 134G

- 4921** (1837-42) C. Bechtler Five Dollar, 134G, With Star MS61 NGC. K-20, R.4. Though a couple of the Bechtler gold dollar varieties are relatively plentiful, the five dollar issues range from very scarce to extremely rare. The present representative is without any noticeable abrasions or flan imperfections. The legends are evenly struck and the wheat-gold color is consistent. Luster illuminates the lettering. There is a raised rim on the right reverse and a concave rim across much of the obverse. The dies are rotated 90 degrees. Listed on page 374 of the 2013 *Guide Book*. Census: 10 in 61, 2 finer (4/13). PCGS# 10097

COINS OF HAWAII

1883 Hawaiian Quarter, MS67
None Finer at PCGS

- 4922** 1883 Hawaii Quarter MS67 PCGS. CAC. From a mintage of 500,000 pieces, the 1883 quarter is the most available Hawaiian issue, and the most popular choice of type collectors who only want one example of the island nation's coinage. This magnificent Superb Gem is sharply detailed and lustrous, with a few hints of pale gold and lavender-gray toning. Population: 15 in 67, 0 finer (4/13). PCGS# 10987

**1883 Hawaii Half Dollar, MS65
Only Two Numerically Finer at PCGS**

- 4923** 1883 Hawaii Half Dollar MS65 PCGS. CAC. From a substantial mintage of 700,000 pieces, the 1883 Hawaii half dollar, or Hapalua, is very rare in MS65 condition. This impressive Gem exhibits sharply detailed design elements and vibrant mint luster with a few hints of golden-tan toning. Population: 14 in 65 (1 in 65+), 2 finer (4/13). PCGS# 10991

PATTERNS

**1863 Copper With Motto Half Dollar
Judd-343, PR64 Red and Brown**

- 4924** 1863 Half Dollar, Judd-343, Pollock-415, R.7, PR64 Red and Brown PCGS. The obverse die is the design used on regular-issue half dollars in 1863. The reverse features the normal perched eagle design, with the addition of the scroll and motto IN GOD WE TRUST above the eagle's head. Struck in copper, with a reeded edge. According to USPatterns.com, Judd-343 was a restrike issue, created for sale to collectors in the 1870s. The coins were typically offered with other denominations as year sets. An early auction appearance of such a set was in the Woodside Collection (New York Coin & Stamp, 4/1892), lot 131. The Woodside sale also included complete sets in silver and aluminum. The issue is rare, with an estimated population of about one dozen survivors. Sharply struck, with all features intricately detailed. Lovely, bright orange-red luster shows just a bit of spotty darkening on the reverse. Deeply reflective fields and thickly frosted devices. The only factors limiting the grade are some carbon spots and handling marks (possibly fingerprints) in the obverse fields. An attractive example of a rare and popular pattern.

Ex: DEA and Marshal's Services Sale (Heritage, 12/1988), lot 1881; Lemus Collection / Queller Family Collection Part Two / FUN Signature (Heritage, 1/2009), lot 1611. PCGS# 70505

**1865 With Motto Five Dollar in Copper
Judd-446, Deeply Reflective PR66 Brown**

- 4925** 1865 Five Dollar, Judd-446, Pollock-518, High R.6, PR66 Brown PCGS. The obverse die is the regular design for the year. The reverse is the design adopted in 1866, with the scroll over the eagle's head and the motto IN GOD WE TRUST added. Struck in copper with a reeded edge. This transitional dies trial may have been struck in 1865, but it also may have been struck later with other With Motto restrikes. As pointed out on the USPatterns.com website, "The first definite appearance of this design was in the April 1870 auction by John Haseltine of coins from the Idler collection." The Brown designation belies the actual appearance of this piece which is a deep blue. Small remnants of red still remain, most notably on the portrait of Liberty. The mirrored fields are deeply reflective and the surfaces minimally marked, as expected. The centers are a bit softly defined. PCGS# 60633

**1865 With Motto Twenty Dollar
Judd-453, PR64 Gilt**

- 4926** 1865 Twenty Dollar, Judd-453, Pollock-526, High R.6, PR64 Gilt NGC. Both the obverse and the reverse are similar to the regular issue 1865 double eagle except that the motto IN GOD WE TRUST was added above the eagle as adopted in 1866. Struck in copper and gilt with a reeded edge. The first appearance at public auction was in Haseltine's April 1870 sale. Several strikings show a pronounced die crack to the left of the date, but this coin does not. This is a nicely gilt example with none of the underlying copper showing. Each side is remarkably clean, the only pedigree identifiers we see are a small rim nick at 12 o'clock on the obverse and a pair of rust spots (one small and one large) around star 5. PCGS# 60640

**1866 Transitional Shield Nickel
Judd-507, PR66 Ultra Cameo**

- 4927** 1866 Shield Nickel, Judd-507, Pollock-591, R.5, PR66 Ultra Cameo NGC. This is an important transitional pattern that was struck later than the 1866 date stated on the coin. The obverse bears the regular Shield nickel design, while the reverse has the regular Without Rays design as adopted in 1867. Struck in nickel with a plain edge. USPatterns.com states that the reverse is believed to be the first No Rays die, distinguished by the stars above CENTS pointing between the E and N and between the T and S. All other No Rays reverse dies have the stars pointing to the E and T. This is a completely brilliant example that shows strongly contrasting mint frost over the devices. A few flyspecks of carbon can be discerned on each side with a magnifier, but there are no mentionable marks. PCGS# 860703

**1868 Five Cents in Copper, PR64 Red and Brown
Judd-627, Struck on a Broad Planchet**

- 4928** 1868 Five Cents, Judd-627, Pollock-696, R.7, PR64 Red PCGS. The obverse closely resembles the contemporary three cent nickel. The reverse is a pattern design, and has a laurel branch with ribbon framing a large 5 and CENTS in curved letters. IN GOD WE TRUST is at the the upper border. Struck in copper with a plain edge. The planchet has the diameter of a silver quarter and the rims are very broad, usual for Judd-627. A well-struck, rose-red near-Gem with scattered minor obverse carbon. Though designated as Low R.7 in the 10th edition of Judd, this is the first example we have offered at auction since 1996, and we feel more comfortable with the uspatterns.com estimate of "about a half dozen known." PCGS# 80844

**1868 Five Cent Pattern in Copper
Judd-634, PR64 ★ Brown**

- 4929** 1868 Five Cents, Judd-634, Pollock-706, High R.7, PR64 ★ Brown NGC. CAC. The overall design is similar to the circulating three cent nickel, in larger format and with a V in the central reverse to indicate a five cent piece. But Liberty has a small star on her coronet, and the date 1868 is in exergue. The reverse has a wreath with small Maltese cross atop, surrounded by a scroll bearing IN GOD WE TRUST. Struck in copper with a plain edge. This is a flashy Choice proof with a precise strike and parallel hairlines on the central reverse field. Attractively toned with aquamarine fields and cherry-red borders. PCGS# 60852

**1870 Longacre Standard Silver Dollar
Judd-1010, PR63 Brown
Evidence of Rotated Double Striking**

- 4930** 1870 Standard Silver Dollar, Judd-1010, Pollock-1143, High R.7, PR63 Brown PCGS. James Longacre's posthumously released Indian Princess design features Liberty seated beside a globe, wearing an Indian headdress. The word LIBERTY is inscribed across the center of the globe and Liberty is holding a pole topped with Phrygian cap. The reverse features the word STANDARD at the top with 1 DOLLAR encompassed by a wreath of cotton and corn. This design was apparently based on a sketch Longacre made prior to 1852, but it was not until 1870 that William Barber made use of it a year after Longacre's death, and he adapted it on a number of different pattern coins. Struck in copper with a reeded edge. Each side displays subtle multicolored iridescence with noticeable original mint red still in evidence within the folds of Liberty's gown and other recessed motifs on the obverse. A few spots of carbon are seen on the obverse.

In our 2011 FUN Signature we sold a doublestruck Judd-1010. This piece also shows evidence of rotated double striking on each side. On the obverse it is most noticeable in the date and the L in LONGACRE. On the reverse it is most prominent on DOLLAR and the bow on the lower part of that side. PCGS# 61258

**1871 Indian Princess Half Dime in Copper
Judd-1060, PR65 Red and Brown**

- 4931** 1871 Standard Silver Half Dime, Judd-1060, Pollock-1195, R.7, PR65 Red and Brown PCGS. CAC. The obverse is the posthumous James B. Longacre Indian Princess design, in a starless field with date in exergue. The reverse shows 5 / CENTS, the latter in an upcurving arc, surrounded by a wreath of corn and cotton, with STANDARD in tiny letters at the upper rim. Struck in copper with a reeded edge. About a half dozen copper strikings are known of this medal-like pattern. Close examination will reveal little of the brown this piece is supposed to have. Varying shades of lighter and deeper red are seen with the occasional dot of blue and smudge of violet in the fields, but no real presence of brown. A spot of carbon is noted to the left of Liberty's foot, as a pedigree identifier. PCGS# 71319

**1874 Bailly-Designed Twenty Cent
Judd-1355, PR64 Red and Brown**

- 4932** 1874 Twenty Cents, Judd-1355, Pollock-1499, R.6, PR64 Red and Brown PCGS. Ex: Denali Collection. The Bailly design obverse with a glum-faced Liberty seated, holding a pole with a Liberty Cap above and the other hand resting on a globe. This is paired with a reverse that is only a minor variation from the regular die adopted in 1875. The same reverse die also struck several 1875 patterns: Judd-1399 through Judd-1402 and Judd-1411 through Judd-1413. Struck in copper with a plain edge. Boldly struck and satiny with deep cherry-red and ruby toning. Careful examination reveals only minor contact on the right obverse field. PCGS# 71659

**1883 PURE NICKEL Pattern, Judd-1704
A Spectacular PR67 Ultra Cameo**

- 4933** 1883 Liberty Head Five Cents, Judd-1704, Pollock-1908, Low R.6, PR67 Ultra Cameo NGC. The obverse is similar in design to the Liberty nickel adopted this year, except the stars are replaced with the legend UNITED STATES OF AMERICA. The reverse has a central inscription that reads PURE NICKEL, surrounded by a wreath of cotton and corn. FIVE CENTS is separated above and below with seven stars left and six right. Struck in nickel with a plain edge. These fascinating coins are struck in pure nickel, which must have been very difficult to strike up properly. They also are magnetic. At least a dozen pieces are known. From examining this coin one would never suspect pure nickel was difficult to strike up or hard on the dies. The devices are fully struck, the fields show deep reflectivity, and the design motifs are heavily frosted. There are no contact marks we can find, only a single tiny planchet flake in the field above the right side of the U in PURE could be used as a reliable identifier. NGC has certified two pieces as PR67 Ultra Cameo, and it appears there actually are two coins rather than one coin resubmitted. PCGS# 62120

Primary Source Material for 1964-1965 Detaclad Bonding Includes 'Franklin Quarter,' Pollock-5391

4934 (1964) Detaclad Explosion Bonded Franklin Quarter, Three Square Planchets, Hand-Written Note, and Photo Album. During 1964-1965 an effective method was needed by the Mint that would bond an outer layer of nickel or silver to an inner core of copper, what we know today as "clad coinage." The problem, as seen by Mint officials at the time, was that coin collectors were pulling too many coins from circulation and were the cause of a coin shortage. One solution was to eliminate mintmarks, thus decreasing collecting pressure on modern issues. Another solution of the dwindling stocks of precious metals was to remove silver from the dime and quarter, and to gradually do so from the half dollar. The solution, however, had to satisfy the vending machine industry (and AT&T) to ensure that the new "clad" coins would work properly when they replaced the traditional silver composition coins.

A process was developed called "explosive bonding." Cobbling together quotes from two internet sources, this method of bonding is explained by one source as, "The process does not melt either metal, instead it plasticizes the surfaces of both metals, causing them to come into intimate contact sufficient to create a weld." Another explains that, "Large areas can be bonded extremely quickly and the weld itself is very clean, due to the fact that the surface material of both metals is violently expelled during the reaction." Explosive bonding was only used for a few years. This method was used by DuPont and Revere to make experimental clad coinage.

Very little has been published about this period of experimentation. This particular lot is original source material compiled and written by Richard M. Brown, who was there at the time and worked at Revere's Michigan Division. Included is a clad "Franklin quarter," Pollock-5391. The experimental coin has the likeness of Franklin on the obverse, the reverse has the DuPont logo in the center, surrounded by the most interesting legend: THIS TOKEN MADE FROM EXPLOSION BONDED "DETACLAD". The piece is uncertified and we grade it MS62. Also included are three square pieces of Detaclad, all unstamped. One is 19 mm x 19 mm and thin, one is 20 mm x 20 mm and just slightly thicker, the third is 21 mm x 21 mm and a thick 6 mm. There is also a four-page (small pages) hand-written note about the development of clad coinage. Also of significant interest as original source material is a 8 1/2 x 11 dog-eared binder from 1966 titled "A Pictorial Summary of the Conversion of Cupro-Nickel Coinage Metal for U.S. Mint." There are 21 color photographs included and a 1966 article from Ordnance titled "Explosive Cladding." Of significant interest to the numismatic researcher.

R. M. Brown's daughter, a national conservation medalist, will donate the proceeds from this lot to Green!USA, a non-profit organization that she founded.

NUGGET

239-Gram Alluvial Nugget

4935 Alluvial Gold Nugget. 239.0 Grams. This interesting nugget is obviously alluvial as most of its features are smooth from many years of friction from water coursing over it. The shape is certainly irregular with one corner making a distinct upward curve. The recesses are deep reddish. Unfortunately we do not know the origin of this piece. At its widest points the nugget measures 75 x 46 mm.

MORGAN DOLLARS

- 4936 1878 8TF MS65 PCGS. CAC. VAM-3.** Remarkable orange-gold toning consumes the obverse, save for slender upper bands of ocean-blue, plum-red, and lemon. The reverse is brilliant. Dynamic luster sweeps this nicely struck and carefully preserved Gem. NGC ID# 253H, PCGS# 7072
- 4937 1878 8TF MS65+ PCGS. CAC. VAM-2.** This essentially brilliant and thoroughly lustrous Gem has a good strike. Mentionable marks are absent save for a tick on the eagle's breast. The eight tailfeather subtype was coined only in 1878 at Philadelphia, and constitutes a minority of the production that year. NGC ID# 253H, PCGS# 7072

1878 8 Tailfeather Dollar, White MS65+
VAM-17

- 4938 1878 8TF MS65+ PCGS. CAC. VAM-17.** LIBERTY and the wreath are nicely die doubled on this available eight tailfeather die pair. This nearly stone-white Gem is crisply struck and highly lustrous. The obverse is splendidly smooth, though inconspicuous marks on the RIC in AMERICA preclude a finer grade. NGC ID# 253H, PCGS# 7072
- 4939 1878 7/8TF Strong MS65 PCGS. VAM-37.** Hints of golden-brown patina visit the margins of this lustrous and minimally toned Gem. Well struck and attractive despite a couple of mint-produced strike-throughs near the bust tip. NGC ID# 2TXZ, PCGS# 7078
- 4940 1878 7/8TF Strong MS65 PCGS. CAC. VAM-37.** Medium to deep apricot-gold dominates the obverse but is confined to the periphery on the reverse. The upper obverse margin offers a glimpse of aquamarine. Sharply struck and lustrous with pleasing surfaces. NGC ID# 2TXZ, PCGS# 7078
- 4941 1878 7/8TF Weak MS65 NGC. VAM-33A.** The later, clashed die state for this 7 over 4 tailfeathers variety. Designated as VAM-33 on the NGC holder, since VAM-33A was not published until recent years. Lustrous and precisely struck with booming luster. Close to brilliant despite an arc of peach-gold toning on the lower reverse. PCGS# 7070
- 4942 1878 7TF Reverse of 1879 MS65 PCGS. CAC. C3 Reverse.** The N in IN is double clashed in front of Liberty's neck, and the T in UNITED is die doubled at its base, a beginning for the 1878 VAM specialist. This lustrous silver dollar exhibits attractive golden-brown and navy-blue peripheral toning. The strike is sharp and there are no obtrusive marks. NGC ID# 253L, PCGS# 7076

- 4943 1878-CC MS65 PCGS.** Delicate almond-gold toning visits this lustrous and precisely struck Carson City Gem. The fields are smooth and the portrait displays only wispy grazes. Housed in an old green label holder.
Ex: Orlando FUN Signature (Heritage, 1/2003), lot 7773, which realized \$1,150. NGC ID# 253M, PCGS# 7080
- 4944 1878-CC MS65 NGC.** A splendid Gem, this first-year Carson City Morgan dollar exhibits satiny luster with lovely peripheral gold toning. Sharply struck with excellent eye appeal. NGC ID# 253M, PCGS# 7080
- 4945 1878-CC MS65 PCGS.** Scattered marks on each side are consistent with the grade of this first-year Carson City dollar. Both sides exhibit frosty silver luster with no evidence of toning. NGC ID# 253M, PCGS# 7080
- 4946 1878-CC MS65 PCGS. CAC.** A brilliant, lustrous Gem with cartwheel luster, this is a wonderful representative. Areas of golden toning appear at the rims. The design elements display a strong level of detail, including the centers. NGC ID# 253M, PCGS# 7080

1878-CC Morgan Dollar, MS66
An Exquisite Beauty

- 4947 1878-CC MS66 NGC.** The first year of the Carson City Morgan dollar, and an exquisite example of that coinage. This Premium Gem exhibits brilliant silver luster, frosty surfaces, bold design definition, and a hint of gold toning at the central obverse and reverse. NGC has certified a mere nine finer pieces (5/13). NGC ID# 253M, PCGS# 7080
- 4948 1878-CC MS64+ Prooflike PCGS. CAC.** Silver-white surfaces burst with thick mint frost and prooflike reflectivity. The strike is sharp overall, even though a few roller marks appear on the lower chin. Super eye appeal for this first-year CC-mint Morgan dollar issue. NGC ID# 253M, PCGS# 7081
- 4949 1879 MS65+ PCGS. CAC.** A lovely high-end Gem with nice eye appeal, this piece displays a pleasing level of design definition and is largely untuned. A few small areas of tan color appear near the top of the obverse. A thin wispy die crack appears near 2 o'clock on the obverse. NGC ID# 253S, PCGS# 7084
- 4950 1879 MS65+ PCGS. CAC.** This piece is far more sharply struck than usual for a Morgan dollar issue whose strike quality can vary widely; we would say this piece is close to full strike, even at the hair over the ear. An untuned beauty with frosty luster and minimal signs of contact. NGC ID# 253S, PCGS# 7084

1879-O Morgan Dollar, MS65
Conditionally Rare in Finer Grades

- 4951 1879-O MS65 PCGS.** This attractive Gem displays well-preserved surfaces, with intense golden-brown and violet toning on the obverse and much lighter patina on the reverse. The design elements are well-detailed and vibrant mint luster is evident on both sides. PCGS has graded 14 numerically finer examples (5/13). NGC ID# 253V, PCGS# 7090

1879-O Morgan Dollar, MS65
Sharply Detailed and Lustrous

- 4952 1879-O MS65 PCGS.** Coinage operations resumed at the New Orleans Mint in 1879 and a fairly large mintage of nearly 2.9 million Morgan dollars was accomplished. This attractive Gem is sharply detailed for an O-mint issue and the well-preserved surfaces are brightly lustrous and brilliant. PCGS has graded 14 numerically finer examples (5/13). NGC ID# 253V, PCGS# 7090
- 4953 1879-S MS65 ★ NGC. CAC.** Though the reverse is minimally toned, the obverse offers crazy-quilt color in more than a dozen different shades from the reds and oranges to greens, blues, and violets. Truly a coin that must be seen to be believed. NGC ID# 253X, PCGS# 7092
- 4954 1879-S MS67 PCGS. CAC.** A solid strike leaves sharp definition on the design elements of this S-mint Superb Gem, including very nice detail in the hair over the ear and a decent impression on the eagle's breast. Lustrous surfaces have been nicely preserved. NGC ID# 253X, PCGS# 7092
- 4955 1879-S MS67 PCGS. CAC.** The silver-white surfaces of this Superb Gem display ebullient luster and are free of distracting marks. An impressive strike leaves sharp definition on the design elements. Overall, this piece possesses very pleasing eye appeal. NGC ID# 253X, PCGS# 7092
- 4956 1879-S MS67+ NGC. CAC.** Just a light blush of color visits each side of this stunning, well-frosted Superb Gem, a coin that boasts a bold strike and excellent surface preservation. A great example for type purposes. NGC ID# 253X, PCGS# 7092

1879-S Morgan Dollar, MS68
Highest Available Quality and Eye Appeal

- 4957 1879-S MS68 NGC.** This magnificent Morgan dollar exhibits sharply detailed design elements with rich mint frost and virtually pristine fields. Although not designated as prooflike, the fields are deeply reflective in most areas. A few hints of pale gold and lavender toning enhance the incredible eye appeal. Neither NGC nor PCGS has certified any coins in higher numeric grades (4/13). NGC ID# 253X, PCGS# 7092
- 4958 1880 MS66 NGC.** A high-grade pearl-gray representative of this high-mintage but conditionally rare Philadelphia issue. The strand of hair over Liberty's ear shows slight blending, but the strike is otherwise precise, and both sides are beautifully smooth. Census: 39 in 66, 0 finer (5/13).
Ex: Central States Signature (Heritage, 4/2008), lot 2602. NGC ID# 253Y, PCGS# 7096
- 4959 1880 MS63 NGC. VAM-39A "E" Clash.** A Hot 50 Variety. This Select Mint State silver dollar has frosty silver luster with central weakness that is typical of the issue and variety. Both sides are brilliant and untuned. PCGS# 133981
- 4960 1880-CC MS65 NGC.** Beautiful pastel rim toning complements silvery centers on this Gem 1880-CC dollar. A few roller marks show above the ear, but the bold strike and few abrasions for the grade raise this coin above most of its competitors. NGC ID# 2542, PCGS# 7100
- 4961 1880-CC MS65 PCGS.** Reddish-gold and electric-blue patination adheres to the margins of this Gem Morgan. Its surfaces possess nice luster and adequately struck design elements, though the centers display the usual softness. Both sides are devoid of significant marks. NGC ID# 2542, PCGS# 7100
- 4962 1880-CC MS65 PCGS.** The lustrous surfaces of this Gem are essentially untuned and exhibit well struck motifs. Some faint roller marks are visible at Liberty's ear. The few scattered marks are in concert with the Gem classification. NGC ID# 2542, PCGS# 7100
- 4963 1880-CC MS65+ NGC.** Hints of light color reside on the rims of this otherwise untuned high-end Gem. Lustrous surfaces are minimally marked and exhibit well struck design elements, though roller marks disturb the definition at Liberty's ear. NGC ID# 2542, PCGS# 7100
- 4964 1880-CC MS65 NGC. CAC.** A crescent-shaped area of dark toning extends from 7 o'clock to 1 o'clock on the obverse of this Gem. The colors include plum, russet, golden-brown, and teal. The piece is well struck overall, with only minor incompleteness at the centers. The profile displays a few moderate marks. NGC ID# 2542, PCGS# 7100
- 4965 1880-CC MS66 PCGS.** The faint golden accents on the obverse grow richer on the reverse. Liberty's portrait has a small area of brown toning just under her eye. Well struck and attractive. NGC ID# 2542, PCGS# 7100
- 4966 1880-CC 8 Over High 7 MS65 PCGS. VAM-5.** A Top 100 Variety. Though undesignated as such on the insert, this is the Guide Book variety with an obvious 7 underdigit entered "high" within the second 8 in the date. Brilliant and flashy with a full strike. PCGS# 7102

4967 1880-CC 8 Over High 7 MS65 Prooflike PCGS. VAM-5. A Top 100 Variety. This overdated Carson City Gem is brilliant and displays flashy fields. No marks are consequential, and the strike is good despite blending of detail on the wreath bow and eagle's legs. Ex: *Chicago Signature (Heritage, 8/2011)*, lot 4465. PCGS# 7103

4968 1880-CC 8 Over Low 7 MS65 NGC. VAM-6. A Top 100 Variety. The "Low" 7 within the second 8 is unmistakable, though the NGC holder lacks any overdate or VAM designation. Light almond-gold patina visits this lustrous Gem. The centers show incompleteness though the remainder of the strike is sharp. PCGS# 7104

**1880-CC Morgan Dollar, MS66
8 Over Low 7, VAM-6**

4969 1880-CC 8 Over Low 7 MS66 PCGS. VAM-6. A Top 100 Variety. The low 7 is visible beneath the second 8 in the date identifying the popular VAM-6 variety. This delightful Premium Gem exhibits sharply detailed design elements and vibrant mint luster with a few wisps of golden-tan toning. Population: 43 in 66 (4 in 66+), 0 finer (5/13). PCGS# 7104

4970 1880/79-CC Reverse of 1878 MS64 PCGS. VAM-4. A Top 100 Variety. A popular Carson City variety that pairs an obsolete Second Reverse with the most prominent overdate of the Morgan series. Sharply struck with light stone-gray toning and a few left obverse grazes. NGC ID# 253Z, PCGS# 7108

4971 1880/79-CC Reverse of 1878 MS65 PCGS. VAM-4. A Top 100 Variety. Light to medium golden-gray patina embraces this lustrous and well preserved Carson City Gem. The overdate is obvious and the obsolete reverse subtype contributes further to the appeal. NGC ID# 253Z, PCGS# 7108

4972 1880/79-CC Reverse of 1878 MS65+ PCGS. CAC. VAM-4. A Top 100 Variety. Booming luster invigorates this well defined and nearly untuned Carson City Morgan. Faint grazes on the left obverse are all that determine the grade. VAM-4 and VAM-7 are the only Second Reverse die varieties found on 1880-dated silver dollars. Ex: *Beverly Hills Signature (Heritage, 11/2011)*, lot 3767, which realized \$2,530. NGC ID# 253Z, PCGS# 7108

4973 1880/79-CC Reverse of 1878 MS62 Deep Mirror Prooflike ANACS. VAM-4. A Top 100 Variety. Rich orange-gold and rose-red toning endows this overdated and prominently mirrored Carson City Morgan. Scattered marks correspond to the grade. NGC ID# 253Z, PCGS# 97109

4974 1880-CC 8/7 Reverse of 1878 MS64 PCGS. CAC. VAM-7A. A Hit List 40 Variety. The obsolete reverse is the most interesting feature, but the N in IN is also clashed near Liberty's neck, and a dash is beneath the second 8, as seen on all '80-CC dollars. Fully struck and close to brilliant with potent luster and impressive high-end preservation. PCGS# 7110

4975 1880-O MS64+ PCGS. Micro O. A lustrous stone-white example of this conditionally rare New Orleans issue. The strike is good and any marks are inconsequential. The MS64+ grade may be ideal for the issue given that CDN is \$25,000 for a full Gem. NGC ID# 2543, PCGS# 7114

4976 1880-O MS64 PCGS. CAC. Oval O. This brilliant near-Gem has booming luster and a bold strike. Pleasing preservation contributes even further to the eye appeal. Difficult to acquire any finer, and then only at a vastly higher cost. NGC ID# 2543, PCGS# 7114

4977 1880-S MS64 NGC. Large S. Both sides display dramatic toning. The obverse offers cherry-red, sea-green, and lemon-gold iridescence while the more deeply patinated reverse exhibits ruby-red centers and forest-green borders. Housed in a prior generation holder. NGC ID# 2544, PCGS# 7118

**1880-S Morgan Dollar, MS65
Eye-Catching Obverse
First-Generation Holder**

4978 1880-S MS65 PCGS. Large S. The obverse is delectably toned with rainbow hues at left fading through to plum and blue-green. The reverse is semiprooflike and minimally toned save for a light scattering of haze and a tiny die dot at the knot of the wreath. This eye-catching "Gem" is housed in a first-generation PCGS holder, so throw out the price guides on this one. Who knows how high it will go? Only the winning bidder. NGC ID# 2544, PCGS# 7118

4979 1880-S MS66 PCGS. CAC. Wildly toned on the obverse with green, gold, orange, rose, and fuchsia being only five of the band-colors visible. The reverse is understated by comparison, "merely" a silvery Premium Gem with pleasing cartwheel luster. NGC ID# 2544, PCGS# 7118

4980 1880-S MS67 PCGS. CAC. Large S. A beautiful Superb Gem silver type coin. The crisply struck and flashy surfaces possess a mere wisp of honey-gold toning. The fields appear immaculate and the motifs exhibit only faint contact. NGC ID# 2544, PCGS# 7118

4981 1880-S MS67+ PCGS. CAC. Large S. Sharply struck and highly lustrous with a pristine obverse and only inconsequential grazes on the cheek. A magnificent and essentially brilliant silver type coin. NGC ID# 2544, PCGS# 7118

4982 1880/9-S MS67 PCGS. VAM-11. A Hot 50 Variety. Die fill within the 0 is suggestive of an underdigit 9. The variety is listed in the *Guide Book*. An essentially brilliant Superb Gem with dynamic luster, a good strike, and exemplary preservation. Population: 41 in 67 (4 in 67+), 3 finer (4/13). PCGS# 7122

4983 1881-CC MS65+ PCGS. This frosty and highly lustrous Gem is boldly detailed with brilliant silver surfaces and no toning on either side. A remarkable example for the advanced collector. NGC ID# 2547, PCGS# 7126

4984 1881-CC MS66 PCGS. The 1881-CC Morgan dollar is a low-mintage but high-survival coin in Mint State, like some of its peers such as the 1885-CC. This Premium Gem boasts surfaces that are frosty and well-struck, even on the hair over Liberty's ear. The cheek is free of all but tiny marks. NGC ID# 2547, PCGS# 7126

4985 1881-CC MS66 PCGS. Pearl-gray with infrequent hints of tan patina. This well struck and lustrous Premium Gem has nearly pristine fields. The popularity of this low mintage Carson City issue remains a constant within the hobby. NGC ID# 2547, PCGS# 7126

4986 1881-CC MS64 Deep Mirror Prooflike PCGS. CAC. The fields display a high degree of flashiness on both sides of this Choice example, with the lightly frosted devices providing an attractive amount of contrast. Much of the obverse periphery displays light toning; primarily light golden-brown, with light turquoise color at the top rim. A splash of red and orange is present near 6 o'clock on the reverse. NGC ID# 2547, PCGS# 97127

- 4987 1881-O MS65 PCGS.** Better-defined than often seen, particularly on the hair over Liberty's ear. Insistent cartwheel luster is silver with touches of blue-green and rose. NGC ID# 2548, PCGS# 7128
- 4988 1881-O MS64 Deep Mirror Prooflike NGC.** Brilliant fields and frosty devices add to the visual appeal of this Choice example exhibiting flashy cartwheel luster. Both sides display attractive toning at the outer edges. NGC has only awarded higher numeric grades to 4 examples (4/13). NGC ID# 2548, PCGS# 97129
- 4989 1881-O MS64 Deep Mirror Prooflike NGC.** The highly reflective surfaces provide pleasing contrast to the devices on this well-struck near-Gem. The outer edges feature gorgeous toning, with the colors including shades of copper-orange, deep pink, and aqua. NGC has graded only 4 examples numerically finer (4/13). NGC ID# 2548, PCGS# 97129
- 4990 1881-S MS66 PCGS. CAC.** This coin's "dream toning" starts with peach and aqua at the upper left obverse, shifting through bands of gold, red, violet, and blue before ending in lime. The reverse offers a more pastel appearance with silver at the center and opening out to the lower right. NGC ID# 2549, PCGS# 7130
- 4991 1881-S MS67 PCGS.** This is a glorious Superb Gem example with exceptional deep rainbow coloration on the obverse. With the current emphasis on original and gorgeous toning, this lovely example should see considerable bidding activity. The reverse is mostly brilliant and nicely displays the prooflike fields evident on both sides. NGC ID# 2549, PCGS# 7130
- 4992 1882 MS65 PCGS. CAC.** Intense shades of lavender, violet, and golden-brown toning enhance the well-preserved surfaces of this sharply detailed Gem. Vibrant mint luster shines through the toning and eye appeal is tremendous. NGC ID# 254A, PCGS# 7132
- 4993 1882 MS65 Prooflike PCGS.** Dazzling luster invigorates this virtually brilliant Gem. The fields are beautifully preserved. The cheek displays faint luster grazes. Encapsulated in a green label PCGS holder. Population: 26 in 65 Prooflike, 1 finer (4/13).
Ex: Orlando Signature (Heritage, 1/2004), lot 8696, which realized \$805. NGC ID# 254B, PCGS# 7133
- 4994 1882-CC MS66 PCGS.** This silver-white Premium Gem is well but not fully struck, with only a few scattered marks that are undistracting but grade-consistent. Bold clash marks appear on the reverse. Nice for the grade. PCGS has seen only 62 numerically finer (5/13). NGC ID# 254B, PCGS# 7134
- 4995 1882-CC MS66 PCGS. CAC.** An exceptional Premium Gem, this 1882-CC Morgan dollar has satiny fields beneath delicately blended green, gold, and iridescent toning. The connoisseur is offered a sharp strike and exceptional eye appeal. NGC ID# 254B, PCGS# 7134
- 4996 1882-CC MS66 PCGS. CAC.** The obverse of this delightful Premium Gem is spectacularly toned in iridescent shades of blue, lavender and golden-brown, while the reverse remains essentially brilliant. Vibrant mint luster adds to the terrific eye appeal. NGC ID# 254B, PCGS# 7134
- 4997 1882-CC MS66+ PCGS. CAC.** Both sides of this pleasing example display a high degree of visual appeal, with brilliant surfaces, rich satin luster, and minimal abrasions. Minor clash marks are present on the reverse. NGC ID# 254B, PCGS# 7134
- 4998 1882-CC MS66+ PCGS. CAC.** A high-end Premium Gem representative, this brilliant piece has terrific eye appeal. Among the attributes is a sharp strike and cartwheel luster. Population: 61 in 66+, 62 finer (5/13). NGC ID# 254B, PCGS# 7134
- 4999 1882-CC MS66 Prooflike PCGS.** A splendid Premium Gem with mirrored fields and satin devices. This boldly struck piece exhibits excellent contrast. Both sides are brilliant and untuned. Population: 75 in 66 (3 in 66+) Prooflike, 1 finer (5/13). NGC ID# 254B, PCGS# 7135
- 5000 1882-O MS65 PCGS.** A well struck and thoroughly lustrous New Orleans dollar, this Gem possesses minimal abrasions, adding to the attractiveness of this piece. Only 27 examples have achieved higher numeric grades from PCGS (4/13). NGC ID# 254C, PCGS# 7136
- 5001 1882-O MS65 Cameo Deep Mirror Prooflike ANACS.** This flashy New Orleans Gem displays attractive golden-brown toning throughout the obverse and across the reverse border. Glimpses of powder-blue are noted near the rims. Sharply struck and carefully preserved. NGC ID# 254C, PCGS# 97137
- 5002 1883 MS66+ PCGS. CAC.** This Premium Gem is a splendid example with frosty silver luster and untuned surfaces. Slight weakness over the ear is typical of the issue. NGC ID# 254G, PCGS# 7142
- 5003 1883-CC MS66 PCGS.** An arc of deep iridescent patina appears at the lower obverse, complementing otherwise untuned surfaces with liberal mint frost and excellent surface preservation. A prize for color aficionados. NGC ID# 254H, PCGS# 7144
- 5004 1883-CC MS66+ PCGS.** This gorgeous Premium Gem Carson City Morgan silver dollar exhibits delicate gold toning over frosty silver luster. Prominent clash marks are noted on both sides. NGC ID# 254H, PCGS# 7144
- 5005 1883-CC MS66+ PCGS. CAC. VAM-5A.** This boldly struck high grade Carson City type coin exhibits potent luster and light ice-blue and straw-gold toning. Minor marks are confined to the upper reverse field. NGC ID# 254H, PCGS# 7144
- 5006 1883-CC MS66+ PCGS. CAC. VAM-5A.** An interesting VAM with a clashed N from IN near Liberty's neck and a lengthy die scratch on the right (facing) wing. A brilliant, well struck, and lustrous Carson City dollar with a nearly pristine reverse and only minor obverse grazes. NGC ID# 254H, PCGS# 7144
- 5007 1883-CC MS66+ PCGS. CAC.** Whispers of russet and cobalt-blue adhere to portions of the obverse margin. This is a nicely preserved and well struck coin that exudes tremendous eye appeal. NGC ID# 254H, PCGS# 7144

**1883-CC Morgan Dollar, MS67
Unusually Vivid Toning**

- 5008 1883-CC MS67 NGC.** The obverse of this spectacular Superb Gem is toned in mottled shades of sea-green, lavender-gray, and amber, while the reverse shows just a narrow crescent of lime-green and powder-blue. The design elements are well-detailed and vibrant frosty mint luster shines through the toning. NGC has graded no numerically finer examples (5/13). NGC ID# 254H, PCGS# 7144
-

**1883-CC Morgan Dollar, MS67
Well-Preserved Lustrous Surfaces**

- 5009 1883-CC MS67 PCGS.** Always popular with mintmark type collectors and series specialists alike, the 1883-CC Morgan dollar was well-produced and widely preserved. This remarkable MS67 specimen offers sharply detailed design elements and vibrant mint luster throughout. Only the most insignificant signs of contact are evident. PCGS has graded only four numerically finer examples (5/13). NGC ID# 254H, PCGS# 7144

**1883-CC Morgan Dollar, Superb Gem
In-Demand Mintmark Type Coin**

- 5010 1883-CC MS67 PCGS.** Ex: New York City Set. The 1883-CC Morgan dollar is always in demand because of the popular mintmark and availability of high-grade specimens. This impressive Superb Gem exhibits sharply detailed design elements and vibrant mint luster with a few hints of golden-tan toning. PCGS has graded four numerically finer examples (5/13). NGC ID# 254H, PCGS# 7144

**1883-CC Morgan Dollar, MS67
Registry Set Candidate**

- 5011 1883-CC MS67 PCGS.** CAC. The 1883-CC Morgan dollar was a well-produced issue and many high-quality examples have survived over the years. Few specimens can match the quality and appeal of the present coin, however. This spectacular Superb Gem displays well-detailed design elements and vibrant mint luster, with virtually pristine creamy surfaces. PCGS has graded only four numerically finer examples (4/13). NGC ID# 254H, PCGS# 7144

**1883-CC Morgan Dollar, MS67
Minimally Toned**

- 5012 1883-CC MS67 PCGS.** CAC. Lightly frosted on the devices with gleaming silver fields that show moderate cartwheel luster. A faint diagonal gray stripe is noted on Liberty's cheek. Great preservation and eye appeal for this popular Carson City issue. PCGS has graded just four non-Prooflike examples as MS68 or better (4/13). NGC ID# 254H, PCGS# 7144
-
- 5013 1883-CC MS65 Deep Mirror Prooflike PCGS.** The prominently reflective fields display a hint of golden patina near the rims. A nicely struck and well preserved Carson City dollar with imposing eye appeal. Certified in a green label holder. NGC ID# 254H, PCGS# 97145
- 5014 1883-CC MS66 Deep Mirror Prooflike PCGS.** The 1883-CC Morgan was among the most ubiquitous of the Treasury coins released post-1960s, but the Premium Gem and Deep Mirror Prooflike combination is seldom encountered. This example shows light obverse color with an untuned reverse, boldly contrasted and sharply struck throughout. Marks are minimal. PCGS has seen only two numerically finer (5/13). NGC ID# 254H, PCGS# 97145
- 5015 1883-O MS66+ PCGS.** CAC. The surfaces on this Premium Gem are remarkably well-preserved and free of all but the smallest marks. A beautiful, untuned, and fairly well-struck example of this available date, seldom seen in Superb Gem. Population: 38 in 66+, 36 finer (5/13). NGC ID# 254J, PCGS# 7146
- 5016 1883-O MS66+ PCGS.** CAC. This Premium Gem New Orleans Morgan dollar exhibits brilliant and untuned silver surfaces with satiny luster and exceptional eye appeal. PCGS has only certified 36 finer examples (5/13). NGC ID# 254J, PCGS# 7146
- 5017 1883-O MS65 Deep Mirror Prooflike NGC.** Notable contrast appears between the fields and the devices on both sides of this Gem produced by the New Orleans Mint. Small areas of light toning appear at portions of the outer edges. NGC has awarded higher numeric grades to a mere 2 examples (4/13). NGC ID# 254J, PCGS# 97147
- 5018 1883-S MS63 PCGS.** A well-detailed MS62 example of this popular S-mint issue, with vibrant mint luster and mostly brilliant surfaces that show a few hints of pale gold toning. A few minor, grade-consistent contact marks are present on both sides. NGC ID# 254K, PCGS# 7148
- 5019 1883-S MS63 ANACS.** This lustrous Select specimen exhibits sharply detailed central design elements, with fine detail in the strands of Liberty's hair. Attractive hints of pale gold toning visit the surfaces of both sides. A few minor contact marks on both sides explain the grade. NGC ID# 254K, PCGS# 7148

**1883-S Morgan Dollar, MS63
Delicate Toning**

5020 1883-S MS63 NGC. CAC. Pale golden-lilac toning graces the surfaces of this satiny Select Mint State Morgan dollar representing a scarce S-Mint issue that followed five relatively plentiful San Francisco dollars. This piece has a sharp strike and excellent surfaces for the grade. NGC ID# 254K, PCGS# 7148

5021 1884 MS66 PCGS. Cobalt-blue, soft orange, and violet patination resides on the lustrous surfaces of this Premium Gem, and is considerably deeper in hue on the reverse. The design elements are adequately struck, showing just slight softness in the hair over Liberty's ear. NGC ID# 254L, PCGS# 7150

5022 1884-CC MS66 PCGS. A few minimal bagmarks are noted above the eagle's head, with the balance of this Premium Gem free of any mentionable marks. Both sides are brilliant and untuned with frosty silver luster. NGC ID# 254M, PCGS# 7152

5023 1884-CC MS66 PCGS. CAC. This primarily brilliant Premium Gem displays only a few small areas of light toning. Pleasing design definition and cartwheel luster add to the eye appeal. Several wispy die cracks extend through the stars and legends on the obverse. NGC ID# 254M, PCGS# 7152

5024 1884-CC MS66+ PCGS. CAC. This Premium Gem 1884-CC Morgan dollar offers a nice uniform look, frosty and untuned on both sides with a sharp strike, few marks, and excellent eye appeal. Population: 90 in 66+, 75 finer (5/13). NGC ID# 254M, PCGS# 7152

5025 1884-CC MS66+ PCGS. CAC. VAM-3A. This scarcer VAM subvariety is attributed by the die break "at top right of left wreath" per VAMworld.com. Most collectors will have greater interest in the beautiful bands of ruby-red, jade-green, and lemon-gold toning across the left obverse. Subtle marks are noted near the profile. NGC ID# 254M, PCGS# 7152

5026 1884-CC MS66+ PCGS. CAC. A frosty and highly lustrous Carson City dollar, this Premium Gem has fully brilliant and untuned silver surfaces with exceptional eye appeal. NGC ID# 254M, PCGS# 7152

5027 1884-CC MS66+ PCGS. CAC. VAM-4B. This "Spiked Date, Pinned Wing, Die Break E" VAM was discovered in 2006 by Phil Perdue, according to VAMworld.com. Lustrous and nearly brilliant with minimal contact and only minor incompleteness of strike above Liberty's ear. NGC ID# 254M, PCGS# 7152

5028 1884-CC MS66+ PCGS. CAC. The lustrous surfaces of this high-end Premium Gem display hints of color at portions of the obverse and reverse rims. Otherwise, the lustrous surfaces give off a silver-white appearance. The design elements are well impressed, including the hair over Liberty's ear. NGC ID# 254M, PCGS# 7152

**1884-O Silver Dollar, MS67
Only One Finer at PCGS**

5029 1884-O MS67 PCGS. An essentially perfect Superb Gem with only a few minuscule marks on each side. The surfaces exhibit frosty luster with no evidence of toning. Faint clash marks are noted in the reverse field. Common enough in lower grades but elusive at this grade level. Population: 69 in 67, 1 finer (5/13). NGC ID# 254N, PCGS# 7154

5030 1884-S AU58 NGC. The 1884-S Morgan dollar is a notable rarity in Mint State, making this near-Mint example a compelling potential acquisition. Deep bluish and gray patina covers the obverse more extensively than the reverse, but only minimal rub appears beneath, and the few marks are grade-consistent. NGC ID# 254P, PCGS# 7156

5031 1884-S AU58 ANACS. This attractive near-Mint Morgan dollar displays well-detailed design elements with just a trace of wear and lightly abraded lustrous surfaces that show hints of pale gold and lavender toning. NGC ID# 254P, PCGS# 7156

5032 1884-S AU58 NGC. Light peach overtones grace medium-gray surfaces that retain nearly all of their original luster. Only minor wear appears on the highest design elements, including the uncommonly well-defined hair over Liberty's ear. NGC ID# 254P, PCGS# 7156

5033 1884-S AU58 PCGS. Occasional splashes of reddish-gold, russet, and electric-blue cling to the margins of this near-Mint State Morgan. These are somewhat more extensive and deeper in tone on the reverse. Luster is retained in the recesses of the rather clean surfaces. NGC ID# 254P, PCGS# 7156

5034 1884-S AU58 PCGS. The silvery surfaces of this near-Mint State example retain ample luster and show just a few undistracting marks. The design elements are well impressed, including the hair over Liberty's ear. NGC ID# 254P, PCGS# 7156

5035 1884-S AU58 PCGS. CAC. We offer in this lot a very lightly circulated 1884-S. That, along with its original sharp strike, leaves very nice detail on the design features. Ample luster complements this attribute, resulting in pleasing overall eye appeal, affirmed by the CAC label. A few minute marks detract nothing from the coin's eye appeal. NGC ID# 254P, PCGS# 7156

5036 1885 MS66+ PCGS. CAC. Cartwheel luster radiates from both sides of this high-end Premium Gem example. The piece remains brilliant and exhibits strong design definition. This is a lovely example. NGC ID# 254R, PCGS# 7158

**1885 Morgan Dollar, MS67
Borderline Prooflike**

5037 1885 MS67 PCGS. CAC. Both sides of this lovely Superb Gem exhibit sharp details with delightful gold and blue-toned peripheries. The fields are satiny and faintly reflective around lustrous silver devices at the centers. While the issue is common, high grade specimens are elusive. Population: 96 in 67 (5 in 67+), 2 finer (5/13). NGC ID# 254R, PCGS# 7158

- 5038 1885-CC MS65 PCGS.** Housed in a green-label PCGS holder, this impressive Gem has frosty silver luster and bold design details with untoned silver surfaces. Both sides are highly appealing with only minimal scattered marks. NGC ID# 254S, PCGS# 7160
- 5039 1885-CC MS65 PCGS.** An impressive Gem, this brilliant and highly lustrous Carson City dollar has frosty devices and satiny fields. No toning is evident on either side of this brilliant silver specimen. NGC ID# 254S, PCGS# 7160
- 5040 1885-CC MS65 PCGS.** One of the most elusive of all Morgan dollars in *circulated* grades, the 1885-CC survived in prodigious quantities until the Treasury releases and GSA sales. This Gem PCGS example beams with frosty luster over untuned surfaces, an extremely attractive piece. NGC ID# 254S, PCGS# 7160
- 5041 1885-CC MS65 NGC.** The 1885-CC Morgan dollar is much more available than its paltry mintage of 228,000 pieces would suggest. Yet, series specialists and mintmark type collectors alike covet the date. A few wisps of light gold visit the obverse of this Gem, and both sides yield potent luster. The design elements are decently brought up. NGC ID# 254S, PCGS# 7160
- 5042 1885-CC MS66 PCGS. CAC.** This Premium Gem Morgan exhibits tremendous eye appeal due to the enticing intermingled toning on both sides. Cartwheel luster further enhances the appearance of this well-struck and beautifully preserved piece. Minor grazes on Liberty's chin provide only minimal distraction, if any. NGC ID# 254S, PCGS# 7160

**1885-CC Morgan Dollar, MS66+
Obverse and Reverse Toning Crescents**

- 5043 1885-CC MS66+ PCGS. CAC.** A gorgeous Premium Gem, this Carson City Morgan dollar exhibits intense mint frost with lustrous white surfaces. A crescent of gold and iridescent toning is noted at the lower left obverse and upper left reverse. The surfaces are otherwise untuned. PCGS has only certified 54 finer examples (5/13). NGC ID# 254S, PCGS# 7160

**1885-O Silver Dollar MS66 ★
Beautifully Toned Obverse**

- 5044 1885-O MS66 ★ NGC. CAC.** The obverse of this Premium Gem exhibits gorgeous rainbow toning with yellow, gold, pale blue, violet, cobalt, and emerald. The underlying luster is frosty and brilliant. The reverse is untuned with brilliant, frosty white luster. Likely the end-piece of a 20-coin roll that was stored for years or decades in a paper wrapper. NGC ID# 254T, PCGS# 7162
- 5045 1885-O MS67 NGC.** This attractive Superb Gem displays well-detailed design elements and cartwheel mint luster over well-preserved surfaces that show a few hints of golden-tan and lavender toning. NGC ID# 254T, PCGS# 7162

- 5046 1885-O MS67 PCGS.** Bright luster emanates from the essentially color-free surfaces of this Superb Gem Morgan. Both sides were in receipt of a fairly good strike. Partial detail shows in the hair over the ear. This is a great coin with very pleasing eye appeal. PCGS has seen none finer (5/13). NGC ID# 254T, PCGS# 7162
- 5047 1885-S MS65 PCGS.** A flashy and nicely struck better date Gem with hints of golden toning across lustrous and lightly marked surfaces. Much more affordable than the few dozen in the next higher grade. Encapsulated in an old green label holder. NGC ID# 254U, PCGS# 7164
- 5048 1886 MS66+ PCGS. CAC.** Brilliant surfaces and pleasing luster add to the visual appeal of this high-end Premium Gem. A few small, scattered spots of color appear on both sides of this well-struck coin. NGC ID# 254V, PCGS# 7166
- 5049 1886 MS67 NGC.** The design elements of this spectacular Superb Gem display razor-sharp definition throughout and the lustrous surfaces are free of mentionable distractions. NGC has graded 17 numerically finer coins (4/13). NGC ID# 254V, PCGS# 7166
- 5050 1886 MS67 PCGS.** A common issue but a conditionally elusive coin in the Superb Gem grade of this piece, numerically surpassed by only three examples at PCGS (5/13). This pristine coin offers surfaces that are untuned save for an arc of lovely pastel iridescence on the reverse. NGC ID# 254V, PCGS# 7166
- 5051 1886 MS67 PCGS. CAC. VAM-3A, R.5.** The N from N is clashed in front of Liberty's neck. A magnificent Superb Gem that boasts a crisp strike, vibrant luster, and nearly immaculate preservation. Housed in a green label holder. NGC ID# 254V, PCGS# 7166
- 5052 1886-O MS62 PCGS.** A fully brilliant example of the scarce New Orleans issue, rare in Mint State despite a mintage that exceeded 10 million coins. This piece has a few scattered marks consistent with the grade. Delicate champagne toning appears on each side. NGC ID# 254W, PCGS# 7168

**1886-S Dollar, MS65
Vibrant Luster**

- 5053 1886-S MS65 PCGS.** Better-defined than often seen with significant definition on Liberty's hair strands. The obverse has rich golden outer toning surrounding a silver-green interior, while the reverse shows the same colors mixed with deep sage-blue. PCGS has graded 35 examples as MS66 or better (4/13). NGC ID# 254X, PCGS# 7170
- 5054 1887/6 MS64+ PCGS. CAC. VAM-2.** A Top 100 Variety. The curve of the base of the underdigit 6 is present on both sides of the bottom of the 7. This *Guide Book* overdate is available in Uncirculated grades though much scarcer than the "common" 1887. A high-end near-Gem that possesses a sharp strike and a smooth appearance. NGC ID# 254Z, PCGS# 7174
- 5055 1887 MS67 PCGS.** Brilliant, well struck, and minimally abraded, this Superb Gem has a tremendous degree of eye appeal. Rich luster and flashy surfaces are additional attributes. A minuscule spot appears near the top of Liberty's hair. PCGS and NGC combined have assigned higher numeric grades to only three examples (5/13). NGC ID# 254Y, PCGS# 7172

**1887 Dollar, VAM-1B, 'E' Clash on Reverse
AU53 Example of Hot 50 Variety**

- 5056 1887 "E" Clash on Reverse AU53 NGC. VAM-1B.** A Hot 50 Variety. On the reverse a near-complete impression from the E in LIBERTY appears under the left side of the tailfeathers. More obvious is an obverse diagnostic, a crack through the middle of the date. Lightly worn but still-lustrous surfaces are pale pearl-gray overall with peach tints that are most obvious at the upper reverse and reddish color in the denticles. The finer of two examples for this die variant certified by NGC, according to VAMworld.com (5/13). PCGS# 134003

1887/6-O Dollar, Scarce MS64

- 5057 1887/6-O MS64 PCGS. VAM-3.** A Top 100 Variety. The remains of the base of a 6 can be detected to the lower right of the 7. The variety is similar to the 1887/6, which was discovered earlier and is substantially more available in Choice Mint State. The present lustrous silver dollar has a lightly toned reverse and rich peach and steel-blue obverse patina. NGC ID# 2553, PCGS# 7178

- 5058 1887-O MS64 PCGS. CAC.** The obverse of this attractive Choice specimen is darkly toned in shades of sea-green and violet, while the reverse remains mostly brilliant. The design elements are sharply rendered and the surfaces radiate vibrant mint luster. NGC ID# 2552, PCGS# 7176

- 5059 1887-O MS65 PCGS.** A few tiny areas of purple toning are the only hints of color on this otherwise bright silver-gray piece. Pleasing satiny luster gives this well-preserved Gem excellent eye appeal. PCGS has certified just nine examples numerically finer (5/13). NGC ID# 2552, PCGS# 7176

- 5060 1887-S MS64+ PCGS. CAC.** This silver-white coin would likely be considered a full Gem by some, and it is close. The generous luster and excellent eye appeal are aided by a bold strike. The peppering of tiny marks is the difference, a subjective one. Nonetheless quite nice. NGC ID# 2554, PCGS# 7180

- 5061 1888 MS66+ PCGS.** PCGS has graded thousands of 1888 Morgan dollars through the Gem level of preservation. The population drops significantly in Premium Gem, but that still accounts for nearly 700 examples. Of these only 43 are assigned the MS66+ designation, including the present offering. PCGS has graded only 18 pieces finer, all MS67s. Lustrous, silver-white surfaces are well struck, including partial definition in the hair above the ear and the eagle's breast feathers. NGC ID# 2555, PCGS# 7182

- 5062 1888 MS66+ PCGS. CAC.** This beautiful, frosty Premium Gem is well-struck save for minor softness over Liberty's ear. The generous luster over untuned surfaces and paucity of singular marks create broad eye appeal. Population: 43 in 66+, 18 finer (5/13). NGC ID# 2555, PCGS# 7182

- 5063 1888 MS65 Deep Mirror Prooflike PCGS.** Although Prooflike examples of this issue can be found, Deep Mirror Prooflike specimens are quite elusive. At the Gem level, this piece is one of only 47 so graded, with 10 finer at PCGS (5/13). The quicksilver surfaces on this untuned piece boasts deep, pleasing contrast and marvelous field reflectivity. NGC ID# 2555, PCGS# 97183

**1888-O Morgan Dollar, MS66
None Finer at PCGS**

- 5064 1888-O MS66 PCGS. CAC.** Slight central weakness is noted on each side as usual on this gorgeous Premium Gem. The frosty surfaces are fully lustrous beneath intense gold and light blue toning on the obverse. Lighter gold toning is noted on the reverse. PCGS has never certified a finer example of this issue (5/13). NGC ID# 2556, PCGS# 7184

- 5065 1888-S MS64 PCGS. CAC.** This near-Gem example displays brilliant surfaces, with the fields displaying a degree of reflectivity. A number of as-made die lines are present, primarily on the obverse. Only minor incompleteness of strike appears at the centers. The reverse exhibits a slight clockwise rotation. Minor grazes are present on the obverse. NGC ID# 2557, PCGS# 7186

Gem 1888-S Silver Dollar

- 5066 1888-S MS65 PCGS.** Daubs of copper-rose color near the rims complement the prevailing silver-white surfaces, well-frosted and well-struck. A few scattered, undistracting marks determine the grade but are not overly bothersome. A better date in all grades. PCGS has seen 21 numerically finer (5/13). NGC ID# 2557, PCGS# 7186

1888-S Dollar, Dazzling MS65

- 5067 1888-S MS65 PCGS.** The strike on this piece is razor-sharp, and as such is quite extraordinary in the context of 1888-S silver dollars, which often come weakly struck. This example is brilliant silver-white, with good eye appeal and a couple of ticks and luster grazes on Liberty's cheek that account for the grade. PCGS has certified 21 coins finer (4/13).
Ex: St. Louis Central States (Heritage, 5/2007), lot 4772, which realized \$4,600. NGC ID# 2557, PCGS# 7186

**1888-S Morgan Dollar, MS65
Low-Mintage Better Date**

- 5068 1888-S MS65 PCGS. CAC.** The 1888-S Morgan dollar is a better date from a small mintage of 657,000 pieces. This impressive Gem exhibits sharply detailed design elements and frosty cartwheel mint luster. A few die striations are evident on Liberty's cheek and the surfaces show a few wisps of golden-tan toning. PCGS has graded 21 numerically finer examples (5/13). NGC ID# 2557, PCGS# 7186

- 5069 1889 MS66 PCGS. CAC.** Brilliant lustrous surfaces and toning in a variety of rich shades provide this Premium Gem with tremendous visual appeal. The reverse exhibits cartwheel luster. PCGS and NGC combined have awarded higher numeric grades to only 6 examples (4/13). NGC ID# 2558, PCGS# 7188

**1889-CC Morgan Dollar, XF40
Key Carson City Issue**

- 5070 1889-CC XF40 PCGS.** Some light wear shows on the high points of the design elements, but this attractive XF specimen retains much of its original design detail and mint luster. A few hints of lime-green and pale gold toning grace the peripheries, while the centers remain mostly brilliant. This lightly abraded key will be a welcome addition to a fine collection of Morgan dollars. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan Dollar, XF45
Elusive Carson City Date**

- 5071 1889-CC XF45 PCGS. CAC.** The 1889-CC is the rarest Morgan dollar from the Carson City Mint and collectors avidly pursue examples in all grades and conditions. This lightly worn specimen shows pleasing pinkish-gray patina and a scattering of minor abrasions on both sides. This coin should find a home in an otherwise high-grade collection of Morgan dollars. NGC ID# 2559, PCGS# 7190

- 5072 1889-O MS64 PCGS.** The hair over Liberty's ear is flat, and the eagle's breast similarly lacks definition. Otherwise, an attractive Choice Mint State specimen with brilliant and frosty silver surfaces showing no evidence of toning. NGC ID# 255A, PCGS# 7192

1889-O Morgan Dollar, MS65+

- 5073 1889-O MS65+ NGC.** The New Orleans dollars typically exhibit weak hair details over Liberty's ear as seen on this lovely Gem. Both sides are brilliant with satin luster and pleasing surfaces. There is no visible toning on either side. Census: 50 in 65 (1 in 65+), 6 finer (5/13). NGC ID# 255A, PCGS# 7192

- 5074 1889-S MS65 PCGS.** The present Gem Morgan is essentially untoned and possesses nice luster. A well directed strike imparts strong definition to the design elements, including the hair above Liberty's ear. A few scattered grazes do not disturb. Examples finer than Gem become quite challenging. NGC ID# 255B, PCGS# 7194

- 5075 1889-S MS65 PCGS.** The silver-gray surfaces of this Gem possess nice luster and exhibit well defined design motifs; the hair above Liberty's ear shows partial definition. Neither side reveals significant marks. The '89-S is difficult to locate any finer; PCGS has graded 65 coins better, a number of which are likely resubmissions. NGC ID# 255B, PCGS# 7194

- 5076 1889-S MS65 PCGS. CAC.** Both sides of this Gem are extremely attractive. Brilliant, untuned surfaces along with a sharp strike and minimal abrasions are attributes of this pleasing piece. NGC ID# 255B, PCGS# 7194

- 5077 1890 MS65 PCGS.** Gold, silver-green, and subdued mauve hues drape the obverse and the outer reverse, while the interior of the latter side remains resolutely silver. Bold cartwheel luster highlights the eye appeal of this well-struck Gem. PCGS has graded only one example at MS66 or better (4/13). NGC ID# 255C, PCGS# 7196

- 5078 1890 MS65 PCGS.** Although not designated as such, this Gem displays a prooflike appearance, with the fields exhibiting a strong degree of reflectivity. The centers are brilliant while the outer edges display toning. The colors include orange, russet, and blue-green. PCGS has assigned a higher numeric grade to a single example (5/13). NGC ID# 255C, PCGS# 7196

- 5079 1890 MS65 PCGS.** A lovely Gem with frosty silver surfaces, this Morgan dollar exhibits gold and iridescent toning on the obverse, and delicate gold toning over most of the reverse. Rather plentiful at this grade level, but PCGS has only certified one finer example (5/13). NGC ID# 255C, PCGS# 7196

- 5080 1890 MS65 PCGS. CAC.** The obverse of this Gem is toned in its entirety in deep gold and light blue while the reverse is almost entirely brilliant with delicate blue and gold peripheral toning. PCGS has only certified one finer example of this issue (5/13). NGC ID# 255C, PCGS# 7196

- 5081 1890-CC MS64 Deep Mirror Prooflike PCGS.** This better date Carson City Morgan is brilliant and boasts prominently mirrored fields. The well struck devices exhibit cameo frost. A few minute bagmarks confirm the business strike status. A splendid representative of the perennially popular Western facility. NGC ID# 255D, PCGS# 97199

5082 1890-O MS65 ANACS. An amazing New Orleans Morgan dollar with brilliant silver luster and hints of peripheral luster. Both sides have a sharp strike and only a few trivial contact marks. NGC ID# 255E, PCGS# 7200

5083 1890-O MS65 ANACS. Patchy peach, blue, and violet outer toning yields to luminous silver interiors. Though softly struck as usual for this New Orleans issue — the centers on both sides are weak and Liberty's cheek has roller marks — the overall eye appeal is surprisingly solid. Housed in a small-format holder.
Ex: CSNS Signature (Heritage, 4/2002), lot 6342. NGC ID# 255E, PCGS# 7200

5084 1890-S MS65 NGC. This well-struck better-date Gem is largely untuned, save for a thin crescent of rose near the rim on the reverse. The frosty luster and relative lack of abrasions produce excellent eye appeal. NGC ID# 255F, PCGS# 7202

**1890-S Silver Dollar, MS66
VAM-29A, Repunched Mintmark**

5085 1890-S MS66 PCGS. CAC. VAM-29A. A late die state of VAM-2, which features a sharply repunched mintmark. Of course, any VAM of the 1890-S is desirable at the MS66 level, since the issue is nearly unobtainable any finer. The present crisply struck Premium Gem is brilliant and highly lustrous with an exceptionally clean portrait. NGC ID# 255F, PCGS# 7202

5086 1891 MS64+ PCGS. CAC. Cartwheel luster and brilliant surfaces provide this high-end Choice example with lovely eye appeal. The centers display only minor incompleteness of strike. This is a lovely representative. NGC ID# 255G, PCGS# 7204

5087 1891-CC MS64 NGC. VAM-3. A Top 100 Variety. Only a wisp of almond-gold toning is present on this lustrous Carson City silver dollar. Well preserved and pleasing with a good strike and uncommon eye appeal for the designated grade. NGC ID# 255H, PCGS# 7206

5088 1891-CC MS64 PCGS. A few small cheek nicks and other trivial marks prevent a higher grade to this Choice Mint State 1891-CC Morgan dollar. Both sides are brilliant and untuned with frosty silver luster. NGC ID# 255H, PCGS# 7206

5089 1891-CC MS64 PCGS. VAM-3. A Top 100 Variety. The "Spitting Eagle" variety, well known to the Carson City specialist. This lustrous near-Gem displays delicate streaks of almond-gold toning. The obverse center shows minor roller mark, as made. NGC ID# 255H, PCGS# 7206

5090 1891-CC MS64+ NGC. VAM-3. A Top 100 Variety. Light wheat-gold toning graces this lustrous and lightly abraded near-Gem. The strike is sharp save for moderate blending on the hair above the ear. NGC ID# 255H, PCGS# 7206

**1891-CC Morgan Dollar, MS65
Attractively Toned Obverse**

5091 1891-CC MS65 PCGS. The obverse of this Gem Carson City Morgan silver dollar has light gold toning at the center, deepening to orange-gold along the borders. Traces of peripheral blue add to its eye appeal. The reverse is essentially brilliant white with hints of peripheral gold toning. A delightful example. NGC ID# 255H, PCGS# 7206

**1891-CC Morgan Dollar, MS65
Nice Luster, Strong Eye Appeal**

5092 1891-CC MS65 PCGS. The 1891-CC Morgan dollar is not as easy to locate in high grade as some other Carson City issues because the date was not heavily represented in the GSA sales. This sharply detailed Gem displays vibrant mint luster and well-preserved creamy surfaces with only minor signs of contact. PCGS has graded 29 numerically finer examples (5/13). NGC ID# 255H, PCGS# 7206

5093 1891-O MS64+ PCGS. Lovely lemon-gold toning invigorates the borders of both sides, with hints of ocean-blue also evident near the rims. Lustrous and nicely struck with a number of minute strike-throughs (as coined) on the field beneath the wings. NGC ID# 255J, PCGS# 7208

5094 1891-O MS64 PCGS. CAC. A satiny near-Gem with pleasing surfaces and brilliant luster, this untuned near-Gem has a typical strike with noticeable central weakness, but still presents excellent eye appeal. NGC ID# 255J, PCGS# 7208

5095 1891-S MS65+ PCGS. CAC. Here is a remarkable satin Gem with brilliant and untuned silver surfaces. Both sides exhibit strong design definition with reflective fields. NGC ID# 255K, PCGS# 7210

5096 1892 MS64 PCGS. The frosty surfaces are well-struck on this untuned piece, but a few tiny dark flecks and scattered, undistracting marks determine the grade. Nonetheless quite appealing for this low-mintage Philadelphia issue. NGC ID# 255L, PCGS# 7212

5097 1892-CC AU58 ANACS. This lightly circulated Morgan dollar shows just a trace of wear on the well-detailed design elements and the lustrous surfaces exhibit only minor abrasions with a few hints of pale gold toning. NGC ID# 255M, PCGS# 7214

5098 1892-CC MS62 NGC. Delicate toning appears on the surfaces of this pleasing Mint State Carson City dollar. Nearly prooflike, the fields on both sides are reflective, contrasting nicely with the lustrous devices. NGC ID# 255M, PCGS# 7214

5099 1892-CC MS63 PCGS. Pale silver surfaces have only a hint of whitish-gray patina against bold cartwheel luster and well-struck, lightly frosted devices. Though light, scattered abrasions and a few luster scrapes account for the grade, the overall eye appeal is solid. NGC ID# 255M, PCGS# 7214

5100 1892-CC MS63 PCGS. A few roller marks appear at Liberty's ear, and some minor luster grazes combine to determine the grade on this untuned Select Mint State example. The silver-white surfaces show much eye appeal. Interesting die cracks and die clashes appear on the reverse. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, MS64 Great Obverse Toning

5101 1892-CC MS64 PCGS. CAC. This penultimate-year Carson City dollar has distinctive obverse toning, gold-orange at the top two-thirds with a trapezoid of orange framed by blue-green at the bottom. The lightly clashed reverse has glimmers of yellow over a light silver-gray base. Well-struck for the date. NGC ID# 255M, PCGS# 7214

5102 1892-O MS64 PCGS. CAC. Whispers of gray, reddish-gold, and greenish-blue patina reside on the lustrous surfaces of this near-Gem Morgan, and are somewhat more extensive and deeper on the reverse. The design elements are generally well defined, save in the centers where roller marks are visible, especially on the obverse. NGC ID# 255N, PCGS# 7216

5103 1892-O MS64+ PCGS. CAC. As with most 1892-O Morgans, the centers are a tad soft, but the remaining design elements exhibit nice detail. Essentially untuned surfaces display pleasing luster and are minimally marked. While PCGS has seen nearly 2,000 specimens in MS64, it has assigned the MS64+ grade to only 76 examples. NGC ID# 255N, PCGS# 7216

5104 1892-S AU50 PCGS. The second key S-Mint dollar behind the 1893-S, this issue is always in demand, especially in AU or better grades. Both sides are brilliant and untuned with considerable luster. NGC ID# 255P, PCGS# 7218

1892-S Morgan Dollar, AU55 Scarce in Better Grades

5105 1892-S AU55 PCGS. The 1892-S has one of the most singularly consistent mintages in U.S. numismatics: 100,000 pieces a month for 12 months. Choice AU examples are available for a price, but anything finer is genuinely scarce. This AU55 piece has light golden overtones over an obverse that swirls with luster and a semireflective pearl-gray reverse. NGC ID# 255P, PCGS# 7218

5106 1893 MS63 PCGS. This Select Mint State 1893 Morgan dollar is an ideal candidate for the "one-a-year" collector, as the three branch mint issues of this date are considerably rarer. This piece has satiny silver-white luster with excellent design definition that only shows weakness over Liberty's ear. NGC ID# 255R, PCGS# 7220

5107 1893 MS64 PCGS. Silver dollar production was drastically reduced in 1893 and only 378,000 business-strikes were coined at the Philadelphia Mint that year. This attractive Choice example displays vibrant mint luster and well-detailed design elements, with creamy surfaces that show only minor signs of contact. NGC ID# 255R, PCGS# 7220

5108 1893 MS64 NGC. The softly frosted surfaces on this better-date Morgan dollar offer plenty of eye appeal via a bold strike and only a few minor luster grazes, as opposed to singular contact marks, save for a single rim nick on the reverse at 3 o'clock. Much less available in Gem grade. NGC ID# 255R, PCGS# 7220

5109 1893 MS64 PCGS. CAC. VAM-7, R.5. Liberty's profile is die doubled. Light gold toning visits this unmarked and nicely struck near-Gem. A popular low mintage issue. Encapsulated in an old green label holder.
Ex: New York Signature (Heritage, 12/2011), lot 4040, which realized \$2,760. NGC ID# 255R, PCGS# 7220

5110 1893-S — Improperly Cleaned — NGC Details. Fine. This stone-gray and chestnut-gold rare date dollar displays parallel hairlines across both sides, but the eagle's wings show much detail and the appearance is attractive to the unaided eye. NGC ID# 255U, PCGS# 7226

5111 1894 VF25 NGC. The 1894 Morgan dollar boasts one of the lowest mintages of the series, leading to the desirability of representatives at any grade level. A few hints of gold appear on this circulated example displaying overall even wear and gunmetal-gray color. There are no surface marks worthy of individual mention. NGC ID# 255V, PCGS# 7228

5112 1894 VF30 NGC. Dark toning splashes are present at the lower right part of the obverse on this light to medium gray silver dollar. The 1894 is a low-mintage and highly collectible key issue in all grades. NGC ID# 255V, PCGS# 7228

5113 1894 VF30 PCGS. CAC. Pewter-gray surfaces are evident with light wear on the obverse and reverse high points. Faint hairlines and other trivial marks are consistent with the grade. NGC ID# 255V, PCGS# 7228

5114 1894 AU55 PCGS. Considerable remaining luster cartwheels across each side. Faint hints of gold visit the rims, while a wider, more obvious spot of peach graces the left (facing) wingtip. NGC ID# 255V, PCGS# 7228

5115 1894 AU55 NGC. A tinge of peripheral gold toning appears on the obverse with wisps of champagne toning on the reverse of this frosty specimen. Nearly full luster remains, with only a few trivial marks. NGC ID# 255V, PCGS# 7228

5116 1894 AU58 NGC. Gold-toned rims frame the light silver-gray surfaces of this lustrous near-Mint scarcity. A few internal splashes of gold toning are also present. The surfaces are pleasing with minimal marks. NGC ID# 255V, PCGS# 7228

5117 1894 AU58 PCGS. CAC. The 1894 Morgan dollar claims a memorably low mintage of 110,000 pieces and collectors prize examples in all grades. This attractive near-Mint specimen retains much of its original mint luster and shows only a trace of high-point wear on the design elements. The brilliant surfaces are lightly abraded and eye appeal is strong for the grade. NGC ID# 255V, PCGS# 7228

5118 1894-S MS64+ PCGS. Both sides of this Morgan possess nice luster and well struck design elements, though the hair at the ear is a tad incomplete; the eagle's breast feathers show. A few scattered grazes preclude full Gem classification. NGC ID# 255X, PCGS# 7232

5119 1895-S PCGS Genuine. VAM-3. A Hot 50 Variety. The PCGS number ending in .92 suggests cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been cleaned. This rare date 1895-S dollar has a widely repunched mintmark. Much luster persists but the coin is dipped and lightly hairlined. The cheek displays many wispy abrasions. NGC ID# 255Z, PCGS# 7238

5120 1895-S — Improperly Cleaned — NGC Details. AU. This well defined key date silver dollar displays hairlines beneath various shades of orange-gold and lime-green toning. A couple of pinscratches are present near the profile and an abrasion is noted beneath the left (facing) wing. NGC ID# 255Z, PCGS# 7238

5121 1896 MS66 PCGS. CAC. A melange of violet, cobalt-blue, and golden-orange toning cascades over the lustrous surfaces of this Premium Gem Morgan. A well directed strike leaves strong definition on the design elements and both sides are devoid of mentionable marks. NGC ID# 2562, PCGS# 7240

5122 1896 MS66+ PCGS. CAC. This high-end Premium Gem exhibits a well-executed strike, rich satin luster, and minimal abrasions. A few as-made lint marks appear near the hair above Liberty's forehead. Population: 44 in 66+, 36 finer (5/13). NGC ID# 2562, PCGS# 7240

5123 1896 MS66+ PCGS. CAC. Frosty and sharply struck, this 1896 Morgan dollar is an exceptional representative from a mintage of nearly 10 million coins. Only a few have survived as fine as this example, and finer pieces are extremely rare with only 36 finer PCGS certified specimens (5/13). NGC ID# 2562, PCGS# 7240

5124 1896-O MS62 PCGS. This coin has an attractive appearance for the grade. Brilliant surfaces and nice luster are present. The centers reveal only a minor incompleteness of strike. NGC ID# 2563, PCGS# 7242

5125 1896-S MS62 PCGS. A fully brilliant Mint State specimen with frosty silver luster and no toning on either side. The 1896-S is a semi-key issue, scarce in lower Mint State grades and rare in higher grades. NGC ID# 2564, PCGS# 7244

5126 1897 MS66 PCGS. CAC. This sharply defined Premium Gem has frosty silver luster and pristine surfaces with exceptional eye appeal. Minimal marks are consistent with the grade. Here is a coin that has it all. PCGS has only graded 18 finer examples of this issue (5/13). NGC ID# 2565, PCGS# 7246

5127 1897 MS66+ PCGS. CAC. Cartwheel luster and brilliant, untuned surfaces are among the attributes of this high-end Premium Gem. The design elements display bold definition and the coin exhibits few abrasions. Several long wispy die breaks are visible on the reverse. Population: 10 in 66+, 18 finer (5/13). NGC ID# 2565, PCGS# 7246

5128 1897-O MS62 NGC. The 1897-O, like a handful of other Morgan dollar issues, is frequently seen in circulated grades but rarely in Mint State. Pearl and steel shadings prevail at a glance on this O-mint dollar, with areas of ice-yellow, violet, russet, and gray-green present at the outer edges. NGC ID# 2566, PCGS# 7248

1897-O Morgan Dollar, MS63 Strong Reverse Luster

5129 1897-O MS63 NGC. CAC. Both sides of this O-mint Morgan dollar offer swirling cartwheel luster, with that of the reverse brighter and stronger. Minimally toned surfaces show a hint of golden-tan on the rims, and though a few small marks and wispy abrasions are present, this Select piece offers strong eye appeal for the grade assigned. NGC ID# 2566, PCGS# 7248

5130 1898-O MS67 PCGS. A gorgeous Superb Gem that boasts exemplary luster and brilliant, smooth surfaces. The strike is intricate despite its New Orleans origin. The 1898-O is plentiful though essentially unobtainable any finer. NGC ID# 2569, PCGS# 7254

5131 1899 MS66 PCGS. This satin Premium Gem is an exceptional representative of the scarce, low-mintage 1899 Morgan dollar. Both sides are brilliant and untuned with an above-average strike and minimal surface marks. NGC ID# 256B, PCGS# 7258

5132 1899-O MS66+ PCGS. CAC. Strongly struck with bold cartwheel luster under minimal patina. Great silvery surfaces with a narrow die crack noted at the southwest part of the reverse margins. NGC ID# 256C, PCGS# 7260

1899-S Morgan Dollar, MS66 Well-Preserved Brilliant Surfaces

5133 1899-S MS66 PCGS. CAC. This sensational Premium Gem is destined for a top level Morgan dollar collection. PCGS has only certified eight numerically finer coins in 27 years of grading (5/13). This piece is fully brilliant with no evidence of toning on either side. The fields are pristine and the overall eye appeal is sensational. NGC ID# 256D, PCGS# 7262

5134 1900-O MS66+ PCGS. CAC. Light golden-brown patina visits the margins of this lustrous and splendidly preserved silver dollar. The strike is crisp except for minor softness left of the wreath bow. NGC ID# 256F, PCGS# 7266

5135 1900-O MS66+ PCGS. CAC. MS66+ is the finest grade that will be encountered by most collectors. Higher-grade specimens are challenging; indeed PCGS has seen only 36 pieces finer, a number of which are likely resubmissions. The lustrous, silvery surfaces of the current MS66+ offering are very nicely preserved and exhibit well struck design elements. NGC ID# 256F, PCGS# 7266

5136 1900-O/CC MS65 PCGS. VAM-8A. A Top 100 Variety. Die rust near the overmintmark confirms the middle die state of this popular VAM. A brilliant and thoroughly lustrous Gem that boasts a bold strike and well preserved fields. The cheek displays a few thin marks. NGC ID# 256G, PCGS# 7268

5137 1900-O/CC MS65+ PCGS. CAC. VAM-11. A Top 100 Variety. Many high-grade examples are known of the various O/CC reverses used in 1900, an unexpected return of the Carson City mintmark (albeit as an undertype). This MS65+ example has hints of blue and gold with a strongly lustrous silver base. The reverse has an extensive die crack through the left letters. NGC ID# 256G, PCGS# 7268

5138 1900-S MS65 PCGS. Pleasing luster is present on this lovely Gem example. The coin has a brilliant appearance overall, with scattered areas of toning including shades of golden-brown and gray. Strike doubling appears at the mintmark and ONE DOLLAR. NGC ID# 256H, PCGS# 7270

5139 1900-S MS65 Prooflike PCGS. CAC. A wisp of canary-gold toning enriches the borders of this otherwise brilliant better date Gem. Well struck and flashy with a clean obverse and a few unobtrusive marks on the eagle. Encapsulated in an old green label holder. Population: 21 in 65 Prooflike, 6 finer (5/13). NGC ID# 256H, PCGS# 7271

5140 1901 AU58 PCGS. CAC. Only a whisper of high-point rub separates this largely untuned 1901 Philadelphia dollar from Mint State and a much higher price. The CAC approval is more than usually important here, assuring "grade solidity" since many examples in the marketplace show "optimistic" grading. NGC ID# 256J, PCGS# 7272

5141 1901-S MS64 PCGS. CAC. The untuned surfaces of this near-Gem display pleasing luster and well struck devices, though the centers reveal some of the typical softness. A few light grazes in non-focal areas preclude Gem classification. Nevertheless, the coin abounds in pleasing eye appeal, evidenced by the CAC label. NGC ID# 256L, PCGS# 7276

**1901-S Dollar, MS65
Deeply Toned Obverse**

5142 1901-S MS65 PCGS. Obverse toning is dusky with a mix of deep orange and brick-red shadings that show pearl-gray and claret accents. The reverse has pleasing cartwheel luster with a mix of lighter accents, including blue and canary. Softly struck but pleasing, a worthy Gem. PCGS has graded just 30 examples as MS66 or finer (4/13). NGC ID# 256L, PCGS# 7276

**1901-S Morgan Dollar, MS65
Scarce Late-Series Issue**

5143 1901-S MS65 PCGS. The 1901-S is a scarce issue in the context of the Morgan dollar series and the date is rare in grades above the Gem level. This attractive specimen displays well-detailed design elements and vibrant mint luster with outstanding eye appeal. PCGS has graded 30 numerically finer examples (5/13). NGC ID# 256L, PCGS# 7276

5144 1902 MS66 PCGS. CAC. The lustrous surfaces of this Premium Gem display hints of color at the rims, more so on the obverse. The devices are relatively well struck, with the hair at Liberty's ear showing partial definition. A few light obverse marks may well have prevented an even higher grade. NGC ID# 256M, PCGS# 7278

5145 1902 MS64 Prooflike PCGS. CAC. Appreciably reflective in the fields, though contrast is minimal as is often the case with this issue. Wisps of green-gray lacing across each side are the only significant toning on an otherwise light silver-gray piece. NGC ID# 256M, PCGS# 7279

5146 1902-O MS66+ PCGS. CAC. Rich luster, a well-executed strike, and minimally abraded surfaces provide this untuned high-end Premium Gem with a high degree of eye appeal. Population: 23 in 66+, 9 finer (5/13). NGC ID# 256N, PCGS# 7280

5147 1902-S MS64 PCGS. CAC. The obverse of this satin near-Gem Morgan dollar has speckled gold and iridescent toning while the reverse exhibits wispy gold toning over brilliant surfaces. A lovely example would not be out of place in a Gem collection. NGC ID# 256P, PCGS# 7282

5148 1902-S MS65 PCGS. This frosty Gem shows roller marks on the cheek and hair over Liberty's ear, areas where they did not strike out fully. The surfaces show just a slight blush of color, and marks are minimal. A nice example for the grade, and seldom seen finer. PCGS has graded only 38 in higher grades (5/13). NGC ID# 256P, PCGS# 7282

5149 1903 MS66+ NGC. CAC. Splashes of gold and blue toning appear on both sides of this fully lustrous Premium Gem Morgan dollar. The surfaces are pristine, showing only a few trivial marks under a glass. NGC ID# 256R, PCGS# 7284

5150 1903 MS66+ PCGS. CAC. This well-frosted and sharply struck Morgan dollar show no trace of color beyond silver-white, for those who like their coins untuned. This high-end Premium Gem is just one or two stray marks away from the Superb Gem level. Population: 16 in 66+, 71 finer (5/13). NGC ID# 256R, PCGS# 7284

5151 1903 MS67 NGC. Broadly lustrous with a hint of flash on the reverse. Both sides remain predominantly silver with just a hint of blue in the wisps of patina. Central detail is above-average for the date. NGC ID# 256R, PCGS# 7284

5152 1903 MS67 NGC. Superb in every respect, a gorgeous coin with vibrant luster, pinpoint definition, and minimally marked surfaces. Minimally toned save for glints of ice-blue in the fields. NGC ID# 256R, PCGS# 7284

5153 1903 MS67 PCGS. This Superb Gem is tied for the finest that PCGS has graded. It exhibits full satin luster with resplendent mint brilliance. Both sides have exceptional design definition to further heighten its desirability. A great survivor from an important 20th century issue. Population: 71 in 67, 0 finer (5/13).
Ex: Shrike Set - The Karschner Collection of Morgan Dollars / Tampa FUN Signature (Heritage, 1/2011), lot 6180. NGC ID# 256R, PCGS# 7284

5154 1921 MS66 PCGS. CAC. Brilliant surfaces and rich satin luster add to the visual allure of both sides of this Premium Gem representative. A tiny, as-made alloy spot appears in the field near Liberty's chin. PCGS and NGC have each only awarded higher numeric grades to 7 examples (4/13). NGC ID# 256X, PCGS# 7296

5155 1921-D MS65+ PCGS. CAC. Both sides of this high-end Gem example display attractive luster and brilliant surfaces. Prooflike areas appear near 11 and 1 o'clock on the reverse. NGC ID# 256Y, PCGS# 7298

5156 1921-D MS66 PCGS. CAC. Variegated reddish-gold, violet, and sea-green cover the obverse of this Premium Gem, ceding to slashes of soft violet on the reverse. The lustrous surfaces are nicely preserved and adequately struck, though the centers exhibit the usual softness. This is the finest grade one can expect to collect, as higher-grade specimens are very rare. NGC ID# 256Y, PCGS# 7298

5157 1921-D MS66 PCGS. CAC. An amazing example, this Premium Gem has speckled blue and iridescent toning over lustrous surfaces. The die work is shallow, yielding indistinct details on most examples, but this piece enjoys a bold strike. PCGS has only certified six finer pieces (5/13). NGC ID# 256Y, PCGS# 7298

5158 1921-S MS65 PCGS. For some reason, the 1921-D and 1921-S Morgan dollars often appear with mottled toning. This Gem 1921-S offers scattered hues of copper-gold and pale jade intermingled with untuned silvery areas. The frosty surfaces show only minor marks, also scattered. PCGS has seen 36 numerically finer (5/13). NGC ID# 256Z, PCGS# 7300

5159 1921-S MS65 PCGS. CAC. A brilliant Gem with the typical shallow details of all 1921 Morgan dollars, this piece is better struck than most and offers satiny white luster with subliminal gold toning. NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

5160 1879 PR58 NGC. The reflective surfaces of this well-detailed proof Morgan dollar show a scattering of grade consistent contact marks and just the slightest trace of wear on the high points of the design. A few hints of pale gold toning accent the surfaces of both sides. NGC ID# 27Z2, PCGS# 7314

1881 Silver Dollar, PR64 Cameo

5161 1881 PR64 Cameo PCGS. This Choice Cameo proof has satiny silver devices with strong mirrors hosting delicate peripheral gold toning. The combination of market price and quality means that this specimen will provide the successful bidder with a good value. Population: 28 in 64 (2 in 64+) Cameo, 20 finer (5/13). PCGS# 87316

1892 Morgan Dollar, PR64 Vivid Multicolor Toning

5162 1892 PR64 PCGS. An unusually generous mintage of 1,245 proof Morgan dollars was accomplished in 1892 but examples in Choice condition are still quite scarce today. This impressive PR64 specimen exhibits razor-sharp definition on all design elements, with deeply reflective fields under vivid shades of magenta and champagne-gold toning. Population: 77 in 64 (1 in 64+), 63 finer (4/13). NGC ID# 27ZM, PCGS# 7327

1894 Morgan Dollar, PR63 Substantial Cameo Effect

5163 1894 PR63 NGC. CAC. The portrait, eagle, and wreath exhibit substantial cameo contrast, though the coin is undesignated as such due to the age of the former generation holder. This high-end rare date dollar is intricately struck and offers attractive peripheral golden-brown toning. NGC ID# 2577, PCGS# 7329

1901 Silver Dollar, PR63 Reverse Die Doubling

5164 1901 PR63 PCGS. ONE DOLLAR is lightly die-doubled, as always on proofs of this date. Proofs are subject to additional demand due to the rarity of the 1901 business strike in quality Mint State. The present specimen is undesignated as Cameo but has a frosty portrait and eagle. Generous peripheral sea-green toning encompasses portions of the wreath. Nicely struck and undisturbed. NGC ID# 27ZZ, PCGS# 7336

1902 Morgan Dollar, PR64 Bold Reflectivity

5165 1902 PR64 PCGS. CAC. The brilliant era of proof Morgan dollars did not last long, just from 1902 to 1904. This near-Gem proof has dotted golden overtones at the margins on each side with additional blue-green elements at the reverse periphery. Gleaming fields impress, though light hairlines and a touch of central striking softness contribute to the grade. NGC ID# 2822, PCGS# 7337

PEACE DOLLARS

5166 1921 MS65 NGC. VAM-1G. The obverse die was previously used to strike matte proofs (VAM-1F). The present lightly toned and well preserved Gem exhibits some inexactness of strike at the centers, but the strike is sharper than usual for the high relief issue. NGC ID# 2U4E, PCGS# 7356

- 5167 1921 MS65 PCGS.** Rich and intriguing patina forms deep swirls of amber, golden-tan, and charcoal patina around a mostly medium-gray interior. The effect is less pronounced on the reverse, which also offers warmer luster. NGC ID# 2U4E, PCGS# 7356
- 5168 1921 MS65 PCGS.** Like virtually all 1921 Peace dollars, this attractive Gem shows a touch of softness on Liberty's hair, due to the high relief of the design. This piece remains bright overall, with a few subtle hints of toning present and minimal abrasions. Rich luster adds to the attractiveness. NGC ID# 2U4E, PCGS# 7356
- 5169 1921 MS65 PCGS.** A pleasing Gem, this High Relief Peace dollar has typical central weakness noted on the hair around Liberty's ear, and at the junction of the eagle's body and leg. The surfaces are fully lustrous under delicate champagne toning. NGC ID# 2U4E, PCGS# 7356
- 5170 1921 MS65 PCGS.** The high-relief 1921 Peace dollar is technically a one-year type. This Gem offers silver-gray surfaces accented with rose in selected areas. The strike is somewhat soft on the central hair, but there are few marks on this beautiful coin. NGC ID# 2U4E, PCGS# 7356
- 5171 1921 MS65 NGC. CAC.** This is the only 20th century silver coin struck in high relief, making the 1921 Peace dollar a one-year curiosity. Just over 1 million pieces were produced. The surfaces of this pleasing lustrous Gem display areas of light toning. NGC ID# 2U4E, PCGS# 7356
- 5172 1921 MS65 PCGS. CAC.** An almond-gold first-year Gem with dynamic luster and pleasing preservation. The obverse is particularly free from contact. The centers display the blending of detail usual for the high relief issue. Encased in a green label holder. NGC ID# 2U4E, PCGS# 7356
- 5173 1922-D MS66 NGC.** Intense luster endows this Premium Gem, complemented by well struck design elements and well cared for surfaces. Die cracks encircle most of the obverse periphery and part of the reverse margin. NGC and PCGS have graded fewer than 20 pieces finer (5/13). NGC ID# 257D, PCGS# 7358
- 5174 1922-S MS65 PCGS.** This Gem 1922-S Peace dollar is well-struck in the centers and softly frosted throughout both sides, largely silver-white with light rose accents. A few contact signs and reeding marks keep this piece from an even finer grade, but the eye appeal is high. PCGS has seen only seven numerically finer (5/13). NGC ID# 257E, PCGS# 7359
- 5175 1922-S MS65 PCGS. CAC.** Rich gleaming luster on both sides of this lovely Gem provides this piece with a strong degree of eye appeal. Toning, consisting primarily of shades of golden-brown and russet appears at the outer portions. PCGS has assigned higher numeric grades to a mere 7 examples (5/13). NGC ID# 257E, PCGS# 7359

**1923-S Peace Dollar, MS65
Only Three Finer Coins at PCGS**

- 5176 1923-S MS65 PCGS.** The 1923-S Peace dollar was produced in large numbers but few high-quality examples are seen in today's market. This well-detailed Gem exhibits lustrous surfaces that show few signs of contact. Some low-intensity champagne-gold toning adds to the considerable eye appeal. PCGS has graded only three numerically finer examples (5/13). NGC ID# 257H, PCGS# 7362

**1923-S Peace Dollar, MS65
Softly Frosted Luster**

- 5177 1923-S MS65 PCGS.** Softly frosted luster is mostly silver but shows several milky areas, most notably at the left obverse. The obverse's central definition is average to slightly better, though the eagle's feathers are softer than average. Near-unobtainable any finer with just three MS66 or better pieces graded by PCGS (4/13). NGC ID# 257H, PCGS# 7362
- 5178 1924 MS66+ PCGS. CAC.** Snow-white surfaces front and back are complemented by light sprinklings of color close to the rims. The strike is far sharper than normal, and the paucity of marks (most on the lower eagle) put this piece close to the next grade level. An extremely appealing coin. Population: 28 in 66+, 24 finer (5/13). NGC ID# 257J, PCGS# 7363
- 5179 1924 Bar "D" MS65 NGC. VAM-1A.** A Top 50 Variety. Reminiscent of the "Tail Bar" 1890-CC Morgan dollar, the Bar "D" exhibits a broad vertical die scratch down from the D in GOD nearly to the rim. A lustrous, lightly toned, and well preserved Gem. PCGS# 133763
- 5180 1924-S MS64 PCGS.** Both sides of this Choice Mint State 1924-S Peace dollar exhibit deep gold toning over frosty and fully lustrous silver surfaces. NGC ID# 257K, PCGS# 7364
- 5181 1925 MS66+ PCGS. CAC.** The surfaces are softly frosted, fully lustrous, and well-struck throughout. This available P-mint issue in high grade, certified by PCGS, would make a terrific type coin. Population: 68 in 66+, 85 finer (5/13). NGC ID# 257L, PCGS# 7365
- 5182 1925 MS66+ PCGS. CAC.** Pleasing luster and brilliant surfaces provide this well-struck high-end Premium Gem with great visual appeal. Small areas of golden toning appear at portions of the outer edges of the reverse. NGC ID# 257L, PCGS# 7365

**1925 Peace Dollar, MS67
Conditionally Rare Issue**

- 5183 1925 MS67 NGC.** Although a common date, the 1925 is rarely seen in Superb Gem or finer grades. In fact, NGC and PCGS have each graded a single finer specimen. This example has brilliant and frosty silver luster without toning on either side. Census: 67 in 67, 1 finer (5/13). NGC ID# 257L, PCGS# 7365
- 5184 1926 MS65 PCGS. CAC. VAM-6.** The olive leaves are strongly die doubled, similar to the Top 50 VAM-2. A brilliant and lustrous Gem with clean surfaces, a crisp strike, and excellent eye appeal. NGC ID# 257N, PCGS# 7367

**1926-D Peace Dollar, MS66
Surprisingly Bold Strike**

- 5185 1926-D MS66 PCGS. CAC.** Boldly impressed, particularly on Liberty's hair, with bright all-around silver luster and hints of frostiness at the high points. A strong Premium Gem with few apparent flaws, uncommonly well-preserved for this little-saved Denver issue. PCGS has certified only eight examples as MS67 or finer (4/13). NGC ID# 257P, PCGS# 7368

**1926-S Peace Dollar, MS66
Well-Produced S-Mint Issue**

- 5186 1926-S MS66 PCGS.** The 1926-S Peace dollar was an unusually well-produced issue from the San Francisco Mint. Like most examples seen, this delightful Premium Gem is sharply detailed in most areas, with just a touch of softness on the eagle's feathers. The well-preserved surfaces are brightly lustrous and display pleasing golden-tan toning. Population: 66 in 66, 2 finer (5/13). NGC ID# 257R, PCGS# 7369

- 5187 1927-D MS64 PCGS. VAM-2.** A Top 50 Variety. IN GOD WE TRVST is clearly die doubled. The variety and VAM are undesignated on the insert. A boldly struck and lustrous near-Gem of this lower mintage issue. Light to medium tan-gold with traces of sky-blue. NGC ID# 257T, PCGS# 7371

- 5188 1927-D MS64 PCGS Secure.** Small splashes of toning appear primarily at the outer edges of this near-Gem example. The colors include olive-green, russet, gold, and teal. Attractive luster is present. NGC ID# 257T, PCGS# 7371

- 5189 1927-D MS64 PCGS. CAC.** The highly lustrous surfaces of this near-Gem Peace dollar display a few wisps of light gold color on the reverse. The design elements are nicely struck and just a few minute marks likely prevent Gem status. Nevertheless, this is a very appealing specimen, evidenced by the CAC label. NGC ID# 257T, PCGS# 7371

- 5190 1927-S MS64 PCGS. CAC.** Delicate champagne toning exhibits faint bluish overtones on this lustrous Choice Mint State Peace dollar. A trifle weak at the centers, the strike is typical of this issue. NGC ID# 257U, PCGS# 7372

- 5191 1927-S MS64 PCGS. CAC.** Hints of champagne toning are barely visible on the brilliant and fully lustrous silver surfaces of this satiny Choice Mint State Peace dollar. NGC ID# 257U, PCGS# 7372

- 5192 1927-S MS64 NGC. CAC.** Frosty luster embraces both sides of this near-Gem, each displaying a hint or two of soft olive-green color. Well struck and moderately abraded. NGC ID# 257U, PCGS# 7372

- 5193 1928 MS64 PCGS.** A few splashes of gold accompany the wispy champagne toning on this highly lustrous Choice Mint State Peace dollar key. NGC ID# 257V, PCGS# 7373

- 5194 1928 MS64 PCGS. CAC.** The strike is a trifle weak at the central hair details, but overall this Choice Mint State key Peace dollar is a lovely specimen. The obverse is brilliant and untuned with satin luster while the reverse has dusky gold toning. NGC ID# 257V, PCGS# 7373

**1928 Peace Dollar, MS65
Distinctly Toned**

- 5195 1928 MS65 NGC. CAC.** The most famous key date in the Peace dollar series, the 1928 is not the rarest in MS65 condition but is of course a desirable coin in such a well-preserved state. This Gem has gold-gray, peach, and tan toning over both sides with a distinct curve of pearl-gray through the right reverse field. NGC has certified only two examples as MS66 or finer (4/13). NGC ID# 257V, PCGS# 7373

- 5196 1928-S MS64+ NGC.** The difficulty in obtaining an MS65 grade for the 1928-S is exemplified by the present well preserved coin. Lustrous and brilliant with smooth surfaces and excellent eye appeal. WE TR exhibits moderate die doubling, as often encountered on this conditionally rare issue. NGC ID# 257W, PCGS# 7374

- 5197 1928-S MS64+ PCGS. CAC.** Areas of light toning are present, however this coin retains an overall brilliant appearance and displays rich satin luster. Minor incompleteness of strike appears at center. NGC ID# 257W, PCGS# 7374

**1934 Peace Dollar, MS66
Low-Mintage Key**

- 5198 1934 MS66 PCGS.** From a low mintage of 954,057 pieces, the 1934 Peace dollar is a key date in the series. The 1934 is not too difficult to locate in lower Mint State grades but examples in MS66 condition are scarce, and finer specimens are very rare. This sharply detailed Premium Gem is lustrous and appealing. PCGS has graded three numerically finer examples (5/13). NGC ID# 257X, PCGS# 7375

**1934 Peace Dollar, Well-Struck MS66
Excellent Eye Appeal**

- 5199 1934 MS66 NGC.** Rich golden-brown, jade-green, and powder-blue toning fills the margins of this lustrous and sharply struck Premium Gem. Exceptionally devoid of contact, and an ideal selection for the collector who seeks a desirable piece at a reasonable price. The low mintage 1934 is readily secured in the MS64 grade, but Premium Gems are very scarce. Certified in a former generation holder. Census: 35 in 66, 5 finer (4/13).
Ex: FUN Signature (Heritage, 1/2013), lot 6427, which realized \$3,290. NGC ID# 257X, PCGS# 7375

**1935 Dollar, Premium Gem
Pleasing Eye Appeal**

- 5200 1935 MS66 PCGS. CAC.** Even with its small mintage of 1.576 million pieces, the 1935 Philadelphia issue is one of the more common dates in the Peace dollar series, as much of its stock was held in Treasury vaults for years. Beautiful satiny luster invigorates both sides of this generally well struck MS66 example. Only the hair over the ear and the letters in UNITED STATES exhibit minor softness. This nicely preserved specimen exudes pleasing overall eye appeal. PCGS has seen none finer, while NGC has graded four higher. NGC ID# 2582, PCGS# 7378
- 5201 1935-S MS65 PCGS.** Four rays below ONE, a design subtype limited to this scarce final-year San Francisco issue, though a majority of '35-S dollars have only three rays below ONE. A faintly toned and lustrous example. The cheek is smooth though a few marks are scattered. NGC ID# 2583, PCGS# 7379

EISENHOWER DOLLARS

- 5202 1971 MS66 PCGS.** This Premium Gem is tied for the finest that PCGS and NGC have certified, with just 77 examples similarly graded at both services. Nickel-gray surfaces host satin luster with hints of gold toning. Population: 43 in 66, 0 finer (5/13). NGC ID# 2584, PCGS# 7406
- 5203 1973 MS66 PCGS.** The 1973-P and -D Ike dollars are mint set-only issues, not struck for circulation and thus limited to a production of about 2 million pieces each. The large format exposed most examples to heavy marks on the president's cheek; this piece is among the few happy exceptions, showing only light and scattered marks over lustrous, untuned surfaces. Population: 97 in 66 (2 in 66+), 0 finer (5/13). NGC ID# 258A, PCGS# 7412

- 5204 1973 MS66 PCGS.** Issued only in Mint Sets, the 1973 and 1973-D Eisenhower dollars are low mintage issues (relatively speaking) with only 2 million struck at each Mint. This brilliant gray Premium Gem is tied for the finest certified. Population: 97 in 66 (2 in 66+), 0 finer (5/13). NGC ID# 258A, PCGS# 7412

PROOF EISENHOWER DOLLARS

**1971-S Eisenhower Dollar, PR70 Deep Cameo
Technically Perfect Silver Clad**

- 5205 1971-S Silver PR70 Deep Cameo PCGS.** The 40% silver composition was first used on circulating Kennedy half dollars from 1965-1970. The San Francisco Mint issued noncirculating Eisenhower dollars in this composition, in both proof and Uncirculated format, beginning in 1971. This coin is a technically perfect specimen, with sharply detailed frosty design elements and deeply reflective fields that produce a stunning cameo effect. Population: 9 in 70 Deep Cameo (4/13).
From The MKJ Collection, Part II. NGC ID# 258S, PCGS# 97428

- 5206 1972-S Silver PR70 Deep Cameo PCGS.** Few examples silver proof Ike dollars, will ever approach the perfect grade of this 1972-S example, untuned and remarkably contrasted with immaculate preservation. Population: 33 in 70 Deep Cameo (5/13).
From The MKJ Collection, Part II. NGC ID# 258T, PCGS# 97429

COMMEMORATIVE SILVER

- 5207 1893 Isabella Quarter MS64+ PCGS.** Reddish-violet patina gravitates to the margins of this MS64+ commemorative, especially on the obverse. Its lustrous surfaces exhibit well struck devices and are minimally marked. NGC ID# 28HR, PCGS# 9220
- 5208 1893 Isabella Quarter MS65 NGC.** This sharply detailed Gem displays vibrant cartwheel mint luster on both sides. The brilliant centers yield to attractive champagne-gold patina at the peripheries and eye appeal is terrific. NGC ID# 28HR, PCGS# 9220
- 5209 1893 Isabella Quarter MS65 NGC.** Vibrant luster endows both sides of this appealing Gem, each of which is devoid of mentionable marks. The design elements have been well brought up. NGC ID# 28HR, PCGS# 9220
- 5210 1893 Isabella Quarter MS65 PCGS. CAC.** Silver centers give way to gold-orange and rose-violet border toning on the obverse, which expands into the fields and adds green-gold on the reverse. A pleasing Gem example of the first commemorative quarter issue. NGC ID# 28HR, PCGS# 9220
- 5211 1900 Lafayette Dollar MS63 NGC. DuVall 2-C.** Medium chestnut-gold and ice-blue toning visits lustrous and lightly marked surfaces. A boldly struck Gem of the sole Classic silver dollar commemorative type. NGC ID# 28N8, PCGS# 9222
- 5212 1900 Lafayette Dollar MS64 PCGS. DuVall 1-B.** Faint golden-gray toning adorns this lustrous and precisely struck Choice silver dollar. Uncommonly free from contact for the designated grade, though we note a faint streak of struck-in grease on the upper obverse. NGC ID# 28N8, PCGS# 9222

- 5213 1921 Alabama MS66 PCGS.** Generous gold and blue overtones remain largely translucent on this Premium Gem. Softly lustrous with a few small marks on Kilby's portrait that contribute to the grade. NGC ID# 28HT, PCGS# 9224

1921 Alabama Half Dollar, MS66
Without 2x2 on Obverse

- 5214 1921 Alabama MS66 PCGS.** The Alabama Centennial half dollar was minted 102 years after the southern state entered the union. The obverse features conjoined portraits of the first governor, William Wyatt Bibb, and the 36th governor, Thomas E. Kilby. This lustrous specimen has splashes of golden-brown toning over frosty silver surfaces. NGC ID# 28HT, PCGS# 9224

- 5215 1936 Albany MS67 PCGS.** A smooth, hazy white patina exhibits a warm, multicolored pastel glow from the vividly toned surfaces underneath. A band of widely dispersed speckled russet toning rings the reverse. Well struck and very clean with only a few trivial marks. PCGS has graded only one numerically finer example (4/13).
Ex: *FUN Signature (Heritage, 1/2004)*, lot 9338. NGC ID# 28HU, PCGS# 9227

- 5216 1936 Albany MS67 NGC. CAC.** Splashes of orange-gold, jade-green, and stone-gray alternate across this coruscating and precisely struck Superb Gem. Nearly unobtainable any finer. Certified in a former generation holder. NGC ID# 28HU, PCGS# 9227

- 5217 1937 Antietam MS66 NGC. CAC.** Exquisite autumn-gold and stone-gray tab toning graces the reverse of this Civil War-themed commemorative. The obverse is cream-white and caramel-gold. Both sides exhibit distributed dark gray freckles. NGC ID# 28HV, PCGS# 9229

- 5218 1937 Antietam MS66 PCGS. CAC.** Light ice-blue and straw-gold toning adorns this highly lustrous and virtually mark-free Premium Gem. A few pinpoint field flecks emerge beneath a loupe. Certified in a green label holder. NGC ID# 28HV, PCGS# 9229

- 5219 1937 Antietam MS67 NGC.** Gold-orange toning at the rims with broad silver-gray interiors that show a hint of cream. Smooth surfaces have a touch of quicksilver to the luster. NGC ID# 28HV, PCGS# 9229

- 5220 1937 Antietam MS67 PCGS.** Subtle shades of champagne, gold, and silver provide this Superb Gem with an attractive appearance. Rich satin luster further enhances the eye appeal of this representative. PCGS has awarded higher numeric grades to only 17 examples (4/13). NGC ID# 28HV, PCGS# 9229

- 5221 1936-D Arkansas MS66+ PCGS.** Violet, reddish-gold, and russet coloration overlay the lustrous surfaces of this MS66+ Arkansas commemorative, though the central reverse remains brilliant. This is a well struck and nicely preserved offering. NGC ID# 28J2, PCGS# 9238

- 5222 1936-D Arkansas MS67 PCGS. CAC.** The satiny luster these coins are known for is evident on both sides of this Superb Gem example. Scattered toning is present, with the obverse displaying subtle hints of ice-blue and gold as well as a few tiny splashes of orange and red. The reverse exhibits numerous small spots of color that include orange, red, and green. Population: 25 in 67, 1 finer (5/13). NGC ID# 28J2, PCGS# 9238

1937 Arkansas Half Dollar, MS67
Tied for Finest Certified

- 5223 1937 Arkansas MS67 NGC.** Hints of champagne toning appear on both sides of this lovely Superb Gem. The pristine surfaces display satiny luster on this conditionally rare issue. A thin crescent of gold, violet, and blue toning appears at the upper obverse border. Census: 4 in 67, 0 finer (5/13). NGC ID# 28J4, PCGS# 9241

1939 Arkansas Half, MS66
Final Issue of the Series

- 5224 1939 Arkansas MS66 NGC. CAC.** The final year of issue for the Arkansas series that began in 1935. Only the Oregon and Booker T. Washington issues had longer runs than the Arkansas. This Premium Gem, surviving from a mintage of only 2,104 coins, has delicate peripheral gold toning with bold design motifs and satin luster. Census: 24 in 66 (1 in 66+), 1 finer (5/13). NGC ID# 28JA, PCGS# 9249

- 5225 1939-D Arkansas MS66+ PCGS. CAC.** A pleasing level of design detail is present on this lovely high-end Premium Gem example displaying attractive satin luster. Scattered areas of toning appear, primarily at portions of the outer edges. The colors on the obverse include a number of delightful shades of red, green, and orange. Population: 13 in 66+, 7 finer (5/13). NGC ID# 28JB, PCGS# 9250

- 5226 1939-D Arkansas MS66+ PCGS. CAC.** This high-end Premium Gem includes areas of toning at portions of the outer edges in shades of brown and yellow, with a few flecks of bold blue, green and fuchsia mixed in. The piece displays attractive luster and is minimally abraded. Only 7 examples have been awarded higher numeric grades by PCGS (4/13). NGC ID# 28JB, PCGS# 9250

- 5227 1939-S Arkansas MS66 PCGS.** Dusky dotted patina on the obverse with a mix of pearl-gray, antique-gold, and dusky rose. Similar hues, smoother and blending into each other, appear on the reverse. This Premium Gem is one of just 2,105 pieces for the issue. NGC ID# 28JC, PCGS# 9251

- 5228 1936-S Bay Bridge MS67 PCGS.** Delicately gold-tinted in the fields around the bear and silver elsewhere. Softly swirling luster has a frosty air. This Superb Gem is housed in a green label holder. NGC ID# 28JD, PCGS# 9254

- 5229 1934 Boone MS67 PCGS.** The silky smooth, lustrous surfaces are undisturbed by any noticeable abrasions and there is a lovely overlay of grayish-gold patina on each side. An exceptionally pleasing type coin and always popular as the first year of issue. Population: 36 in 67 (1 in 67+), 1 finer (4/13).
Ex: *Central States Signature (Heritage, 5/2004)*, lot 1868. NGC ID# 28JE, PCGS# 9257

- 5230 1935/34-D Boone MS67 PCGS.** A mostly untoned silver-centered piece with light touches of color near the rims, but each side is well-struck and free of mentionable marks. The second-year Denver issue with small 1934 in the field. Population: 57 in 67 (1 in 67+), 7 finer (5/13). NGC ID# 28JK, PCGS# 9263
- 5231 1937-D Boone MS67 PCGS.** Fully struck, lustrous, and nearly immaculate. Light chestnut-brown toning graces the margins. AMERICA and DOLLAR are die doubled, as likely seen on all survivors of the 2,506-piece mintage. Certified in a green label holder. Population: 45 in 67 (1 in 67+), 3 finer (5/13). NGC ID# 28JS, PCGS# 9271
- 5232 1937-S Boone MS66 PCGS. CAC.** An impressive Premium Gem, this Boone half dollar is brilliant and untoned. Both sides have fully prooflike surfaces with mirrored fields. PCGS has only seen 39 finer examples (5/13). NGC ID# 28JT, PCGS# 9272
- 5233 1938-S Boone MS67 PCGS.** Distinctly patinated surfaces are pale gray with glimpses of purple-pink and gold. A smooth Superb Gem that is one of just 2,100 pieces for its issue. Population: 34 in 67 (2 in 67+), 2 finer (4/13). NGC ID# 28JW, PCGS# 9276
- 5234 1938-S Boone MS67 NGC. CAC.** Light daubs of pastel patina complement pristine preservation on this well-struck and highly appealing Superb Gem 1938-S Boone half, among the few finest obtainable. Only a bit more than 2,000 examples of this issue were distributed, but today it is quite popular. NGC ID# 28JW, PCGS# 9276
- 5235 1938 Boone PDS Set MS64 to MS66 NGC.** The set is housed in separate holders with consecutive serial numbers, and includes: 1938 MS64, light almond-gold toning, minor field marks near the chin; 1938-D MS66, a hint of peach patina, well preserved; and a 1938-S MS66, pristine and lustrous with only a wisp of ice-blue and straw-gold toning. (Total: 3 coins) PCGS# 9277
- 5236 1936 Bridgeport MS67 PCGS.** This attractive Superb Gem exhibits sharply detailed design elements and satiny mint luster with a few hints of lavender and pale gold toning. Housed in a green label holder. Population: 66 in 67 (2 in 67+), 0 finer (4/13). NGC ID# 28JX, PCGS# 9279
- 5237 1925-S California MS65 PCGS. CAC.** Pleasing orange toning, along with small splashes of red and pink, appears on approximately half of the obverse. A few areas of color are present on the reverse as well. Attractive satin luster adds to the visual appeal. NGC ID# 28JY, PCGS# 9281
- 5238 1925-S California MS66 PCGS.** Dappled orange-gold, lilac-gray, and sea-green shades encompass this lustrous and immaculate Premium Gem. The iconic types of miner and bear combine for a memorable design. Encased in a green label holder. NGC ID# 28JY, PCGS# 9281
- 5239 1925-S California MS66 PCGS. CAC.** Splashes of golden-tan, powder-blue, and pearl-gray endow this lustrous and high grade silver commemorative. The strike is intricate and the eye appeal is exceptional. Certified in an old green label holder. NGC ID# 28JY, PCGS# 9281
- 5240 1925-S California MS66 PCGS. CAC.** A whisper of gold and iridescent toning appears on the lustrous and satiny surfaces of this Premium Gem. Both sides are sharply defined and pristine. NGC ID# 28JY, PCGS# 9281
- 5241 1925-S California MS66 NGC. CAC.** Medium autumn-brown and blue-green toning embraces this highly lustrous and fully struck Premium Gem. Pristine save for minor grazes on the right obverse field. Encased in a prior generation holder. NGC ID# 28JY, PCGS# 9281
- 5242 1925-S California MS67 NGC.** Dramatic toning is this Superb Gem's greatest asset. The left obverse has pink-purple patina, while dappled gold, orange, maroon, and related shades dominate the rest of the surfaces. NGC ID# 28JY, PCGS# 9281

**1925-S California Half Dollar, MS67
Vivid Iridescent Toning**

- 5243 1925-S California MS67 PCGS.** Iridescent amber, violet, and champagne-gold toning highlights the well-preserved surfaces of this magnificent Superb Gem. The design elements are sharply detailed and both sides radiate vibrant mint luster. Overall eye appeal is terrific. Population: 92 in 67, 6 finer (5/13). NGC ID# 28JY, PCGS# 9281

**1925-S California Half Dollar, MS67
Vibrant Luster, Sharply Detailed**

- 5244 1925-S California MS67 PCGS.** Especially vibrant mint luster and sharply detailed design elements are the calling cards of this stunning Superb Gem. Close inspection with a loupe reveals no mentionable distractions and traces of champagne-gold and violet toning add to the ample eye appeal. Population: 92 in 67, 6 finer (5/13). NGC ID# 28JY, PCGS# 9281
- 5245 1925-S California MS67+ NGC.** Rich satin luster and bright surfaces lead to outstanding visual appeal for both sides of this high-end Superb Gem example. Areas of attractive toning are scattered throughout, but are primarily concentrated near the rims. Census: (3 in 67+), 8 finer (4/13). NGC ID# 28JY, PCGS# 9281
- 5246 1925-S California MS67 NGC. CAC.** Attractive shades of champagne-gold toning blanket the well-preserved surfaces of this impressive Superb Gem, with hints of lavender in some areas and vibrant mint luster throughout. NGC has graded only eight numerically finer examples (4/13). NGC ID# 28JY, PCGS# 9281
- 5247 1936 Cincinnati MS66 NGC.** Caramel-gold and ice-blue pastel toning visits this lustrous and immaculate example. Among the scarcest silver types, since the low mintage was evenly divided among the PDS mints. Housed in a former generation holder. NGC ID# 28JZ, PCGS# 9283
- 5248 1936-D Cincinnati MS66+ PCGS. CAC.** A lovely high-end Premium Gem example, this piece displays small areas of toning in a variety of colors, including cherry-red, iridescent lime-green, ice-blue, and golden-orange on both sides. The neck and face exhibit minor contact marks. Only 14 examples have received the 66+ grade from PCGS, with 36 finer (4/13). NGC ID# 28K2, PCGS# 9284

**1936-D Cincinnati Half, MS67
Smooth, Lustrous Example**

- 5249 1936-D Cincinnati MS67 PCGS. CAC.** This highly lustrous piece offers smooth, virtually unblemished surfaces. Each side has light gray patina with subtle accents of rose and emerald-green iridescence around the margins. Scarce as such because of the large, open surfaces of the coin's design. Population: 35 in 67 (1 in 67+), 1 finer (4/13).

Ex: *FUN Signature* (Heritage, 1/2003), lot 9603; *New York Signature* (Heritage, 11/2003), lot 9062; *Long Beach Signature* (Heritage, 2/2008), lot 931. NGC ID# 28K2, PCGS# 9284

- 5250 1936-S Columbia MS67+ PCGS. CAC.** Green-gold outer toning is duskier on the obverse, but the blue-violet and pink interiors are of roughly equal intensity. Impressively preserved even by Superb Gem standards. Population: 90 in 67 (5 in 67+), 6 finer (4/13). NGC ID# 28K7, PCGS# 9293

- 5251 1936 Columbia PDS Set PCGS. CAC.** Each coin is separately housed in holders with consecutive certification numbers. Similar light tan and green toning suggests the trio has remained together since its issue. The set includes: **1936 MS66+ PCGS, CAC**, virtually pristine; **1936-D MS66 PCGS, CAC**, nearly immaculate, a streak of gunmetal toning; and a **1936-S MS66 PCGS, CAC**, one thin mark at the base of the tree. (Total: 3 coins) PCGS# 9294

- 5252 1893 Columbian MS66+ PCGS. CAC.** Even a quick glance at each side of this high-end Premium Gem reveals what a lovely piece this is. The obverse center remains brilliant while attractive toning appears at the outer edges. The colors include golden-brown, rose-pink, violet, blue-green, and electric-blue. The reverse is largely untuned other than at the extreme periphery. Minimal abrasions are present. Population: 16 in 66+, 11 finer (5/13). NGC ID# 26H6, PCGS# 9297

- 5253 1893 Columbian MS66+ NGC. CAC.** Although the mintage for this date was over 1.5 million, only 24 examples have received higher grades from NGC (4/13). Attractively toned, this piece displays shades of lavender-blue and golden-brown. The mint luster is vibrant and the surfaces of this high-end Premium Gem are pristine, with the design elements displaying bold detail. NGC ID# 26H6, PCGS# 9297

- 5254 1935 Connecticut MS67 NGC.** Richly toned across the obverse with autumnal hues against a silver-gray base. The shades lighten on the reverse, letting swirling frosty luster shine through. NGC ID# 28K8, PCGS# 9299

- 5255 1935 Connecticut MS67 NGC.** Both sides of this beautiful coin have competing light swirls of lavender and olive-gold patina. A good strike and strong luster are complimented with nearly pristine surfaces. Virtually unobtainable any finer. Census: 62 in 67 (1 in 67+), 1 finer (4/13). NGC ID# 28K8, PCGS# 9299

- 5256 1935 Connecticut MS67 NGC. CAC.** This delightful Superb Gem exhibits well-detailed design elements and vibrant mint luster, under attractive shades of champagne-gold and ice-blue toning. Census: 62 in 67 (1 in 67+), 1 finer (4/13). NGC ID# 28K8, PCGS# 9299

- 5257 1936 Delaware MS67 PCGS. CAC.** Distinctly toned green-to-yellow overall with reddish-violet elements along parts of the peripheries, most obviously in an arc at the upper left reverse. Great eye appeal for this state-interest commemorative issue of 1936. Population: 92 in 67 (8 in 67+), 2 finer (5/13). NGC ID# 28K9, PCGS# 9301

- 5258 1936 Elgin MS67 PCGS. CAC.** Rich satin luster adds to the eye appeal of this Superb Gem example. Areas of intermingled toning are present on both sides and include a wide array of colors, among them are golden-brown, olive-green, red-orange, lime-green, kelly-green, and hot pink. PCGS has awarded higher numeric grades to a mere 4 examples (5/13). NGC ID# 28KA, PCGS# 9303

- 5259 1936 Gettysburg MS67 PCGS.** Civil War-themed commemorative halves — Grant, Gettysburg, Antietam — form an interesting and historic subset of the series. This Gettysburg is a great-looking coin with frosted luster and excellent preservation over lightly toned surfaces. Population: 90 in 67 (3 in 67+), 2 finer (5/13). NGC ID# 28KB, PCGS# 9305

- 5260 1936 Gettysburg MS67 NGC.** Gleaming silver interiors with almond-tan outer toning that stops almost exactly at the "ring" borders around the central figures. Broadly lustrous surfaces are carefully preserved with a touch of quicksilver. NGC ID# 28KB, PCGS# 9305

- 5261 1922 Grant With Star MS64 NGC.** This Choice Mint State Grant With Star half dollar has pewter-gray surfaces with exceptional luster, combined with splashes of deep gold toning, mostly about the periphery. NGC ID# 28KC, PCGS# 9307

- 5262 1922 Grant With Star MS64 NGC.** Attractive deep gold toning appears around the devices and along the borders of this satiny and fully lustrous medium gray Choice Mint State Grant with Star half dollar. NGC ID# 28KC, PCGS# 9307

**1922 Grant Half Dollar, MS65
Popular With Star Variant**

- 5263 1922 Grant With Star MS65 PCGS.** The popular variant with the small star in the right obverse field below the final A in AMERICA. This attractive Gem exhibits sharply detailed design elements and vibrant mint luster with hints of champagne-gold and lavender toning. PCGS has graded 48 numerically finer examples (5/13). NGC ID# 28KC, PCGS# 9307

- 5264 1928 Hawaiian MS63 NGC.** Only the slightest tinge of golden-yellow, generally seen on this popular key commemorative, appears on the present Select Mint State example, with silver-gray color present elsewhere. The satiny surfaces reveal only a few minor marks consistent with the grade. NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Half Dollar, MS64
Key Silver Commemorative**

- 5265 1928 Hawaiian MS64 NGC.** The 1928 Hawaiian half dollar is one of the keys to the silver commemorative series with a small distribution of 9,958 pieces. This attractive choice example features sharply detailed design elements and vibrant mint luster. The well-preserved surfaces provide ample eye appeal. NGC ID# 28KE, PCGS# 9309

1928 Hawaiian Half Dollar, MS64+

- 5266 1928 Hawaiian MS64+ PCGS.** One of the important commemorative issues, the Hawaiian half dollar had a mintage of just 10,008 coins, including 50 sandblast proofs. This Choice Mint State specimen has frosty luster beneath distinctive mustard-yellow splashes. Only a few trivial marks prevent a higher grade. NGC ID# 28KE, PCGS# 9309

1928 Hawaiian Half Dollar, Colorful MS65

- 5267 1928 Hawaiian MS65 PCGS. CAC.** Apple-green and caramel-gold compete for territory across this coruscating and well struck Gem. The obverse is essentially free from contact and the reverse has only minor abrasions. The Hawaiian is the scarcest silver commemorative type. Encapsulated in a green label holder. NGC ID# 28KE, PCGS# 9309

1928 Hawaiian Half, Smooth Gem Example

- 5268 1928 Hawaiian MS65 NGC. CAC.** Dappled tan-brown and jade-green invigorates the peripheries of this lustrous and lovely half dollar. The strike is bold and neither side displays any noticeable marks. The low mintage Hawaiian type was partially reserved for residents of the then-territory, and many such purchasers were non-collectors. Housed in a prior generation holder. NGC ID# 28KE, PCGS# 9309

- 5269 1935 Hudson MS65 PCGS.** The obverse is lustrous silver with a short arc of lemon-orange at the top, while the reverse has a more even cast of pale gold. A pleasing Gem example of the popular low-mintage Hudson half. NGC ID# 28KE, PCGS# 9312

- 5270 1935 Hudson MS66 PCGS. CAC.** Brilliant satin luster adds to the visual appeal of this Premium Gem with freckles of tobacco-brown toning adorning the rims. PCGS has awarded higher numeric grades to only 10 examples (4/13). NGC ID# 28KE, PCGS# 9312

- 5271 1924 Huguenot MS67 NGC.** A ring of amber, dark gray, and greenish-gold toning surrounds the brilliant centers of this attractive Superb Gem. The design elements are sharply detailed and vibrant mint luster radiates from both sides. In a former generation holder. Census: 41 in 67, 0 finer (4/13). NGC ID# 28KG, PCGS# 9314

- 5272 1924 Huguenot MS67 NGC. CAC.** Dappled green-gold, orange, and silver-gray on the obverse with smoother blocks of the same colors gracing the reverse. Great underlying luster and generous eye appeal. NGC ID# 28KG, PCGS# 9314

- 5273 1946 Iowa MS68 PCGS.** Patches of orange toning appear at parts of the margins, echoed by gold that is visible only at certain angles. A lovely silver piece with understated but elegant luster, housed in a green label holder. Population: 65 in 68 (3 in 68+), 0 finer (4/13). NGC ID# 28KJ, PCGS# 9316

- 5274 1925 Lexington MS66 PCGS.** Gold-green outer toning and glimmering silver interiors combine for top-shelf eye appeal. This Premium Gem is softly struck but pleasingly preserved. NGC ID# 28KK, PCGS# 9318

**1925 Lexington Half, MS66+
Bright, Bold Luster**

- 5275 1925 Lexington MS66+ PCGS. CAC.** A bright and beautiful MS66+ Lexington with only faint glimmers of golden toning on otherwise silver surfaces. If not for a tiny luster scrape above the R in PATRIOT on the obverse, this coin might qualify as a Superb Gem. PCGS has graded only 11 examples as MS67 or finer (4/13). NGC ID# 28KK, PCGS# 9318

5276 1918 Lincoln MS67 PCGS. Effusive cartwheel luster with splashes of peripheral green-gold against otherwise pale silver surfaces. Only a few light grazes stand between this piece and an even finer designation. PCGS has graded only two examples as MS68 or better (4/13). PCGS# 9320

**1920 Maine Half Dollar, MS67
Only One Finer Example at PCGS**

5277 1920 Maine MS67 NGC. This stunning Superb Gem exhibits well-preserved brilliant surfaces that show no mentionable signs of contact. The design elements are well-detailed, with just a touch of softness on the central obverse, and vibrant mint luster radiates from both sides. Census: 28 in 67, 1 finer (5/13). NGC ID# 28KN, PCGS# 9326

5278 1921 Missouri MS65 NGC. Attractive shades of lavender-gray and greenish-gold peripheral toning accent the well-preserved obverse surfaces of this impressive Gem, while the reverse remains essentially brilliant. Eye appeal is outstanding. NGC ID# 28KS, PCGS# 9330

5279 1921 Missouri MS65 PCGS. This Gem represents the Plain variety of the 1921 Missouri half dollar, without the 2★4 notation in the field. Shades of light pink and blue toning appear on the lustrous frosty silver surfaces. PCGS has certified only 32 coins in higher numeric grades (4/13). NGC ID# 28KS, PCGS# 9330

5280 1921 Missouri 2x4 MS65 NGC. An attractive Gem representative of the popular 2x4 variant, with well-detailed design elements and vibrant mint luster, under light shades of lavender and champagne-gold toning. NGC ID# 28KR, PCGS# 9331

5281 1921 Missouri 2x4 MS65 NGC. Light intermingled toning in several shades, along with pleasing satin luster, creates nice eye appeal for this Gem. The small incuse 2★4 in the left obverse field of this variety signifies that Missouri was the 24th state. NGC ID# 28KR, PCGS# 9331

5282 1921 Missouri 2x4 MS65 NGC. The 1921 Missouri 2★4 is one of the keys to the set. This piece shows silver centers with pink-amber rim toning over original surfaces with lots of eye appeal. A nice coin for the grade. NGC ID# 28KR, PCGS# 9331

5283 1923-S Monroe MS65 NGC. The frostiness of the luster is most visible in contrast to the few tiny brilliant areas near lettering or devices. Color ranges from silver on much of the obverse to gold, apricot, and peach on the reverse with a crescent of umber accenting the former side. NGC ID# 28KT, PCGS# 9333

5284 1923-S Monroe MS65 NGC. An attractive lilac-gray patina envelops both sides of this well-struck example. A lesser-known fact about the Monroe commemoratives is that the California film industry issued them. NGC ID# 28KT, PCGS# 9333

5285 1923-S Monroe MS65 NGC. Splashes of rich intermingled toning at the outer edges, particularly on the reverse, provide this Gem with an attractive appearance and serve to highlight the brilliant, lustrous centers. Along with the Panama-Pacific, Vancouver, and California Diamond Jubilee issues, the Monroe is one of several commemorative issues with a West Coast connection. NGC ID# 28KT, PCGS# 9333

5286 1923-S Monroe MS65 PCGS. CAC. Rich satin luster provides this Gem with a pleasing appearance on both sides. Light gray-green patina covers large portions of this piece. The mintage for the type proved ambitious and many unsold specimens were released into circulation. NGC ID# 28KT, PCGS# 9333

**1923-S Monroe Half Dollar, MS66
Attractive Multicolor Patina**

5287 1923-S Monroe MS66 PCGS. The 1923-S Monroe half dollar was produced in large numbers but collector demand did not meet expectations and few high-quality specimens were saved. This delightful Premium Gem exhibits well-detailed design elements and vibrant mint luster under shades of champagne-gold, lavender-gray, and amber toning. Population: 68 in 66 (2 in 66+), 5 finer (5/13). NGC ID# 28KT, PCGS# 9333

1923-S Monroe Half Dollar, Premium Gem

5288 1923-S Monroe MS66 PCGS. A sharply defined example, at least in the context of Monroe half dollars, this piece exhibits brilliant and frosty silver luster beneath delicate gold toning. Although the Monroe half dollar is one of the highest mintage commemoratives, and plentiful in all lower grades, Gem and finer specimens are rarely encountered. Population: 68 in 66 (2 in 66+), 5 finer (5/13). NGC ID# 28KT, PCGS# 9333

**1923-S Monroe Half Dollar, MS66
Scarce in Gem and Better Grades**

5289 1923-S Monroe MS66 PCGS. Ex: W.P.E. Collection. The Monroe half dollar is a commemorative condition rarity that is elusive at the Premium Gem level offered here, and rarely seen any finer. This piece has mottled golden-brown toning over frosty mint luster with excellent eye appeal. Population: 68 in 66 (2 in 66+), 5 finer (5/13). NGC ID# 28KT, PCGS# 9333

5290 1938 New Rochelle MS67 NGC. Blue and peach overtones shimmer across each side of this semireflective Superb Gem. The midrib of the flower shows typical softness, but the surfaces are largely mark-free. NGC ID# 28KU, PCGS# 9335

5291 1938 New Rochelle MS67 ★ NGC. An eye-catching Superb Gem example with semireflective fields. Light gold and lilac overtones visit much of each side, while the margins have areas of deep toning, most visibly at the reverse rim above the F in OF. NGC ID# 28KU, PCGS# 9335

5292 1938 New Rochelle MS67 PCGS. CAC. A decidedly prooflike Superb Gem. The strike is above average but just shy of complete at the centers. The immaculate surfaces display only a trace of tan patina. Certified in an old green label holder. NGC ID# 28KU, PCGS# 9335

1938 New Rochelle Half Eye-Catching MS67+

5293 1938 New Rochelle MS67+ PCGS. CAC. Distinctly toned with gold-green and blue “general” hues and deeper dots of similar colors along parts of the margins. Though the flower’s midrib is typically soft, the coin’s preservation is remarkable. PCGS has certified only three examples of the type as MS68 or better (4/13). NGC ID# 28KU, PCGS# 9335

5294 1926 Oregon MS67 PCGS. CAC. Both sides of this Superb Gem exhibit vibrant multi-colored toning, ranging from brilliant gold, to pale blue, lilac, and golden-brown. An important condition rarity, representing the first year of a new commemorative half dollar design. Population: 73 in 67 (5 in 67+), 3 finer (5/13). NGC ID# 28KW, PCGS# 9340

5295 1933-D Oregon MS67 PCGS. FS-801. Rich golden-brown borders encompass pristine cream-gray centers. HALF DOLLAR and other obverse legends are die tripled, a characteristic of the entire emission of 5,008 pieces. The only silver issue of any denomination struck at Denver in 1933. Certified in a green label holder. Population: 87 in 67 (4 in 67+), 0 finer (4/13). NGC ID# 28KZ, PCGS# 9343

5296 1933-D Oregon MS67 PCGS. The 1933-S Oregon Trail issue trades at premium prices compared to the type issues of the series, due to its small distribution of only 5,000 pieces. This silvery Superb Gem offers splendid eye appeal over unmarked and untuned surfaces. Population: 87 in 67 (4 in 67+), 0 finer (4/13). NGC ID# 28KZ, PCGS# 9343

5297 1933-D Oregon MS67 PCGS. A wonderful Superb Gem representative of the popular Oregon Trail commemorative, this lovely example features rich satin luster. Small splashes of light toning are present, primarily on the obverse. One of the few Denver Mint issues of any denomination struck in 1933 during the Great Depression, the 1933-D Oregon is also interesting because HALF and other obverse legends are die tripled. Population: 87 in 67 (4 in 67+), 0 finer (4/13). NGC ID# 28KZ, PCGS# 9343

5298 1934-D Oregon MS67 PCGS. Light silver-blue overall with tiny arcs of deep crimson and violet at the top and bottom obverse borders. A charming Denver Superb Gem. NGC ID# 28L2, PCGS# 9344

5299 1937-D Oregon MS68 NGC. Blue and green overtones, delicate on the obverse but strong on the reverse, dominate the eye appeal. A well-defined and carefully preserved example from late in the classic design’s long tenure. NGC ID# 28L5, PCGS# 9347

5300 1938 Oregon MS66+ PCGS. CAC. Ex: Gutttag Family. Whispers of light tan patina make occasional visits to the lustrous surfaces of this high-end Premium Gem. This is a well struck, clean, and highly appealing specimen. While PCGS has graded nearly 500 examples as MS66, only 14 have been assigned MS66+. NGC ID# 28L6, PCGS# 9348

5301 1938 Oregon MS67 PCGS. Impressively preserved with low-key eye appeal. The obverse has a medium-silver interior with deep gold-orange rim toning, while the reverse has a mix of green-gold and blue hues. Population: 91 in 67 (8 in 67+), 2 finer (4/13). NGC ID# 28L6, PCGS# 9348

5302 1938 Oregon MS67 PCGS. Superlative preservation overall with golden rim toning that is suggestive of original packaging. Otherwise brilliant and remarkably clean. NGC ID# 28L6, PCGS# 9348

5303 1938 Oregon MS67+ PCGS. Ex: Gutttag Family. Intense luster radiates from each side of this high-end Superb Gem. The reverse shows just a few whispers of gold color at the upper margin. The solid strike and impeccable preservation enhance the gorgeous eye appeal, aptly recognized by CAC. Only two pieces have been graded MS67+ by PCGS, and eight finer (5/13). NGC ID# 28L6, PCGS# 9348

5304 1939-D Oregon MS67 PCGS. Some long-running commemorative half series such as the Texas, Boone, and Oregon Trail sets, among others, lend themselves to the collecting of complete date and mintmark sets. This 1939-D Oregon is largely untuned on the obverse with light patina on the reverse, but neither side shows mentionable distractions. PCGS has certified only 21 finer (5/13). NGC ID# 28LA, PCGS# 9353

5305 1915-S Panama-Pacific MS65 NGC. FS-501. The mintmark is repunched east. Predominantly pale silver with just a hint of gold visiting the rims. Though a degree of striking softness is noted on the eagle’s breast, the overall detail is slightly better than usually seen on the issue. NGC ID# 26H7, PCGS# 9357

5306 1915-S Panama-Pacific MS65 NGC. Autumn-gold toning drapes this undisturbed and beautifully preserved Gem. A lustrous and well struck high grade example of the sole silver issue from the Panama-Pacific Exposition. NGC ID# 26H7, PCGS# 9357

5307 1915-S Panama-Pacific MS65 NGC. CAC. FS-502. Deep original forest-green and lavender toning envelops this shimmering and unabraded Gem. A scarce type at the MS65 level. The mintmark is lightly repunched north. Ex: *Cincinnati Central States (Heritage, 5/2009)*, lot 3396, which realized \$1,265. NGC ID# 26H7, PCGS# 9357

5308 1915-S Panama-Pacific MS65 PCGS. CAC. FS-501. The mintmark is lightly but fairly widely repunched east. Bands of ocean-blue and autumn-gold grace the borders of this coruscating and precisely struck Gem. Smooth save for a tick near Columbia’s front shoulder. NGC ID# 26H7, PCGS# 9357

1920 Pilgrim Commemorative, MS67 Smooth, Lustrous Surfaces

5309 1920 Pilgrim MS67 PCGS. Satiny fields and a superb strike are the hallmarks of this appealing, untuned Superb Gem, one that is remarkably free from the usual distractions — poor strike, bagmarks, reeding marks, slide marks — that are often found on this issue. The cheek of Gov. William Bradford shows a single small tick, visible only under a loupe. But the wonderful strike, with bold peripheral legends on both sides and full masts on the reverse, fully merits the grade. Population: 39 in 67 (4 in 67+), 0 finer (4/13). Ex: *Palm Beach Signature (Heritage, 3/2006)*, lot 1424. NGC ID# 28LC, PCGS# 9359

- 5310 1936-D Rhode Island MS67 PCGS.** Medium gunmetal-blue and caramel-gold toning graces this lustrous, fully struck, and nearly pristine Superb Gem. Certified in a green label holder. Population: 53 in 67 (1 in 67+), 0 finer (4/13).
Ex: Long Beach Signature (Heritage, 3/2003), lot 8980; Baltimore ANA (Heritage, 8/2008), lot 10532, which realized \$1,610. NGC ID# 28LF, PCGS# 9364
- 5311 1936-D Rhode Island MS67 NGC.** The 1936-D Rhode Island half dollar is a low-mintage issue and Superb Gem specimens are rare. This spectacular coin is well-detailed and lustrous, with light lavender and gold toning. Census: 36 in 67, 2 finer (5/13). NGC ID# 28LF, PCGS# 9364
- 5312 1937 Roanoke MS67 PCGS.** An attractive Superb Gem offering a balance of colors with surfaces that are partly pearl-gray but also show substantial gold, orange, rose, blue-green, and sage patina, the last two hues swirling in front of Raleigh's nostrils. Understated luster supplements the eye appeal. PCGS has graded just 14 examples as MS68 or finer (4/13). NGC ID# 28LH, PCGS# 9367
- 5313 1935-S San Diego MS67 PCGS.** An area of reddish-gold and violet patina gravitates to the borders of this Superb Gem, and is slightly deeper in hue on the reverse. The remaining attributes include well struck design elements, pleasing luster, and nicely preserved surfaces. NGC ID# 28LK, PCGS# 9371
- 5314 1935-S San Diego MS67 ★ NGC. CAC.** Collectors may not realize that 20 years later, sculptor Robert I. Aitken revisited his Minerva design for the round and octagonal 1915-S Panama-Pacific fifty dollar gold commemoratives, in the form of the San Diego half dollars, more correctly called the California-Pacific International Exposition halves. This gleaming, untoned Superb Gem more than merits the Star for extra eye appeal. Census: 18 in 67 ★, 2 in 67+, 1 in 67+★, 7 finer (5/13). NGC ID# 28LK, PCGS# 9371
- 5315 1936-D San Diego MS67 PCGS.** The San Diego halves are certainly among the most lustrous in the commemorative series. Each side of this piece shows pale pinkish color with deeper russet and sea-green patina around the margins. A nearly perfect example of this popular issue. Population: 81 in 67 (3 in 67+), 0 finer (5/13). NGC ID# 28LL, PCGS# 9372
- 5316 1936-D San Diego MS67 PCGS. CAC.** A medley of yellow-gold, orange, and soft violet patina bathes the obverse of this Superb Gem while occasional splashes of golden-brown visit the reverse. Lustrous surfaces exhibit well struck design features and are quite well preserved. Population: 81 in 67 (3 in 67+), 0 finer (5/13). NGC ID# 28LL, PCGS# 9372
- 5317 1926 Sesquicentennial MS65 PCGS.** Green-gold and peach peripheral toning is partial on the obverse and near-complete on the reverse. Interiors are lightly patinated pale gray with strong "halo" luster shining through the layers. NGC ID# 28LM, PCGS# 9374
- 5318 1926 Sesquicentennial MS65 PCGS. CAC.** A lustrous Gem displaying a light caramel-gold patina overall, closer examination of Washington's hair reveals tiny splashes of ice-gray, cherry-red, and lime-green color. As on all Sesquicentennial halves, the cheek of Washington displays the texture of the planchet. Only 8 examples have received higher numeric grades from PCGS (5/13). NGC ID# 28LM, PCGS# 9374
- 5319 1935 Spanish Trail MS65 PCGS.** A narrow band of golden-brown toning adorns the margins. Lustrous and sharply struck with a smooth reverse and minor contact on the lower left obverse field. Among the lowest mintage silver commemorative types. Certified in a first generation holder. NGC ID# 28LN, PCGS# 9376
- 5320 1935 Spanish Trail MS65 PCGS.** Satiny and sharply struck with light honey-gold toning. Magnificently preserved. This low mintage type was designed by L.W. Hoffecker, who later became an ANA President. Certified in a green label holder. NGC ID# 28LN, PCGS# 9376

- 5321 1935 Spanish Trail MS66 PCGS.** Rich gray interiors have violet overtones on the obverse and lavender-rose on the reverse. Gold-orange patina occupies the borders. A charming Premium Gem example of this popular issue. NGC ID# 28LN, PCGS# 9376

- 5322 1935 Spanish Trail MS66+ NGC. CAC.** This is an attractive, high-end Premium Gem. Golden-brown toning, along with a few splashes of red highlights, appears primarily at the outer edges of the reverse. Areas of light toning appear at the outer peripheries of the obverse. NGC ID# 28LN, PCGS# 9376

1935 Spanish Trail Half, MS67

- 5323 1935 Spanish Trail MS67 PCGS. CAC.** With just 10,000 pieces coined (plus eight more for assay purposes), the Spanish Trail has one of the lowest mintages of any commemorative design. This soft, frosty Superb Gem has faint champagne toning with a few splashes of darker color. PCGS has only certified two finer examples (5/13). NGC ID# 28LN, PCGS# 9376

- 5324 1936 Texas PDS Set NGC.** The coins display light golden toning and are housed in separate holders bearing consecutive serial numbers. The set includes: **1936 MS67 NGC**, fully struck and pristine save for a fingerprint on the upper left obverse field; **1936-D MS67 NGC, CAC**, the strike is sharp except on the hand of the winged victory; and a **1936-S MS67 NGC, CAC**, immaculate, minor incompleteness of strike on the central reverse. (Total: 3 coins) PCGS# 9389

- 5325 1938 Texas MS67 PCGS. CAC.** Ex: Gutttag Family. From a low distribution figure of only 3,780 pieces, the 1938 Texas commemorative half dollar is seldom encountered at the Superb Gem level. This smooth piece is sharply detailed and lustrous, with delicate olive-green and pearl-gray toning. Population: 48 in 67 (2 in 67+), 1 finer (4/13). NGC ID# 28M2, PCGS# 9394

- 5326 1938 Texas MS67 NGC. CAC.** Butter-gold and lilac shades embrace this lustrous and virtually mark-free Superb Gem. The strike is bold and the eye appeal is exemplary. Certified in a prior generation holder. Census: 46 in 67, 1 finer (5/13). NGC ID# 28M2, PCGS# 9394

- 5327 1938-D Texas MS67 PCGS.** This is an appealing, well-struck Superb Gem example of one of the most ornate designs among the Classic Commemorative Series. Areas of iridescent toning, including a variety of attractive shades of gold, orange, sea-green, and splashes of vibrant red add to the visual allure of this representative. NGC ID# 28M3, PCGS# 9395

- 5328 1938-D Texas MS67 NGC.** The elaborate design detail of this Superb Gem Texas commemorative has received a solid strike. This, along with potent luster and nicely preserved surfaces results in outstanding eye appeal. Census: 93 in 67 (4 in 67+), 3 finer (5/13). NGC ID# 28M3, PCGS# 9395

- 5329 1938-S Texas MS67 NGC. CAC.** The satiny surfaces on this late-series Superb Gem show a thin ring of deep russet peripheral patina on each side, a coin that is virtually pristine and nearly unimprovable. Census: 80 in 67, 1 in 67 ★, 13 finer (5/13). NGC ID# 28M4, PCGS# 9396

- 5330 1938-S Texas MS67 NGC. CAC.** This Superb Gem commemorative displays pleasing luster and occasional traces of soft color. The surfaces on both sides are very well preserved and exhibit sharply struck design elements. Census: 80 in 67, 7 finer (5/13). NGC ID# 28M4, PCGS# 9396

5331 1938-S Texas MS67 NGC. CAC. Whispers of subtle tones of powder-blue, soft violet, and light yellow-gold reside on the lustrous surfaces of this sharply struck Texas commemorative. These attributes along with impeccable preservation yield impressive eye appeal. Census: 80 in 67, 7 finer (5/13). NGC ID# 28M4, PCGS# 9396

5332 1925 Vancouver MS66 PCGS. Areas of toning appear on both sides of this Premium Gem example, with the colors including olive-green and gold. The reverse displays additional colors, among them red, lime-green, and orange. The 1925 Fort Vancouver Centennial half dollars enjoyed a net distribution of 14,994 pieces. They are scarce beyond the MS66 level. NGC ID# 28M5, PCGS# 9399

5333 1925 Vancouver MS66 NGC. Pale golden-lilac toning appears over the satiny surfaces of this highly lustrous and brilliant Premium Gem. A few splashes of deeper gold toning are evident near the border. NGC has only certified 40 finer examples (5/13). NGC ID# 28M5, PCGS# 9399

1927 Vermont Half, MS67 Iridescent Toning

5334 1927 Vermont MS67 NGC. Essentially perfect surfaces appear on this Superb Gem. Even with magnification, the surfaces are exquisite. Both sides have satin luster with brilliant silver shining through the lovely gold and iridescent toning. Census: 17 in 67, 1 finer (5/13). NGC ID# 28M6, PCGS# 9401

5335 1946-S Booker T. Washington MS67 PCGS. Pastel toning on each side features lighter-colored centers producing a "halo" effect, with intermingled hues of powder-gray, pinkish, and bluish tones on surfaces that are essentially unmarked. A beautiful representative of this issue. Population: 86 in 67 (7 in 67+), 1 finer (5/13). NGC ID# 28M9, PCGS# 9406

5336 1946-S Booker T. Washington MS67 PCGS. CAC. Scattered gold, yellow, and green highlights appear on both sides of this lustrous Superb Gem representative. Population: 86 in 67 (7 in 67+), 1 finer (5/13). NGC ID# 28M9, PCGS# 9406

5337 1946-S Booker T. Washington MS67 PCGS. CAC. The portrait on the obverse is echoed by a halo of lighter toning on the reverse, the prevailing iridescence of the pastel sort on both sides. A well-frosted and near-pristine specimen with much eye appeal. Population: 86 in 67 (7 in 67+), 1 finer (5/13). NGC ID# 28M9, PCGS# 9406

5338 1946-S Booker T. Washington MS67 PCGS. CAC. A stunning display of brilliant gold, delicate blue, pale violet, and golden-brown, intermingled on both sides over frosty silver luster. Population: 86 in 67 (7 in 67+), 1 finer (5/13). NGC ID# 28M9, PCGS# 9406

5339 1948-D Booker T. Washington MS67 PCGS. CAC. The 1948-D Booker T. Washington is a better issue due to a low mintage of 8,005 pieces. Reddish-gold, sea-green, and grayish-violet patination is slightly deeper in tone and more extensive on the reverse of this Superb Gem specimen. The well preserved surfaces exhibit nice design detail. Population: 18 in 67, 0 finer (5/13). NGC ID# 28ME, PCGS# 9413

1950-D Booker T. Washington Half, MS67 Well-Defined and Carefully Preserved

5340 1950-D Booker T. Washington MS67 PCGS. CAC. Zones of canary-yellow and pinkish-blue occupy the centers of this Superb Gem, while orange-influenced hues prevail along the borders. Surprisingly little of the customary planchet roughness affects Washington's jaw, and as the grade suggests, the surfaces are free of all but the smallest marks. Population: 9 in 67, 0 finer (5/13). NGC ID# 28ML, PCGS# 9421

1950-D Booker T. Washington Half Superb Gem, Tied for Finest Certified

5341 1950-D Booker T. Washington MS67 NGC. CAC. This impressive Superb Gem has a full strike with exquisite obverse and reverse details. The surfaces are fully brilliant and satiny with no toning on either side. Marks are entirely absent on this beauty. Census: 16 in 67, 0 finer (5/13). NGC ID# 28ML, PCGS# 9421

5342 1950-S Booker T. Washington MS67 NGC. Both sides of this beautifully preserved Superb Gem representative display a strong degree of visual appeal. Rich gleaming luster and brilliant surfaces are among the attributes of this piece. Census: 53 in 67 (1 in 67+), 0 finer (4/13). NGC ID# 28MM, PCGS# 9422

1952 Washington-Carver, Peripherally Toned MS67 Among the Finest Known

5343 1952 Washington-Carver MS67 NGC. A light ring of blue-green and golden-rose surround silvery centers on this attractive Superb Gem, one of the dozen-plus finest certified survivors of this issue. The jugate portraits on the obverse are remarkably abrasion-free, accounting for the grade. Census: 15 in 67, 0 finer (4/13). Ex: ANA Signature (Heritage, 7-8/2008), lot 2596. NGC ID# 28MV, PCGS# 9434

- 5344 1952-D Washington-Carver MS66 PCGS.** Scattered areas of light toning appear on this Premium Gem displaying pleasing luster. An interesting piece of trivia concerning these coins is that Delaware was omitted from the U.S. map. Population: 33 in 66, 0 finer (4/13). NGC ID# 28MW, PCGS# 9435

**1936 Wisconsin Half Dollar, MS68
None Certified Finer at PCGS**

- 5345 1936 Wisconsin MS68 NGC.** This virtually perfect Wisconsin half dollar shows none of the minor contact marks that usually appear in the large open fields of the obverse, reducing many fine coins to "only" Superb Gem status. The design elements are sharply detailed and the lustrous surfaces are accented by shades of lavender and green toning. Census: 24 in 68, 0 finer (5/13). NGC ID# 28N6, PCGS# 9447

COMMEMORATIVE GOLD

- 5346 1903 Louisiana Purchase/Jefferson MS64 NGC.** Peach-gold luster endows this near-Gem gold commemorative, which in conjunction with well struck design elements yields nice eye appeal. From a distribution of 17,500 pieces. NGC ID# 26HA, PCGS# 7443

- 5347 1903 Louisiana Purchase/Jefferson MS65 NGC.** Lustrous peach-gold surfaces offer pleasing eye appeal on this Gem commemorative. This is complemented by nicely struck design elements and the lack of significant marks. NGC ID# 26HA, PCGS# 7443

- 5348 1903 Louisiana Purchase/Jefferson MS66 PCGS.** A gorgeous Premium Gem example of these pieces commemorating the 100th anniversary celebration of Jefferson's Louisiana Purchase. Jefferson's portrait is pristine on this example. A few tiny alloy spots are present. NGC ID# 26HA, PCGS# 7443

- 5349 1903 Louisiana Purchase/Jefferson MS66 NGC,** A pristine sea-green and caramel-gold example, fully struck save for softness on the lower reverse dentils; **1903 Louisiana Purchase/McKinley MS66 NGC,** lustrous and mark-free with a few pinpoint flecks, honey-gold and olive-green with blushes of fire-red on the obverse near the shoulder and bust tip; and **an original gold dollar holder,** a cream-white cardboard box with a plain interior and bottom and gilt Louisiana Purchase Exposition lettering on the top. (Total: 2 coins) NGC ID# 26HA, PCGS# 7443

- 5350 1903 Louisiana Purchase/McKinley MS65 PCGS. CAC.** The 1903 Louisiana Purchase/ McKinley gold dollars were produced in large numbers, but probably only about 17,500 examples were actually distributed. The present coin is an appealing Gem, with lustrous orange-gold surfaces and a sharp strike. NGC ID# 26HB, PCGS# 7444

- 5351 1903 Louisiana Purchase/McKinley MS66 NGC.** The recently assassinated President McKinley appears on the obverse of this gold commemorative issued for the St. Louis World's Fair. Both sides of this Premium Gem are brilliant and lustrous, providing excellent eye appeal. A small lint mark appears below the 03 of the date. NGC ID# 26HB, PCGS# 7444

- 5352 1903 Louisiana Purchase/McKinley MS66+ PCGS.** This is a marvelous high-end Premium Gem featuring highly lustrous yellow-gold surfaces that exhibit sharply struck design elements and is nicely preserved. A short crack extends from between SI in LOUISIANA to the rim. NGC ID# 26HB, PCGS# 7444

**1903 Louisiana Purchase Gold Dollar, MS67
McKinley Obverse**

- 5353 1903 Louisiana Purchase/McKinley MS67 NGC.** An extraordinary Superb Gem, this brilliant yellow-gold McKinley gold dollar has a bold strike with fully lustrous surfaces. The fields are satiny and reflective. A short die crack extends in from the reverse border at 9 o'clock. NGC has only certified four finer examples (5/13). NGC ID# 26HB, PCGS# 7444

**1903 Louisiana Purchase Gold Dollar, MS67
McKinley Portrait**

- 5354 1903 Louisiana Purchase/McKinley MS67 PCGS.** A stunning Superb Gem, this McKinley portrait gold dollar has fully brilliant and highly lustrous yellow surfaces that host faint blue and orange overtones. This is a pristine specimen with a bold strike. Population: 86 in 67, 1 finer (5/13). NGC ID# 26HB, PCGS# 7444

- 5355 1904 Lewis and Clark MS64 PCGS.** A gorgeous apricot-gold example of this early gold commemorative type. Well preserved and highly lustrous with crisply struck motifs and minor blending of impression on the dentils. Certified in a green label holder. NGC ID# 26HC, PCGS# 7447

1904 Lewis and Clark Gold Dollar, MS65

- 5356 1904 Lewis and Clark MS65 PCGS.** With a distribution of 10,025 pieces, the 1904 Lewis and Clark gold dollar is one of the key issues in the gold commemorative series, though not quite as elusive as its 1905 counterpart. This sharply detailed Gem displays lightly marked orange-gold surfaces with hints of lilac and vibrant mint luster. NGC ID# 26HC, PCGS# 7447

- 5357 1915-S Panama-Pacific Gold Dollar MS65 NGC. CAC.** This Gem Pan-Pac gold dollar alternates khaki-gold and yellow-gold to beautiful effect on each side of this piece, complementing surfaces that show no mentionable abrasions and great eye appeal. NGC ID# 26HE, PCGS# 7449

5358 1915-S Panama-Pacific Gold Dollar MS66 NGC. Deep reddish-orange color complements the surfaces that show few marks of any size, large or small, amid intense eye appeal. A great example of this relatively affordable gold commemorative issue. NGC ID# 26HE, PCGS# 7449

5359 1915-S Panama-Pacific Gold Dollar MS66+ PCGS. CAC. Yellow-gold surfaces imbued with hints of red occupy both sides of this MS66+ gold accommodative. This is a sharply struck and nicely preserved specimen. While PCGS has seen over 700 Premium Gems, only nine have received the MS66+ classification. NGC ID# 26HE, PCGS# 7449

5360 1916 McKinley MS64+ PCGS. CAC. A couple of shades of wheat-gold embrace this high-end near-Gem commemorative, being slightly deeper on the reverse. This is a well struck lustrous coin that is minimally marked. NGC ID# 26HF, PCGS# 7454

5361 1916 McKinley MS65 PCGS. A brilliant yellow-gold Gem, this example has the usual satin luster that is normally associated with the McKinley gold dollars of 1916 and 1917. The surfaces are pristine with trivial marks only visible under a loupe. NGC ID# 26HF, PCGS# 7454

5362 1916 McKinley MS65+ PCGS. Sharply struck design elements embolden this high-end Gem commemorative. Its lustrous, yellow-gold surfaces are devoid of mentionable marks. NGC ID# 26HF, PCGS# 7454

5363 1916 McKinley MS66 PCGS. Attractive pumpkin-gold patina endows this lustrous and razor-sharp representative. Even a loupe fails to locate any remotely noticeable imperfections. Encased in a green label holder. NGC ID# 26HF, PCGS# 7454

5364 1916 McKinley MS66+ NGC. A splendid Premium Gem, this 1916 McKinley gold dollar has satiny yellow-gold luster with sharp design motifs and minimal marks on each side. A few tiny copper spots are noted on each side. NGC ID# 26HF, PCGS# 7454

5365 1916 McKinley MS66 ★ NGC. Even a quick glance at this lovely Premium Gem conveys the spectacular eye appeal of this piece. Brilliant surfaces, gorgeous color, rich luster, and a well-executed strike are among the attributes of this representative. To date, this is the sole MS66 example that has earned the ★ designation from NGC (5/13). NGC ID# 26HF, PCGS# 7454

**1916 McKinley Gold Dollar, MS67
Only One Certified Finer**

5366 1916 McKinley MS67 NGC. The McKinley gold dollars were authorized to provide funding for a memorial in Niles, Ohio, the birthplace of the late President. The memorial structure, depicted on the reverse of these gold dollars, was completed in 1915. The property is owned by the National McKinley Birthplace Memorial Association. This Superb Gem shows the usual soft, frosty gold luster and brilliant rose overtones of most surviving examples. NGC has only certified one finer, and PCGS has never certified a better example (5/13). NGC ID# 26HF, PCGS# 7454

1916 McKinley Gold Dollar, MS67+

5367 1916 McKinley MS67+ NGC. Intended to raise funds for the McKinley birthplace memorial in Niles, Ohio, this 1916 and 1917 commemorative gold dollars saw minimal distribution. This extraordinary Superb Gem has splashes of orange and powder-blue on its bright yellow surfaces. Census: 72 in 67 (2 in 67+), 1 finer (5/13). NGC ID# 26HF, PCGS# 7454

5368 1917 McKinley MS65+ PCGS. The lustrous peach-gold surfaces of this high-end Gem gold commemorative display subtle hints of red and exhibit well struck motifs. While PCGS has certified nearly 600 Gems, it has designated only six as MS65+. NGC ID# 26HG, PCGS# 7455

5369 1917 McKinley MS66 PCGS. The light yellow-gold surfaces of this attractive Premium Gem show a few hints of rose, with satiny mint luster and well-detailed design elements. Eye appeal is outstanding. NGC ID# 26HG, PCGS# 7455

5370 1917 McKinley MS66 PCGS. Bright yellow-gold surfaces with softly frosted luster are remarkably clean on the normally abraded portrait of McKinley, separating this piece from most of its cohort. PCGS has seen only 57 submissions numerically finer, some undoubtedly duplications (5/13). NGC ID# 26HG, PCGS# 7455

**1917 McKinley Gold Dollar, MS66
Prooflike Fields**

5371 1917 McKinley MS66 PCGS. CAC. This impressive Premium Gem McKinley gold dollar has brilliant yellow surfaces that host delightful rose and blue toning with hints of pale green. The fields are prooflike, suggesting a strike from dies that had been prepared for proof production. NGC ID# 26HG, PCGS# 7455

**1917 McKinley Dollar, MS66+
Frosty and Lustrous**

5372 1917 McKinley MS66+ PCGS. CAC. The 1917 McKinley Memorial gold dollar is considerably scarcer at the Premium Gem level of the present piece than the 1916 issue. This MS66+ example is free of all but a couple of minuscule marks, mostly in the obverse field, while the president's profile is quite clean. The orange-gold surfaces are thoroughly lustrous, although a tiny dark toning fleck appears at 2 o'clock on the obverse rim. NGC ID# 26HG, PCGS# 7455

5373 1922 Grant No Star MS65 PCGS. This impressive Gem shows sharply detailed design elements and vibrant mint luster on the unmarked yellow-gold surfaces. A few hints of rose enhance the considerable appeal. NGC ID# 26HJ, PCGS# 7458

5374 1922 Grant No Star MS65+ PCGS. Captivating luster adorns the yellow-gold surfaces of this high-end Gem Grant commemorative and a well directed strike delivers strong definition to the design elements. Both sides yield pleasing eye appeal. NGC ID# 26HJ, PCGS# 7458

5375 1922 Grant No Star MS66 PCGS. The Grant gold dollar, marking the centennial of the late President's birth, exists in two variants, with or without a star on the obverse. This Premium Gem is the No Star variety. Both sides exhibit brilliant light yellow surfaces with satin luster and exceptional eye appeal. NGC ID# 26HJ, PCGS# 7458

5376 1922 Grant With Star MS64 NGC. A beautiful peach-gold example of this Laura Gardin Fraser design. The fields are pristine. Two prominent slender die cracks on the reverse may be of interest to the specialist, as the cataloger cannot recall another with those cracks. Encapsulated in a former generation holder. NGC ID# 26HH, PCGS# 7459

5377 1922 Grant With Star MS65 NGC. Lustrous yellow-gold surfaces exhibit sharply struck design motifs. Just a few light marks might preclude a higher grade. This is a great coin for a high-grade type collection. NGC ID# 26HH, PCGS# 7459

5378 1922 Grant With Star MS65 NGC. The lustrous surfaces of this Gem display well struck design elements and attractive yellow-gold color. This is a well preserved example that will fit nicely in a high-grade gold commemorative set. NGC ID# 26HH, PCGS# 7459

**1922 Grant Gold Dollar, MS66
With Star Obverse, Cracked Reverse**

5379 1922 Grant With Star MS66 PCGS. CAC. Prior to the modern commemorative era that began in 1982, Laura Gardin Fraser, the designer of the Grant gold dollar, was the only woman to design any U.S. gold piece. Two varieties of her design were created, one with and the other without a star above GRANT, and the star on this variety signifies absolutely nothing. This sharply struck yellow-gold Premium Gem is a lovely example with pristine surfaces. A tiny die crack at 2:30 is seen on the reverse. NGC ID# 26HH, PCGS# 7459

**1922 Grant With Star Gold Dollar
Brightly Lustrous MS66+**

5380 1922 Grant With Star MS66+ PCGS. CAC. Pale golden surfaces have a touch of green on the reverse with a more canary-accented obverse. Intricate detail on Grant's hair suggests an above-average strike on this With Star example, and the all-around preservation is excellent even by Premium Gem standards. Brightly lustrous, a great collector coin. NGC ID# 26HH, PCGS# 7459

**1926 Sesquicentennial Quarter Eagle
MS65+ With Rolling Luster**

5381 1926 Sesquicentennial MS65+ PCGS. CAC. Rich orange-gold luster rolls in cartwheels across this Sesquicentennial quarter eagle, which goes beyond the MS65 designation to score a coveted Plus from PCGS. Beyond the noteworthy preservation, the strike is pleasing, and even critical coin connoisseurs would be hard-pressed to find a better coin in the grade range. NGC ID# 26HL, PCGS# 7466

MODERN ISSUES

5382 1984-D Olympic Gold Ten Dollar PR70 Deep Cameo PCGS. The 1984-PDSW ten dollar Olympic gold issues ushered in the modern era of gold commemorative coinage. This low-mintage 1984-D is one of only 40 at the perfect PR70 Deep Cameo level at PCGS, an optimally reflective coin (5/13). NGC ID# 28PE, PCGS# 9615

5383 2000-W Library of Congress Bimetallic Ten Dollars MS70 NGC. A first in American numismatics was the 2000-W bimetallic Library of Congress design, making it today a key to the series. This MS70 example will fit nicely alongside an MS70 Jackie Robinson. NGC ID# 28V5, PCGS# 9784

5384 2000-W Library of Congress Bimetallic Ten Dollars MS70 PCGS. The 2000-W Library of Congress ten dollar commemorative is the first gold/platinum bimetallic coin ever issued by the United States, with a mintage of just 6,683 pieces. The flawless surfaces and full strike attest to the perfection of this specimen. NGC ID# 28V5, PCGS# 9784

5385 2000-W Library of Congress Bimetallic Ten Dollars MS70 PCGS. Gold on the outside, platinum on the inside, and flawless regardless of metal, this bimetallic ten dollar comes from the Mint State issue. It was not popular at the time of release but is much more desirable today. NGC ID# 28V5, PCGS# 9784

5386 2001-W Capitol Visitor's Center Gold Five Dollar MS70 NGC. The Uncirculated 2001-W Capitol Visitor Center gold five is always in demand due to its limited mintage of 6,761 pieces. This is a technically flawless example of a simple-but-effective design from former Chief Engraver Elizabeth Jones. NGC ID# 28VB, PCGS# 9792

5387 2008-W Jackson's Liberty Half-Ounce Gold Ten Dollar MS70 PCGS. Rachel Jackson, Andrew Jackson's wife, died after her husband was elected President but before his inauguration. This half-ounce gold piece in Uncirculated format shows Jackson's Liberty in smooth, even yellow shadings.
From The Twilight Collection. NGC ID# 28ZY, PCGS# 395700

5388 2008-W Jackson's Liberty Half-Ounce Gold Ten Dollar PR70 Deep Cameo PCGS. As Andrew Jackson was a widower in the White House, his "First Spouse" coin shows a Capped Bust of Liberty instead of Rachel Jackson. This Deep Cameo specimen of the type was given a perfect grade by PCGS. Population: 89 in 70 Deep Cameo (4/13).
From The Twilight Collection. PCGS# 395708

5389 2008-W Van Buren's Liberty Half-Ounce Gold Ten Dollar MS70 PCGS. The Liberty First Spouse ten dollar gold pieces form an interesting collecting subset of the entire series, with the "circulation strike" coins generally lower-mintage than the proofs. This perfect example of course reflects the Christian Gobrecht Seated Liberty design of 1836 and after. Martin (or Maarten) van Buren, a native Dutch speaker who grew up in Kinderhook, New York, took office as president in 1837; he became a widower upon the death of his wife in 1819 and never remarried.
From The Twilight Collection. NGC ID# 2922, PCGS# 395702

5390 2008-W Van Buren's Liberty Half-Ounce Gold Ten Dollar PR70 Deep Cameo PCGS. After the death of Hanna Hoes Van Buren, Martin Van Buren never remarried. Though his daughter-in-law Angelica Singleton Van Buren served as White House hostess during much of his presidency, it is Van Buren's Liberty who appears on his corresponding First Spouse coin. This is a perfect proof example with exacting contrast. Population: 93 in 70 Deep Cameo (4/13).
From The Twilight Collection. PCGS# 395710

5391 2009-W Julia Tyler Half-Ounce Gold Ten Dollar MS70 PCGS. This half-ounce piece of satiny perfection waltzed its way to a perfect grade from PCGS. Only 24 at the time of her marriage to the widower President John Tyler, Julia Tyler was among the youngest Presidential spouses.
From The Twilight Collection. NGC ID# 2928, PCGS# 404568

5392 2009-W Julia Tyler Half-Ounce Gold Ten Dollar PR70 Deep Cameo PCGS. John Tyler was the first of two Presidents to remarry while in office. This flawless proof depicts his second First Lady, Julia Tyler, in portrait on the obverse and dancing with her much older husband on the reverse. Population: 75 in 70 Deep Cameo (4/13).
From The Twilight Collection. PCGS# 404579

5393 2009-W Margaret Taylor Half-Ounce Gold Ten Dollar PR70 Deep Cameo PCGS. A technically perfect proof of the Margaret Taylor half-ounce gold issue, commemorating the second First Lady to be widowed while her husband was in office. Contrast is absolute. Population: 65 in 70 Deep Cameo (4/13).
From The Twilight Collection. PCGS# 404583

MODERN BULLION COINS

5394 1991 Tenth-Ounce Gold Eagle MS70 NGC. This perfect proof survivor is from the low original mintage of 165,200 pieces, one of the lowest in the series. Every bit as flawless as expected. NGC ID# 26L2, PCGS# 9848

5395 1991-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS. Deep gold-on-jet-black contrast ensures the allure of this perfect-grade proof example, although the one ounce of gold helps as well.
From The Twilight Collection. NGC ID# 28Z2, PCGS# 9855

5396 1991-W One-Ounce Gold Eagle PR70 Ultra Cameo NGC. Exquisite field-motif contrast and design detail reach out to the observer of this Cameo \$50. The surfaces on both sides are fully pristine. NGC ID# 28Z2, PCGS# 9855

5397 1992-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS. Bold gold-on-black contrast and unimprovable surfaces endow this \$50 Deep Cameo gold Eagle. The year 1992 was the first one in which the Mint reverted to Arabic numerals from Roman, making this a first-year subvariety. NGC ID# 28Z3, PCGS# 9865

5398 1993-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS. Flawless mirrors offer excellent contrast with the decisively struck and richly textured devices on this mid-date American Eagle one-ounce gold proof. From an original mintage of 34,389 pieces. Population: 80 in 70 Deep Cameo (5/13). NGC ID# 28Z5, PCGS# 9875

1995-W American Eagle Set Popular Tenth Anniversary Issue Featuring One-Ounce Silver Key

5399 1995-W Tenth Anniversary Proof American Eagle Set Featuring One Ounce Silver in Government Packaging. The star of this lot is the 1995-W one ounce silver, key date in its series, with excellent preservation and minimal spotting. The four gold proof American eagles, tenth-ounce, quarter-ounce, half-ounce, and one ounce sizes, add significant value to the set as a whole. Offered in the original government packaging with cardboard outer box. (Total: 5 coins)

5400 1997-W One-Ounce Platinum Eagle PR70 Deep Cameo PCGS. The one-ounce proof Platinum American Eagles debuted with the reverse they shared with their fractional counterparts, a simple soaring eagle above an abstracted sun and ground. The holder has a few minor scuffs, but these should not be taken as damage to a technically flawless coin.
From The Twilight Collection. NGC ID# 293M, PCGS# 9751

5401 1998-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS. A perfect \$50 proof gold eagle with luminous devices, mirrored fields, and flawless features. One of only 90 examples given the grade of PR70 Deep Cameo at PCGS (5/13). NGC ID# 28ZA, PCGS# 9938

5402 1999-W Quarter-Ounce Gold Eagle — Struck From Unfinished Proof Dies — MS69 NGC. A modern mint blunder, the 1999-W gold coins were supposed to have been struck only in proof format. These eagles were struck from unfinished proof dies, showing a hybrid appearance. This piece is a couple of tiny field ticks away from perfection. NGC ID# 26MG, PCGS# 99942

5403 1999-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS. This technically perfect 1999-W one-ounce gold coin offers stunning contrast between the lustrous devices and fully mirrored fields. The aesthetic appeal is impossible to deny. Population: 94 in 70 Deep Cameo (5/13). NGC ID# 28ZB, PCGS# 9946

5404 1999-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS. A technically perfect one-ounce gold coin, this piece offers impressive contrast between the lustrous devices and deeply mirrored fields. From a population of 31,427 pieces. Population: 94 in 70 (5/13). NGC ID# 28ZB, PCGS# 9946

5405 1999-W One-Ounce Platinum Eagle PR70 Deep Cameo PCGS. Second in the Vistas of Liberty series, featuring a reverse showing an eagle overflying southeastern wetlands. The surfaces are pristine, and a full strike and magnificent white-on-black contrast contribute further to the eye appeal.
From The Twilight Collection. NGC ID# 293P, PCGS# 99776

- 5406 2002 Silver Eagle MS70 PCGS.** A thoroughly frosted and completely untoned example of the “circulation strike” Eagle from 2002, this perfect example is one of only 45 such at PCGS out of the original mintage exceeding 10 million coins (5/13). *From The Twilight Collection.* NGC ID# 26K5, PCGS# 9959
- 5407 2003-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS.** Exceptional detail and bold contrast are among the most important features of this gleaming, perfect coin. From a mintage of 28,344 pieces. NGC ID# 26PU, PCGS# 99968
- 5408 2004-W Quarter-Ounce Platinum Eagle PR70 Deep Cameo PCGS.** This 2004-W quarter-ounce proof saw only 5,193 pieces sold. Outstanding white-on-black contrast and perfect surfaces adorn both sides. NGC ID# 293A, PCGS# 921105
- 5409 2004-W Half-Ounce Platinum Eagle PR70 Deep Cameo PCGS.** One of only 5,063 proofs for this half-ounce issue, and technically perfect according to PCGS. Close inspection corroborates the assessment of that service. Additionally, the frost-white on black is simply stunning. NGC ID# 293J, PCGS# 921106
- 5410 2004-W One-Ounce Platinum Eagle PR70 Deep Cameo PCGS.** On the reverse of this year’s one-ounce platinum American Eagle proofs, an eagle perches at the feet of an allegorical figure. This specimen offers untoppable contrast and preservation. *From The Twilight Collection.* NGC ID# 293U, PCGS# 921107
- 5411 2005-W One-Ounce Platinum Eagle PR70 Deep Cameo PCGS.** The year of the “cornucopia eagle” reverse for the Platinum American Eagles, represented here by a technically perfect one-ounce proof. A magnificent modern specimen. *From The Twilight Collection.* NGC ID# 293V, PCGS# 921111
- 5412 2006-W One-Ounce Gold Eagle MS70 PCGS.** The “burnished” member of the popular three-piece American Gold Eagle sets, which along with their silver counterparts created such a sensation on their debut in 2006 with the proof and reverse proof issues alongside. This is the “business strike” 2006-W, in certified perfect condition. PCGS# 89989
- 5413 Three-Coin American Eagle 20th Anniversary 2006-W Gold Set in Original Government Packaging.** Includes three forms of the 2006-W one-ounce gold American Eagle: **Uncirculated finish, proof, and reverse proof.** All pieces are in their original Mint capsules and housed in the black plastic case of issue. Comes with outer box (slit on one side for easy access) and slipcover. (Total: 3 coins)
- 5414 2006-W One-Ounce Gold Eagle Reverse Proof PR70 PCGS.** The reverse proof American Gold and Silver Eagles came in three-piece sets with a regular proof and a burnished circulation strike coin, creating a sensation when they were released in 2006. This reverse proof offers a stunning black-on-yellow appearance. *From The Twilight Collection.* NGC ID# 28ZH, PCGS# 89994
- 5415 2007-W Half-Ounce Platinum Eagle, Frosted FREEDOM PR70 Deep Cameo PCGS.** A perfect proof with extraordinary contrast, this piece is minted in the reverse proof style, with frosted fields and mirrored devices. Population: 1 in 70 Deep Cameo (5/13). PCGS# 506625
- 5416 2008-W Reverse of 2007 Silver Eagle, First Strike MS70 PCGS.** The popular error featuring the Reverse of 2007, with the plain U in UNITED, a perfect and untoned example. Given the many collectors who pursue the American Silver Eagles, these coins usually see far more bidders than available coins. In a custom PCGS First Strike holder. *From The Twilight Collection.* PCGS# 396437
- 5417 2008-W Tenth-Ounce Gold Buffalo, First Strike MS70 PCGS.** One-tenth ounce of pure gold perfection. The intrinsic appeal of the four 2008-W issues is augmented by the demand from series completists for the fractional pieces as well as the fifty dollar unit. PCGS# 399927
- 5418 2008-W Tenth-Ounce Gold Buffalo, First Strike PR70 Deep Cameo PCGS.** The 2008-W Buffalo gold bullion pieces were the only year that the Mint made the fractional issues. This perfect-grade five dollar (tenth-ounce) proof is one of the finest certified at PCGS from the 18,884 reportedly struck. PCGS# 399933
- 5419 2008-W Quarter-Ounce Gold Buffalo MS70 PCGS.** .9999 Fine. This quarter-ounce American Buffalo has medium-yellow surfaces that are rugged and unmarked. Housed in a PCGS “Black Diamond” holder. *From The Twilight Collection.* PCGS# 399928
- 5420 2008-W Quarter-Ounce Gold Buffalo, First Strike MS70 PCGS.** The fractional coins of this year were a one-off, but the one-ounce pure-gold Buffalos are a staple of modern gold bullion collecting. This is a medium yellow-gold example with the pristine surfaces demanded of the grade. In a Black Diamond PCGS holder. PCGS# 399929
- 5421 2008-W Quarter-Ounce Gold Buffalo, First Strike PR70 Deep Cameo PCGS.** .9999 Fine. The fields have perfect textured reflectivity surrounding sharply struck devices blanketed in gold-frost. PCGS-designated as a First Strike. PCGS# 399935
- 5422 2008-W Quarter-Ounce Gold Buffalo, First Strike PR70 Deep Cameo PCGS.** The Mint reportedly struck 13,125 examples of this quarter-ounce gold fractional Buffalo. A perfect proof representative of the issue. PCGS# 399935
- 5423 2008-W Half-Ounce Gold Buffalo MS70 PCGS.** From the first year of the gold Buffalo series, and at least so far, the only date issued in fractional ounce format. Thus the 2008-W half-ounce gold Buffalo qualifies as a single-year type. The present specimen is intricately defined and exhibits pristine, satiny surfaces. *From The Twilight Collection.* PCGS# 399930

**2008-W Buffalo Half Ounce Gold
First Strike, PR70 Deep Cameo**

- 5424 2008-W Half-Ounce Gold Buffalo, First Strike PR70 Deep Cameo PCGS.** This “four-nines” fine American Buffalo half-ounce gold piece, borrowing the iconic 20th century design of the Buffalo nickel, is a perfect brilliant proof struck in bright yellow gold with extraordinary contrast between the highly lustrous devices and the deeply mirrored fields. PCGS# 399937
- 5425 2008-W Half-Ounce Gold Buffalo, First Strike PR70 Deep Cameo PCGS.** Luminous motifs provide outstanding contrast with the reflective yet textured fields. The strike is exacting and the preservation is immaculate. A perfect representative of the modern bullion issue. PCGS# 399937
- 5426 2008-W Gold American Buffalo Four-Piece Uncirculated Set in Government Packaging.** Fractional gold American Buffalo bullion coins were struck only in 2008. This four-piece set in Uncirculated format, housed in the government capsules and packaging, includes the **tenth-ounce, quarter-ounce, and half-ounce** sizes as well as the familiar **one ounce** that was struck before and after that year. (Total: 4 coins)

**2008-W One-Ounce Gold, PR70 Deep Cameo
First Strike Buffalo**

5427 2008-W One-Ounce Gold Buffalo, First Strike PR70 Deep Cameo PCGS. A perfect brilliant Deep Cameo proof, this First Strike Buffalo exhibits brilliant yellow color with extraordinary contrast resulting from the deeply mirrored fields framing the frosty and highly lustrous devices. A numismatic masterpiece in the form of a modern bullion coin. PCGS# 393330

5428 2008-W Gold American Buffalo Four-Piece Proof Set in Government Packaging. The only year of four denominations of gold American Buffalo, 2008, saw the release of this W-mintmarked set. Included are the **tenth-ounce**, **quarter-ounce**, and **half-ounce** denominations exclusive to 2008, as well as the **one ounce** coins seen before and after. (Total: 4 coins)

5429 Four-Piece 2008-W Gold Buffalo Proof Set PR70 Deep Cameo PCGS. Included are: \$5 **tenth-ounce** PR70 Deep Cameo PCGS; \$10 **quarter-ounce** PR70 Deep Cameo PCGS; \$25 **half-ounce** PR70 Deep Cameo PCGS; and a \$50 **one-ounce** PR70 Deep Cameo PCGS. All coins are flawless and fully struck with radiant motifs and flashy textured fields. 2008 was the only year the Mint produced four-piece American Buffalo fractional coin sets. *From The Twilight Collection.* (Total: 4 coins) PCGS# 393329

5430 Four-Piece 2008-W Gold Buffalo Proof Set PR70 Deep Cameo PCGS. Included are: \$5 **tenth-ounce** PR70 Deep Cameo PCGS; \$10 **quarter-ounce** PR70 Deep Cameo PCGS; \$25 **half-ounce** PR70 Deep Cameo PCGS; and a \$50 **one-ounce** PR70 Deep Cameo PCGS. An immaculate and needle-sharp quartet with frosty motifs and sparkling fields. The \$5, \$10, and \$25 Buffalo denominations were coined only in 2008 due to low Mint sales. *From The Twilight Collection.* (Total: 4 coins)

5431 2008-W One-Ounce Platinum Eagle, First Strike PR70 Deep Cameo PCGS. Technically flawless with platinum-ice devices and gleaming fields. The 2008-W Platinum American Eagle proofs complete the "Branches of Government" triplet with the Judicial branch. *From The Twilight Collection.* PCGS# 393093

5432 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS69 NGC. The ever-popular tribute to Augustus Saint-Gaudens. This Ultra shows typical yellow-gold, pristine surfaces and in housed in the custom NGC holder designed specifically for the issue. One ounce of pure .999 fine gold. NGC ID# 26S4, PCGS# 407404

5433 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS69 PCGS. The reflectivity on this 2009 Ultra High Relief twenty comes close to Prooflike levels, just as the surface preservation approaches perfection. Gorgeous sculptural detail. NGC ID# 26S4, PCGS# 407404

5434 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS69 PCGS. Struck in 2009 as a reprise of the 1907 variant of the double-thick twenty dollar designed by Augustus Saint-Gaudens, these coins were an immediate hit with collectors and remain so today. Just a hair from perfection, this magnificent MS69 representative is fully struck and brightly lustrous. NGC ID# 26S4, PCGS# 407404

5435 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 NGC. This is a technically flawless and aesthetically unsurpassable representative of this modern Mint rendition of the classic Saint-Gaudens design in Ultra High Relief. NGC ID# 26S4, PCGS# 407404

5436 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS. An utterly flawless rendition of the popular Ultra High Relief twenty dollar coin from 2009, exactly struck and perfectly beautiful. NGC ID# 26S4, PCGS# 407404

5437 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS69 Prooflike NGC. The concave fields are flashy and flawless on this wonderful example. A sharp strike and rich sun-gold color add to the eye appeal. These pieces were struck with the diameter of a ten dollar eagle but on a double-thick flan and were inspired by the Judd-1917 pattern held by the Smithsonian. PCGS# 506602

**2012-W One-Ounce Platinum American Eagle
'Common Defense,' PR70 Deep Cameo**

5438 2012-W One-Ounce Platinum Eagle PR70 Deep Cameo PCGS. The 2012-W One-Ounce Platinum American Eagle's theme was "To Provide for the Common Defense," fourth of six concepts from the Preamble to the Constitution, and a Revolutionary War-era book-and-rifle-toting minuteman appears on the reverse. The contrast is as perfect as the surface preservation. NGC ID# 2U2H, PCGS# 515152

COINS OF HAWAII

5439 1847 Hawaii Cent AU58 NGC. M. 2CC-2. Crosslet 4, 15 berries. A sharply struck example with medium to deep brown toning. A couple of inconspicuous spots are on the reverse near 3:30 and between the ER in HANERI. Struck for the Kingdom of Hawaii in Attleboro, Massachusetts. PCGS# 10965

5440 1883 Hawaii Quarter MS64 NGC. A splendid Choice Mint State example of the popular 1883 Hawaiian coinage, struck at the San Francisco Mint. The quarter dollar is clearly the most plentiful of the four denominations, and it is popular with type collectors. This piece is brilliant and lustrous with no evidence of toning on either side. PCGS# 10987

5441 (1860) Hawaii Waterhouse Token — Rim Damage — PCGS Genuine Secure. VF Details. Medcalf 2TE-1. Honolulu merchant John T. Waterhouse issued the earliest known Hawaiian tokens. Struck in soft pewter, the Waterhouse token is "virtually impossible to find above EF condition," per Medcalf. The present slate-gray example has lumpy rims but is no more than typically abraded for the variety. Listed on page 410 of the 2014 *Guide Book*. PCGS# 600500

5442 1871 Hawaii Wailuku Plantation Token, 12 1/2 Cents VF20 PCGS Secure. Medcalf 2TE-2. Narrow Starfish. The Wailuku Plantation grew cane sugar and was owned and operated by American businessmen. The 1871 tokens were struck at a blacksmith shop on Maui. The present chocolate-brown piece has an uneven strike but is surprisingly unabraded given its territorial service. Listed on page 410 of the 2014 *Guide Book*. Population: 5 in 20, 8 finer (5/13). PCGS# 600503

**1880 Wailuku Half Real Token, Medcalf 2TE-4
AU Details, No Significant Abrasions**

- 5443** 1880 Wailuku Half Real — Environmental Damage — PCGS Genuine Secure. AU Details. Medcalf 2TE-4 Rose-brown surfaces go violet at parts of the margins, more visibly on the obverse, where environmental damage has occurred. Otherwise this is a lightly worn and pleasing “half real” (6 1/4 cents) token from the Wailuku plantation with few significant abrasions. Listed on page 410 of the 2014 *Guide Book*. PCGS# 600509

**1879 T. Hobron 12 1/2 Cent Token, AU55
High-Grade Example of Medcalf 2TE-8**

- 5444** 1879 T. Hobron AU55 PCGS Secure. Medcalf 2TE-8. A pleasing Choice AU example of this Thomas Hobron railroad token valued at one rial or 12 1/2 cents. Surfaces are smooth, rich brown with sage and mushroom overtones as well as glimmers of mahogany on the R.R. / 1879 side and peripheral patches of deep hue on the T.H.H. side. Listed on page 410 of the 2014 *Guide Book*. PCGS# 600515

GSA DOLLARS

**1878-CC Dollar, GSA Soft Pack, MS65
VAM-2A, Doubled LIBERTY**

- 5445** 1878-CC Soft Pack MS65 NGC. VAM-2A, R.5. LIBERTY is die doubled and a large die chip is on Liberty's nose. The VAM variety is undesignated by NGC. This lustrous and crisply struck Carson City dollar displays a brief arc of autumn-brown toning on each side. Undoubtedly rare in the present quality within a soft pack holder. PCGS# 407080
- 5446** 1881-CC MS65 NGC. This brilliant, nicely struck, and low mintage Carson City Gem has booming luster and an essentially pristine reverse. The cheek and neck display only wispy grazes. No box or certificate is included. PCGS# 407126
- 5447** 1882-CC MS66+ NGC. This well struck and high grade GSA type coin exhibits vibrant luster and remarkable preservation. A wisp of tan toning denies full brilliance. A box is included (with top and bottom detached) but no certificate is present. PCGS# 407134
- 5448** 1885-CC MS65 NGC. Minimally toned with gently frosted devices and subtle cartwheel luster. This Gem, band-certified in the black GSA holder of issue, also comes with a 1974-dated mailing box and certificate number 85005433. PCGS# 407160
- 5449** 1890-CC MS62 NGC. Lustrous and lightly toned with a nice strike and a well preserved reverse. The obverse displays delicate grazes associated with the grade. 1890-CC is a better date among GSA Carson City dollars. A box and certificate accompany the lot. PCGS# 407198
- 5450** 1890-CC MS62 NGC. A brilliant, lustrous, and boldly struck silver dollar. The fields are only lightly abraded and the portrait marks are moderate for the designated grade. The 1890-CC is scarce in a GSA holder. No box or certificate is included. PCGS# 407198
- 5451** 1900-O/CC Soft Pack XF40 NGC. VAM-8. A Top 100 Variety. An early die state without the break inside the G in GOD. A cream-gray representative that displays traces of luster in protected areas.

CERTIFIED MODERN PROOF SETS

1937 NGC-Certified Five-Piece Proof Set, PR63-67

5452 1937 Proof Set PR63-67 NGC. Included are:

1937 Cent PR63 Red NGC. Unusually nice surfaces for the grade, just limited by a few small carbon flecks and fingerprint on the obverse.

1937 Nickel PR67 NGC. A magnificent deeply reflective proof with barely a hint of color and just a couple of microscopic specks of carbon on the reverse.

1937 Dime PR65 NGC. Brilliant and deeply mirrored, the reverse shows just a bit of contrast between the fields and devices.

1937 Quarter PR63 NGC. Each side is brilliant, but we only see light hairlines on the obverse.

1937 Half Dollar PR65 NGC. Struck from heavily lapped dies, with the resultant attenuation of the rays of the sun. Brilliant throughout and problem-free. (Total: 5 coins)

5453 Five-Piece 1939 Proof Set PR64 to PR66 PCGS. All but one of the holders have consecutive serial numbers. The set includes: **cent PR64 Red**, a contact-free apricot-gold near-Gem with minor peripheral carbon; **Reverse of 1938 nickel PR65**, fully struck and satiny, a faint spot above Jefferson's queue; **dime PR66**, intricately struck and flawless with dappled tan-gold patina; **quarter PR65**, well struck, lightly patinated; and a **half dollar PR65**, satiny and well struck, light chestnut-gray toning, mint re-engraved AW monogram. (Total: 5 coins)

PROOF SET

5454 Five-Piece 1940 Proof Set in Custom Plastic Case. Five coins, representing all proof denominations of 1940, in a screw-held custom plastic case. The **cent** is cleaned, while the **nickel**, **dime**, **quarter**, and **half dollar**, all approximately PR64 to PR66, show moderate to heavy patina. Personal inspection recommended. **Sold as is, no returns.** (Total: 5 coins)

CERTIFIED MODERN PROOF SETS

5455 Five-Piece 1941 Proof Set PR65 PCGS. The coins are separately housed in PCGS holders. The set includes: **cent PR65 Red**, a peach-red Gem with exemplary surfaces; **nickel PR65**, fully struck and essentially brilliant; **dime PR65**, a razor-sharp specimen, lightly toned save for a few dabs of dark patina; **quarter PR65**, brilliant, flashy, and beautiful; and a **half dollar No AW PR65**, smooth and fully struck, lightly variegated ice-blue and pale gold toning, no designer's initials. (Total: 5 coins)

5456 Five-Piece 1941 Proof Set PR65 to PR66 PCGS. Housed in separate PCGS holders. The set includes: **cent PR65 Red**, bands of color deepen left to right from wheat-gold and orange to ruby-red; **nickel PR66**, needle-sharp strike, light tan toning, a few flecks; **dime PR65**, lovely cherry-red, sea-green, and lemon-gold patina, fully struck; **quarter PR65**, honey-gold toning, minor carbon; and a **No AW half dollar PR65**, intricately struck and essentially brilliant. (Total: 5 coins)

5457 Six-Piece 1942 Proof Set PR64 to PR65 PCGS. The holders possess consecutive serial numbers. The set includes: **1942 cent PR64 Red and Brown**, void of carbon, fire-red and olive-gold hues; **1942 Type One nickel PR65**, sea-green and peach-gold alternate; **1942-P Type Two nickel PR65**, brilliant and razor-sharp; **1942 dime PR65**, a pearl-white gem with softly defined central bands; **1942 quarter PR65**, glimpses of powder-blue and tan-brown toning; and a **1942 half dollar PR64**, stone-white and flashy, superior for the grade. (Total: 6 coins)

5458 Six-Piece 1942 Proof Set PR64 to PR66 NGC. Both nickel types are included. Separately housed in holders with consecutive serial numbers. The set contains: **1942 cent PR64 Red**, an orange-gold near-Gem with a few specks beneath the stem of the right wheat ear; **1942 Type One nickel PR66**, razor-sharp and immaculate; **1942-P Type Two PR65**, brilliant and exemplary; **1942 dime PR65**, untuned and coruscating, a lovely Gem; **1942 quarter PR66**, a pristine white beauty; and a **1942 half dollar PR65**, stone-white and exquisite with moderate but undesigned contrast. (Total: 6 coins)

5459 Six-Piece 1942 Proof Set PR64 to PR65 PCGS. Four of the coins have consecutive serial numbers. The set includes: **1942 cent PR64 Red**, pumpkin-gold with areas of lime, orange, and cherry-red, a few specks; **1942 Type One nickel PR65**, steel-gray overall with chestnut-tan undertones; **1942-P Type Two nickel PR64**, fully struck, lightly toned, a few glimpses of steel-gray on the reverse; **1942 dime PR65**, apricot and lilac shades, crisply struck; **1942 quarter PR64**, satiny and lightly toned, high-end; and a **1942 half dollar PR64**, nicely struck, a hint of golden patina. (Total: 6 coins)

5460 Six-Piece 1942 Proof Set PR65 to PR66 NGC. Except for the cent, the holders have consecutive serial numbers. The set includes: **1942 cent PR65 Red**, an orange-red Gem with a few flecks above ONE; **1942 Type One nickel PR66**, pristine and fully struck with rich butter-gold toning; **1942-P Type Two nickel PR66**, intricately struck and lustrous, light golden patina; **1942 dime PR66**, stone-white and immaculate; **1942 quarter PR66**, brilliant and beautiful; and a **1942 half dollar PR65**, a magnificent ice-white Gem. (Total: 6 coins)

ERRORS

1958 Cent on a Silver Dime Blank, MS63

5461 1958 Lincoln Cent — Struck on a Dime Blank — MS63 NGC. The indistinct rims indicate the coin was struck on a blank that never passed through the upset mill. This silver cent is lustrous and well preserved with light olive-gold toning. Despite the undersized flan, the strike is soft only on Liberty's shoulder and the opposite portion of the O in ONE.

1981-D Cent Struck Over a 1981-D Dime, MS63 '11-Cent Piece'

5462 1981-D Lincoln Cent — Struck on a 1981-D Dime — MS63 NGC. Most cent-on-dime double denomination errors come from the Philadelphia Mint, but here is a Denver example. The dime date and mintmark are readable while their cent equivalents are bold. Roosevelt gazes toward 1:30 relative to the portrait of Lincoln. Lustrous with light tan toning.
Ex: Rosemont Central States Signature (Heritage, 4/2011), lot 6156, which realized \$632.50.

**1989 Cent on a 1989-P Dime, MS67
Popular Double Denomination Error**

- 5463** 1989 Lincoln Cent — Struck on a 1989-P Dime — MS67 NGC. Three of the four digits in the cent date are sharp, including the final 9. The dime date and mintmark are clear, and located near Frank Gasparro's initials. Roosevelt gazes southwest relative to the Lincoln Memorial. Brilliant and lustrous with pristine preservation.
Ex: Rosemont Central States Signature (Heritage, 4/2011), lot 6164, which realized \$747.50. NGC ID# 22JB, PCGS# 3077

**1997 Cent Struck Over a 1997-P Dime
MS64, Double Denomination**

- 5464** 1997 Lincoln Cent — Overstruck on a 1997-P Roosevelt Dime — MS64 NGC. The cent date and dime mintmark are clear. The final digit of the dime date is indistinct. The portraits of our wartime leaders overlap, with Roosevelt gazing southwest relative to Lincoln. The flame of the torch is over the east wing of the Lincoln Memorial. NGC ID# 22JW, PCGS# 3145

**1988 Cent, Two-Planchet Bonded Pair
MS66 Red**

- 5465** 1998 Lincoln Cent — Two Planchet Bonded Pair — MS66 Red NGC. 5.0 gm. The typical copper-plated zinc cent weighs 2.5 gm. This remarkable mint error has the steep, even, thimble-like walls associated with the dramatic obverse die cap error. The reverse has a well struck impression of the reverse die, though the copper plating is mostly absent from the margins. The final strike of the obverse die cap bonded with its final mated reverse. The two cents are together because the walls of the reverse cap partly encompass the walls of the obverse cap, and it may also be that the reverse of the obverse cap is fused with the obverse of the reverse cap. (Total: 2 coins)

**2001 Cent Struck Over a
2001-P Dime, MS63**

- 5466** 2001 Lincoln Cent — Struck on a 2001-P Dime — MS63 NGC. Potent luster sweeps across the lightly toned chestnut-gray surfaces. Roosevelt gazes northwest relative to the portrait of Lincoln. The cent date is bold, as is the dime mintmark. Only traces of the dime date are present. The second strike stretched this double denomination piece and exposed a section of the clad layer on the reverse border at 4 o'clock, relative to the cent strike.
Ex: Bellaire Collection, Part Two (Heritage, 4/2006), lot 5276, which realized \$747.50.

**1980-P Nickel Struck Over a 1980 Cent
MS64 Red and Brown**

- 5467** 1980-P Jefferson Nickel — Overstruck on a 1980 Cent — MS64 Red and Brown NGC. The nickel date and mintmark are crisp. The cent date is easily readable, located near the C in FIVE CENTS. Much of the undertype is effaced by the strike though the statue of Lincoln from the Memorial is near Jefferson's ear, surrounded by the columns of that structure. Portions of IN GOD WE TRUST and E PLURIBUS UNUM are absent due to the smaller diameter flan.

Broadstruck 1883-O Silver Dollar, MS62

- 5468** 1883-O Morgan Dollar — Broadstruck — MS62 NGC. Perhaps more accurately called a partial collar error, since the new-style holder shows a narrow band of reeding between 1 and 3 o'clock near the reverse rim. Since the left borders were unrestrained by a collar die, the rims are unusually wide near 9 o'clock on each side. Right-side stars and legends exhibit the stretching toward the rim often seen on broadstrikes. Lustrous with light golden-brown toning and a full strike at the centers. Well preserved aside from a patch of hairlines near the right (facing) wingtip.

- 5469** 1921 Morgan Dollar — Double Struck in Collar — XF45 PCGS. Doubling is visible on Liberty's neck and elsewhere on the obverse, and in the left reverse field, where the eagle's head is visible. Widely rotated between strikes. Lightly circulated with medium intensity gold toning.

Undated Peace Dollar Die Adjustment Strike Great Large-Format Example of the Error

- 5470** Undated Peace Dollar — Die Adjustment Strike — NGC. Die adjustment strikes are test pieces made to check the spacing of dies. Too far apart, and the result is a coin like this, which shows only central images to any significant degree with even those usually weak. The space southeast of the artist's initials might — emphasis on "might" — show the top of a 6. Surfaces are medium-gray with a golden overtone.

Rectangular Strike-Through on a Type Two Bicentennial Ike, MS62

- 5471** 1976 Type Two Bicentennial Dollar — Struck Through Unknown Object — MS62 PCGS. A nearly rectangular object, 20 mm x 7 mm x 1 mm, was struck into the obverse, with the upper left corner near the I in LIBERTY and the lower right corner beneath Ike's ear. The object then separated from the coin, as is usually the case for this error type, leaving behind a corrugated texture within the strike-through. Satiny and unmarked with dusky golden-gray toning.

Flipover Double Strike Denver Eisenhower Dollar Second Strike 90% Off-Center, MS62

- 5472** Undated Denver Mint Eisenhower Dollar — Flipover Double Struck, Second Strike 90% Off Center — MS62 PCGS. Type One Reverse, which implies a 1971 or 1972 striking. The first strike was normal but the coin did not eject completely, instead flipping over and receiving a second impression. The second strike is at 5 o'clock relative to the first strike and overlaps the last two digits of the date. The second strike is 90% off center toward 6 o'clock. The reverse has a few thin test marks.

Ex: *Chicago Signature (Heritage, 8/2011)*, lot 5167, which realized \$1,265. PCGS# 14518

WASHINGTONIA

- 5473** (circa 1850-1858) Manly Medal MS63 Brown NGC. Baker-62B. Bronze, 49 mm. The second obverse variety with different legends than the Baker-61. Boldly struck and satiny. Mahogany-brown persists in design recesses though the high points and open fields are medium brown. A spot on the nose is all that limits the grade.

SO-CALLED DOLLARS

1904 Louisiana Purchase Expo, HK-308 Roosevelt So-Called Dollar, PR63

- 5474** 1904 Louisiana Purchase Exposition President Roosevelt Dollar PR63 NGC. HK-308, R.7. This medal-turn so-called dollar depicts then-President Theodore Roosevelt on the obverse and the Expo's "Hall of Festivals and Central Cascades" on the reverse. Edge-marked "Silber 0.990," the first word being the German for "silver" and the 0.990 possibly meaning 99% fineness, though this is not conclusive. Light hairlines affect surfaces that remain strongly reflective in the fields with rich blue-green toning overall. Listed on page 59 of the second edition of Hibler-Kappen.

- 5475** 1920 Wilson Dollar, Silver AU58 PCGS. HK-449, R.4. Pastel peach-gold and lilac toning is more prominent on the obverse than the reverse. This satiny and nicely struck example is blemish-free and readily collectible. The Manila Mint opened on July 16, 1920. The Wilson obverse was designed by Chief Engraver Morgan.

- 5476** 1920 Wilson Dollar, Bronze MS62 Brown PCGS. HK-450, R.4. This popular variety commemorates the opening of the Manila Mint in the Philippines, at the time a territory of the United States. The obverse depicts a robust Wilson but he was a lame duck in more ways than one. The reverse design was previously used on numerous assay medals. The deep brown surfaces are prooflike and smooth with lavender, lilac, and powder-blue undertones.

**1900 Leshner Dollar, Second Reverse
A.B. Bumstead Type, HK-789
Serial #882, AU58**

- 5477** 1900 Leshner Dollar, A.B. Bumstead Second Reverse #882, AU58 NGC. Zerbe-3, HK-789, R.5. The increasingly popular "Referendum" eight-sided pieces, each labeled at one ounce of silver and a face value of \$1.25, were made by a silver mine owner, Joseph W. Leshner, to promote the use of silver in circulation. Leshner teamed up with grocer A.B. Bumstead for broader distribution in Victor, Colorado, Leshner's hometown. This lightly rubbed example with silver interiors and gold-orange margins is from the Second Reverse and has serial number 882. Listed on page 157 of Hibler-Kappen second edition and page 404 of the 2014 *Guide Book*.

HARD TIMES TOKENS

- 5478** 1837 Liberty - Not One Cent AU55 NGC. Low-27, HT-41, R.7. Though this Hard Times type is plentiful, the present specific die pair, HT-41, is very rare. It is distinguished by two six-pointed stars on the reverse. This dark brown example displays substantial mint gloss. The mildly granular surfaces are smooth save for a few obverse rim marks near 2:30.

**1837 Feuchtwanger Three Cent, HT-262
New York Coat of Arms, AU55**

- 5479** 1837 Feuchtwanger Three Cent, Coat of Arms AU55 PCGS. Low-117, HT-262, R.3. Lewis Feuchtwanger's cent tokens are plentiful, but his various three cent varieties range from scarce to very rare. This smooth dove-gray example is nicely struck and shows scant evidence of wear. The die engraver attempted to enter the New York motto EXCELSIOR on the ribbon between Liberty and Justice, but ran out of room and had to omit the letter R. Listed on page 400 of the 2013 *Guide Book*.

- 5480** 1837 Feuchtwanger Cent MS63 PCGS. CAC. Low-120, HT-268, Breen 6-1, R.1. Dove-gray high points contrast with the blended olive-green and tan-gold fields. Nearly mark-free, though the flan shows granularity (as issued) on the obverse margin between 4 and 6 o'clock. Listed on page 400 of the 2013 *Guide Book*.

CIVIL WAR MERCHANTS

- 5481** 1864 S.P. Sedgwick & Co. Variety Goods, Bloomingdale, IL, MS65 NGC. Fuld-IL65A-2b, R.9. A lovely Gem token with great color and eye appeal, this brass piece exhibits a sharp strike on both sides. The Lincoln reverse displays a slight clockwise rotation. Sherman P. Sedgwick served as postmaster for the Village of Bloomingdale in 1850 and ran the post office out of his drug store located at the northeast corner of Bloomingdale Road and Lake Street. In 1864, he was elected as a Representative to the Illinois State Legislature.

- 5482** 1863 Charles Kolb Restaurant, Newark, NJ — Overstruck on an 1862 Cent — MS64 NGC. Fuld-NJ555B-1do, R.6. This near-Gem retains attractive color and a pleasing appearance. Portions of the text and designs from the host coin remain visible on both sides of this piece. The token is well-struck and exhibits bold detail. Kolb's restaurant was located at 102 Market Street.

- 5483** 1863 Daniel Williams, Grocer, Brooklyn, NY, MS65 NGC. Fuld-NY95F-4b, R.9. A bright, well-preserved, sharply struck example, this rare piece struck in brass has tremendous eye appeal. Areas of doubling are present on both sides. As the token indicates, the store was located at the corner of Court and Warren streets.

- 5484** 1863 Bridgens Metal Tokens & Store Cards, New York, NY — Clipped Planchet — MS62 NGC. Fuld-NY630J-2e, R.7. The obverse is slightly concave and the reverse convex on this sharply struck piece that remains bright, with the clip appearing near 2 o'clock on the obverse. The reverse is rotated clockwise approximately 90 degrees. The Washington reverse, with his portrait and THE WASHINGTON TOKEN text, provides crossover appeal to collectors of Washington material. William Bridgens' work was considered to be of good quality, with his Boy and Dog design used on the reverse of some Atlantic Telegraph-related pieces.

- 5485** 1863 Broas Pie Baker, New York, NY, MS66 NGC. Fuld-NY630M-12b, R.6. An attractive Premium Gem, this is a well-preserved example from a prolific issuer. One of the highlights of this high-grade piece is the beautiful toning. The colors include shades of vibrant orange, golden orange, light sea-green, ice-blue, and plum. A few small alloy spots are present. The coloration adds to the eye appeal of the obverse that is always interesting to study due to the variety of die characteristics present.

- 5486** 1863 Felix Dining Saloon, New York, NY — Overstruck on an 1863 Cent — MS64 NGC. Fuld-NY630W-2do, R.8. Portions of the host coin remain visible on both sides of this near-Gem example, including portions of the shield to the left of the F in FELIX. These pieces are also of interest to collectors who specialize in saloon tokens or examples from Jewish issuers. The Hebrew text on the obverse is well-struck. This piece is bright and attractive and is the variety with the CONSTITUTION AND THE UNION reverse, although a portion of the text from the host coin remains in place of UNION.

- 5487** 1863 John P. Gruber, New York, NY — Overstruck on an 1860 Cent — MS65 NGC. Fuld-NY630AG-1do, R.8. A pleasing Gem example, this token was struck using an 1860 cent as the host coin. Among other indications, an outline of the shield is visible near 12 o'clock on the reverse. Portions of the date are visible near the YO of YORK on the obverse and the date appears to be 1860. The piece is well-struck and retains nice color. A die crack extends from the obverse rim through the H in JOHN to the left side of the scale.

CIVIL WAR PATRIOTICS

- 5488** 1863 Charles A. Luhrs, Pike Slip Shades, New York, NY — Overstruck on an 1857 Flying Eagle Cent — MS63 NGC. Fuld-NY630AR-1do, R.8. The host coin for this piece was an 1857 Flying Eagle cent, with areas of detail from that coin remaining visible on both sides. The 57 from the date appears to the right of the P in PIKE on the reverse when that text is viewed upside down. Kanzinger lists the NY630AR-1do as rarity 8. The token is well-struck and displays a pleasing appearance. Luhrs was a liquor dealer.
- 5489** 1863 Monk's Metal Signs, New York, NY, MS65 NGC. Fuld-NY630BB-7e, R.9. A Gem example struck in white metal, this piece remains brilliant and exhibits bold detail with the exception of Washington's portrait. The tokens from this issuer are listed in *Medallic Portraits of Washington* as well.
- 5490** (1861-65) John Quinn, Grocer, New York, NY, MS62 NGC. Fuld-NY630BG-3b, R.8. Although some doubling is present on the reverse, the obverse of this piece displays multiple strikes, leading to an interesting appearance. Toning is present and includes attractive shades of yellow, gold, red, blue, and green. The reverse is well-struck, with McClellan exhibiting a sharp degree of detail. As stated on the obverse, Quinn's store was located at the corner of 26th Street and Lexington Ave.
- 5491** (1861-65) PH.J. Seiter's Market, New York, NY, MS65 NGC. Fuld-NY630BQ-1d, R.9. A pleasing Gem example of the popular boar's head design, this beautifully struck token displays attractive color and retains plenty of eye appeal. A cud appears at the rim between 12 and 2 o'clock on the obverse. The market was located at 102 Third Avenue.
- 5492** 1863 Peter Warmkessel, New York, NY — Overstruck on an 1863 Cent — MS64 NGC. Fuld-NY630BZ-1do, R.9. Areas of the design from the host coin are visible on both sides of this piece, with all four digits of the date remaining visible. The numbers begin on the reverse between the O and R of YORK and extend to the S in St. Warmkessel's business was established in 1850 and was located at 8 Duane Street. The obverse design was the work of die sinker and engraver Charles D. Horter, located at 178 Williams St.
- 5493** 1863 Fred A. Plum, Goodyear India River Depot, Troy, NY, MS64 NGC. Fuld-NY890C-1h, R.6. Not surprisingly, given the business of the merchant this piece was issued by, this token was struck in rubber. This near-Gem example displays a bold strike, providing a strong level of detail to the text on both sides. The color is an even shade of black. This is a truly lovely example.
- 5494** 1863 F.P. Rogers Milk Cans, Philadelphia, PA — Full Obverse Brockage — MS64 NGC. Fuld-PA750P-4c, R.7. The milk can adds to the charm of these pieces that are especially popular with people who collect based on designs or dairy themes. This is one of eleven dairy-related Civil War tokens. The full obverse brockage adds an additional layer of collectability to this near-Gem example. The piece exhibits a beautifully executed strike.
- 5495** 1864 Peck & Orvis, Druggists, Baraboo, WI, MS64 NGC. Fuld-WI45A-1c, R.9. A token with many desirable attributes, this near-Gem piece was struck in nickel and features a Lincoln reverse. The piece remains brilliant overall, with a few small spots present on both sides. This example displays a sharp strike, with evidence of die rust present at the date. Around the time period when this token was issued, the town experienced an "Indian scare" and a resident named Wiggins spoke to a crowd while standing on a box in front of the Peck & Orvis drugstore.
- 5496** 1863 — Full Obverse Brockage — MS63 Brown NGC. Fuld-6B/6Ba Incuse, R.9. The R.9 rarity level indicates 2 to 4 estimated examples in existence. As the description implies, the obverse is incuse on this lovely piece. Overall pleasing chocolate brown color is present, with die rust evident due to the raised areas on the surface of the reverse. A small piece of white metal, appearing in the right obverse field, was struck into the coin.
- 5497** 1864 Our Army MS66 NGC. Fuld-47/332d, R.8. Listed as rarity 8, indicating 5 to 10 known examples, this well-preserved token was struck in copper-nickel. The central devices display a strong level of detail, adding to the attractiveness of this piece, while portions of the beading at the outer peripheries are not well defined. A heavy die crack, along with a smaller one, on the obverse extends from star four to the bottom of the cap.
- 5498** (1861-65) Our Navy — Overstruck on an 1863 Cent — MS63 NGC. Fuld-53/336do, R.7. Both sides of this lovely example clearly reveal that it was struck using an 1863 Indian Head cent as the host coin. The obverse displays the date and portions of the cent legends, and in addition, outlines of the headdress feathers are present. The shield, ONE CENT, and portions of the wreath detail appear on the reverse. This is a wonderful piece.
- 5499** 1863 United We Stand MS64 NGC. Fuld-91/435e, R.8. The NGC attribution indicates this pleasing near-Gem piece with the popular UNITED WE STAND motto is struck in white metal. The surface texture of the obverse reveals the die was rusted. The portrait displays softness of strike at some portions, although much of the feather detail is strong. What appears to be strike doubling is present on the reverse, most noticeably at UNITED.
- 5500** 1863 Now and Forever MS63 NGC. Fuld-92/440e, R.8. The reverse of this piece was struck off-center initially and then the token was struck by hand a second time at a 180-degree rotation from the initial strike, leading to areas of doubling on the obverse. This white metal token is an attractive and well-preserved error example with plenty of eye appeal.
- 5501** 1864 Abraham Lincoln MS63 NGC. Fuld-124/294j, R.10. This Abraham Lincoln design along with this FREE/DOM reverse is only listed in Kanzinger's reference with the following compositions: a (copper), do, and e (white metal). The composition of this piece has been attributed as German silver, leading to the rarity 10 designation. A few tiny spots of toning are present. The important Lincoln side displays a pleasing level of detail. The reverse exhibits a well-defined strike at center, however the outer portions lack detail. This is a wonderful piece for Civil War token collectors as well as Lincoln collectors.
- 5502** 1863 United Country — Reverse Double Struck Off Center — MS62 NGC. Fuld-360/436e, R.8. Struck in white metal, this piece with the UNITED COUNTRY obverse has a NOT ONE CENT reverse. The fact that it is reverse double struck off center error adds to the charm. Due to the striking, the token is not flat with the obverse being concave while the reverse is convex. This is an interesting example.
- 5503** (1861-65) Our Country MS65 NGC. Fuld-360/436j, R.8. A German silver example, this nicely preserved Gem displays shades of peach, champagne, and ice blue toning along with a few splashes of copper-orange. The central devices exhibit a strong level of detail, while minor incompleteness of strike appears at the outer edges.

MISCELLANEOUS

- 5504** Four-Piece Gallery Mint "1796" Gold Type Set. The set includes: uncirculated finish No Stars on Obverse quarter eagle; uncirculated finish Stars Obverse quarter eagle; proof finish half eagle; proof finish eagle. All examples have a COPY stamp on the central reverse within the major device, and all are sharply struck and flawless. Separately housed in Coin World holders. (Total: 4 pieces)

PATTERNS

1854 Large Cent Design, PR61 Brown
Judd-161 Original

- 5505** 1854 One Cent, Judd-161 Original, Pollock-187, R.4, PR61 Brown NGC. An early Mint attempt to reduce the diameter of the cumbersome large cent. The size is close to a quarter dollar, and the design is similar to the Mature Head. However, there are no stars on the obverse, and the wreath is proportionately smaller. Struck in bronze with a plain edge. An ebony brown specimen with a precise strike and flashy fields. Moderately granular on the obverse field near the profile. PCGS# 11663

1855 Flying Eagle Cent in Copper
Judd-168 Original, PR64 Brown

- 5506** 1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4, PR64 Brown PCGS. A Flying Eagle cent pattern in a large format, featuring a hooked-neck eagle, slanting 5s on the obverse, and ONE CENT in the center of the reverse surrounded by a thick laurel wreath similar its counterpart on the large cent. Struck in copper with a plain edge. Fully struck and flashy with clashed but unabraded surfaces. The obverse border retains initial mint red but most of the coin is brown with olive-gray undertones. A few minor spots are on the obverse exergue. PCGS# 11720

1858 Hook-Necked Flying Eagle Cent
Judd-202, PR63

- 5507** 1858 Flying Eagle Cent, Judd-202, Pollock-245, R.5, PR63 NGC. The hook-necked eagle obverse, usually attributed to Longacre, was paired with several reverses during the year. Judd-202 displays ONE CENT in a simple laurel wreath with clusters of six leaves. Struck in copper-nickel with a plain edge. This fully struck specimen is iridescently toned lime-green, rose-gold, and cherry-red along with a streak of deep lavender and cobalt-blue across the obverse. PCGS# 11867

1858 Copper-Nickel Flying Eagle Cent
Judd-206, Brightly Reflective PR64

- 5508** 1858 Flying Eagle Cent, Judd-206, Pollock-242, R.5, PR64 PCGS. The obverse displays a hooked-neck eagle flying left with the legend UNITED STATES OF AMERICA above and the date below. The reverse is the same used to coin regular issue 1858 Flying Eagle cents. Struck in copper-nickel with a plain edge. This design was part of 12-piece sets issued by the Mint. Examples are also known in copper and nickel. The fields are deeply mirrored and the surfaces have the characteristic lighter, honey-tan appearance of copper-nickel alloy. Two small spots are located in the field above the eagle's wing on the obverse, and a large carbon spot covers much of the O in ONE on the reverse. PCGS# 11877

1858 Indian Cent, PR62
Judd-212, Broad Bust Point

- 5509 1858 Indian Cent, Judd-212, Pollock-263, Snow-PT25, R.4, PR62 NGC. The Broad Bust point subvariety of the Judd variety. The transitional Indian Head obverse of Judd-208 is paired with a pattern reverse that resembles the issued 1860 cent but has a broad ornamented shield. Struck in copper-nickel with a plain edge. The present well struck specimen is nicely mirrored and minimally abraded. Occasional flyspecks decide the grade. PCGS# 11895

1859 Shield Reverse Indian Cent
Judd-228, MS66

- 5510 1859 Indian Cent, Judd-228, Pollock-272, Snow-PT4, R.1, MS66 NGC. This transitional pattern combines the standard Indian Head cent obverse with the adopted reverse design of 1860 with the shield at the top of that side. Struck in copper-nickel with a plain edge. This lustrous and pristine specimen displays dusky orange-gold toning. The strike is sharp save for blending on the top of the shield. Census: 8 in 66, 0 finer (5/13). PCGS# 11932

1859 Longacre Half Dollar in Silver
Judd-237, Proof Details

- 5511 1859 Half Dollar, Judd-237, Pollock-293, R.4 — Cleaned — ANACS. PR60 Details. A bust of Liberty faces right with laurel and vine in her hair. A ribbon below the bust is inscribed LIBERTY, with UNITED STATES OF AMERICA around, and the date 1859 below. The reverse displays the agricultural wreath of the Seated dime, resized to appropriate scale, around the denomination HALF DOLLAR. Struck in silver with a reeded edge. This well struck specimen is untuned save for light tan-gold margins. The fields possess hairlines but there are no other detractors. PCGS# 11966

1859 'French Head' Half Dollar in Silver
Judd-237, Proof, Unc Details

- 5512 1859 Half Dollar, Judd-237, Pollock-293, R.4 — Cleaning — PCGS Genuine. Proof, Unc. Details. The so-called "French Head" design for the half dollar that features a bust of Liberty facing right, draped with a ribbon inscribed LIBERTY and a wide wreath of oak and vine on her head. The reverse has HALF DOLLAR in the center and is surrounded by a wreath of cotton, tobacco, sugar cane, corn, wheat, and oak. Struck in silver with a reeded edge. Blushes of golden-brown toning visit this otherwise slate-gray pattern. Moderately glossy and faintly abraded with a pair of small spots beneath OF. PCGS# 11966

1863 Indian Cent in Bronze
Judd-299, PR65 Brown

- 5513 1863 One Cent, Judd-299, Pollock-359, Snow-PT1, R.3, PR65 Brown NGC. A transitional variety similar to the 1864 No L bronze cent but dated 1863, when regular issue cents were copper-nickel. Struck in bronze on a thick planchet with a plain edge. The dies exhibit medallion alignment, as usual for Judd-299. The thick planchet variety, however, is much rarer than its thin planchet alternative. A fully struck and flashy specimen whose medium brown surfaces exhibit sea-green and orange-red undertones. Pristine aside from minor contact near Liberty's eye. PCGS# 60454

**1863 Postage Currency Ten Cent Pattern
Judd-325, Toned PR64**

- 5514** 1863 Ten Cents, Judd-325, Pollock-390, Low R.6, PR64 NGC. The obverse design features the heraldic shield with arrows, inside an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse shows the denomination 10 CENTS in two lines above the date, with the inscriptions POSTAGE CURRENCY above, and ACT JULY 1862 below. Struck in standard silver alloy with a plain edge. Examples are known that range from 88% silver to 96.1% silver. Deep iridescence covers each side with russet toning surrounding the devices. Significant reflectivity shines through the toning. PCGS# 60482

**1863 GOD OUR TRUST Seated Half
Judd-339, PR64 Red and Brown**

- 5515** 1863 Half Dollar, Judd-339, Pollock-411, Low R.6, PR64 Red and Brown PCGS. Similar to the regular issue 1863 Seated half, except the motto GOD OUR TRUST is set on a ribbon in the field above the eagle. Struck in copper with a reeded edge. Attractively toned cherry-red and forest-green. Fully struck and undisturbed with occasional minute carbon at the peripheries. PCGS# 70501

5516 No lot.

**Copper 1865 Three Cent Nickel
Judd-413, PR64 Red and Brown**

- 5517** 1865 Three Cents, Judd-413, Pollock-484, R.5, PR64 Red and Brown PCGS. CAC. From regular issue dies, but struck in copper with a plain edge. Presumably struck to demonstrate the new designs prior to large-scale production of the series. The present fully struck specimen is toned peach-red and apple-green. Smooth aside from moderate contact on the cheek. PCGS# 70594

**1868 Three Cent Nickel Pattern
Judd-615, PR66 Ultra Cameo**

- 5518** 1868 Three Cent Nickel, Judd-615, Pollock-680, R.5, PR66 Ultra Cameo NGC. Similar in design to the contemporary three cent nickel, but the wreath on the reverse is that of the Flying Eagle cent and the Roman numeral lacks fluting on the columns. Struck in nickel with a plain edge. The obverse rim is unusually wide, while the reverse is narrower than normal. Tom DeLorey suggested that the obverse design is a regular 17.9-mm three cent obverse set in a one cent-size 19.1-mm die blank, leaving the wide borders, whereas the reverse is normal one cent-size. The fields show exceptionally deep reflectivity, especially for a nickel product, with sharply contrasting frosted devices. The mostly brilliant surfaces have a light overlay of straw-gold patina. There is a small patch of die rust, as made, between the chin and the T in UNITED.

**1868 Three Cent Nickel in Nickel
Judd-618, PR65 Cameo
Smooth Roman Numerals**

- 5519** 1868 Three Cent Nickel, Judd-618, Pollock-687, R.4, PR65 Cameo PCGS. CAC. Similar to the regular issue, but the Roman numerals on the reverse are smooth instead of ribbed. Struck in nickel with a plain edge. Frosty motifs rise above unabraded and glassy fields. Toned faint straw-gold aside from a few minute flecks. The strike is crisp though the portrait device has softer definition than its issued counterpart. PCGS# 860834

1868 Seated Liberty Dime in Nickel
Judd-641, Premium Gem Proof

- 5520** 1868 Ten Cents, Judd-641, Pollock-713, Low R.7, PR66 NGC. The designs are similar to the familiar Seated Liberty design, but the date is moved to the reverse where it appears in miniature beneath the denomination. An oversized six-pointed star is incongruously located on the upper field just inside the wreath. Per Judd, "David Cassel has revealed that these coins were struck in 1863 from a die erroneously dated 1868. The obverse without date is same as that used to strike" Judd-331, a Postage Currency dime. Struck in nickel with a reeded edge. This sharply struck stone-gray and almond-gold specimen is pristine aside from the infrequent minute gray fleck. Ex: Lemus Collection, Queller Family Collection Part Two (Heritage, 1/2009), lot 1679, which realized \$5,318.75. PCGS# 60859

1869 Standard Silver Ten Cents, PR66
Judd-709, Tied for Finest Certified

- 5521** 1869 Standard Silver Ten Cents, Judd-709, Pollock-788, High R.6, PR66 PCGS. This Standard Silver design variety has only one star at the front of Liberty's head on the obverse. The reverse has 10 CENTS in the center, crowded by a wreath of oak and laurel, with STANDARD SILVER 1869 around the margin. Struck in silver with a plain edge. This delightful Premium Gem displays dark shades of golden-brown, dusky gray, and cobalt-blue patina over well-detailed design elements and reflective surfaces. Population: 2 in 66, 0 finer (5/13). PCGS# 60934

1869 Standard Silver Quarter, PR66
Judd-727, Toned PR66

- 5522** 1869 Standard Silver Quarter Dollar, Judd-727, Pollock-808, R.5, PR66 PCGS. CAC. The obverse features a head of Liberty, with hair bound and no stars on the tiara. UNITED STATES OF AMERICA encircles the obverse, with a ribbon bearing the motto IN GOD WE TRUST below. The reverse displays a centered denomination surrounded by a wreath, with STANDARD SILVER and the date at the peripheries. Struck in silver with a reeded edge. A well struck, flashy, and virtually flawless specimen. Rich golden-brown toning dominates the fields and motifs though the margins offer ocean-blue and violet-red. PCGS# 60954

1871 Five Cent Pattern in Nickel
Judd-1050, Choice Proof

- 5523** 1871 Five Cents, Judd-1050, Pollock-1184, Low R.6, PR64 PCGS. CAC. The obverse bears a portrait of Liberty similar to that used on the nickel three cent piece. The date is below and UNITED STATES OF AMERICA is above the central device. The reverse depicts a reversed Roman numeral five (backward) and the word CENTS is within a wreath. Struck in nickel with a plain edge. Examples were also struck in copper and aluminum, and a single piece is known in the Connecticut State Library struck on a wide aluminum planchet. The fields on this example are brightly mirrored and there is slight contrast evident against the lightly frosted devices. Almost brilliant, showing just a hint of golden color on each side. There are few contact marks or other post-striking impairments on this lovely near-Gem. PCGS# 61309

1871 Longacre Nickel in Aluminum
Judd-1055, PR64

- 5524** 1871 Five Cents, Judd-1055, Pollock-1190, Low R.7, PR64 NGC. The bust of Liberty is similar to that seen on the issued three cent nickel. The reverse has a simple laurel wreath with 5 CENTS inside. Struck in aluminum with a plain edge. A well struck and moderately mirrored Choice proof with unabraded fields and a few delicate slide marks on the cheek. As of (4/13), NGC has certified a mere four pieces. PCGS# 61314

**1875 Sailor Head Twenty Cent in Copper
Judd-1393, PR63 Red and Brown**

- 5525** 1875 Sailor Head Twenty Cents, Judd-1393, Pollock-1536, R.7, PR63 Red and Brown PCGS. Ex: Denali Collection. William Barber's "Sailor Head" obverse design that shows Liberty facing left, wearing a coronet, her hair tied in the back with two ribbons trailing, thus resembling a sailor's cap. The reverse has a three-pointed shield as the central motif with 20 sunken in the middle, and UNITED STATES OF AMERICA / CENTS around the margins. Struck in copper with a plain edge. Orange-gold, plum-red, and lavender compete for territory across this intricately struck and contact-free specimen. Neither side shows any spots. The present design might have been more successful than the issued types, since no one would have confused the denomination with a Seated quarter. PCGS# 71700

**1875 Twenty Cent in Copper
Judd-1412, PR63 Brown**

- 5526** 1875 Twenty Cents, Judd-1412, Pollock-1555, High R.6, PR63 Brown PCGS. Ex: Denali Collection. The designs are close to the issued twenty cent piece, though LIBERTY is incuse instead of raised, and the leaves and arrows are arranged slightly different. The reverse die was used on a number of pattern twenty cent varieties and can be identified by broad repunching on the final A in AMERICA. Struck in copper with a plain edge. The present deep lavender-brown Select specimen has smooth surfaces and excellent eye appeal given its conservatively assessed third party grade. PCGS# 61719

**1879 Metric Dollar in Silver
Judd-1618, PR30**

- 5527** 1879 Metric Dollar, Judd-1618, Pollock-1813, R.5, PR30 NGC. William Barber's Metric dollar pattern. Liberty wears a coronet with a border of pearls. The reverse shows a partial wreath of cotton and corn tied at the base, a ribbon, and inscriptions that include DEO EST GLORIA and the elemental composition of goloid. Struck in silver with a reeded edge. This stone-gray specimen displays even wear but lacks any mentionable marks. PCGS# 61996

GOLD DOLLARS

**1849 No L Gold Dollar, Impressive MS65
Open Wreath Subtype**

- 5528** 1849 No L MS65 NGC. Designated solely as Open Wreath, but this is the famous introductory variety without a designer's initial on the bust truncation. Bold repunching on three obverse stars confirms the variety. A lustrous peach-gold Gem that boasts an intricate strike and impressively preserved surfaces. Census: 24 in 65, 15 finer (5/13). NGC ID# 25B7, PCGS# 7501

- 5529** 1849 Closed Wreath MS63 PCGS. Breen-6005. The "Heavy Date" variety, likely from a deep hubbing of the working reverse die. The 1849 Closed Wreath gold dollars are scarcer than their Open Wreath counterparts. This Select example displays several shades of gold, orange, and green along with nicely defined design elements. A small spot appears at the top of Liberty's beaded tiara and a few marks appear in her hair. Housed in a green label holder. Population: 60 in 63 (1 in 63+), 62 finer (5/13). PCGS# 7503

- 5530** 1849-O Open Wreath MS61 PCGS. Variety 2. A charming canary-gold example of this single-year New Orleans subtype. The fields are moderately prooflike and are impressively unabraded. A small lamination (as produced) is beneath the D in DOLLAR. NGC ID# 25BE, PCGS# 7508

- 5531** 1849-O Open Wreath MS62 PCGS. Variety 1. The ME in AMERICA are repunched. The obverse is honey-gold though the central reverse has a generous splash of orange. A couple of thin marks on the field near the profile account for the grade. NGC ID# 25BE, PCGS# 7508

**1851-C Gold Dollar, XF40
Scarcer Variety 3 Example**

- 5532** 1851-C XF40 PCGS. CAC. Variety 3. A high date and a vertical crack above the second S in STATES identify this circulated piece as an example of the scarcer of the two reverse die varieties. This example displays antique-gold color with hints of orange and peach. A touch of wear is present on the devices. Housed in an old green label holder. NGC ID# 25BL, PCGS# 7514

**1851-D Gold Dollar, Borderline Uncirculated
Low-Mintage D-Mint Issue**

5533 1851-D AU58 PCGS. CAC. Variety 3-E. An intermediate die state with clashes but no cracks. The orange-gold surfaces display consistent color save for a blush of tan-brown and sea-green near the TE in STATES. Nicely struck, partly lustrous, and without any flan flaws or remotely mentionable marks. This very scarce Dahlonega issue has a mintage of only 9,882 pieces. Population: 27 in 58, 21 finer (4/13). NGC ID# 25BM, PCGS# 7515

5534 1851-O MS62+ NGC. Variety 1. The diagnostic for this variety is a die crack through the 1 o'clock star. A lovely peach and khaki-gold example of this New Orleans type issue, this coin has nice eye appeal. The piece displays a sharp strike and is only lightly abraded. Gold dollars were coined in considerable quantity between 1851 and 1853 to replace Seated silver hoarded from commerce. NGC ID# 25BN, PCGS# 7516

5535 1851-O MS63 PCGS. Variety 1. A lustrous honey-gold New Orleans type coin. The centers show minor inexactness of strike but there are no individually relevant marks. A good value relative to the next higher grade. NGC ID# 25BN, PCGS# 7516

5536 1852-O MS62 PCGS. CAC. Variety 1. Though only a single reverse die was used to strike the '52-O, obverse varieties exist. The present coin has a bold vertical crack at 12 o'clock on the obverse and a lesser crack at 3 o'clock. A well struck green-gold example with good luster and a moderate graze near the bust tip. Population: 24 in 62, 19 finer (4/13). NGC ID# 25BT, PCGS# 7520

**1852-O Gold Dollar, MS63
Conditionally Challenging**

5537 1852-O MS63 NGC. Variety 1. The obverse high points and border are sea-green but the rest of this Select New Orleans dollar is orange-gold. The date and forehead curls are soft though most of the design is well struck. Smooth except for a slender mark near star 10. Rare at the MS63 level though AU and typical Mint State pieces are available. Census: 19 in 63, 13 finer (5/13). NGC ID# 25BT, PCGS# 7520

**1853 Gold Dollar, MS65
Full Strike**

5538 1853 MS65 PCGS. Exceptional design definition appears on both sides of this fully struck Gem Type One gold dollar. This brilliant and frosty specimen exhibits bright yellow-gold surfaces with hints of green on the reverse. A few minuscule marks are evident in the fields, consistent with the grade. PCGS has only certified 43 finer examples (5/13). NGC ID# 25BU, PCGS# 7521

**1853 Gold Dollar, MS66
Quintessential Type Coin**

5539 1853 MS66 PCGS. CAC. The early 1850s were the peak years of the California gold rush, and huge quantities of fresh gold were transported to the Philadelphia and New Orleans Mints. More than 4 million gold dollars were coined in 1853, the highest mintage of any issue. However, Gem and finer coins are quite rare today. This Premium Gem has brilliant yellow luster with pristine surfaces and full details, an exceptional specimen. Population: 32 in 66, 11 finer (5/13). NGC ID# 25BU, PCGS# 7521

5540 1855 MS61 NGC. As is often the case, clash marks are present on this piece, as seen on both sides. The coin displays nice luster and pleasing rich yellow-gold color that includes a few subtle hints of green. NGC ID# 25C4, PCGS# 7532

5541 1855 MS61 PCGS. Hints of peach and orange are present on this lovely example with bright yellow-gold color. A pleasing degree of luster adds to the eye appeal. Small, scattered marks limited the grade. NGC ID# 25C4, PCGS# 7532

5542 1856 Upright 5 MS64 NGC. CAC. The Upright 5 is much more elusive than its Slanted 5 counterpart. This well-detailed Choice example displays partially prooflike surfaces with only minor signs of contact. PCGS# 7541

5543 1859 MS65 PCGS. CAC. Peach-gold and lime-green toning graces lustrous and impeccably preserved fields and devices. The strike is sharp except slight softness on the 5 in the date. Population: 17 in 65, 11 finer (5/13). NGC ID# 25CL, PCGS# 7551

5544 1873 Closed 3 MS62 NGC. The population data for the 1873 gold dollars varies depending upon the source consulted. However, an undisputed fact is that the Closed 3 variety survivors are significantly scarcer than the Open 3 examples. Attractive color and luster are present on this example displaying pronounced clash marks on the obverse. A few as-made lint marks appear on the reverse. Census: 22 in 62, 31 finer (4/13). NGC ID# 25DA, PCGS# 7574

**1873 Gold Dollar, MS64
Closed 3 Type**

- 5545** 1873 Closed 3 MS64 PCGS. A prooflike peach-gold near-Gem with a smooth appearance and excellent eye appeal. The strike is good though incomplete on the 7 in the date and the IC in AMERICA. Though its Open 3 cousin is plentiful, the Closed 3 is very scarce. Housed in a green label holder. Population: 6 in 64, 4 finer (5/13). NGC ID# 25DA, PCGS# 7574

**1879 Gold Dollar, MS66
Prooflike Obverse**

- 5546** 1879 MS66 PCGS. This hybrid Premium Gem exhibits a prooflike obverse with fully mirrored fields around frosty and lustrous devices. The reverse has frosty luster with slightly reflective fields. Both sides have light clash marks and the obverse appears to show faint die polishing lines. Brilliant yellow surfaces exhibit delicate rose and pale blue overtones. Population: 47 in 66 (5 in 66+), 3 finer (5/13). NGC ID# 25DH, PCGS# 7580
- 5547** 1880 MS65 PCGS. This delightful Gem displays prooflike orange-gold surfaces and sharply detailed design elements with outstanding eye appeal. From a minuscule mintage of 1,600 pieces. NGC ID# 25DJ, PCGS# 7581

1882 Gold Dollar, MS65

- 5548** 1882 MS65 PCGS. CAC. Only 5,000 business strike gold dollars were minted in 1882, and survivors are usually in the middle Mint State grades, MS63 to MS65, but rarely finer. This brilliant Gem has light yellow surfaces with frosty luster and delicate green overtones. Scattered marks are minimal and consistent with the grade. Population: 28 in 65, 68 finer (5/13). NGC ID# 25DL, PCGS# 7583
- 5549** 1883 MS64 PCGS. CAC. Gold dollar mintages throughout the 1880s were generally quite small, although survival rates were larger than for previous decades. This Choice Mint State specimen has frosty yellow luster with lemon overtones creating excellent eye appeal. NGC ID# 25DM, PCGS# 7584

- 5550** 1883 MS65 PCGS. CAC. A delightful Gem from a mintage of just 10,800 pieces, this well-detailed specimen exhibits partially prooflike orange-gold surfaces with outstanding eye appeal. NGC ID# 25DM, PCGS# 7584

**1883 Gold Dollar, MS66+
Popular Type Candidate**

- 5551** 1883 MS66+ PCGS. CAC. Splashes of mint-green and powder-blue toning appear on the yellow-gold surfaces of this highly lustrous and satiny Premium Gem. The 1883 had a business strike mintage of 10,800 coins, fourth highest for the period from 1875 to 1889, and the date is an excellent candidate for a type collection. NGC ID# 25DM, PCGS# 7584

**1884 Gold Dollar, MS66
Distinct Lilac Color**

- 5552** 1884 MS66 NGC. The business strike mintage of 5,230 coins was about half of that for the two adjacent years of gold dollars. Survivors are typically in lower Mint State grades. This Premium Gem has an extraordinary appearance with sharp details, prooflike fields, and mottled lilac toning on both sides. Census: 13 in 66 (1 in 66+), 19 finer (5/13). NGC ID# 25DN, PCGS# 7585

**1884 Gold Dollar, MS66+
Reflective Surfaces**

- 5553** 1884 MS66+ NGC. Wisps of lilac toning appear on both sides of this prooflike yellow-gold Premium Gem. A sharply detailed example, this 1884 gold dollar has light clash marks in the fields. A highly attractive piece and ideal for a type set or advanced gold dollar collection. Census: 13 in 66 (1 in 66+), 19 finer (5/13). NGC ID# 25DN, PCGS# 7585

5554 1885 MS66 PCGS. This orange-gold Premium Gem 1885 gold dollar boasts plenty of eye appeal, one of the finest survivors of the original mintage of only 11,000-plus coins. The surfaces are virtually unmarked, although there is some evidence of die fatigue in the form of crumbling at IC(A). The strike is as bold as the dies could muster, with excellent central detailing on each side. Population: 29 in 66, 14 finer (5/13). NGC ID# 25DP, PCGS# 7586

5555 1885 MS66 NGC. CAC. This is an incredible Premium Gem from a modest mintage of just 11,156 coins. As opposed to some other years, only a few higher grade pieces survive of the 1885. This example displays a prooflike appearance, with mirrored fields around lustrous, sharply defined devices. Census: 55 in 66 (1 in 66+), 29 finer (4/13). NGC ID# 25DP, PCGS# 7586

5556 1887 MS66+ PCGS. The 1887 gold dollar is a popular date from the later years of the series, with a low reported mintage of 7,500 pieces. Two or three shades of yellow-gold patina drape the lustrous surfaces of this high-end Premium Gem. This is a well struck and nicely preserved piece. Population: 68 in 66 (1 in 66+), 25 finer (5/13). NGC ID# 25DS, PCGS# 7588

1888 Gold Dollar, MS67 Penultimate Issue

5557 1888 MS67 NGC. CAC. This sensational Superb Gem has vibrant yellow-gold luster with bold design motifs and dusky toning near the reverse border. The surfaces are pristine and the eye appeal is first-rate. An outstanding example for a date or type collection. Census: 38 in 67, 3 finer (5/13). NGC ID# 25DT, PCGS# 7589

5558 1889 MS65 PCGS. The rich luster and deep color of this Gem provide this piece with immediate eye appeal. This beautiful coin is predominantly peach-gold, though blushes of lime-green and powder-blue are also evident. The strike is precise. An as-made strike-through is present near the R in AMERICA. The lower wreath is die doubled, as always on business strikes of this final year issue. NGC ID# 25DU, PCGS# 7590

1889 Gold Dollar, MS67 28,950 Business Strikes Minted

5559 1889 MS67 PCGS. CAC. The final issue of the gold dollar saw a spike in the mintage with more than 30,000 coined, including proofs. That production was nearly equal to the gold dollar coinage of the previous three years combined. This Superb Gem has frosty yellow-gold luster with traces of mint green toning. NGC ID# 25DU, PCGS# 7590

CLASSIC QUARTER EAGLES

5560 1834 Classic AU55 NGC. Breen-6138, Variety 1, R.1. The Small Head subtype, limited to the present variety and likely the first struck for the series. This nicely struck straw-gold representative displays small marks but none merit individual mention. Bright luster illuminates the legends and stars. NGC ID# 25FS, PCGS# 7692

1834 Classic Two and a Half, Uncirculated

5561 1834 Classic MS61 NGC. Breen-6140, Variety 2, R.3. The Large Head variety, scarcer than its Small Head counterpart. Rich peach toning fills design recesses while open areas are honey-gold. The strike is uncommonly sharp for the type. Abrasions are minor for the grade though Liberty's neck and the field near star 9 display thin marks. NGC ID# 25FS, PCGS# 7692

5562 1835 AU53 NGC. CAC. Breen-6141, Variety 6, R.2. The Wide AM variety, the most available of the three 1835 marriages. The present lot has ample glimmering luster and only trivial contact. Richly toned olive-green and orange-rose. Liberty's cheek and neck each have a mint-made strike-through. NGC ID# 25FT, PCGS# 7693

5563 1838 XF45 PCGS. Breen-6146, Variety 19, R.2. A Choice XF example of the scarce 1838 quarter eagle coinage, this representative retains nice eye appeal with bright yellow-gold color. Scattered abrasions are present, as expected at this grade level, with a small concentration of horizontal marks located above the date. NGC ID# 25FY, PCGS# 7696

1838-C Two and a Half, AU Details

5564 1838-C — Cleaning — PCGS Genuine. AU Details. Breen-6147, Variety 20, R.3. A honey-gold representative of the elusive introductory Charlotte issue. Bright from cleaning, and a mint-made strike-through is noted on the cheek, but the wings and curls are bold. The sole die variety for the '38-C. Just 7,880 pieces were struck. NGC ID# 25FZ, PCGS# 7697

**1839-C Two and a Half
AU Sharpness**

- 5565** 1839-C — Cleaning — PCGS Genuine. AU Details. Breen-6150, Winter 2, Variety 22, R.4. This olive-gold Charlotte quarter eagle is moderately subdued from cleaning and has a couple of unobtrusive obverse marks. A lamination (as made) affects the reverse near OF. The usual die state with prominent die cracks across both sides. NGC ID# 25G4, PCGS# 7699

**1839-C Quarter Eagle, AU Details
Repunched Date**

- 5566** 1839-C — Cleaning — PCGS Genuine. AU Details. Breen-6150, Winter-2, Variety 22, R.4. The 39 in the date is sharply repunched. An early die state without obverse die cracks. Both sides are somewhat glossy but this peach-gold representative displays exceptional design definition. One of only two Charlotte issues of the type. NGC ID# 25G4, PCGS# 7699

LIBERTY QUARTER EAGLES

- 5567** 1842-C — Mount Removed — NGC Details. AU. Variety 1. This low mintage olive-gold Charlotte quarter eagle has a matte appearance from cleaning and shows repairs the upper obverse and lower reverse rims. The edge between 11 and 1 o'clock is also repaired. NGC ID# 25GH, PCGS# 7724
- 5568** 1842-D — Reverse Scratched, Improperly Cleaned — NCS. AU Details. Variety 3-F. The early die state with clear repunching beneath the 18 in the date. This orange-gold Dahlonega quarter eagle is glossy from cleaning. The reverse has many scratches, especially prominent on the lower half of the eagle. NGC ID# 25GJ, PCGS# 7725
- 5569** 1843-D Small D — Rim Damage — NGC Details. AU. Variety 4-F. The rims are crimped in selected areas, especially near 8 o'clock on the obverse. Liberty's nose and the nearby field are abraded, and the shield has a shiny mark. The borders teem with luster and only slight wear is evident. A scarce Dahlonega issue. NGC ID# 25GP, PCGS# 7730

**1843-D Quarter Eagle, AU55
Rare Large D Variety**

- 5570** 1843-D Large D AU55 NGC. CAC. The Large D variety is significantly rarer than its Small D counterpart, but this representative is from a different and unlisted reverse die. The mintmark tilts upward and its upright is centered over the tip of the fraction bar. The mintmark is also clearly repunched at its base. A well struck and desirable apricot-gold Dahlonega five with original color and unblemished surfaces. PCGS# 97730

**1843-O Two and a Half, MS62
Crosslet 4, Small Date**

- 5571** 1843-O Small Date, Crosslet 4 MS62 PCGS. Variety 2. An attractive olive-gold representative of this conditionally rare New Orleans issue. Well struck at the peripheries, and the centers show only minor blending. Refreshingly unmarked aside from a small obverse rim nick at 10 o'clock. Population: 14 in 62, 14 finer (5/13). NGC ID# 2874, PCGS# 7731

- 5572** 1843-O Large Date, Plain 4 AU50 PCGS. Variety 1. Rich green-gold toning embraces this lightly circulated and minimally abraded New Orleans two and a half. The strike is fairly good though LIBERTY and the eagle's left (facing) leg show incompleteness. NGC ID# 25GS, PCGS# 7732

**1846 Quarter Eagle, MS60
Well Above Average**

- 5573** 1846 MS60 NGC. A pleasing Mint State quarter eagle from the early years of the denomination. This specimen is clearly superior to the average certified piece that grades AU53. Sharply struck, this example has pleasing green overtones on its yellow-gold surfaces with brilliant mint luster. Census: 3 in 60, 17 finer (5/13). NGC ID# 25GZ, PCGS# 7740

5574 1846-O AU58 PCGS. Variety 1. A pleasing green-gold near-Mint New Orleans example. The centers show some bluntness of strike but no marks are noticeable and the margins teem with luster. A scant 62,000 pieces were issued. NGC ID# 25H4, PCGS# 7743

5575 1847 AU58 NGC. CAC. The 1847 quarter eagle is scarce in all grades, coming from a mintage less than 30,000 pieces. Considerable luster is retained on the peach-gold surfaces of this near-Mint State specimen and a well directed strike imparts strong definition to the design elements. Census: 42 in 58, 19 finer (5/13). NGC ID# 25H5, PCGS# 7744

5576 1847-C AU50 PCGS. Variety 1. The only known dies for this scarce issue, from a mintage of 23,226 coins. Small splashes of orange, red, and violet appear at portions of the outer edges of both sides of this lightly circulated piece, with the colors particularly noticeable near the date. The coin displays chestnut-gold color overall. Wear is present on the high spots, but the designs retain a nice appearance. Population: 36 in 50, 92 finer (5/13). NGC ID# 25H6, PCGS# 7745

5577 1847-C AU50 PCGS. Variety 1. A number of colors appear on this quarter eagle, particularly on the obverse. The hues include bright frosty yellow-gold, pink, ice-blue, violet, grape, and aquamarine. A small horizontal mark is present near Liberty's mouth. NGC ID# 25H6, PCGS# 7745

5578 1847-O AU53 PCGS. Variety 3 (?). The reverse die corresponds most closely with Variety 3 but is in such an advanced state (spiderweb die cracks through the rim areas and major die erosion) that an exact attribution remains speculative. Softly struck with yellow-to-orange surfaces that retain considerable radiance. NGC ID# 25H8, PCGS# 7747

5579 1850 MS62 PCGS. Although the 1850 quarter eagle is not difficult to locate in lower grades, Mint State examples are very scarce. Intermingled shades of gold, orange, and green are present on both sides of this lovely example. The design elements display a nice level of detail. A couple of as-made strike-throughs appear near the top of the obverse, but there are no contact marks worthy of mention. Population: 20 in 62, 21 finer (5/13). NGC ID# 25HG, PCGS# 7755

5580 1855 MS63 PCGS. Vibrant orange-gold color and lustrous surfaces create pleasing eye appeal for this Select representative. Both sides reveal clash marks. This is a lovely, well-struck example. Certified in a green label holder. Population: 22 in 63, 20 finer (5/13). NGC ID# 25J4, PCGS# 7774

1857-S Quarter Eagle, AU58

5581 1857-S AU58 NGC. CAC. A lovely light yellow near-Mint specimen. The 1857-S is common among double eagles, but rarely seen in smaller gold denominations. This example has virtually full luster with scattered surface marks that are entirely trivial. Census: 58 in 58, 21 finer (5/13). NGC ID# 25JF, PCGS# 7785

1858 Quarter Eagle, MS63 Conditionally Rare

5582 1858 MS63 PCGS. This boldly detailed pre-Civil War issue is an exceptional example, with brilliant and frosty yellow-gold luster, and splendid surfaces showing minimal marks. The 1858 and 1859 quarter eagles were the only two Philadelphia Mint issues of the decade with coinage totals under 100,000 pieces, and the two years combined saw less than that number, with 47,377 and 39,364 pieces minted respectively. Population: 12 in 63, 7 finer (5/13). NGC ID# 25JG, PCGS# 7786

5583 1861 New Reverse, Type Two MS62 PCGS. A bright, almost radiant New Reverse piece with strong hair and feather detail. Though numerous fine abrasions appear on Liberty's portrait, the arm's-length eye appeal is surprisingly solid. NGC ID# 25JX, PCGS# 7794

5584 1861 New Reverse, Type Two MS62 PCGS. The three year period from 1859 to 1861 was a transitional period for quarter eagles with two reverse hubs used. The Old Reverse had short and fat arrowheads and the New Reverse had long and slender arrowheads. This pleasing Mint State New Reverse quarter eagle has frosty yellow luster with minimal marks and sharp details. Trivial clash marks are evident on both sides. NGC ID# 25JX, PCGS# 7794

5585 1865-S XF45 PCGS. This lightly worn specimen retains much of its original design detail intact and the pleasing rose-gold surfaces are minimally abraded for the grade. Population: 9 in 45, 25 finer (5/13). NGC ID# 25K6, PCGS# 7802

1866 Quarter Eagle, XF45 Rare and In-Demand

5586 1866 XF45 NGC. Mintages at the end of the Civil War and during the first few years of Reconstruction were extremely small. Gold coins were hoarded and often melted, so survival rates were also small. The result is a series of rarities from the Philadelphia Mint. Today, survivors are in demand in all grades. This Choice XF specimen has pleasing light yellow surfaces with traces of luster and minimal marks. Census: 10 in 45, 19 finer (5/13). NGC ID# 25K7, PCGS# 7803

5587 1867-S AU55 NGC. Hints of peach appear on this Choice AU example retaining nice eye appeal, one of only 28,000 pieces struck. The typical central striking softness is present. Liberty's cheek displays two reed marks. Census: 23 in 55, 33 finer (4/13). NGC ID# 25KA, PCGS# 7806

**1872-S Quarter Eagle, MS61
A Mint State Rarity**

5588 1872-S MS61 NGC. The decade following the Civil War saw quarter eagle production limited to Philadelphia and San Francisco. Mintages in Pennsylvania were generally minimal, with larger mintages in California. In 1872, San Francisco coined 18,000 quarter eagles, six times the Philadelphia production. This Mint State piece is one of only a few that survive in Uncirculated grades. Both sides have satiny yellow luster with excellent design definition and minimal marks. Census: 5 in 61, 9 finer (5/13). NGC ID# 25KL, PCGS# 7816

5589 1873 Closed 3 MS64 PCGS. Attractive orange-gold color and rich luster provide this near-Gem with tremendous eye appeal. The design elements exhibit a bold level of definition. The reverse displays several thin die breaks along the upper portion. Population: 48 in 64 (1 in 64+), 9 finer (5/13). NGC ID# 25KM, PCGS# 7818

1890 Quarter Eagle, MS64

5590 1890 MS64 PCGS. CAC. Just 8,720 business strike quarter eagles were minted in 1890, all at the Philadelphia Mint. Survivors are generally in AU or lower Mint State grades, with an average certified grade of just MS60. This Choice Mint State example has a bold strike with splashes of orange toning on its yellow-gold surfaces. Population: 26 in 64, 4 finer (5/13). NGC ID# 25LE, PCGS# 7842

**1894 Quarter Eagle, MS64
Only 4,000 Minted**

5591 1894 MS64 PCGS. An impressive Choice Mint State quarter eagle, surviving from a low mintage of just 4,000 business strikes, this piece has brilliant yellow luster with bold design definition and a bright copper toning spot at the AT of STATES. Population: 23 in 64 (3 in 64+), 21 finer (5/13). NGC ID# 25LJ, PCGS# 7846

5592 1902 MS65 NGC. CAC. Brilliant lustrous surfaces, lovely green-gold color with hints of orange, and a well-executed strike provide this Gem with a fantastic appearance. Very few contact marks are present and they are all quite small. NGC ID# 25LT, PCGS# 7854

5593 1902 MS66 PCGS. CAC. This exquisite Premium Gem displays vivid orange-gold surfaces and vibrant mint luster, with sharply detailed design elements throughout. PCGS has graded 38 numerically finer examples (5/13). NGC ID# 25LT, PCGS# 7854

5594 1903 MS65 PCGS. This lovely sun-gold Gem displays a few scattered freckles of golden-rose toning that are most conspicuous near the eagle's beak. The coin is fully struck and lustrous, with a smooth reverse and only minor obverse grazes. NGC ID# 25LU, PCGS# 7855

5595 1905 MS66 NGC. Gleaming luster and bright yellow-gold color provide this Premium Gem with immediate eye appeal. Subtle areas of green color are also present. Sharply struck design details and minimal abrasions are additional attributes of this pretty piece. NGC ID# 25LW, PCGS# 7857

5596 1905 MS66+ PCGS. Pleasing yellow-gold color along with subtle hints of green and blue appear on this lustrous, sharply struck high-end Premium Gem. A couple of hair-thin marks are present on the obverse. Population: 5 in 66+, 55 finer (5/13). NGC ID# 25LW, PCGS# 7857

5597 1905 MS66 PCGS. CAC. Rich satin luster and sharply defined devices provide this Premium Gem with great visual appeal. This minimally abraded piece displays lovely yellow-gold color. PCGS has awarded higher numeric grades to only 55 examples (5/13). NGC ID# 25LW, PCGS# 7857

5598 1907 MS65 NGC. A bold strike, rich luster, and yellow-gold color that includes hints of green and peach combine to provide this Gem with a lovely appearance. The final issue of the Liberty Head quarter eagle, the 1907 is commonplace in lower grades, but quite rare in higher grades. NGC ID# 25LY, PCGS# 7859

5599 1907 MS66 PCGS. CAC. Bright butter-gold color with hints of green and peach along with rich vibrant luster provide a high degree of eye appeal to this Premium Gem example. The devices display strong definition. NGC ID# 25LY, PCGS# 7859

5600 1907 MS66+ NGC. CAC. An exceptional Premium Gem of the final Liberty quarter eagle, this example has hints of rose toning over brilliant yellow surfaces with bold design motifs. NGC ID# 25LY, PCGS# 7859

INDIAN QUARTER EAGLES

5601 1908 MS64 PCGS. A beautiful peach-gold example of the introductory Indian issue. The strike is bold and marks are absent aside from a single faded line left of the G in GOD. Housed in a green label holder. NGC ID# 288Y, PCGS# 7939

5602 1908 MS64+ NGC. CAC. A high-end Choice example of this first-year type issue, with lustrous greenish-gold surfaces and vibrant mint luster on both sides. Sharply detailed design elements add to the strong visual appeal. NGC ID# 288Y, PCGS# 7939

5603 1908 MS64+ PCGS. CAC. Bright luster cascades over the yellow-gold surfaces of this high-end near-Gem quarter eagle. The design elements are well brought up, save for the usual softness on the eagle's shoulder. NGC ID# 288Y, PCGS# 7939

**1908 Quarter Eagle, MS65
Pratt's Indian Design**

5604 1908 MS65 PCGS. CAC. President Theodore Roosevelt desired to introduce new coin designs during his time in office, and that desire led to the Indian gold pieces that were first minted in 1907 (eagle) and 1908 (quarter and half eagles). The two smaller denominations were designed by Bela Lyon Pratt. This first-year quarter eagle is a brilliant yellow Gem with frosty luster and bold design motifs. Both sides have trivial grade-consistent marks. NGC ID# 288Y, PCGS# 7939

5605 1909 MS64 NGC. CAC. Lovely green-gold color with a few orange highlights provides this near-Gem example with nice eye appeal. Further adding to the appeal, the coin displays very few abrasions and they are minuscule. NGC ID# 288Z, PCGS# 7940

5606 1910 MS64+ PCGS. This sharply detailed 1910 Indian quarter eagle exhibits light pumpkin-gold surfaces, with highlights of green color. Minimal abrasions add to the appeal of this high-end Choice example. NGC ID# 2892, PCGS# 7941

5607 1910 MS64 PCGS. CAC. The vivid greenish-gold surfaces of this attractive Choice example display vibrant mint luster and sharply detailed design elements with few signs of contact. Eye appeal is terrific. NGC ID# 2892, PCGS# 7941

**1910 Quarter Eagle, MS65+
Excellent Type Issue**

5608 1910 MS65+ NGC. The quarter eagles of 1908 to 1915 are popular with type collectors who prefer an early date rather than one from the late 1920s. This boldly defined Gem exhibits subdued yellow-gold luster with a few grade-consistent surface marks on each side. NGC has only certified 14 finer examples (5/13). NGC ID# 2892, PCGS# 7941

5609 1911 MS64+ NGC. CAC. This high-end Choice specimen exhibits pleasing green and reddish-gold surfaces, with vibrant mint luster and sharply detailed design elements. Eye appeal is outstanding. NGC ID# 2893, PCGS# 7942

5610 1911-D Strong D — Ex-Jewelry — PCGS Genuine. XF Details. No edge or rim damage is evident although this key date two and a half has been polished. The khaki-gold surfaces are hairlined and glossy but lack noteworthy abrasions. NGC ID# 2894, PCGS# 7943

5611 1912 MS64 PCGS. CAC. The 1912 Indian quarter eagle is an underrated issue, especially in high grade. This attractive Choice specimen displays vivid orange-gold surfaces with vibrant mint luster and a few hints of lilac. Sharply detailed design elements add to the extraordinary eye appeal. NGC ID# 2896, PCGS# 7944

1912 Indian Quarter Eagle, MS64+

5612 1912 MS64+ PCGS. CAC. An outstanding example of this higher mintage issue, one with a rather low survival rate. The 1912 quarter eagle had the third highest mintage of the Indian Head series, yet has an average certified grade of just MS60. This frosty and fully lustrous near-Gem has brilliant yellow-gold surfaces with exceptional eye appeal. NGC ID# 2896, PCGS# 7944

5613 1913 MS64 NGC. CAC. An attractive Choice specimen, with vibrant mint luster, sharply detailed design elements, and well-preserved yellow and rose-gold surfaces. Eye appeal is outstanding. NGC ID# 2897, PCGS# 7945

5614 1913 MS64 PCGS. CAC. Vibrant mint luster and vivid orange-gold surfaces are the hallmarks of this impressive Choice example, with well-detailed design elements and ample eye appeal. NGC ID# 2897, PCGS# 7945

5615 1913 MS64 PCGS. CAC. Yellow-orange luster takes on violet attributes on parts of each side. Well-defined and pleasingly preserved. The holder has a scrape over the left obverse that should not be interpreted as damage to the coin. NGC ID# 2897, PCGS# 7945

5616 1914 MS62 NGC. Possibly the most frequently encountered grade for the 1914 quarter eagle. This piece has lustrous yellow-gold surfaces with scattered marks. A sharp impression. NGC ID# 2898, PCGS# 7946

**1914-D Quarter Eagle, MS64
Scarce Denver Issue**

5617 1914-D MS64 NGC. The Denver Mint produced Indian quarter eagles in 1911, 1914, and 1925, and those are the only branch mint issues of the type. The 1911 is rare, the 1914 is scarce, and the 1925 is common. This near-Gem has lustrous honey-gold color with frosty surfaces and minimal marks. The present piece is the finest that most collectors may obtain, as less than 100 finer examples have been certified. NGC ID# 2899, PCGS# 7947

**1914-D Quarter Eagle, MS64
First Generation Holder**

5618 1914-D MS64 PCGS. CAC. A khaki-gold representative of the middle Denver issue of the series. As one might expect, the 1914-D is rarer than the 1925-D but more prevalent than the 1911-D. This is a sharply struck near-Gem with exemplary luster, clean fields, and a couple of tiny ticks on the cheekbone. Certified in a first generation holder. NGC ID# 2899, PCGS# 7947

5619 1915 MS64+ PCGS. This high-end Choice specimen exhibits sharply detailed design elements and vibrant mint luster, with pleasing orange-gold surfaces that show a few highlights of lilac. NGC ID# 289A, PCGS# 7948

5620 1915 MS64 PCGS. CAC. A window of light gold at the left obverse yields to deeper peach shadings over the rest of each side. Pleasingly detailed overall, if a trifle soft on the pendants of the necklace, with smooth eye appeal. NGC ID# 289A, PCGS# 7948

5621 1915 MS64 PCGS. CAC. This Choice 1915 Indian quarter eagle exhibits well-detailed design elements and lightly marked orange and greenish-gold surfaces. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 289A, PCGS# 7948

5622 1915 MS64 NGC. CAC. The bright greenish-gold surfaces of this attractive Choice specimen show a few hints of orange, with vibrant mint luster and well-detailed design elements. Eye appeal is exceptional. NGC ID# 289A, PCGS# 7948

5623 1925-D MS65 PCGS. The obverse in particular displays a range of attractive colors, including brilliant orange and light blue, on this Gem. The coin is well-struck and the few minor abrasions are almost entirely outside of the designs. This is a lovely example. NGC ID# 289B, PCGS# 7949

**1925-D Quarter Eagle, MS65+
Plentiful Denver Issue**

5624 1925-D MS65+ PCGS. CAC. This is the common Denver Mint Indian quarter eagle, and the one usually chosen by branch mint type collectors. This lovely Gem has a bold strike with faint rose overtones on frosty yellow-gold surfaces. Few marks are noted on either side. PCGS has only certified 31 finer examples (5/13). NGC ID# 289B, PCGS# 7949

5625 1926 MS64 PCGS. This lovely Choice example displays golden-orange color overall, with hints of green and ice-yellow also present. Pleasing luster adds to the attractiveness. A few minor marks appear.

Ex: Long Beach Signature (Heritage, 1/2004), lot 6904, which realized \$1,092.50. NGC ID# 289C, PCGS# 7950

5626 1926 MS64 NGC. A few dark toning splashes appear at the bottom of the reverse on this fully brilliant and highly lustrous piece. Frosty surfaces exhibit minimal contact marks. NGC ID# 289C, PCGS# 7950

5627 1926 MS64+ PCGS. CAC. Hints of blue and silver are present on this high-end near-Gem example displaying overall yellow-gold color. The piece is minimally abraded and displays a well-executed strike. NGC ID# 289C, PCGS# 7950

**1926 Quarter Eagle, MS65+
Appealing Gem Type Coin**

5628 1926 MS65+ PCGS. CAC. The 1926 quarter eagle is one of the most plentiful of the entire series. Even MS65 examples can be located with patience. High-end Gems, such as this coin, and numerically finer specimens are much more difficult, however. Its rose-gold surfaces offer pleasing luster and well-defined devices, including the eagle's shoulder feathers. This is a minimally marked and appealing coin. NGC ID# 289C, PCGS# 7950

5629 1927 MS64 PCGS. The well-preserved orange-gold surfaces of this attractive Choice example display vibrant mint luster with a few hints of rose and lilac. The design elements are well-detailed and visual appeal is strong. NGC ID# 289D, PCGS# 7951

5630 1927 MS64 PCGS. Rich luster and deep golden-orange color provide this sharply struck near-Gem example with a strong degree of eye appeal. The reverse includes a splash of cherry along with areas of bright yellow. Several small contact marks near the Indian's face likely held this piece from a higher grade. A couple of tiny alloy spots appear. NGC ID# 289D, PCGS# 7951

5631 1928 MS64 NGC. Pale yellow-gold color with a few subtle hints of peach provides this Choice piece with a pleasing appearance. The coin exhibits a nice strike and there are no contact marks worthy of individual mention. NGC ID# 289E, PCGS# 7952

5632 1928 MS64 NGC. A luminous example of the penultimate Indian quarter eagle issue, yellow-to-orange with areas showing a distinctly coppery overtone. A handful of grade-defining marks are visible, including a few ticks on the face and a scrape below the R in LIBERTY. NGC ID# 289E, PCGS# 7952

5633 1928 MS64 NGC. A sharply struck specimen, this Choice Mint State 1928 quarter eagle has brilliant yellow gold surfaces with frosty luster. NGC ID# 289E, PCGS# 7952

5634 1928 MS64 NGC. CAC. A few hints of rose mingle with the more prevalent greenish-gold hues on this attractive Choice example. The design elements are well-detailed and vibrant mint luster adds to the outstanding eye appeal. NGC ID# 289E, PCGS# 7952

5635 1928 MS65 PCGS. A radiant orange-gold type coin whose dynamic luster and crisp strike confirm the eye appeal. Minor field marks are near the Indian's chin and the E in LIBERTY. Encapsulated in a green label holder. NGC ID# 289E, PCGS# 7952

5636 1928 MS65 NGC. The vivid greenish-gold surfaces of this impressive Gem radiate vibrant mint luster and the design elements are sharply detailed throughout. NGC has graded 16 numerically finer examples (5/13). NGC ID# 289E, PCGS# 7952

5637 1929 MS64 NGC. A lovely Choice representative, this piece displays nice straw-gold color with accents of peach. A pleasing level of design definition is present. Although none is overly distracting, contact marks appear and were likely the grade-limiting factor. NGC ID# 289F, PCGS# 7953

5638 1929 MS64 NGC. An exceptional example of the final Indian quarter eagle issue, this Choice Mint State piece has frosty and fully brilliant yellow-gold luster with bold design motifs. NGC ID# 289F, PCGS# 7953

5639 1929 MS64 NGC. A frosty and highly lustrous orange-gold near-Gem, this 1929 quarter eagle has sharp design motifs and excellent eye appeal. NGC ID# 289F, PCGS# 7953

1929 Quarter Eagle, MS65 Final Indian Head Issue

5640 1929 MS65 PCGS. This is the final issue of the Indian quarter eagle series, and one of the most plentiful of the series. It is the only easily obtained gold coin dated 1929. Both sides of this Gem exhibit frosty yellow-gold luster with bold design motifs and exceptional eye appeal. A condition rarity, with only three finer PCGS certified coins (5/13). NGC ID# 289F, PCGS# 7953

THREE DOLLAR GOLD PIECES

5641 1854 — Improperly Cleaned — NGC Details. Unc. A mildly bright and lightly hairlined representative of the single-year Small Letters subtype. The canary-gold surfaces are devoid of consequential abrasions. NGC ID# 25M3, PCGS# 7969

1854 Three Dollar, MS62+

5642 1854 MS62+ NGC. First year of the denomination, the 1854 is also a one-year subtype with small letters in DOLLARS. Only the Philadelphia Mint coined both types. This Select Mint State piece has frosty yellow luster with coppery toning splashes on each side. A lovely example for a date or type collection. NGC ID# 25M3, PCGS# 7969

5643 1854-O — Damaged — NGC Details. XF. Variety 2. A small roundish dig near the E in AMERICA may account for the NGC notation, though the reverse has three mentionable marks, noted on the rim at 3 o'clock, near the rim at 1:30, and on the wreath east of the date. Glimpses of luster emerge from the straw-gold surfaces. NGC ID# 25M5, PCGS# 7971

5644 1854-O — Improperly Cleaned — NCS. AU Details. Variety 2. The usually encountered die state with lapped ribbon loops. This apricot-gold example is faintly hairlined and has minor mint-made strike-throughs near the TA in STATES and the 85 in the date. NGC ID# 25M5, PCGS# 7971

1854-O Three Dollar, Almost Uncirculated

5645 1854-O AU50 NGC. Variety 2. The reverse die is lapped; the usual die state. No New Orleans gold type set can be completed without the 1854-O, which places strong demand on survivors from the mintage of 24,000 pieces. The present wheat-gold representative shows moderate wear but is surprisingly unabraded and lacks any distracting strike-throughs. NGC ID# 25M5, PCGS# 7971

1854-O Three Dollar, AU50

5646 1854-O AU50 NGC. Variety 2. A straw-gold example of this popular variety, requisite for the New Orleans specialist. Flashes of luster fill the legends and outline the wreath. The surfaces are subdued and free from consequential contact. The '54-O is known for strike-throughs, but none are apparent on the present piece. NGC ID# 25M5, PCGS# 7971

5647 1855 AU58 PCGS. CAC. An attractive near-Mint example from the second year of the denomination, this pleasing orange-gold example shows just a trace of wear on the well-detailed design elements. NGC ID# 25M6, PCGS# 7972

5648 1856 XF45 NGC. Luster remains on this Choice XF piece, which boasts pleasing eye appeal, relatively few abrasions, and nice green-gold patina. This is a lovely example. NGC ID# 25M8, PCGS# 7974

5649 1856 AU55 NGC. This lovely lightly circulated Choice AU example displays yellow-gold color overall with portions of the protected areas revealing hints of peach. A pleasing degree of mint luster remains. There are no contact marks worthy of mention. NGC ID# 25M8, PCGS# 7974

5650 1856-S XF45 NGC. Medium S. This tan-gold San Francisco type coin is only lightly abraded aside from a tick near the upper serif of the mintmark. Liberty's curls exhibit wear commensurate with the grade. NGC ID# 25M9, PCGS# 7975

5651 1856-S XF45 NGC. Medium S. A butter-gold example of this scarce but collectible San Francisco issue. The high points exhibit moderate wear and the mildly bright fields display a couple of thin marks. NGC ID# 25M9, PCGS# 7975

5652 1857 AU53 NGC. Mintages steadily declined in the three dollar series until they reached the level that was actually used in commerce. Yellow-gold, green, and peach combine to provide this piece with a nice appearance. NGC ID# 25MA, PCGS# 7976

1857-S Three Dollar, AU Details
Mintage 14,000 Pieces

5653 1857-S — Scratch — PCGS Genuine. AU Details. Though a curving scratch under Liberty's chin puts this piece in net-grade territory, the lightly worn reverse is generally pleasing. A sizable planchet void at the top of the wreath is not an influence on the technical grade, while generous sun-gold luster is semireflective in the fields.

5654 1858 — Graffiti — PCGS Genuine. AU Details. A light X above the R in DOLLARS was entered long ago to test the alloy of the present lot. Ample bright luster illuminates the legends. The 1858 Philadelphia mintage of the denomination was much smaller than the preceding four years. NGC ID# 25MC, PCGS# 7978

1860 Three Dollar Gold Piece, AU58

5655 1860 AU58 NGC. With a mintage of 7,036 coins, the 1860 three-dollar gold piece is a scarce issue, and survivors are infrequently encountered. This near-Mint specimen has satiny light yellow surfaces with brilliant luster and only a trace of high point rub. A few scattered marks are inconsequential. NGC ID# 25ME, PCGS# 7980

5656 1861 — Improperly Cleaned — NGC Details. AU. This apricot-gold better date three dollar gold piece possesses substantial luster but the surfaces have faint hairlines. Small patches of pinscratches are noted in front of the chin and above the R in DOLLARS. NGC ID# 25MG, PCGS# 7982

1862 Three Dollar, Almost Uncirculated
Scarce Civil War Date

5657 1862 AU50 NGC. CAC. An original apricot-gold example with bright luster throughout the legends and other design recesses. Void of noticeable marks. The curls and forehead show only minor wear. A meager mintage of 5,750 pieces ensures the scarcity of this Civil War issue. Certified in a prior generation holder. NGC ID# 25MH, PCGS# 7983

5658 1864 — Cleaning — PCGS Genuine. AU Details. The lemon-gold surfaces are noticeably bright but this Civil War example shows only light wear on the wreath and curls. The fields display scattered minor abrasions. From a mintage of just 2,600 pieces. NGC ID# 25MK, PCGS# 7985

5659 1866 — Improperly Cleaned — NGC Details. AU. Pockets of luster illuminate the legends of this briefly circulated scarce date three. Only mildly cleaned, though we note small field marks beneath the chin and a couple of thin lines behind the mouth. Just 4,000 pieces were struck. NGC ID# 25MM, PCGS# 7987

5660 1866 AU55 PCGS. Only 4,000 three dollar gold pieces were struck in 1866. This lightly circulated example displays lightly abraded surfaces with prooflike reflectivity in sheltered areas. Population: 25 in 55, 55 finer (5/13). NGC ID# 25MM, PCGS# 7987

5661 1867 AU55 PCGS. This light yellow Choice AU specimen survives from a low mintage of only 2,600 coins. Both sides show light high-point wear with faint greenish overtones and splashes of rose patina. Considerable luster remains with only a few faint hairlines on each side. Population: 23 in 55, 30 finer (5/13). NGC ID# 25MN, PCGS# 7988

5662 1869 AU50 PCGS. This wheat-gold three dollar displays hints of red, along with traces of luster in the recesses. The design elements are well detailed. Only 2,500 three dollar gold pieces were struck in 1869, making the issue quite scarce in AU and rare in Mint State grades. NGC ID# 25MR, PCGS# 7990

5663 1869 AU55 NGC. Areas of red and orange appear at portions of the lettering on the obverse of this Choice AU example, adding to the eye appeal. An as-made lint mark is present on the reverse along with a few small marks above the date. Census: 40 in 55, 71 finer (4/13). NGC ID# 25MR, PCGS# 7990

5664 1870 XF40 NGC. CAC. Despite 20 points of wear, this 1870 three dollar gold still possess considerable cachet. A single mark on the jaw is among few overt marks, and the yellow-gold surfaces engage the viewer with a decent strike and good eye appeal. The mintage was only 3,500 pieces for the issue. NGC ID# 25MS, PCGS# 7991

5665 1870 AU50 PCGS. The 1870 is scarce in all grades, not surprising with its low production run of only 3,500 pieces. The prooflike surfaces of this lightly circulated three dollar gold piece exhibit only minor abrasions. NGC ID# 25MS, PCGS# 7991

1872 Three Dollar, AU58+
Mintage 2,000 Pieces

5666 1872 AU58+ NGC. An excellent "slider coin" that shows just a touch of rub on the highest points of the devices and near-uninterrupted yellow-gold luster with a hint of orange. By 1872 the three dollar was an also-ran denomination and the high-mintage flukes of 1874 and 1878 had not happened, so the business strike mintage was low, just 2,000 pieces. Census: 64 in 58 (1 in 58+), 30 finer (5/13). NGC ID# 25MV, PCGS# 7994

**1872 Three Dollar, AU58
Reflective Peripheries**

5667 1872 AU58 PCGS. CAC. Rich yellow-orange color with prime reflectivity pooled in the protected areas on each side. Just a touch of rub affects the high points of the devices, and based on the absence of abrasions, the AU58 designation and CAC affirmation are richly deserved. A great post-Civil War three dollar piece from an issue of 2,000 pieces. Population: 42 in 58, 35 finer (5/13). NGC ID# 25MV, PCGS# 7994

5668 1874 XF45 PCGS. Hints of orange, red, and green appear on this lightly circulated example retaining a pleasing appearance. The mintage of the 1874 three dollar was considerably larger than many of the other issues, with 41,800 coins produced, largely due to the Mint Act of 1873 mandating that old gold coins be melted and new pieces produced. NGC ID# 25MX, PCGS# 7998

5669 1874 AU53 NGC. The 1874 is one of the three large-mintage issues in the series, well suited for type set purposes. Hints of peach, orange, and green appear on this lightly circulated example that retains luster. NGC ID# 25MX, PCGS# 7998

5670 1874 AU55 PCGS. The 1874 three dollar gold piece had the third highest mintage of any issue of the denomination, and it follows that this is the third most common issue. This Choice AU specimen has brilliant luster with a trace of wear on the high points as expected for the grade. An outstanding example with lovely surfaces. NGC ID# 25MX, PCGS# 7998

5671 1874 AU58 PCGS. The 1874 was the second of three high-mintage issues in the three dollar gold series. This near-Mint coin shows attractive yellow-gold color and no mentionable marks, a well-struck piece with good eye appeal. NGC ID# 25MX, PCGS# 7998

5672 1874 AU58 NGC. CAC. Excellent eye appeal arises on this near-Mint 1874 three from the deep orange-gold color, minimally marked surfaces, and slight circulation rub. A nice type coin, high-end for the grade. NGC ID# 25MX, PCGS# 7998

**1874 Three Dollar, MS62
Popular Type Coin**

5673 1874 MS62 PCGS. Warm apricot-gold luster is this three dollar type coin's greatest asset. Peripheral definition is soft, most visibly on the feathers in the headdress and the knot of the wreath, but the interiors offer slightly better detail. Between the strike and a luster scrape to the left of the date, the MS62 designation is justified, but this is a coin that will please the right buyer. NGC ID# 25MX, PCGS# 7998

5674 1878 AU55 NGC. Canary-gold color provides this Choice AU example with a pleasing degree of eye appeal. Attractive peach color resides in the protected areas. There are no marks worthy of individual mention on this lovely piece. NGC ID# 25MZ, PCGS# 8000

5675 1878 AU55 NGC. The protected areas in particular reveal vibrant mint luster on this lovely Choice AU three dollar gold piece. Attractive orange color frames much of the design elements. As expected, a number of contact marks are present, but they are minor with none being worthy of individual mention. NGC ID# 25MZ, PCGS# 8000

5676 1878 AU58 NGC. Lovely canary-gold color and rich luster add to the eye appeal of this nicely struck near-Mint representative. Areas of peach hues appear in portions of the protected areas. A few abrasions are present near the face, but pose minimal distraction. NGC ID# 25MZ, PCGS# 8000

5677 1878 MS60 PCGS. A beautiful butter-gold type coin that is unquestionably high end for its designated grade. Lustrous, smooth, and well struck. Minor die doubling is noted on the right-side cotton leaves. Housed in an old green label holder. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar, MS61
Ideal Type Candidate**

5678 1878 MS61 PCGS. The 1878 had the second highest mintage of the denomination with a little over 80,000 coins produced. Only 1854 had a higher mintage, and there were just eight other issues that had more than 10,000 coins minted. This issue is ideal for type collectors. The piece offered in this lot is a fully lustrous light yellow-gold example with trivial marks of no consequence. NGC ID# 25MZ, PCGS# 8000

5679 1879 AU53 NGC. The reddish-gold surfaces of this three dollar possess traces of luster in the protected areas. Fairly good detail shows on the design elements. NGC ID# 25N2, PCGS# 8001

5680 1882 AU55 PCGS. CAC. From a mintage of just 1,500 pieces, the 1882 three dollar gold is a scarce date in higher grades. This Choice AU specimen offers well-detailed design elements with more detail on the reverse and lightly abraded yellow-gold surfaces. Prooflike reflectivity is evident in sheltered areas. NGC ID# 25N5, PCGS# 8004

**1882 Three Dollar, MS60
Prooflike**

5681 1882 MS60 NGC. The mintage of only 1,500 coins suggests a rarity, although the survival rate was high, so specimens are available on a regular basis today. However, these coins are still rare when compared to other gold denominations. This example has brilliant yellow surfaces with mirrored fields and minimal marks. A highly attractive example. NGC ID# 25N5, PCGS# 8004

5682 1886 — Cleaning — PCGS Genuine. AU Details. A scant 1,000 business strikes constitutes the 1886 mintage, along with 142 proofs. The present lightly circulated canary-gold commercial example displays delicate hairlines but will satisfy many collectors of the challenging series. NGC ID# 25N9, PCGS# 8008

**1886 Three Dollar Gold, AU58
Conditionally Rare in Higher Grades**

5683 1886 AU58 NGC. Only 1,000 business-strike three dollar gold pieces were struck at the Philadelphia Mint in 1886, and high-grade examples are more difficult to locate than the proofs of this date. This near-Mint example displays reflective prooflike surfaces and pleasing yellow-gold color with subtle hints of orange. Census: 45 in 58, 40 finer (5/13). NGC ID# 25N9, PCGS# 8008

**1887 Three Dollar Gold, AU58
Much Luster Remains and Prooflike Fields**

5684 1887 AU58 NGC. This slider AU has ample mint luster and bright prooflikeness in the fields, and only an inconspicuous vertical mark on the cheek merits mention. The obverse is nicely die doubled on LIBERTY and AMERICA, as usual for business strikes of this low-mintage issue. A mere 6,000 pieces were struck. For whatever reason, the 1887 is noticeably scarcer in better grades than the 1888, which had an even smaller production. Ex: *Denver Signature (Heritage, 8/2006)*, lot 1786. NGC ID# 25NA, PCGS# 8009

**1888 Three Dollar, Borderline Uncirculated
Attractive Patina**

5685 1888 AU58 PCGS. A lovely peach-gold slider. Luster dominates raised areas, and the few marks are not of any significance. A hint of high point wear denies a Mint State assessment. UNITED is clearly die doubled, though this feature is common to the low business strike emission of 5,000 pieces. NGC ID# 25NB, PCGS# 8010

5686 1889 — Improperly Cleaned — NGC Details. Unc. Careful rotation finally reveals delicate hairlines, but this caramel-gold final-year three dollar piece will appeal to many collectors. There are no distracting marks and the strike is crisp throughout.

EARLY HALF EAGLES

**1800 Five Dollar, XF Details
Blundered M, BD-4**

5687 1800 — Mount Removed — NGC Details. XF. BD-4, R.4. Bass-Dannreuther Die State d/c exists with and without a cud over the first T in STATES. The Bass plate coin lacks that cud, while the present lot possesses that die break. The Blundered M (in AMERICA) variety. This canary-gold piece has damage on the left-side obverse rim and tooling on the reverse border at 1 and 7 o'clock. The shield lines are re-engraved and the reverse center has a few pin scratches. NGC ID# 25NW, PCGS# 8082

1805 Five Dollar, AU Details, BD-1

5688 1805 — Obverse Spot Removed — NGC Details. AU. BD-1, High R.3. Bass-Dannreuther a/a. This better date early half eagle is hairlined and somewhat glossy with a few moderate obverse abrasions. The bust displays adjustment marks, as made. The eagle's breast feathers display full detail, which indicates little or no actual circulation.

**1806 Round Top 6 Five Dollar
XF Sharpness, 7x6 Stars, BD-6**

5689 1806 Round Top 6, 7x6 Stars — Smoothed — PCGS Genuine. XF Details. BD-6, R.2. A thoroughly whizzed lemon-gold example with smoothed areas near 1, 5, and 10 o'clock on the reverse. The obverse has an evenly granular texture. A scarce early gold type. BD-6 is the sole variety of the Bust Left design with a 7x6 star arrangement. NGC ID# 25P5, PCGS# 8089

**1811 Half Eagle, AU Sharpness
BD-1, Tall 5 Variant**

- 5690** 1811 Tall 5 — Removed From Jewelry — NGC Details. AU. BD-1, High R.3. No edge or rim damage is apparent, but the surfaces are a bit bright and exhibit myriad tiny marks consistent with casual storage. The more elusive of the two known 1811 half eagle varieties. Though the Reich Head type has a deservedly reputation for scarcity, all dates are collectible.

CLASSIC HALF EAGLES

- 5691** 1834 Plain 4 — Obverse Damage — NCS. Unc. Details. Breen-6502, McCloskey 2-A, R.1. The obverse “damage” consists of a few minute digs above the 83 in the date. However, a series of slender parallel marks are noted on the lower portion of the shield. Peach-tinged luster fills the margins and devices.
Ex: Dallas Signature (Heritage, 10/2008), lot 2058, which realized \$1,380. NGC ID# 25RR, PCGS# 8171

- 5692** 1834 Crosslet 4 — Cleaned — ANACS. XF45 Details. Breen-6503, McCloskey 5-D, R.4. The sole Crosslet 4 Classic die marriage, and key to a Philadelphia Mint Guide Book set. This moderately glossy apricot-gold example is smoothed on the field near STATES but possesses substantial plumage detail. PCGS# 8172

**1834 Crosslet 4 Classic Five, AU Details
An Underrated, Overlooked Series Rarity**

- 5693** 1834 Crosslet 4 — Cleaning — PCGS Genuine. AU Details. Second Head, Breen-6503, McCloskey 5-D, R.4 This overlooked scarcity is seldom seen in any grade and is especially challenging in AU and Mint State. The contrast between the Crosslet 4 and Plain 4 Classic fives is a stark one, the Crosslets are among the three rarest issues in the series while the Plain 4s are by far the most common. Signs of cleaning are minimal on this piece, and the green-gold surfaces are peppered with the expected small abrasions. PCGS# 8172

- 5694** 1835 AU50 PCGS. Breen-6505, McCloskey 3-D, R.3. This lightly circulated butter-gold half eagle is free from noticeable marks. The eagle is well struck while Liberty's curls exhibit minor blending. The more available of the two Second Head die varieties for the date. NGC ID# 25RV, PCGS# 8173

LIBERTY HALF EAGLES

- 5695** 1839 XF45 NGC. A wonderful Choice XF representative, this piece exhibits pleasingly original surfaces, providing a high degree of visual appeal. Areas of golden-orange and red-orange are present and serve as attractive accents. A desirable example for the discerning collector. NGC ID# 25S7, PCGS# 8191

- 5696** 1839-D VF20 PCGS. Variety 2-A. This piece with butter-gold color is a circulated representative of this difficult Dahlonega issue, noteworthy for its obverse mintmark and single-year portrait subtype. Several long marks appear on the obverse and lacquer residue is present on the reverse. Housed in a green label holder. NGC ID# 25S9, PCGS# 8193

- 5697** 1840 Narrow Mill AU55 NGC. The Narrow Mill variety is more available than its Broad Mill counterpart, but high-grade specimens are still elusive. This lightly circulated specimen displays lustrous yellow-gold surfaces. Census: 67 in 55, 83 finer (5/13). NGC ID# 25SA, PCGS# 8194

**1840-D Half Eagle, AU50
Tall D Mintmark**

- 5698** 1840-D Tall D AU50 NGC. Variety 3-B. Two distinct mintmark sizes are known for the '40-D. Since specialists collect both varieties, this increases demand for survivors from the low mintage of 22,896 pieces. The present almond-gold example displays glimpses of luster along with light wear on the high points. Marks are distributed and range from moderate to inconsequential. NGC ID# 25SG, PCGS# 8198

- 5699** 1841 AU50 NGC. A lightly circulated yellow-gold example of this elusive issue, from a tiny mintage of 15,800 pieces. Traces of mint luster and most original design detail remains intact. Census: 6 in 50, 43 finer (5/13). NGC ID# 25SN, PCGS# 8202

1842-C Large Date Five, AU50

- 5700** 1842-C Large Date AU50 PCGS. Variety 1. On this more common obverse for the 1842-C half eagle, the date fills much more of the exergue than it does on the rarer Small Date. Areas of brighter yellow-gold color appear at the rims and serve as highlights on the eagle. Several as-made strike-throughs appear on the obverse, primarily near the outer edges. Population: 11 in 50, 31 finer (5/13). NGC ID# 25SW, PCGS# 8209

- 5701** 1843 AU58 PCGS. Pumpkin-gold color and pleasing luster provide this near-Mint example with a nice degree of eye appeal. The protected areas reveal areas of peach color on this well-struck example. Population: 27 in 58, 26 finer (5/13). NGC ID# 25T2, PCGS# 8213

5702 1843-D Medium D — Improperly Cleaned — NGC Details. AU. Variety 11-G (formerly 10-H). This well defined honey-gold Dahlonaga type coin is polished and exhibits moderate field abrasions. A collectible representative of the bygone Southern facility, which burned to the ground in an 1878 fire.

5703 1844-O AU55 PCGS. Variety 3. Five die pairs are confirmed for the 1844 New Orleans No Motto type issue. This Choice AU piece displays a die lump above the D in UNITED, one of the diagnostics for the Variety 3 examples. More often seen in well-circulated grades, this Choice AU example of the 1844-O half eagle would make an excellent representative for type purposes. Population: 34 in 55, 55 finer (5/13). NGC ID# 25TA, PCGS# 8222

5704 1845-D XF45 NGC. Variety 15-H (formerly 13-I). Easily the rarer of the two 1845-D die pairs, the date is situated high and centered instead of to the left beneath the bust. A wheat-gold Dahlonaga five with noticeable luster and moderate softness of strike on the eagle's neck. Lightly abraded save for minor field marks near the bust tip. NGC ID# 25TC, PCGS# 8224

5705 1846-D XF45 NGC. Variety 16-H. This Choice XF Dahlonaga type coin displays rich orange toning and has pleasing sharpness for the grade. Ice-gray color frames portions of the central devices, particularly on the reverse. Small marks are distributed, with none meriting individual mention. Census: 21 in 45, 55 finer (5/13). Ex: FUN Signature (Heritage, 1/2007), lot 5846, which realized \$2,300. NGC ID# 25TH, PCGS# 8228

5706 1847 — Rotated Dies — VF35 PCGS. The PCGS insert states "90 Degree Counter-Clockwise Rotated Reverse," though either die could have been misaligned. The present olive-gold example is surprisingly unabraded. The strike is soft on the curls but the eagle's plumage is well defined. NGC ID# 25TL, PCGS# 8231

5707 1847-O VF25 NGC. CAC. Variety 1. Though the 1847-O eagle has a mintage of 571,500 pieces, the half eagle production at New Orleans that year was a miserly 12,000 pieces. The present khaki-gold representative retains some plumage definition and has smooth fields. The cheek has a trio of thin lines. NGC ID# 25TR, PCGS# 8235

5708 1848-D VF20 NGC. Variety 21-N (previously unlisted). A very rare die variety unlisted in the 2003 Winter reference, notable for a die crack through the upright of the R in AMERICA and a heavy horizontal die line in the shield. Liberty's neck is well worn but the stars and left wing display substantial detail. No marks are noticeable, though a slender retained lamination bisects the obverse between 11 and 5 o'clock. NGC ID# 25TU, PCGS# 8238

5709 1851 MS61 PCGS. Bright lustrous yellow-gold surfaces provide this piece with nice eye appeal. Although a number of contact marks are present, none are worthy of individual mention. An as-made lint mark appears below the first S in STATES. Struck from lightly rotated dies. Population: 10 in 61, 26 finer (5/13). NGC ID# 25U5, PCGS# 8246

5710 1851 MS61 PCGS. An extraordinary example from the California Gold Rush era, this brilliant yellow No Motto half eagle exhibits deeper lemon toning splashes on each side. A plentiful issue but rarely available in Mint State grades. Population: 10 in 61, 26 finer (5/13). NGC ID# 25U5, PCGS# 8246

1851-O Half Eagle, AU53 Scarcer O-Mint

5711 1851-O AU53 NGC. Variety 1. An apricot-gold example with original color and only minimal marks. The strike shows selected softness near the centers, usual for this scarcer No Motto New Orleans issue. One small bright area noted above star 10. The mintage was just 41,000 pieces. Census: 19 in 53, 36 finer (4/13). NGC ID# 25U9, PCGS# 8249

5712 1852 MS61 PCGS. This lemon-gold No Motto five lacks noticeable marks and offers substantial luster. The strike is good though incomplete on the left-side stars and Liberty's lovelock. Certified in a green label holder. NGC ID# 25UA, PCGS# 8250

5713 1852-C — Spot Removed — PCGS Genuine. AU Details. Variety 2. The scarcer of the two die varieties, the date is left-aligned with the bust tip. This wheat-gold Charlotte half eagle displays clusters of pinscratches beneath the stem end, above the eagle's neck, and above the upper arrowhead. A pinscratch is noted between 11 o'clock and Liberty's neck. NGC ID# 25UB, PCGS# 8251

1852-C Half Eagle, AU55 Reddish Patina Surrounds the Devices

5714 1852-C AU55 NGC. Variety 1. Sole die pairing for the year. A loupe reveals a scattering of small marks on each side, none of them overly distracting, particularly in light of the good eye appeal remaining. Much luster clings to deep orange-red surfaces, and the strike is far sharper than on many examples of this denomination and mint. NGC ID# 25UB, PCGS# 8251

5715 1852-D — Obverse Damage — NGC Details. AU. Variety 32-V (formerly 27-U). The obverse periphery displays a bright, narrow band of pinscratches. Otherwise, this yellow-gold Dahlonaga type coin has good eye appeal due to its plentiful pockets of remaining luster. The strike shows moderate blending on the stars and major devices. NGC ID# 25UC, PCGS# 8252

5716 1853 MS61 NGC. The 1853 is a No Motto type issue but is usually encountered in XF or AU grades. Uncirculated examples are scarce. The present piece has a bold strike and is free from visible marks, though an area of wispy abrasions is above the eagle's head. NGC ID# 25UD, PCGS# 8253

5717 1853-D Large D — Cleaning — PCGS Genuine. AU Details. Variety 35-AA (formerly 29-U). This green-gold Dahlonaga type coin is remarkably devoid of abrasions but has been gently wiped. The strike is above average though the dentils are soft and the curls are incompletely impressed. NGC ID# 25UF, PCGS# 8255

5718 1854-D Large D — Cleaning — PCGS Genuine. XF Details. Variety 37-BB (formerly 31-X). This olive-gold and peach-red Dahlonaga type coin displays parallel hairlines but the only visible mark is a line near the R in AMERICA. Liberty's curls and the eagle's fletchings show the inexactness of strike associated with the Georgian facility. NGC ID# 25UK, PCGS# 8258

**1855-D Five Dollar, AU53
Large D Variety**

- 5719 1855-D Large D AU53 NGC. Variety 38-EE (formerly 32-AA).** This low mintage Dahlonega half eagle exhibits unmarked caramel-gold surfaces. The strike is good overall, although the eagle's neck and Liberty's lovelock show softness. The right-side stars are attenuated from die lapping, as produced.

Ex: Milwaukee Central States Signature (Heritage, 4/2010), which realized \$3,515.55. NGC ID# 25US, PCGS# 8263

- 5720 1855-S — Improperly Cleaned — NGC Details. AU.** San Francisco concentrated on double eagle production in 1855, since that denomination was the unit of account for West Coast banking. Only 61,000 half eagles were struck, and most were melted long ago. The present tan-gold example is glossy and subdued. A moderate rim ding is on the reverse at 2 o'clock. NGC ID# 25UU, PCGS# 8265

- 5721 1857 MS61 NGC.** A sharply detailed Mint State specimen with lightly marked yellow-gold surfaces and vibrant mint luster. Eye appeal is outstanding. Census: 17 in 61, 23 finer (5/13). NGC ID# 25V2, PCGS# 8271

- 5722 1857-C XF45 NGC. CAC. Variety 1.** A green-gold type coin from the antebellum Charlotte facility. Impressively free from marks except for a single line beneath the TAT in STATES. The strike is good with softness noted on the eagle's neck and the curls near the bun. NGC ID# 25V3, PCGS# 8272

- 5723 1859-D Medium D — Improperly Cleaned — NGC Details. VF. Variety 43-CC (formerly 36-CC).** The almond-gold surfaces are hairlined but lack obtrusive marks. Though designated as VF Details, traces of luster are apparent, and a soft strike is more responsible than wear for the lack of definition on Liberty's curls. The Dahlonega issue has a low mintage of 10,366 pieces. NGC ID# 25VD, PCGS# 8282

- 5724 1860-S XF45 PCGS.** A number of handling marks are evident on both sides of this Choice XF example, with traces of luster remaining in the protected areas. The mintage of this issue was just 21,200 coins, and survivors are elusive in all grades. Population: 4 in 45, 7 finer (5/13). NGC ID# 25VJ, PCGS# 8287

- 5725 1861 MS61 NGC.** This popular Civil War date is brightly lustrous and lightly abraded, with a couple of minor obverse rim bruises at 6 and 7 o'clock the only marks of note. The design elements are well-detailed. NGC ID# 25VK, PCGS# 8288

**1866-S Liberty Half Eagle, XF45
First Year With Motto**

- 5726 1866-S Motto XF45 NGC.** From a mintage of 34,920 pieces, the 1866-S Liberty half eagle is the first issue with the motto IN GOD WE TRUST. This lightly abraded Choice XF specimen retains much of its original design detail and traces of mint luster, with pleasing yellow and orange-gold surfaces. Census: 9 in 45, 16 finer (5/13). NGC ID# 25W2, PCGS# 8312

- 5727 1868-S AU50 NGC.** This scarce issue saw immediate circulation of its emission of 52,000 pieces, like so many other S-mint coins in the coinage-starved West, and survivors are scarce in XF or higher grades. Hints of green and peach are present on this lightly circulated example displaying overall even wear. Census: 11 in 50, 45 finer (4/13). NGC ID# 25W6, PCGS# 8316

- 5728 1871 — Cleaning — PCGS Genuine. Unc. Details.** Gold coins failed to circulate in 1871, and the token production of 3,200 pieces was probably to prevent any embarrassing speculation of the 30 proofs produced that year. This yellow-gold example is free from wear but has been wiped and exhibits delicate hairlines. NGC ID# 25WC, PCGS# 8322

1871-S Five Dollar, Still-Lustrous AU58

- 5729 1871-S AU58 NGC.** Generous semireflective luster is apricot-gold on the obverse with elements of peach on the reverse. While striking softness, typical for the issue, is noted on details such as the hair below the coronet and the eagle's neck, only a trace of actual wear is visible on the high points. NGC has graded only two Mint State examples of this issue (4/13). NGC ID# 25WE, PCGS# 8324

- 5730 1874-CC Fine 15 ANACS. Variety 2-C.** Despite a low mintage of 21,198 pieces, at least seven die pairs have been identified for this scarce Carson City issue. Apparently, coinage was intermittent throughout the year and appropriate dies were selected at random. A sea-green and apricot-gold example with pleasing wing plumage detail and two thin marks near stars 8 and 11. NGC ID# 25WP, PCGS# 8334

- 5731 1879-CC VF35 PCGS. Variety 1-A.** Antique-gold color appears on both sides of this Choice VF example. Splashes of rose-peach hues are present at some of the protected areas. The wear is even on both sides and there are no marks worthy of mention. This is a very pleasing circulated example. Population: 15 in 35, 88 finer (5/13). NGC ID# 25X8, PCGS# 8349

1879-CC Half Eagle, AU53

- 5732 1879-CC AU53 NGC. **Variety 1-A.** This Carson City five is from a mintage of just 17,281 pieces. The luminous apricot-gold surfaces display relatively few marks, and substantial luster brightens design elements. The strike is generally good though the eagle's neck and fletchings are soft. NGC ID# 25X8, PCGS# 8349

1882-CC Half Eagle, Borderline Uncirculated

- 5733 1882-CC AU58 NGC. **Variety 1-A.** A single die pairing is known from the production of 82,817 pieces. Luster dominates the borders of this canary-gold Carson City five. Liberty's eyebrow and other high points exhibit minor blending but most design elements are crisp. No marks remotely merit mention. NGC ID# 25XH, PCGS# 8359

- 5734 1882-S MS64+ PCGS. **CAC.** Rich luster, particularly on the reverse, provides this high-end near-Gem example with a bold degree of eye appeal. Honey-gold and peach colors combine for pleasing color along with areas of bright yellow highlights. Population: 11 in 64+, 11 finer (5/13). NGC ID# 25XJ, PCGS# 8360

1882-S Five Dollar, MS65
Very Scarce in Gem Condition

- 5735 1882-S MS65 NGC. This lustrous peach-gold Gem has a nearly pristine appearance save for a single brief hair-thin line above the eagle's right (facing) shoulder. Though a common issue in typical Mint State grades, the 1882-S becomes an important conditional rarity at the MS65 level. Census: 27 in 65, 3 finer (5/13). NGC ID# 25XJ, PCGS# 8360

- 5736 1885-S MS64+ NGC. A well-executed strike and attractive honey and orange colors add to the eye appeal of this lustrous high-end near-Gem example. A couple of contact marks near the eagle pose little distraction, if any. Census: 15 in 64+, 108 finer (5/13). NGC ID# 25XT, PCGS# 8368

1890 Half Eagle, MS62
Conditionally Rare Low-Mintage Issue

- 5737 1890 MS62 NGC. **CAC.** A mere 4,240 half eagles were struck for circulation in 1890. Given that low figure, it is not surprising that there are few Mint State survivors. This piece displays canary-gold color and good luster. The strike produced a pleasing level of detail. The piece exhibits the typical abrasions for the grade level. Census: 3 in 62, 3 finer (5/13). NGC ID# 25Y2, PCGS# 8375

1890-CC Five Dollar, Bright Yellow-Gold MS62

- 5738 1890-CC MS62 NGC. **Variety 1-A.** A luminous sun-gold representative of this later but scarce Carson City emission. Marks are refreshingly scarce and trivial. The borders and motifs shimmer with luster. The strike is close to full though the lovelock and eagle's neck show incompleteness. NGC ID# 25Y3, PCGS# 8376

1890-CC Half Eagle, MS62

- 5739 1890-CC MS62 PCGS. **CAC. Variety 1-A.** Olive-green and apricot-gold alternate across this boldly struck Carson City five. Marks are minor for the grade despite a slender line beneath the hairbun. Luster dominates the legends and stars. More elusive than its 1891-CC successor, which has nearly four times the mintage. NGC ID# 25Y3, PCGS# 8376

- 5740 1891-CC MS61 NGC. **CAC. Variety 1-A.** A crisply struck and satiny apricot-gold representative. Small marks are present but are fewer in number and severity than is usual for the designated grade. A popular Carson City type issue. NGC ID# 25Y5, PCGS# 8378

**1892 Liberty Five, MS65
Condition Rarity**

5741 1892 MS65 PCGS. A coin with tremendous eye appeal on both sides, this Gem displays lovely butter-gold color with subtle hints of peach and rich satin luster. The design elements display a sharp level of detail. Several tiny die breaks appear on the reverse. A few scattered marks appear, primarily in the fields. Although the 1892 half eagle was produced in large numbers, the date is rare in higher grades. Population: 34 in 65 (5 in 65+), 22 finer (5/13). NGC ID# 25Y6, PCGS# 8379

5742 1895 MS64 NGC. Vibrant satin luster and rich colors in intermingled shades of pumpkin-gold, bright yellow, and peach provide this near-Gem with nice eye appeal. Sharply defined devices add to the attractiveness. NGC ID# 25YH, PCGS# 8390

5743 1895-S MS61 NGC. Splashes of red-orange and peach colors are scattered on this honey-gold example of a better date in the series that was released into circulation rather than housed in overseas banks. The number of mint state survivors is small, as indicated by the census data, with only a few dozen having achieved that grade level from the two major services combined. As expected at this grade level, numerous marks are present. A granular area appears near the arrows. Census: 16 in 61, 6 finer (5/13). NGC ID# 25YJ, PCGS# 8391

5744 1901-S MS64+ NGC. This high-end near-Gem possesses rich luster and lovely gold, green, and peach colors. The design elements display a pleasing level of detail. NGC ID# 25YX, PCGS# 8404

5745 1901-S MS64 PCGS. CAC. A pleasing butter-gold near-Gem, this piece displays exemplary luster and a sharp strike. The coin is largely unabraded. This example is from a plentiful issue overall, but is a good value relative to higher grades. Several tiny die cracks appear on the reverse. NGC ID# 25YX, PCGS# 8404

5746 1901-S MS65 NGC. A lovely honey-gold Gem, this piece includes hints of peach and green. The coin exhibits strong design definition and rich satin luster. Minor contact marks are present, including a few near the mouth. NGC ID# 25YX, PCGS# 8404

5747 1904 MS64+ NGC. CAC. The luminous peach-gold surfaces of this high-end Choice example show only a few minor contact marks, with sharply detailed design elements and outstanding eye appeal. NGC ID# 25Z4, PCGS# 8409

5748 1905-S MS63 PCGS. Rich cartwheel luster and pleasing butter-gold color provide this Select example with tremendous eye appeal. Splashes of orange-gold are also present. A small spot appears near 9 o'clock on the obverse. Population: 31 in 63, 30 finer (5/13). NGC ID# 25Z7, PCGS# 8412

5749 1906 MS64 NGC. The brassy-gold surfaces of this near-Gem five dollar exhibit pleasing luster and are well struck up on the devices. A few scattered marks are within the parameters of the designated grade. NGC ID# 25Z9, PCGS# 8413

5750 1906-D MS63+ NGC. A high-end Select representative from the first year of Denver Mint coinage, this coin displays lovely honey-gold color and retains nice luster. The 1906-D is one of only two D-mint Liberty half eagle issues. NGC ID# 25ZA, PCGS# 8414

**1906-D Liberty Half Eagle, MS65
First Denver Issue**

5751 1906-D MS65 NGC. As the first issue from the Denver Mint, the 1906-D Liberty half eagle is an important issue for mintmark type collectors. This impressive Gem exhibits sharply detailed design elements and vibrant mint luster, with outstanding eye appeal. Census: 56 in 65, 10 finer (5/13). NGC ID# 25ZA, PCGS# 8414

5752 1907-D MS64+ NGC. CAC. The lustrous honey-gold surfaces of this high-end near-Gem example also reveal hints of peach and green color. A small as-made strike-through appears near Liberty's eye. A tick is present near 2 o'clock on the reverse rim. NGC ID# 25ZD, PCGS# 8417

5753 1908 MS65 NGC. Lustrous and well struck, this final-year Gem displays delicate apple-green and caramel-gold shades. This well-preserved representative would be a good candidate for the advanced gold type collector. NGC ID# 25ZE, PCGS# 8418

INDIAN HALF EAGLES

5754 1908 MS63 NGC. This Select piece is a lovely representative of the popular first year of the unusual incuse Indian design. The coin displays lovely yellow-gold color and nice luster. There are no marks worthy of individual mention. NGC ID# 28DE, PCGS# 8510

5755 1908 MS63+ PCGS. CAC. A sharp strike, attractive yellow-gold color, and nice luster provide this high-end Select example with a pleasing appearance. A small spot appears near the top of the eagle's left wing. NGC ID# 28DE, PCGS# 8510

5756 1909 MS63 PCGS. CAC. One of the more available dates in the Indian Head half eagle series. This Select example show an obverse that is particularly clean and appealing — perhaps even suggestive of a finer grade — but a few small, scattered contact marks on the reverse determine the grade while not defeating the excellent eye appeal. The color is attractive auburn-gold. NGC ID# 28DH, PCGS# 8513

**1909 Half Eagle, MS64
Satin Type Coin**

5757 1909 MS64 NGC. Swirling luster has an intriguing mix of straw-gold, butterscotch, and peach shadings. Both sides are generally well-defined with a touch of satin. The 1909 half eagle is among the more accessible issues in its series and remains available for a price as a near-Gem, though finer coins are conditionally scarce. NGC ID# 28DH, PCGS# 8513

**1909 Indian Five Dollar, MS64
Scarce in Higher Grades**

5758 1909 MS64 PCGS. CAC. The 1909 Indian half eagle enjoyed a large mintage of 627,060 pieces in the second year of the innovative incuse design. This impressive Choice example displays boldly defined design elements and lustrous yellow-gold surfaces, with hints of pumpkin-gold color. The 1909 is very scarce in higher grades. NGC ID# 28DH, PCGS# 8513

5759 1910-D MS62 PCGS. This attractive 1910-D Indian half eagle displays pleasing yellow and rose-gold surfaces with especially vibrant mint luster and well-detailed design elements throughout. NGC ID# 28DL, PCGS# 8518

**1910-S Indian Half Eagle, MS61
Challenging Issue in High Grade**

5760 1910-S MS61 PCGS. CAC. A richly toned Mint State specimen that has golden-brown and aqua-blue patina. The surfaces are immaculately preserved. The design elements are sharply detailed throughout and the surfaces retain much of their original mint luster. Struck from lightly clashed dies. The 1910-S is much more difficult to locate than its large mintage would suggest. Ex: *Central States Signature (Heritage, 4/2002)*, lot 1188. NGC ID# 28DM, PCGS# 8519

**1910-S Indian Five, MS62
Finest Certified Weak S Specimen**

5761 1910-S Weak S MS62 NGC. This attractive 1910-S Indian half eagle features well-detailed central design elements, but the peripheral devices are softly rendered. The mintmark is barely discernible. NGC has recently begun certifying this Weak S variety and this coin is currently the finest example graded. The pleasing green and rose-gold surfaces show a few minor contact marks on both sides. Census (Weak S): 1 in 62, 0 finer (5/13). PCGS# 88519

**1911 Five Dollar, MS64
Tough to Locate Any Finer**

5762 1911 MS64 PCGS. The 1911 is among the more available half eagle issues in high grade, making them good candidates for type collections. Butter-yellow and pumpkin-gold colors combine to provide this near-Gem with an attractive appearance. A small mark in the right reverse field poses minimal distraction, if any. PCGS has awarded higher numeric grades to only 52 pieces (5/13). NGC ID# 28DP, PCGS# 8520

**1911-D Indian Five Dollar, AU58
Notable Low-Mintage Issue**

5763 1911-D AU58 NGC. Several attractive shades of yellow-gold color are present on the obverse of this near-Gem, while the reverse exhibits khaki-gold color. The piece displays a pleasing degree of luster. The nicely struck surfaces reveal a trace of rub on the high-points. A thin line extends from stars one to four. NGC ID# 28DR, PCGS# 8521

**1911-S Indian Half Eagle, MS62
Elusive Issue in High Grade**

5764 1911-S MS62 NGC. CAC. The 1911-S Indian half eagle is much more difficult to locate than its large mintage of 1.4 million pieces would suggest, especially in high grade. This attractive MS62 example exhibits well-detailed design elements and lustrous copper-gold surfaces with a scattering of minor contact marks that explain the grade. NGC ID# 25ZM, PCGS# 8522

1912-S Indian Five, MS61
Challenging Date in High Grade

5765 1912-S MS61 NGC. CAC. The 1912-S Indian half eagle is one of the most elusive issues of the series in high grade. This attractive MS61 example displays bright mint luster and pleasing orange-gold surfaces that show the expected number of minor contact marks for the grade. The 1912-S is known for striking problems, but this specimen exhibits better-than-average detail on all design elements. NGC ID# 25ZN, PCGS# 8524

5766 1913 MS63+ PCGS. This high-end Select example displays shimmering surfaces and deep yellow-gold color with subtle hints of green, orange, and lemon-yellow. The coin exhibits an attractive strike, adding to the eye appeal. NGC ID# 28DT, PCGS# 8525

1913 Half Eagle, MS64
Conditionally Rare in Gem Grades

5767 1913 MS64 PCGS. Rich golden-orange color overall with scattered areas of khaki-green provides this near-Gem with lovely eye appeal. A portion of the eagle's left wing includes small splashes of pink and ice-green. The coin displays lustrous surfaces and sharply defined design elements. PCGS has awarded higher numeric grades to only 51 examples (5/13). NGC ID# 28DT, PCGS# 8525

5768 1914 MS63 PCGS. CAC. Sandy-gold surfaces show a single straight tick in the obverse field before the Indian's mouth, and tiny copper spots appear on the uppermost headdress feather, and on a star near the left obverse rim; both are exceedingly small. The reverse shows scattered small scrapes, none singular. NGC ID# 28DU, PCGS# 8527

5769 1914-S AU58 NGC. CAC. This pleasing near-Mint State half eagle possesses generous amounts of luster on its yellow-gold surfaces, and exhibits quite nice design definition. Some light marks in the fields do not detract from the overall appeal. NGC ID# 28DW, PCGS# 8529

5770 1915 MS63 NGC. Light yellow-gold with a few coppery elements and a suggestion of wire rim on the obverse. Decently detailed, including three complete pendants on the necklace, with only minor, scattered abrasions accounting for the Select grade. NGC ID# 28DX, PCGS# 8530

5771 1916-S MS61 NGC. CAC. The 1916-S Indian half eagle is reasonably available in lower Mint State grades, making it a popular choice of mintmark type collectors. This well-detailed MS61 specimen displays bright yellow and rose-gold surfaces, with a few spots of amber. NGC ID# 28DY, PCGS# 8532

1916-S Half Eagle, MS62
Frosted Mint Luster and Nicely Toned

5772 1916-S MS62 PCGS. The '16-S is the final Indian half eagle issued during the decade, and one of the last two dates to utilize the design, along with 1929. These were the last two gold coins of the denomination issued by the U.S. Mint prior to the 1933 gold recall by the government. This frosty Mint State specimen has rich yellow luster with considerable orange toning, mostly within the obverse devices. NGC ID# 28DY, PCGS# 8532

1916-S Half Eagle, MS62
Last San Francisco Circulating Five

5773 1916-S MS62 PCGS. CAC. Light sun-gold luster has apricot and caramel accents. Though both sides show a number of light abrasions, the strike is strong, as is the overall eye appeal for an MS62 coin. The 1916-S half eagle issue was the last for the denomination until the ill-fated melt rarity of 1929. NGC ID# 28DY, PCGS# 8532

LIBERTY EAGLES

5774 1843-O XF45 NGC. Variety 4. This No Motto New Orleans ten is well defined aside from some softness of strike on the hair above the ear. Marks are moderate though we note slight rim dings at 7:30 on the obverse and 4:30 on the reverse.
Ex: Houston Signature (Heritage, 12/2008), lot 2105. NGC ID# 262R, PCGS# 8589

5775 1846-O XF40 PCGS. Variety 3. The common variety formerly listed as an overdate but now regarded as struck from a damaged date punch. The scarce early die state with clear repunching above the mintmark. A peach-gold XF example without any individually consequential marks, though small abrasions are distributed. NGC ID# 262X, PCGS# 8595

5776 1846-O — Cleaned — ANACS. AU Details, Net XF40. Breen-6875, Variety 3. Variety 3 is the most prevalent for the issue and was, in recent decades, considered an 1846/5-O. The variety has since been reclassified as a defective date logotype punch. This yellow-gold example is hairlined and moderately bright with a minor reverse rim ding at 2 o'clock. NGC ID# 262X, PCGS# 8595

5777 1846-O XF45 NGC. Variety 4. A rare die variety with the mintmark closer to the stem tip than the left (facing) claw. The obverse is shared with Variety 3, the familiar flawed logotype punch formerly listed as an 1846/5-O. The present butter-gold New Orleans ten has scattered minor marks and a light impression on Liberty's curls. The eagle's wing plumage is bold. NGC ID# 262X, PCGS# 8595

- 5778 1847 AU58 PCGS.** A near-Mint example of the bulged central bun variety without the shield ring on the reverse, this piece retains vibrant mint luster. Although numerous abrasions are present as expected at this grade level, there is none worthy of individual mention. Population: 22 in 58, 26 finer (5/13). NGC ID# 262Z, PCGS# 8597

**1848 Eagle, MS60
Condition Rarity**

- 5779 1848 MS60 NGC.** Despite a healthy mintage of 145,484 business-strikes, the 1848 eagle is surprisingly scarce at or approaching the Mint State levels. Although several dozen examples were recovered from the *S.S. Republic*, which sank in 1865, there was not a single Mint State example was among them. This piece displays light caramel-gold color and a pleasing degree of design definition overall, with light rub on the ear. Portions of the protected areas reveal nice luster. Census: 7 in 60, 22 finer (5/13). NGC ID# 2633, PCGS# 8599

- 5780 1848-O PCGS Genuine. Variety 1.** The PCGS number ending in .92 suggests cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been cleaned. The present butter-gold piece is glossy from polishing but retains most of its initial design detail. Variety 1 has a shield ring, unlike the other two die pairings for this scarce New Orleans issue. NGC ID# 2634, PCGS# 8600

- 5781 1848-O XF45 PCGS. Variety 2.** This honey-gold Liberty ten displays ample luster and has only minor wear, though the stars and curls are softly impressed. The fields exhibit the expected number of marks. No shield ring. A scarce No Motto New Orleans issue. Population: 30 in 45, 47 finer (4/13). NGC ID# 2634, PCGS# 8600

**1848-O Ten Dollar, AU50
With the Curious Ring on the Reverse**

- 5782 1848-O AU50 PCGS. CAC. Variety 1.** A shield ring atop the second vertical stripe identifies the die variety. Much scarcer than its 1847-O predecessor, the 1848-O is typically encountered in XF. This green-gold AU example displays peripheral glimmers of luster. The strike is typical and abrasions are minor save for a thin vertical line on Liberty's neck and a cluster of marks near star 3. NGC ID# 2634, PCGS# 8600

**1849-O Ten Dollar, XF45
Scarce New Orleans Issue**

- 5783 1849-O XF45 PCGS. Variety 2.** No shield ring, unlike the rare Variety 3. The 1849-O is a much better No Motto New Orleans issue. The mintage of 23,900 pieces compares favorably with the 1847-O production of 571,500 pieces. The orange-gold surfaces reveal pockets of luster. No marks merit individual mention. Population: 23 in 45, 19 finer (4/13). NGC ID# 2636, PCGS# 8602

- 5784 1850-O AU50 PCGS. CAC. Variety 1.** Sea-green and honey-gold toning enriches this scarce date No Motto New Orleans ten. No marks are distracting though unobtrusive laminations (as made) are on Liberty's jaw and near stars 3 and 11. Population: 19 in 50, 23 finer (5/13). NGC ID# 2639, PCGS# 8605

- 5785 1851-O AU55 PCGS. Variety 2.** This peach-gold representative has considerable luster and only one noticeable abrasion, a slender mark above the portrait. A shield ring rests atop the second vertical stripe, as always for this collectible New Orleans No Motto issue. Population: 41 in 55, 29 finer (4/13). NGC ID# 263B, PCGS# 8607

- 5786 1852 AU55 NGC.** Ex: *S.S. Republic*. The *S.S. Republic* sank in the Atlantic a few months after the Civil War. When the wreck was recovered, it contained a large and varied holding of Federal gold. This wheat-gold No Motto ten displays noticeable luster along with a couple of moderate rim dings and scattered small abrasions. NGC ID# 263C, PCGS# 8608

**1852 No Motto Ten, MS60
Far Above Average**

- 5787 1852 MS60 NGC.** A highly lustrous yellow-gold specimen, this 1852 No Motto eagle has frosty surfaces with a few scattered marks that are expected for the grade. Although quite a number were minted, most survivors entered circulation, and today the average certified grade only slightly exceeds AU50. This piece is one of only 50 submissions to NGC and PCGS that have been certified as Mint State. Census: 7 in 60, 30 finer (5/13). NGC ID# 263C, PCGS# 8608

1852-O No Motto Eagle, XF45

- 5788 1852-O XF45 PCGS. Variety 1.** The 1852-O, with a mintage of 18,000 pieces, is a difficult date to find in any grade. This is a mildly bright Choice XF representative with orange-red toning in protected areas. Well defined and only lightly abraded aside from thin marks near the left (facing) wingtip and above the eagle's head. Population: 23 in 45, 37 finer (4/13).
Ex: Long Beach (Heritage, 6/2002), lot 1642; Atlanta ANA Signature (Heritage, 4/2006), lot 1986, which realized \$2,530. NGC ID# 263D, PCGS# 8609

- 5789 1853 AU58 PCGS.** This lightly circulated Liberty eagle retains almost all of its original design detail and mint luster, with strong eye appeal for the grade. Population: 32 in 58, 24 finer (5/13). NGC ID# 263E, PCGS# 8610

- 5790 1854-O Large Date XF40 PCGS. CAC. Variety 3.** A peach-gold and sea-green example of this collectible New Orleans No Motto issue. No marks are conspicuous aside from two minor rim dings at 3 o'clock and 3:30 on the reverse. PCGS# 98614

- 5791 1854-S VF30 NGC.** Reddish-gold patination runs over both sides of this VF30 ten dollar. The remaining detail of the devices is consistent with the designated grade. Actually a very nice piece for a moderately circulated Liberty eagle. NGC ID# 263K, PCGS# 8615

- 5792 1854-S AU50 PCGS. CAC.** An attractive example of this lightly circulated Liberty eagle, with orange-gold surfaces that are minimally abraded for the grade and well-detailed design elements. Population: 59 in 50, 61 finer (5/13). NGC ID# 263K, PCGS# 8615

- 5793 1854-S AU50 PCGS. CAC.** Though the 1854-S half eagle and quarter eagle are famous rarities, the '54-S ten is collectible. This orange-gold example is well struck and free from detractors. Luster is especially prevalent on the reverse. Certified in a green label holder. NGC ID# 263K, PCGS# 8615

- 5794 1855-O PCGS Genuine. Variety 2.** The PCGS number ending in .92 suggests Cleaned as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been cleaned. A much better New Orleans issue from a mintage of just 18,000 pieces. Light orange-gold with lime-green peripheries. Moderately hairlined but nonetheless attractive. NGC ID# 263M, PCGS# 8617

1858-O Ten, AU58

High Grade Example of This Low Mintage Issue

- 5795 1858-O AU58 PCGS. Variety 1.** A lovely lemon-gold example of this better No Motto New Orleans issue. Sharply struck and minimally abraded with superior eye appeal for the designated grade. Inflows of Gold Rush bullion receded after the advent of the San Francisco Mint, and the 1858-O has a scant mintage of 20,000 pieces. Population: 10 in 58, 7 finer (4/13). NGC ID# 263X, PCGS# 8626

- 5796 1860-O — Streak Removed — PCGS Genuine. XF Details. Variety 2.** The low date variant of this very scarce New Orleans issue, the final ten dollar emission from the facility prior to its 1879 re-opening. The present yellow-gold representative appears to have AU sharpness but a streak of struck-in grease on the left obverse field is accompanied by a patch of coarse hairlines. NGC ID# 2645, PCGS# 98631

1861-S Eagle, AU Details

Low Mintage Issue

- 5797 1861-S PCGS Genuine.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been cleaned. Though the 1861 is comparatively plentiful, the 1861-S is a rare Civil War issue with a low survival rate from its mintage of 15,500 pieces. PCGS has certified just 54 pieces in all grades. A well struck but hairlined orange-gold example with distributed moderate marks. NGC ID# 2648, PCGS# 8634

- 5798 1861-S — Cleaning — PCGS Genuine. AU Details.** All San Francisco issues from the 1860s are rare, and the Civil War 1861-S is no exception. The mintage was just 15,500 pieces, and none were saved by numismatists until decades later. The present coin is polished but has a sharp strike and minimal circulation wear. NGC ID# 2648, PCGS# 8634

- 5799 1865 — Altered Surfaces — ANACS. AU50 Details.** The 1865 eagle is an unheralded rarity in the Liberty ten series. Only 3,980 pieces were struck, and most were eventually melted since the NGC Census shows only 28 pieces. The present example has only a wisp of circulation wear but the sun-gold surfaces are bright and microgranular.
Ex: Houston Signature (Heritage, 12/2009), lot 1762. NGC ID# 264F, PCGS# 8641

1865-S Eagle, XF Sharpness

Scarce Issue

- 5800 1865-S — Cleaning — PCGS Genuine. XF Details.** Though more available than its virtually uncollectible 1864-S predecessor, the 1865-S is nonetheless scarce, with only 19 pieces graded by PCGS during its 27-year existence, some of which likely represent duplicate submissions. (By comparison, the PCGS Population Report shows 86 graded 1794 dollars). The present No Motto eagle offers mildly luminous straw-gold surfaces. The cheek is lightly smoothed and Liberty's hair is faintly tooled, but there are no other relevant marks. NGC ID# 264G, PCGS# 8642

5801 1871-CC — Scratch — PCGS Genuine. VF Details. Variety 2-A. A meager mintage of 8,085 pieces ensures the rarity of this second-year Carson City ten. A cluster of thin vertical marks beneath TRUST confirms the PCGS designation. The only other consequential abrasion is on Liberty's jaw. NGC ID# 264X, PCGS# 8661

5802 1871-S XF40 NGC. CAC. The 1871-S Liberty eagle boasts a mintage of just 16,500 pieces and the date is scarce-to-rare in all grades. This nicely detailed specimen shows appropriate signs of wear for an XF40 coin, with peach-gold color and significant traces of mint luster. Census: 10 in 40, 56 finer (5/13). NGC ID# 264Y, PCGS# 8662

1874-CC Ten Dollar, VF35

5803 1874-CC VF35 PCGS. CAC. Variety 1-A. The 1874-CC is the most available Carson City ten from the 1870s. However, it would be considered a great rarity in many series, since PCGS has certified a total of only 167 pieces, including duplicate submissions, over the past 27 years. CAC has confirmed just 11 pieces in all grades (4/13). This lightly marked apricot-gold example displays wear on the wingtips and the hair above the ear but shows ample design definition. NGC ID# 2658, PCGS# 8670

1876-CC Eagle, XF Details 4,696 Pieces Struck

5804 1876-CC — Cleaning — PCGS Genuine. XF Details. Variety 1-A. This lemon-gold Carson City eagle is moderately glossy from cleaning but has only a single mentionable mark, found at the base of Liberty's neck. The strike is decidedly above average for this rare issue. The mintage of 4,696 pieces soon dissipated in Old West commerce. NGC ID# 265D, PCGS# 8675

1877-CC Ten, AU Sharpness Low Mintage of Only 3,332 Pieces

5805 1877-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A. Ex: Cornerstone Collection. A rare Carson City issue from a meager mintage of 3,332 pieces. Despite the minimal production, none were saved for numismatic reasons, and no Uncirculated examples are known today. The yellow-gold surfaces are somewhat bright but less abraded than usually encountered. Nicely struck with merging of detail confined to the lovelock and the hair above the ear.

5806 1881-O VF30 NGC. Variety 1. A much better New Orleans issue with a tiny mintage of 8,350 pieces. This midgrade sun-gold example appears to have XF sharpness, but abrasions are noted near the branch stem and the R in AMERICA, and the reverse has a small rim nick at 12 o'clock. NGC ID# 265Y, PCGS# 8693

5807 1882-S MS62 PCGS. The brightly lustrous yellow-gold surfaces of this attractive MS62 specimen are minimally abraded for the grade and the design elements are well-detailed. Population: 78 in 62, 13 finer (5/13). NGC ID# 2665, PCGS# 8698

5808 1883 MS61 Prooflike NGC. Only 16 1883 eagles have received the Prooflike designation from NGC, this MS61 piece among them (5/13). Orange-gold surfaces exhibit sharply struck devices, and there can be no denying the prooflikeness of this coin despite distributed minute marks. PCGS# 78699

1886-S Liberty Eagle, MS64 None Certified Finer

5809 1886-S MS64 PCGS. The 1886-S Liberty eagle was produced in large numbers, but few high-quality specimens were saved by contemporary collectors and the issue is rare in MS64 condition. This attractive Choice example displays vivid orange and greenish-gold surfaces, with vibrant mint luster and well-detailed design elements. Population: 15 in 64, 0 finer (5/13). NGC ID# 266G, PCGS# 8709

5810 1888 MS62 PCGS. The 1888 Liberty eagle is rarely encountered in high grade. This well-detailed rose-gold specimen shows a scattering of minor contact marks on both sides. Population: 47 in 62, 7 finer (5/13). NGC ID# 266K, PCGS# 8712

5811 1888-O AU58 NGC. Variety 1. Like other Motto New Orleans ten issues, the 1888-O has a low mintage. Just 21,335 pieces were struck. This momentarily circulated representative has rich apricot color and shows fewer than the expected number of small abrasions. Ex: Long Beach Signature (Heritage, 6/2007), lot 8784. NGC ID# 266L, PCGS# 8713

1889 Eagle, MS61
Only 4,440 Pieces Struck

5812 1889 MS61 NGC. The 1889 has the lowest mintage of any post-1883 Liberty eagle. A mere 4,440 pieces were struck and, since there was scant collector interest at the time, most entered circulation. The issue is rare in all grades, with NGC having awarded the MS61 grade to only 22 examples, with 10 finer consisting of 9 in MS62 and a sole MS63 example (5/13). Butter-gold color with hints of pumpkin-gold, pleasing luster, and sharply detailed design elements add to the eye appeal of this piece. NGC ID# 266N, PCGS# 8715

5813 1891 MS63 PCGS. Intermingled colors that include shades of vibrant orange and peach are present on both sides of this Select example. The design elements display a bold level of detail. Abrasions appear on both sides. The reverse reveals several thin wispy die cracks. Population: 50 in 63, 3 finer (5/13). NGC ID# 266T, PCGS# 8719

5814 1891-CC AU50 PCGS. CAC. Variety 2-B. Substantial luster beckons from the borders and devices of this almond-gold Carson City type coin. Smooth save for one small roundish mark beneath star 8. NGC ID# 266U, PCGS# 8720

5815 1893 MS64 NGC. Peach and green colors are present on this near-Gem example. The luster is particularly attractive on the reverse. The design elements exhibit sharp definition. NGC has awarded higher numeric grades to only 28 examples (5/13). NGC ID# 266Z, PCGS# 8725

5816 1893 MS64 NGC. Although the 1893 Liberty eagle enjoyed a huge mintage of 1.8 million pieces, survivors are quite rare at the Gem level, making near-Gems a considerably more obtainable and affordable alternative. Swirling luster and light honey-gold color create nice eye appeal for this near-Gem example. A solid strike adds to the attractiveness. NGC ID# 266Z, PCGS# 8725

5817 1893 MS64+ PCGS. CAC. Pumpkin-gold color and richly lustrous surfaces provide this high-end near-Gem with a lovely appearance. The cheek displays a small area of struck-in grease. Contact marks are present, but there is none worthy of mention. Population: 7 in 64+, 4 finer (5/13). NGC ID# 266Z, PCGS# 8725

5818 1894-O MS62 PCGS. Variety 3. A pleasing lemon-gold New Orleans eagle. Sharply struck and lightly abraded. Luster is especially dynamic at the margins. The base of the 1 in the date is lightly repunched. In a green label holder. NGC ID# 2676, PCGS# 8730

1895 Liberty Eagle, MS64+
Very Rare Any Finer

5819 1895 MS64+ NGC. CAC. From a mintage of 567,700 pieces, the 1895 Liberty eagle is seldom encountered in higher grades. This high-end Choice specimen exhibits sharply detailed design elements and vibrant mint luster, with pleasing peach-gold surfaces that show few signs of contact. NGC has certified four numerically finer examples (5/13). NGC ID# 2678, PCGS# 8732

5820 1897 MS64+ NGC. Both sides of this lovely high-end near-Gem display tremendous eye appeal due to lustrous honey-gold surfaces. The well-struck coin is minimally abraded, with a small mark above Liberty's eye posing little distraction, if any. A few tiny spots are present. Census: 2 in 64+, 31 finer (5/13). NGC ID# 267D, PCGS# 8737

5821 1897-O MS62 NGC. Variety 1. The 1897-O is scarce overall and conditionally rare in nice Mint State. The present khaki-gold New Orleans example is lustrous and smooth with a sharp strike except on the final two stars. NGC ID# 267E, PCGS# 8738

5822 1897-O MS62 PCGS. CAC. Variety 1. The top and bottom of the mintmark are thicker than on Variety 2. Generous green-influenced gold-orange luster with solid inner detail but weakness on several obverse stars and the leftmost leaf tips on the reverse. NGC ID# 267E, PCGS# 8738

1898-S Ten Dollar, MS63
Lightly Abraded and Lustrous

5823 1898-S MS63 NGC. Rich orange-gold margins pale to yellow at the warmly lustrous centers. Though lightly abraded overall, this later 19th century S-mint eagle retains considerable arm's-length charm thanks to boldly impressed devices that stand out from a distance. Census: 20 in 63, 3 finer (5/13). NGC ID# 267H, PCGS# 8741

5824 1899 MS64+ PCGS. CAC. A high-end Choice example of this popular Liberty ten, with sharply detailed design elements and well-preserved peach-gold surfaces. PCGS has graded 39 numerically finer examples (5/13). NGC ID# 267J, PCGS# 8742

1899-O Eagle, MS62
Conditionally Rare Late-Date Issue

5825 1899-O MS62 PCGS. Variety 1. A scant mintage of 37,047 pieces ensures the conditional rarity of this later New Orleans issue. The present lustrous and boldly struck representative is primarily pumpkin-gold but has sea-green margins. The reverse is lightly abraded while the obverse exhibits scattered moderate marks. Population: 42 in 62 (1 in 62+), 17 finer (5/13). NGC ID# 267K, PCGS# 8743

5826 1899-S MS63 PCGS. Brilliant surfaces, particularly on the reverse and gleaming luster provide this Select example with a high degree of eye appeal. The design elements exhibit a pleasing level of detail. Population: 53 in 63, 16 finer (4/13). NGC ID# 267L, PCGS# 8744

5827 1900 MS64+ PCGS. Vibrant frosty mint luster and sharply detailed design elements are the outstanding visual features of this high-end Choice specimen. The peach-gold surfaces are well-preserved as well. PCGS has graded 17 numerically finer examples (5/13). NGC ID# 267M, PCGS# 8745

5828 1901-S MS64+ PCGS. This sharply detailed high-end near-Gem exhibits prooflike surfaces on both sides although it is not designated as such. Bright shimmering lustrous yellow-gold surfaces provide this minimally abraded piece with exceptional eye appeal. NGC ID# 267S, PCGS# 8749

5829 1902-S MS65 NGC. This spectacular Gem Liberty ten exhibits well-preserved peach-gold surfaces with especially vibrant mint luster and sharply detailed design elements throughout. NGC has graded 14 numerically finer examples (5/13). NGC ID# 267U, PCGS# 8751

1902-S Ten Dollar, MS65+
Satiny and Bright

5830 1902-S MS65+ NGC. Satiny and cartwheelled with yellow-gold luster that takes on greater hints of apricot-orange toward the reverse. Impressively preserved with strong central detail, though the margins show uneven definition on the stars surrounding Liberty. NGC has graded only 14 examples as MS66 or finer (4/13). NGC ID# 267U, PCGS# 8751

1907-D Ten Dollar Liberty, MS64
Wonderful Color and Luster

5831 1907-D MS64 PCGS. An eye-catching near-Gem that appears even finer at first glance. The powerfully lustrous fields are alluring butter-yellow with occasional sun and wheat accents, and the sharp strike further supplements the eye appeal. Tied for the finest certified example known to PCGS (4/13).
Ex: Dallas Signature (Heritage, 10/2008), lot 2279. NGC ID# 2689, PCGS# 8764

INDIAN EAGLES

5832 1908 No Motto AU58 PCGS. A scarce, low-mintage date with a mintage of 33,500 pieces, the 1908 No Motto is nonetheless available for a price up into the higher Mint State grades. This near-NGC ID# 28GG, PCGS# 8853

5833 1908-D Motto MS61 NGC. Despite its large mintage, the 1908-D Motto Indian eagle is seldom encountered in high grade. This well-detailed Mint State example displays satiny mint luster and lightly marked orange-gold surfaces. NGC ID# 28GK, PCGS# 8860

1909-D Eagle, MS62

5834 1909-D MS62 NGC. CAC. The Denver Mint was busy minting half eagles in 1909, and the mintage of that denomination was the highest of any Indian half eagle issue. However, among eagles, the 1909-D was one of the lower mintage issues with a production of only 121,450 coins. One of those is the MS62 offered here, with frosty yellow luster and delicate rose overtones. Splashes of dark greenish-ebony are also present on this example. Both sides show minor marks that are expected for the grade. NGC ID# 28GN, PCGS# 8863

5835 1909-S MS61 PCGS. Myriad surface marks appear on both sides of this brilliant and frosty Indian eagle. The yellow-gold surfaces show a few splashes of darker patina. A pleasing example for a type set or specialized collection. NGC ID# 28GP, PCGS# 8864

5836 1910 MS63 NGC. The 1910 Indian eagle is an available date and a popular type coin. This pleasing Select example is well-detailed and lustrous, with a few minor contact marks on both sides. NGC ID# 28GR, PCGS# 8865

5837 1910-D MS63 NGC. The 1910-D Indian eagle is an available date and a favorite choice of mintmark type collectors. This sharply detailed Select specimen is brightly lustrous and minimally marked. NGC ID# 28GS, PCGS# 8866

5838 1910-D MS64 NGC. CAC. This impressive Choice example displays sharply detailed design elements and vibrant mint luster, with light yellow-gold surfaces that show few signs of contact. Areas of darker color appear at portions of the rims, adding to the eye appeal. NGC ID# 28GS, PCGS# 8866

5839 1911 MS63 NGC. This attractive Select specimen displays sharply detailed design elements and vibrant mint luster, and the pleasing orange-gold surfaces show a minimum number of contact marks for the grade. NGC ID# 28GT, PCGS# 8868

1911 Indian Ten, MS64

5840 1911 MS64 PCGS. Considered a common date, the 1911 eagle had a mintage of slightly over half a million coins. The typical survivor falls at the low end of the Mint State grading scale. This Choice Mint State piece is far finer than usual with frosty yellow surfaces and excellent design definition. NGC ID# 28GT, PCGS# 8868

5841 1911-D AU53 PCGS. Although not as rare as some dates in the series in absolute terms, the 1911-D is the rarest Indian eagle in high grade, from a tiny mintage of 30,100 pieces. Traces of luster show in the recesses of this D-mint eagle, and wheat-gold surfaces are well struck up. NGC ID# 28GU, PCGS# 8869

1911-D Eagle, AU58 Well-Struck Khaki-Gold Example

5842 1911-D AU58 NGC. This near-Mint State 1911-D eagle would make a nice accompaniment to a 1911-D quarter and 1911-D half eagle in the same grades, a "key date type set" of the Indian Head issues. The mintage of this 1911-D eagle was the lowest of the three, at 30,100 pieces. The khaki-gold surfaces are well-struck and free of all but a few minor abrasions. NGC ID# 28GU, PCGS# 8869

5843 1911-S AU55 NGC. CAC. From a low mintage of 51,000 pieces, the 1911-S Indian eagle is an elusive date in high grade. This Choice AU specimen is minimally abraded for the grade and retains much original mint luster. NGC ID# 28GV, PCGS# 8870

5844 1911-S AU58 NGC. An attractive near-Mint representative of this elusive issue, with just a trace of wear on the sharply detailed design elements and lustrous orange-gold surfaces that show few signs of contact. NGC ID# 28GV, PCGS# 8870

5845 1912 MS63 NGC. This attractive Choice Indian eagle features well-detailed design elements and slightly granular lustrous surfaces with the usual number of minor contact marks for the grade. NGC ID# 28GW, PCGS# 8871

5846 1912 MS63+ PCGS. CAC. A high-end Select example of this popular Indian eagle, with sharply detailed design elements and vibrant mint luster throughout. Vivid yellow and greenish-gold surfaces add to the considerable eye appeal. NGC ID# 28GW, PCGS# 8871

1912 Indian Ten, MS64 Very Scarce in Higher Grades

5847 1912 MS64 PCGS. The 1912 Indian eagle is an available date in the series, with a reported mintage of 405,000 pieces. However, the population falls off considerably above the MS64 level. This attractive Choice specimen displays well-detailed design elements and pleasing yellow and rose-gold surfaces, with slightly granular frosty luster. PCGS has graded 38 numerically finer examples (5/13). NGC ID# 28GW, PCGS# 8871

5848 1912-S AU58 NGC. The 1912-S Indian eagle is seldom encountered in high grade. This lightly circulated AU58 specimen exhibits well-detailed design elements and the usual complement of minor abrasions. NGC ID# 28GX, PCGS# 8872

5849 1912-S AU58 PCGS. The 1912-S eagle is very challenging in the higher grades as it was not saved at the time of issue. The wheat-gold surfaces of this AU58 example retain traces of luster in the recessed areas and have been in receipt of a decent strike. A moderate spot is visible under the M of the reverse motto. NGC ID# 28GX, PCGS# 8872

5850 1914 MS63 NGC. Apricot-gold surfaces are luminous with coppery overtones at parts of the high points, most visibly on the eagle's feathers. An abrasion that seems to underline the U in UNITED contributes to the grade. NGC ID# 28H2, PCGS# 8875

1915 Indian Ten, MS64 Well-Preserved Lustrous Surfaces

5851 1915 MS64 NGC. The 1915 Indian eagle claims a substantial mintage of 351,000 pieces, which apparently satisfied the need for this denomination in the eastern part of the country for the next decade. This sharply detailed Choice example displays vibrant mint luster and pleasing orange and rose-gold surfaces. NGC ID# 28H5, PCGS# 8878

**1915 Eagle, MS64
Popular Type Issue**

- 5852 1915 MS64 NGC.** About 4,000 examples of the 1915 eagle are thought to exist in all grades, and the date is popular with type collectors who wish to avoid the plentiful 1926 and 1932 issues. This near-Gem has frosty lemon-yellow luster with delicate rose overtones, a small splash of copper toning on the reverse, and a vertical scratch across the eagle's wings. NGC ID# 28H5, PCGS# 8878

**1915 Indian Eagle, MS64+
A Plentiful Issue**

- 5853 1915 MS64+ NGC.** The 1915 Indian ten ranks among the more frequently encountered issues of the series, and it is similar in rarity (or lack thereof) to the 1910, 1912, and 1913 issues. Wisps of pinkish-rose overtones appear on the brilliant and frosty yellow-gold surfaces of this sharply defined specimen. NGC ID# 28H5, PCGS# 8878

**1915 Indian Ten, MS64+
Elusive in Higher Grades**

- 5854 1915 MS64+ NGC.** The mintage of 351,000 coins was the ninth highest of the series. However, this date is still elusive in higher grades, and the average certified grade is only about MS61. This piece has brilliant yellow-gold surfaces with frosty mint luster and excellent design definition. NGC ID# 28H5, PCGS# 8878

1916-S Eagle, MS62

- 5855 1916-S MS62 PCGS.** This is a satiny Mint State example that is typically struck for the issue, with softness noted on the eagle's talons and leg feathers, and on the center of the obverse. The color is an attractive shade of reddish-gold, and the lustrous surfaces display abrasions that seem normal for the MS62 grade level. NGC ID# 28H7, PCGS# 8880

- 5856 1926 MS64 NGC.** Yellow-gold and green colors appear on this lustrous Choice representative. The hair detail is typically soft just below LIBERTY, but the remaining design elements are bold. A few small abrasions and luster grazes prevent a finer grade assessment. NGC ID# 28H9, PCGS# 8882

- 5857 1926 MS65 PCGS.** A spectacular Gem with sharply detailed design elements and vibrant mint luster throughout. The lemon-yellow surfaces are free of mentionable flaws and eye appeal is terrific. PCGS has graded 11 numerically finer examples (5/13). NGC ID# 28H9, PCGS# 8882

- 5858 1926 MS65+ NGC.** Plentiful in lower Mint State grades, the 1926 Indian eagle is very scarce above the Gem level. This sharply detailed example offers vibrant mint luster and pleasing orange-gold surfaces with hints of lilac. NGC has graded 53 numerically finer examples (5/13). NGC ID# 28H9, PCGS# 8882

- 5859 1932 MS64 NGC.** The 1932 Indian eagle is an available date and a popular type coin. This delightful Choice example is sharply detailed and brightly lustrous, with no mentionable distractions and outstanding eye appeal. NGC ID# 28HB, PCGS# 8884

- 5860 1932 MS64 NGC. CAC.** The highly lustrous peach-gold surfaces that are minimally marked for the designated grade and well struck devices affirm the pleasing overall eye appeal. This is a great coin for a high-grade type collection. NGC ID# 28HB, PCGS# 8884

- 5861 1932 MS64+ PCGS. CAC.** A high-end Choice example of this popular type issue, with sharply detailed design elements and vibrant mint luster on both sides. Only a few barely visible contact marks prevent a Gem designation. NGC ID# 28HB, PCGS# 8884

- 5862 1932 MS64+ NGC. CAC.** A virtual Gem, this Choice Mint State 1932 eagle is the only collectible U.S. gold coin of the decade, and this particular example is highly attractive with frosty yellow brilliance and splashes of rich orange toning. NGC ID# 28HB, PCGS# 8884

- 5863 1932 MS65 PCGS.** Rich lustrous surfaces and pleasing orange-gold color provide this nicely struck Gem with tremendous eye appeal. Highlights of pink, silver, green, and peach are also present. Minor marks appear on Liberty. Housed in a green label holder. NGC ID# 28HB, PCGS# 8884

- 5864 1932 MS65 PCGS.** Even at the Gem level, the 1932 Indian eagle is easy to locate. Accordingly, this issue is quite popular with type and date collectors alike. Vibrant luster exudes from the yellow-gold surfaces of this MS65 example. Both sides are very well preserved. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1850 Liberty Double Eagle, XF45 Popular First-Year Type Coin

- 5865 1850 XF45 PCGS.** As the first date of issue, the 1850 double eagles are popular with collectors. The coins are obtainable at most grade levels, adding to the appeal. Mint State examples became available thanks to the recovery of coins from the S.S. *Yankee Blade*, the S.S. *Central America*, S.S. *Brother Jonathan*, and the S.S. *Republic*. Areas of peach and rose-gold are present in the protected areas of the obverse on this Choice XF representative displaying antique-gold color with hints of orange and khaki. The piece displays even wear and has no mentionable marks. NGC ID# 268F, PCGS# 8902

1856-S S.S.C.A. Twenty, Choice AU No Serif, High Right S Variety

- 5866 1856-S AU55 PCGS. CAC. Variety 17N.** Ex: S.S. *Central America*. SSCA 7634. The No Serif, High Right S variety, per research by Robert Evans. This sun-gold Choice AU example provides substantial luster and good eye appeal. A few light hairlines on each side are barely visible. Housed in a gold label PCGS holder. Ex: Charlotte ANA Money Show (*Heritage*, 3/2007), lot 2173, which realized \$4,025. NGC ID# 2692, PCGS# 8919

- 5867 1858-S AU50 PCGS.** Struck the year after the S.S. *Central America* sank, and far enough prior to the sinking of the S.S. *Republic* and S.S. *Brother Jonathan* in 1865, this issue is scarce with few that were saved in higher grades. Both sides display light yellow surfaces with scattered marks. NGC ID# 2699, PCGS# 8925

1859-S Double Eagle, AU55 Few Found in Treasures

- 5868 1859-S AU55 NGC. CAC.** The 1858-S and 1859-S double eagles were minted after the S.S. *Central America* sunk in September 1857, and long enough before the S.S. *Republic* and S.S. *Brother Jonathan* both sank in 1865, that few examples were found in those treasures. The result is that survivors are usually well circulated. This Choice AU 1859-S twenty is far above average. Both sides have nearly full luster with pleasing surfaces that show only minimal marks. An important opportunity for the double eagle specialist. NGC ID# 269C, PCGS# 8928

1861 Liberty Twenty, AU58 Vibrant Luster and Color

- 5869 1861 AU58 NGC.** An attractive Type One double eagle from the first year of the Civil War, this lightly circulated example retains full vibrant mint luster and shows just the slightest trace of wear on the high points of the design. The vivid greenish-gold surfaces are lightly abraded and eye appeal is quite strong for the grade. NGC ID# 269G, PCGS# 8932

- 5870 1865-S — Improperly Cleaned — NGC Details. AU.** Small S. A yellow-gold double eagle from the waning year of the Civil War. Both sides are somewhat bright from cleaning and the obverse is typically abraded. The reverse displays comparatively few marks. NGC ID# 269V, PCGS# 8944

1865-S Double Eagle, AU53 Interesting Peripheral Die Cracks

- 5871 1865-S AU53 NGC.** A lightly circulated Liberty double eagle from the last year of the Civil War, this coin displays well-detailed design elements and an interesting network of die cracks through the obverse stars and reverse legends and denomination. The pleasing orange-gold surfaces show only minor abrasions. NGC ID# 269V, PCGS# 8944

**1870-S Liberty Twenty, AU58
Very Scarce in Higher Grades**

- 5872 1870-S AU58 NGC. CAC.** The 1870-S Liberty double eagle was produced in large numbers but, like most Type One twenties, most of the mintage circulated extensively and high-grade specimens are elusive in today's market. This attractive near-Mint coin displays well-detailed design elements with just a touch of wear, and lightly abraded orange-gold surfaces that retain most of their original mint luster. NGC has graded 51 numerically finer examples (4/13). NGC ID# 26A9, PCGS# 8959

- 5873 1873 Open 3 AU55 PCGS. Gold CAC.** An original and moderately abraded khaki-gold double eagle that displays the cartwheel sheen associated with a higher grade. The cheek nonetheless shows a hint of wear. Encapsulated in an old green label holder. NGC ID# 26AH, PCGS# 8967

**1873-S Liberty Twenty, MS61
Popular Closed 3 Variety**

- 5874 1873-S Closed 3 MS61 PCGS. CAC.** The 1873-S Liberty double eagle with a Closed 3 in the date is somewhat more available than its Open 3 counterpart. This attractive MS61 example exhibits well-detailed design elements, with lustrous orange-gold surfaces. PCGS has certified 27 numerically finer examples (5/13). NGC ID# 26AL, PCGS# 8969

**1875 Type Two Twenty, MS62
Splendid Type Coin**

- 5875 1875 MS62 PCGS.** A frosty and highly lustrous Mint State Type Two double eagle, this piece has brilliant yellow surfaces with traces of delicate pink and green overtones, minor surface marks of little consequence, and scattered copper spots to show its originality. A splendid specimen for a type collector or double eagle specialist. NGC ID# 26AS, PCGS# 8973

**1875 Liberty Double Eagle, MS62
Sought-After Type Two Date**

- 5876 1875 MS62 PCGS. CAC.** This attractive Type Two double eagle exhibits well-detailed design elements and lustrous peach-gold surfaces that show only minor signs of contact. The double eagle was the only gold denomination produced in collectible quantities at the Philadelphia Mint in 1875, all the other issues are famous rarities. PCGS has graded 70 numerically finer examples (5/13). NGC ID# 26AS, PCGS# 8973

**1878 Liberty Twenty, MS62
Vibrant Frosty Mint Luster**

- 5877 1878 MS62 NGC.** Like many other dates of this era, the 1878 Liberty double eagle was produced in large numbers and is not difficult to locate in grades up to the MS62 level. However, finer examples are very scarce. This well-detailed specimen displays especially vibrant mint luster and the usual number of minor contact marks for the grade. NGC has graded 31 numerically finer examples (5/13). NGC ID# 26B3, PCGS# 8985

- 5878 1878 Doubled Die Reverse MS61 PCGS. CAC. Breen-7270.** TWENTY DOLLARS and portions of E PLURIBUS UNUM are nicely die doubled. Other reverse legends are also doubled but with a lesser spread. A sharply struck and lustrous khaki-gold double eagle with a number of small marks that correspond to the grade. NGC ID# 26B3, PCGS# 8985

- 5879 1885-S MS62 NGC.** A few minor obverse scuffs account for the grade of this '85-S double eagle. Reddish-gold surfaces show a good amount of luster and exhibit well struck devices. NGC ID# 26BP, PCGS# 9005

- 5880 1887-S MS61 PCGS.** Large numbers of the 1887-S twenty dollar were shipped for international trade, and many have returned to the States. Locating an example in circulated or low-end Uncirculated should pose relatively little problems. The bright yellow-gold surfaces of this MS61 example exhibit sharply defined motifs and possess a good amount of luster. Light marks are scattered about. NGC ID# 26BS, PCGS# 9007

- 5881 1887-S MS61 PCGS. CAC.** The yellow and rose-gold surfaces of this pleasing Mint State specimen retain much original mint luster and show the expected number of minor contact marks for the grade. NGC ID# 26BS, PCGS# 9007

- 5882 1888-S MS62 NGC.** Considerable luster is present on the peach-gold surfaces of this MS62 twenty. The design elements are well impressed. This issue becomes much more challenging as finer. NGC ID# 26BU, PCGS# 9009

5883 1889 AU58 PCGS. Due to the low production number for this issue of only 44,070 pieces, representatives are relatively scarce. The reddish-gold surfaces of this near-Mint State specimen contain ample luster and display relatively well impressed design elements. NGC ID# 2695, PCGS# 9010

5884 1890 MS61 NGC. Semiprooflike fields exhibit modest field-motif contrast at certain angles. Yellow-gold surfaces are imbued with hints of mint-green and apricot, and exhibit crisply defined design features. None of the light, scattered marks are worthy of individual mention. Good eye appeal for an MS61. NGC ID# 26BX, PCGS# 9013

5885 1894-S MS63 PCGS. The vivid orange-gold surfaces of this attractive Select example show a few minor contact marks on each side, explaining the grade. Vibrant mint luster and well-detailed design elements add to the outstanding eye appeal. NGC ID# 26CC, PCGS# 9026

5886 1894-S MS63 PCGS. CAC. This green-gold double eagle provides exceptional eye appeal for the MS63 level, since the reverse is only lightly marked and the obverse is less abraded than is customary for the bag-stored type. Housed in a green label holder. NGC ID# 26CC, PCGS# 9026

**1894-S Double Eagle, MS63+
Vivid Color and Luster**

5887 1894-S MS63+ PCGS. CAC. The 1894-S Liberty double eagle claims a substantial mintage of more than 1 million pieces, but the issue becomes very scarce in grades above the Select level. This high-end Select specimen represents a good balance of quality and value, with well-detailed design elements, vibrant mint luster, and vivid orange-gold surfaces. NGC ID# 26CC, PCGS# 9026

5888 1898-S MS64+ PCGS. CAC. Exquisitely struck and displaying intense luster. Yellow-gold surfaces reveal just a few minor marks. Like most Type Three San Francisco issues, the 1898-S has a high mintage and is plentiful in bagmarked Mint State. However, the issue becomes undeniably difficult to locate in Gem. NGC ID# 26CL, PCGS# 9034

5889 1899 MS64 NGC. This attractive Choice Liberty double eagle displays lightly marked peach-gold surfaces with slightly subdued mint luster and well-detailed design elements throughout. NGC ID# 26CM, PCGS# 9035

5890 1899 MS64 NGC. A splendid Choice Mint State specimen, this 1899 double eagle is an important example, representing the top grade that is easily obtainable with only 73 finer NGC certified pieces (5/13). Both sides are sharply detailed with exceptional luster and brilliant yellow surfaces. NGC ID# 26CM, PCGS# 9035

5891 1899 MS64+ NGC. This turn-of-the-century Liberty Head twenty certainly possesses the overall eye appeal of a Gem, even if just a few too many small contact marks preclude the grade — barely. Bold luster and attractive orange-gold color make this a standout coin. NGC ID# 26CM, PCGS# 9035

**1901-S Liberty Double Eagle, MS63
Scarce in Higher Grades**

5892 1901-S MS63 PCGS. The 1901-S Liberty double eagle enjoyed a large production total of nearly 1.6 million pieces, but the issue is seldom encountered in grades above the MS63 level. This attractive Select specimen exhibits well-detailed design elements and vibrant mint luster, with lightly marked orange-gold surfaces. NGC ID# 26CT, PCGS# 9040

5893 1903 MS65 NGC. A well-struck and beautiful Gem exhibiting apricot toning. Liberty's cheek displays roller marks. NGC has certified a mere nine pieces in finer grades (5/13). NGC ID# 26CW, PCGS# 9043

5894 1903 MS65 PCGS. Bounteous luster appears over orange-gold surfaces that are well-struck and problem free on this Gem 1903 twenty, a coin numerically surpassed in grade by only three submissions at PCGS (5/13). A great coin to represent the type. NGC ID# 26CW, PCGS# 9043

5895 1904 MS64 NGC. Vibrant luster and rich honey-gold color add to the attractiveness of this nicely struck Choice example. Scattered abrasions are present, but there are no marks worthy of individual mention. NGC ID# 26CY, PCGS# 9045

5896 1904 MS64+ PCGS. Apricot-gold base color is surprisingly complex and has a few coppery areas on and near design elements. Liberty's cheek has just a few too many marks for this coin to be a full MS65, but it puts the "near" in "near-Gem." NGC ID# 26CY, PCGS# 9045

5897 1904 MS64 PCGS. CAC. Both sides of this Choice example display attractive eye appeal, with lustrous honey-gold surfaces and relatively few abrasions. A couple of tiny alloy spots are present. NGC ID# 26CY, PCGS# 9045

5898 1904 MS65 PCGS. The lightly marked greenish-gold surfaces of this impressive Gem radiate vibrant mint luster, with few signs of contact. Sharply detailed design elements add to the outstanding eye appeal. NGC ID# 26CY, PCGS# 9045

**1905-S Double Eagle, MS63
Sharply Detailed and Lustrous**

5899 1905-S MS63 NGC. The 1905-S Liberty double eagle is not as easy to locate in high grade as its mintage of 1.8 million pieces would suggest. This impressive Select specimen exhibits sharply detailed design elements and vibrant mint luster, with pleasing yellow-gold surfaces. Eye appeal is quite strong. NGC ID# 26D3, PCGS# 9048

- 5900 1907 MS62 Prooflike NGC.** The vivid lemon-yellow surfaces of this attractive MS62 double eagle are deeply mirrored throughout, with the expected number of minor contact marks for the grade. The design elements are sharply detailed, adding to the considerable eye appeal. Census: 11 in 62 Prooflike, 1 finer (5/13). PCGS# 79052

**1907-D Liberty Twenty, MS63
Final Year of the Liberty Design**

- 5901 1907-D MS63 PCGS. CAC.** The 1907-D double eagle represents the last year of the Liberty design and the issue was particularly well-produced. This delightful Select example displays especially vibrant mint luster, sharply detailed design elements, and well-preserved yellow-gold surfaces with outstanding eye appeal. NGC ID# 26D8, PCGS# 9053

SAINT-GAUDENS DOUBLE EAGLES

- 5902 1908 No Motto MS66 NGC.** Short Rays obverse. A well preserved orange-gold Premium Gem with hints of gunmetal-blue on Liberty's chest and the eagle's breast. Marks are absent aside from an incused S on the top of the sun.
Ex: Phillip H. Morse Collection (Heritage, 11/2005), lot 9374. NGC ID# 26F6, PCGS# 9142
- 5903 1908 No Motto MS66 NGC.** Short Rays Obverse. This lustrous marigold-yellow Premium Gem is carefully preserved and nicely struck. Late dies create wavy orange-peel fields, as made. Faint clash marks are located on the field beneath the eagle's chest.
Ex: Dallas Signature (Heritage, 7/2006), lot 1903, which realized \$2,415. NGC ID# 26F6, PCGS# 9142
- 5904 1908 No Motto MS66 NGC.** Long Rays obverse. A butter-gold representative of this popular two-year type. Potent luster sweeps the minimally marked surfaces. The strike shows inexactness only on UNITED and the Capitol building.
Ex: Orlando FUN Signature (Heritage, 1/2006), lot 5836, which realizes \$2,530. NGC ID# 26F6, PCGS# 9142
- 5905 1908 No Motto MS66 NGC.** Short Rays obverse. This apricot-gold example pedigreed to a formidable collection and exhibits exceptional eye appeal. Beautifully preserved, though the strike is incomplete on the raised knee and the eagle's leg plumage.
Ex: Phillip H. Morse Collection (Heritage, 11/2005), lot 9371. NGC ID# 26F6, PCGS# 9142
- 5906 1908 No Motto MS66 NGC.** Short Rays obverse. A peach-gold beauty with vibrant luster and a clean appearance. The high points display selected incompleteness. A good value relative to finer grades.
Ex: Phillip H. Morse Collection (Heritage, 11/2005), lot 9372. NGC ID# 26F6, PCGS# 9142
- 5907 1908 No Motto MS66 PCGS.** While the 1908 With Motto double eagles are plentiful in high grades from the Wells Fargo Hoard, the same is not true of the No Motto pieces. These coins are rare in the highest Mint State grades, and PCGS has only certified 82 finer examples (5/13). This lovely Premium Gem is fully brilliant with frosty yellow luster and minimal surface marks. NGC ID# 26F6, PCGS# 9142
- 5908 1908-S — Cleaning — PCGS Genuine. AU Details.** A hairlined and briefly circulated caramel-gold representative of this popular low mintage issue. San Francisco usually struck more double eagles than its Philadelphia counterpart but not in 1908. NGC ID# 26FA, PCGS# 9149

- 5909 1909-S/S MS64 PCGS. FS-501.** The mintmark is nicely repunched southeast. Seen on a small minority of 1909-S twenties. This pumpkin-gold near-Gem is lustrous and minimally abraded with a sharp strike. PCGS# 145741

- 5910 1910-D MS65 NGC.** The 1910-D double eagle can be located with little trouble in Gem, but finer coins are quite difficult. Indeed, NGC has seen fewer than 50 higher-grade specimens, and some of these are undoubtedly resubmissions. This Gem displays yellow-gold lustrous surfaces and adequately struck design motifs. A couple of alloy spots under the eagle's breast do not detract. NGC ID# 26FG, PCGS# 9155

- 5911 1910-D MS65 NGC.** Lustrous orange-gold surfaces are present on this lovely example. The piece exhibits a bold level of detail. This is a wonderful Gem representative from an issue that is available up through that grade level, but is scarce any finer. NGC ID# 26FG, PCGS# 9155

- 5912 1910-D MS65 PCGS.** Gorgeous colors, bright and lustrous surfaces, along with strong details combine for tremendous eye appeal on this Gem. This is a lovely representative. NGC ID# 26FG, PCGS# 9155

**1910-D Saint-Gaudens Twenty, MS65+
Conditionally Scarce in Higher Grades**

- 5913 1910-D MS65+ PCGS. CAC.** While specialists seek an example of every date and mintmark combination, others collect just one example from each year, regardless of mintmark. For those collectors, the 1910-D is the best choice, as the most common of the PDS trio, despite having the lowest mintage. This high-end Gem displays rich luster, attractive pumpkin-gold color, and bold design definition. NGC ID# 26FG, PCGS# 9155

- 5914 1910-S MS64 PCGS.** An attractive Choice specimen with well-detailed design elements and vibrant mint luster on both sides. The light yellow and orange-gold surfaces show a few minor contact marks and luster grazes. NGC ID# 26FH, PCGS# 9156

- 5915 1910-S MS64 NGC.** Khaki-gold surfaces display generous luster and a bold strike, but a scattering of small- to medium-sized marks precludes an even finer grade. Most examples of the large mintage exceeding 2 million pieces were melted long ago. NGC ID# 26FH, PCGS# 9156

1911 Twenty Dollar, Choice Uncirculated

- 5916 1911 MS64 NGC. CAC.** An olive-gold near-Gem with unmarked matte surfaces and a full strike. Cartwheel luster swirls throughout both sides. Philadelphia mintages of the denomination were relatively low between 1911 and 1915, perhaps due to the East Coast preference for paper money. Encapsulated in a prior generation holder. NGC ID# 26FJ, PCGS# 9157

5917 1911-D MS65 PCGS. Better-defined than often seen, particularly on Liberty's individually discernible toes. Wheat-gold luster has yellow and orange attributes. Minimally abraded. The online viewer should not be fooled by apparent horizontal abrasions on the left and center obverse; these are on the holder, not the coin itself. NGC ID# 26FK, PCGS# 9158

5918 1911-D MS65 NGC. Honey-gold surfaces with greenish tints exhibit a slightly pebbly-like texture and soft luster on this pleasing Gem. The design features are well defined. A few minor marks appear on the reverse.
Ex: *Dallas Signature* (Heritage, 12/2005), lot 1942. NGC ID# 26FK, PCGS# 9158

5919 1911-D MS65 PCGS. A lustrous, beautifully struck Gem, this piece displays pleasing gold color with highlights of peach near the central obverse. A few thin marks in the left obverse field pose little distraction, if any. NGC ID# 26FK, PCGS# 9158

1911-D Double Eagle, MS66 ★

5920 1911-D MS66 ★ NGC. CAC. The typical 1911-D double eagle has a finely granular surface with satin luster. This piece matches the description with brilliant light yellow luster at the centers, and richer lemon-yellow closer to the borders. A sharply struck piece, it exhibits outstanding eye appeal. NGC has only certified 34 finer pieces (5/13). NGC ID# 26FK, PCGS# 9158

5921 1911-S MS64 PCGS. Butter-gold color with hints of orange and peach add to the eye appeal of this near-Gem, particularly on the obverse. The well-struck coin displays a pleasing degree of detail and there are no surface marks worthy of mention. This is an attractive representative. NGC ID# 26FL, PCGS# 9159

5922 1912 MS63 PCGS. This attractive Select specimen exhibits well-detailed design elements and vibrant mint luster throughout. The yellow and rose-gold surfaces show a minimum number of minor contact marks for the grade. NGC ID# 26FM, PCGS# 9160

5923 1912 MS63 PCGS. Liberal splashes of medium lemon-yellow color appear on both sides of this Select example. The design elements display a strong level of detail overall. Scattered marks are present, including a few near the eagle's beak. NGC ID# 26FM, PCGS# 9160

5924 1912 MS63+ PCGS. This high-end Select specimen exhibits light orange-gold surfaces with vibrant mint luster and a few minor contact marks on both sides. The design elements are well-detailed and eye appeal is quite strong. NGC ID# 26FM, PCGS# 9160

5925 1914-D MS64 PCGS. Intermingled shades of yellow-gold, orange, peach, and green provide this near-Gem with a nice appearance. An alloy spot appears at the top of Liberty's head. NGC ID# 26FT, PCGS# 9165

5926 1914-D MS65 PCGS. This delightful Gem exhibits sharply defined design elements and especially vibrant mint luster on the well-preserved yellow and rose-gold surfaces. Eye appeal is outstanding. PCGS has graded 64 numerically finer examples (5/13). NGC ID# 26FT, PCGS# 9165

1915 Double Eagle, MS64 Rare Date in Finer Grades

5927 1915 MS64 NGC. The 1915 Saint-Gaudens double eagle claims a low mintage of 152,000 pieces, and the issue is scarce at the MS65 level and higher. This attractive Choice specimen displays a pleasing level of detail throughout, with lightly marked canary-gold surfaces. Only 41 examples have received higher numeric grades from NGC (5/13). NGC ID# 26FV, PCGS# 9167

5928 1915-S MS65 NGC. This attractive Gem exhibits well-detailed design elements and lustrous orange-gold surfaces with a few highlights of rose. Only a few minor surface marks are evident on both sides. NGC ID# 26FW, PCGS# 9168

5929 1915-S MS65 NGC. A sharply struck Gem of this scarcer date in the teens that poses a challenge any finer than MS65, this piece displays excellent luster characteristics with lovely, bright orange-gold color. The reverse is almost entirely free of contact marks. NGC ID# 26FW, PCGS# 9168

5930 1915-S MS65 NGC. The well-preserved orange and rose-gold surfaces of this attractive Gem are brightly lustrous and the design elements are well-detailed, with excellent eye appeal. NGC ID# 26FW, PCGS# 9168

5931 1915-S MS65 NGC. This Gem possesses rich luster and medium gold color overall, with a few small splashes of yellow and orange present. The design elements are nicely detailed and there are no marks worthy of mention. NGC ID# 26FW, PCGS# 9168

5932 1915-S MS65 PCGS. This impressive Gem exhibits well-detailed design elements and especially vibrant mint luster on both sides. The bright lemon-yellow surfaces are free of mentionable distractions. NGC ID# 26FW, PCGS# 9168

5933 1915-S MS65 PCGS. Brightly lustrous but also appreciably patinated, particularly in the field framed by Liberty's arms. A few tiny marks are well within the parameters for the Gem grade. This year offers a bit of interesting trivia, as this is the only San Francisco twenty that was not the highest-denomination coin struck at that mint, that year (the 1915-S Panama-Pacific fifties take the crown). NGC ID# 26FW, PCGS# 9168

5934 1916-S MS64 PCGS. Radiant luster and pumpkin-gold color combine to provide outstanding eye appeal for this near-Gem representative. The surface marks are minor in nature. A small streak of as-made struck-in grease appears on the lower portion of Liberty's right leg. NGC ID# 26FX, PCGS# 9169

5935 1920 MS63 NGC. This attractive Select specimen displays pleasing yellow and rose-gold surfaces, with satiny mint luster and a scattering of minor contact marks on both sides that explains the grade. NGC ID# 26FY, PCGS# 9170

**1920 Saint-Gaudens Double Eagle, MS64
Very Rare Any Finer**

5936 1920 MS64 PCGS. CAC. Although a relatively low number of circulation strike pieces were produced, only 228,250, examples are easily obtained through the Choice Level. However, beginning at the MS65 level, survivors are scarce, with PCGS has awarded a higher numeric grade to a single example (5/13). Rich yellow-gold color and pleasing luster provide this piece with nice eye appeal. A well-executed strike further enhances the appearance. NGC ID# 26FY, PCGS# 9170

5937 1922 MS64+ NGC. CAC. This high-end Choice double eagle exhibits well-detailed design elements with an interesting die crack through the letters of IBERTY. Vibrant mint luster is evident on both sides and the peach-gold surfaces show only minor signs of contact. NGC ID# 26G3, PCGS# 9173

**1922 Saint-Gaudens Double Eagle, MS65
Excellent Eye Appeal**

5938 1922 MS65 PCGS. This lustrous pumpkin-gold Gem is minimally abraded and provides pleasing eye appeal. The strike is sharp aside from a slender area of incompleteness on the sun. Unlike its 1921 predecessor, the 1922 will never be rare, yet both major services combined have certified only 15 coins in higher numeric grades (5/13).

Ex: Summer FUN (Heritage, 7/2010), lot 5013; Long Beach Signature (Heritage, 9/2010), lot 5772. NGC ID# 26G3, PCGS# 9173

**1922 Saint-Gaudens Twenty, MS65
Condition Rarity in Higher Grades**

5939 1922 MS65 PCGS. From a mintage of more than 1.3 million pieces, the 1922 Saint-Gaudens double eagle is reasonably available in MS65 condition but the date is a prime condition rarity in finer grades. This sharply detailed Gem exhibits vibrant mint luster and light orange-gold surfaces with outstanding eye appeal. PCGS has graded eight numerically finer examples (5/13). NGC ID# 26G3, PCGS# 9173

**1923 Double Eagle, MS65
Tied for Finest at NGC**

5940 1923 MS65 NGC. All Philadelphia Mint double eagles minted from 1922 through 1928 are considered common issues for type collectors, although the 1922 and 1923 are less common than the five later dates of that period. This sharply defined Gem has hints of pinkish overtones on its brilliant and satiny yellow-gold surfaces. This date is a condition rarity in higher grades as PCGS has only certified three finer coins, and NGC has never certified a finer specimen. NGC ID# 26G5, PCGS# 9175

5941 1924 MS65 PCGS. CAC. Bright, straw-gold color on both sides further enhances the eye appeal of this well-struck piece. The surfaces of this Gem have a lustrous satin appearance. NGC ID# 26G7, PCGS# 9177

5942 1924 MS66 PCGS. This spectacular Premium Gem exhibits sharply detailed design elements and vibrant mint luster throughout. The virtually pristine surfaces are a vivid orange-gold color, with green and rose highlights. NGC ID# 26G7, PCGS# 9177

5943 1924 MS66 PCGS. The vivid orange-gold surfaces of this spectacular Premium Gem radiate satiny mint luster and show no mentionable distractions. The design elements are well detailed and eye appeal is terrific. NGC ID# 26G7, PCGS# 9177

5944 1924 MS66 NGC. Honey-gold surfaces with hints of hazel on both sides. Swirling luster with a couple of tiny luster grazes in the left obverse field. A robust striking of this gorgeous, progressive design (remember that this design in its initial form premiered in the 16th year of the Barber dimes, quarters, and halves). A lovely selection, both technically and aesthetically, for a high-grade type set. NGC ID# 26G7, PCGS# 9177

5945 1924 MS66 NGC. This spectacular Premium Gem exhibits sharply detailed design elements throughout, with bright orange-gold surfaces that show hints of lilac and vibrant mint luster on both sides. NGC ID# 26G7, PCGS# 9177

5946 1924 MS66 PCGS. The 1924 double eagle is the most available issue in the Saint-Gaudens series, making Premium Gems such as this optimally desirable as high-grade type coins. Bold luster complements surfaces that show deep sunset-orange color, a sharp strike, and minimal marks. NGC ID# 26G7, PCGS# 9177

**1924 Double Eagle, MS66+
Popular Type Choice**

5947 1924 MS66+ NGC. CAC. A distinct greenish appearance enhances the eye appeal of this brilliant and highly lustrous yellow-gold Premium Gem. The strike is bold on this representative. The 1924 is far more plentiful than any other Saint-Gaudens double eagle, making it the most popular choice among type collectors. NGC ID# 26G7, PCGS# 9177

**1924 Saint-Gaudens Double Eagle, MS66+
Ideal Type Coin**

5948 1924 MS66+ PCGS. CAC. The 1924 is one of the most available dates in the Saint-Gaudens double eagle series and a favorite choice with type collectors. This high-end Premium Gem displays sharply detailed design elements and vibrant mint luster, with terrific eye appeal. PCGS has certified 81 numerically finer examples (5/13). NGC ID# 26G7, PCGS# 9177

5949 1924-D — Cleaning — PCGS Genuine. Unc. Details. Despite a mintage that exceeded 3 million pieces, the 1924-D is very scarce today, unlike its Philadelphia counterpart. Most of the production never left Treasury vaults, where the issue was held to back gold certificates. The sun-gold surfaces are lustrous but patches of hairlines emerge upon careful rotation. NGC ID# 26G8, PCGS# 9178

5950 1925 MS65 NGC. A sharply detailed Gem, with vibrant mint luster and only minor signs of contact on the pleasing yellow and rose-gold surfaces. Outstanding visual appeal throughout. NGC ID# 26GA, PCGS# 9180

5951 1925 MS66 PCGS. The 1925 Saint-Gaudens double eagle is not difficult to locate in high grade, but few examples are found in grades above MS66. This delightful Premium Gem exhibits sharply detailed design elements and lustrous orange-gold surfaces that show no mentionable defects. PCGS has graded only five numerically finer examples (5/13). NGC ID# 26GA, PCGS# 9180

5952 1925 MS66 NGC. CAC. A lovely Premium Gem example, this piece possesses well-defined design elements, rich luster, and attractive yellow and green-gold surfaces. NGC has awarded higher numeric grades to only 19 examples (5/13). NGC ID# 26GA, PCGS# 9180

5953 1925-D — Cleaning — Genuine PCGS. AU Details. The mintage of the 1925-D surpassed the common date 1923-D, but while examples of the latter were distributed, the 1925-D is very scarce, since it was principally held by the Treasury prior to the 1933 gold recall. The present caramel-gold example has minimal wear and the matte-textured surfaces are minimally abraded though slightly subdued.

**1925-S Twenty, AU Sharpness
Heavily Melted Issue**

5954 1925-S — Cleaning — PCGS Genuine. AU Details. The 1925-S has a high mintage but most pieces never left the Treasury and were eventually melted. Several hundred examples were exported to Europe prior to the 1933 gold recall, and many of those pieces have returned to America in recent decades. Today, the issue is scarce but collectible. This butter-gold example shows little if any wear but is glossy and lackluster with faint hairlines. NGC ID# 26GC, PCGS# 9182

**1925-S Twenty Dollar, AU Sharpness
Very Scarce S-Mint**

5955 1925-S — Damage — PCGS Genuine. AU Details. The cataloger believes the “Damage” designation is unduly strict, since the small digs northwest of the Capitol building and above the eagle’s head are unremarkable for a lightly circulated double eagle. Relative to its Philadelphia cousin, the 1925-S is very scarce today despite a high mintage, since most of the production ended up as gold bricks at Fort Knox. NGC ID# 26GC, PCGS# 9182

5956 1925-S — Scratch — PCGS Genuine. AU Details. Both sides display numerous pinscratches; the outcome of an idle hour decades ago. Cartwheel luster is evident and the eagle’s breast shows only a hint of wear. A high mintage but predominantly melted postwar branch mint issue. NGC ID# 26GC, PCGS# 9182

5957 1926 MS66 NGC. The lemon-yellow and rose-gold surfaces of this delightful Premium Gem are well-preserved and brightly lustrous, with sharply detailed design elements and terrific eye appeal. NGC has certified only seven numerically finer examples (5/13). NGC ID# 26GD, PCGS# 9183

5958 1926 MS66+ NGC. Copious luster appears over orange-apricot surfaces that show only a few tiny tick marks rather than overt signs of contact. One of the more available P-mint issues from the decade of the 1920s, although not as much as the 1924 or the 1927. Census: 4 in 66+, 7 finer (5/13). NGC ID# 26GD, PCGS# 9183

5959 1927 MS65 PCGS. This lemon-gold Gem displays dazzling cartwheel sheen. Nicely struck and carefully preserved. A pleasing representative of this available type issue. Encapsulated in an old green label holder. NGC ID# 26GG, PCGS# 9186

5960 1927 MS65 PCGS. A pumpkin-gold Gem whose dynamic luster, sharp strike, and attractively preserved surfaces ensure considerable eye appeal. Certified in a first generation holder. NGC ID# 26GG, PCGS# 9186

5961 1927 MS65 NGC. The 1924, 1927, and 1928 Saint-Gaudens issues are among a group of P-mints frequently chosen for type purposes. Rich honey-gold color and vibrant luster are attributes of this lovely Gem. Both sides display a couple of alloy spots. NGC ID# 26GG, PCGS# 9186

5962 1927 MS66 PCGS. This impressive Premium Gem possesses especially vibrant mint luster with outstanding eye appeal. The design elements are well-detailed and the surfaces show no mentionable signs of contact. NGC ID# 26GG, PCGS# 9186

5963 1927 MS66 NGC. Yellow-gold color, shimmering luster, sharp strike detail, and minimal contact marks make this Gem example an attractive double eagle. Just a couple of small abrasions are detected on Liberty’s leg under close examination. NGC ID# 26GG, PCGS# 9186

5964 1927 MS66 NGC. Potent luster greets the viewer of this boldly struck and attractively preserved Saint-Gaudens double eagle. Over the years, examples of the 1927 have returned to our shores from foreign gold reserve holdings, and the issue is by no means rare in typical Mint State grades. However, only a slender fraction of these pieces merit the lofty assigned grade of the present piece. NGC ID# 26GG, PCGS# 9186

- 5965** 1928 MS66 NGC. This stunning Premium Gem displays flawless yellow and peach-gold surfaces with vibrant mint luster and sharply detailed design elements. Eye appeal is outstanding. NGC ID# 26GK, PCGS# 9189

TERRITORIAL GOLD

August Bechtler Gold Dollar, Uncirculated Details
27 G, 21 C, Kagin-24

- 5966** (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge — Reverse Damage — NGC Details. Unc. K-24, R.3. The wheat-gold surfaces are well defined but somewhat wavy. Moderate marks are noted near the first E in BECHTLER and the OL in GOLD. A collectible August Bechtler variety. Listed on page 376 of the 2014 *Guide Book*.

1853 Assay Office Twenty, 900 Thous.
Uncirculated Details, K-18

- 5967** 1853 Assay Office Twenty Dollar, 900 Thous. — Filed Rims — PCGS Genuine. Unc. Details. K-18, R.2. The obverse rim is filed between 9 and 12 o'clock with a slight touch-up on the rim at 2 o'clock. This butter-gold example from the waning days of the San Francisco Assay Office is richly detailed and shows luster throughout the motifs, legends, and scrollwork. Listed on page 380 of the 2013 *Guide Book*. PCGS# 10013

CALIFORNIA FRACTIONAL GOLD

- 5968** 1855/4 Liberty Octagonal 1 Dollar, BG-511, High R.4, AU58 NGC. A momentarily circulated but satiny example of this scarce Frontier, Deviercy & Co. Period One variety. Olive-gold and lilac toning embraces unmarked surfaces. Census: 5 in 58, 11 finer (4/13). PCGS# 10488

1868 Liberty Quarter, MS67
BG-711, Octagonal

- 5969** 1868 Liberty Octagonal 25 Cents, BG-711, R.4, MS67 NGC. This variety is one of the many made by Frontier, Deviercy & Co. during Period Two. The pristine surfaces are attractively toned in lemon-gold and olive-green shades. The strike is good though the reverse legends show minor softness where opposite the high relief portrait. Census: 3 in 67, 0 finer (5/13). PCGS# 10538
- 5970** 1873 Liberty Octagonal 25 Cents, BG-728, R.3, MS67 NGC. This common variety is frequently seen in the upper grade levels, with the combined NGC and PCGS population data including a total of seven Superb Gems, four at NGC and three at PCGS (5/13), although we suspect that some duplication may exist. Neither service has awarded an MS68 grade or higher. This splendid Superb Gem specimen has rich yellow-gold color and matte-like surfaces displaying a strong level of eye appeal. Census: 4 in 67, 0 finer (5/13). PCGS# 10555
- 5971** 1871 Liberty Round 25 Cents, BG-809, Low R.4, MS67 NGC. The moderately mirrored sun-gold fields are unabraded and provide outstanding eye appeal. The strike is full except on the fraction denominator. One mint-made retained lamination inside the D in DOLLAR. Tied with one other example for the honor as finest certified at NGC (5/13). PCGS# 10670
- 5972** 1859 Liberty Octagonal 50 Cents, BG-901, High R.6, MS64 Prooflike NGC. A flashy straw-gold near-Gem that boasts a crisp strike and an unabraded appearance. As of (4/13), NGC has certified a total of five examples in all grades, with only the present piece as MS64 Prooflike and just one finer as MS65 Prooflike. PCGS# 710759
- 5973** 1873 Liberty Octagonal 50 Cents, BG-915, Low R.4, MS66 NGC. Pleasing color and rich luster add to the eye appeal of this Premium Gem representative. Both sides display a well executed strike overall, with minor incompleteness appearing at the F in HALF and A in DOLLAR. Census: 7 in 66, 1 finer (5/13). PCGS# 10773
- 5974** 1871 Liberty Octagonal 50 Cents, BG-927, Low R.5, MS63 Deep Prooflike NGC. A nicely struck representative of this better Liberty octagonal variety. The prominently reflective sun-gold fields display only minor hairlines and a tiny strike-through (as issued) near the A in DOLLAR. The sole example certified as Deep Prooflike by NGC (4/13). PCGS# 810785
- 5975** 1872/1 Indian Octagonal 50 Cents, BG-937, High R.4, MS65+ PCGS. Die State II with a cud at 3 o'clock on the reverse. Deeply mirrored fields display pleasing cameo contrast against the frosted devices. Several of the stars are soft, as typically seen, but the central design elements are boldly impressed. This piece features a 90-degree die rotation. A hair-thin line appears to the left of the portrait. Population: 6 in 65 (1 in 65+), 2 finer (5/13). PCGS# 10795

**1872 Octagonal Indian Half Dollar, MS67
Single Finest Certified BG-939**

- 5976** 1872 Indian Octagonal 50 Cents, BG-939, Low R.5, MS67 NGC. Light wheat-gold toning overlies flashy sun-gold surfaces. Smooth and pristine, and in fact (as of 5/13) the single highest graded specimen at either leading service. A hair thin flan crack (as made) traverses between the 87 in the date on the obverse and through the serif of the numerator on the reverse. PCGS# 10797

**1865 Round Liberty Half Dollar, BG-1005
MS65, The Single Finest Certified**

- 5977** 1865 Liberty Round 50 Cents, BG-1005, Low R.5, MS65 NGC. A flashy Gem with greater field reflectivity on the obverse than the reverse. The strike is crisp save for a few letters in the reverse legends that oppose high points of the portrait. Essentially immaculate, though we note a small vertical lamination above the bust. The heavy diagonal break on the upper obverse is usual for the variety. As of (5/13), the single finest certified by either service. PCGS# 10834

**1871 Round Liberty Half Dollar, BG-1029
MS65 Deep Prooflike
Sole Deep Prooflike Certified**

- 5978** 1871 Liberty Round 50 Cents, BG-1029, High R.4, MS65 Deep Prooflike NGC. Remarkably mirrored fields distinguish this sharply struck and splendidly preserved butter-gold Gem. The L initial beneath the bust stands for Levison Bros., the successor firm to Robert B. Gray & Co. Presently the only Deep Prooflike example certified by NGC (5/13). PCGS# 910858

-
- 5979** 1871 Liberty Octagonal 1 Dollar, BG-1109, Low R.4, MS62 PCGS. A prooflike wheat-gold octagonal dollar that has a typical strike and a couple of small retained laminations near the G in GOLD. Housed in a green label holder. Population: 24 in 62, 22 finer (4/13). PCGS# 10920

- 5980** 1871 Liberty Octagonal 1 Dollar, BG-1109, Low R.4, MS62 PCGS. Ex: Bruce Collection. This peach-gold representative is flashy and minimally abraded with a few tiny flecks and the usual moderate incompleteness of impression at the centers. Population: 24 in 62, 22 finer (4/13). PCGS# 10920

End of Session Five

SESSION SIX

HERITAGE Live!®, Internet, Fax, and Mail Only Session
Saturday, June 8, 2013 | 3:00 PM CT | Dallas, Texas | Lots 7001 - 8417

A 17.5% Buyer's Premium (\$14 minimum) Will Be Added To All Lots
To view full descriptions, enlargeable images and bid online, visit HA.com/1186

SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. Check the Time Remaining on individual lots for details. After Internet proxy bidding closes, live bidding will take place through HERITAGE Live!®, our bidding software that lets you bid live during the actual auction. Your secret maximum will compete against those bids, and win all ties. To maximize your chances of winning, enter realistic secret maximum bids before live bidding begins. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bidders could lose lots they would otherwise have won, so be sure to place your proxy bids in advance.)

EARLY QUARTERS

7766 1805 Good 4 PCGS. PCGS Population (40/442). NGC Census: (18/231). Mintage: 121,394. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4: \$400. NGC ID# 23RC, PCGS# 5313

7767 1806 VG8 PCGS. CAC. PCGS Population (69/508). NGC Census: (40/287). Mintage: 206,124. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$540. NGC ID# 23RD, PCGS# 5314

BUST QUARTERS

7768 1818 Fine 15 PCGS. CAC. PCGS Population (56/406). NGC Census: (24/350). Mintage: 361,174. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$380. NGC ID# 23RH, PCGS# 5322

7769 1818 B-4, R.2 Fine 15 PCGS. PCGS Population (0/0). NGC Census: (0/0). PCGS# 38945

7770 1819 Large 9 Fine 12 PCGS. PCGS Population (7/51). NGC Census: (0/0). PCGS# 5326

7771 1821 Fine 12 PCGS. CAC. PCGS Population (22/228). NGC Census: (6/183). Mintage: 216,851. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$240. NGC ID# 23RM, PCGS# 5331

7772 1828 Fine 15 PCGS. CAC. PCGS Population (8/162). NGC Census: (4/119). Mintage: 102,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$256. NGC ID# 23RV, PCGS# 5342

7773 1831 Small Letters VF35 PCGS. CAC. PCGS Population (31/414). NGC Census: (10/461). Mintage: 398,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$274. NGC ID# 23RW, PCGS# 5348

7774 1831 Small Letters, B-4, R.1 XF45 PCGS. CAC. PCGS Population (0/0). NGC Census: (0/0). PCGS# 38983

7775 1831 Large Letters, B-7, High R.5 — Holed and Plugged — PCGS Genuine. PCGS# 38986

7776 1832 XF45 PCGS. PCGS Population (17/109). NGC Census: (15/86). Mintage: 320,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$432. NGC ID# 23RX, PCGS# 5351

7777 1834 B-3, R.3 XF45 PCGS. CAC. PCGS Population (0/0). NGC Census: (0/0). PCGS# 38994

7778 1834 B-5, R.5 Fine 12 PCGS. CAC. PCGS Population (0/0). NGC Census: (0/0). PCGS# 38996

7779 1835 XF45 PCGS. CAC. PCGS Population (58/200). NGC Census: (63/245). Mintage: 1,952,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$431. NGC ID# 23S2, PCGS# 5354

7780 1835 B-6 AU55 NGC. NGC Census: (54/140). PCGS Population (38/96). Mintage: 1,952,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$700. NGC ID# 23S2, PCGS# 5354

7781 1838 Capped Bust, B-1 — Cleaned — ANACS. AU55 Details. NGC Census: (18/94). PCGS Population (21/60). Mintage: 366,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$725. NGC ID# 23S5, PCGS# 5357

SEATED QUARTERS

7782 1842-O Large Date — Cleaned — ANACS. MS60 Details. NGC Census: (0/5). PCGS Population (1/23). Mintage: 769,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$1,750. NGC ID# 23SP, PCGS# 5402

7783 1843 AU58 PCGS. CAC. PCGS Population (11/31). NGC Census: (18/54). Mintage: 645,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$300. NGC ID# 23SR, PCGS# 5404

7784 1845 MS61 NGC. NGC Census: (7/49). PCGS Population (2/41). Mintage: 922,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$500. NGC ID# 23SV, PCGS# 5408

7785 1847 AU58 NGC. NGC Census: (11/31). PCGS Population (7/23). Mintage: 734,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$300. NGC ID# 23SX, PCGS# 5410

7786 1850-O AU53 NGC. NGC Census: (4/45). PCGS Population (5/31). Mintage: 412,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$675. NGC ID# 23T5, PCGS# 5416

7787 1851-O VG10 PCGS. PCGS Population (4/45). NGC Census: (2/23). Mintage: 88,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG10: \$478. NGC ID# 23T7, PCGS# 5418

7788 1853 Arrows and Rays AU53 NGC. NGC Census: (38/635). PCGS Population (61/533). Mintage: 15,210,020. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$325. NGC ID# 23U4, PCGS# 5426

7789 1853/4 Arrows and Rays VF35 PCGS. CAC. PCGS Population (7/39). NGC Census: (2/32). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$382. NGC ID# 23U4, PCGS# 5427

7790 1854 Arrows AU55 PCGS. PCGS Population (69/264). NGC Census: (52/316). Mintage: 12,380,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$275. NGC ID# 23U6, PCGS# 5432

7791 1856 AU58 NGC. NGC Census: (26/113). PCGS Population (12/138). Mintage: 7,264,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$235. NGC ID# 23TB, PCGS# 5438

7792 1857 MS61 NGC. NGC Census: (13/273). PCGS Population (10/215). Mintage: 9,644,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$365. NGC ID# 23TE, PCGS# 5442

7793 1857-O AU55 NGC. NGC Census: (11/38). PCGS Population (12/26). Mintage: 1,180,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$625. NGC ID# 23TE, PCGS# 5443

7794 1858-S VG10 PCGS. CAC. PCGS Population (1/52). NGC Census: (0/23). Mintage: 121,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG10: \$198. NGC ID# 23TK, PCGS# 5447

7795 1860-S — Damaged — PCGS Genuine. VG Details. NGC Census: (1/12). PCGS Population (7/31). Mintage: 56,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$1,050. NGC ID# 23TS, PCGS# 5453

7796 1861 AU58 PCGS. PCGS Population (74/338). NGC Census: (99/323). Mintage: 4,854,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$225. NGC ID# 23TT, PCGS# 5454

7797 1861-S VG10 PCGS. CAC. PCGS Population (6/38). NGC Census: (1/22). Mintage: 96,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG10: \$244. NGC ID# 23TU, PCGS# 5455

7798 1863 — Whizzed — NGC Details. AU. NGC Census: (2/50). PCGS Population (0/58). Mintage: 191,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$340. NGC ID# 23TX, PCGS# 5458

7799 1864 AU58 PCGS Secure. PCGS Population (2/49). NGC Census: (1/34). Mintage: 93,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$690. NGC ID# 23TY, PCGS# 5459

7800 1870 AU50 PCGS. PCGS Population (4/34). NGC Census: (3/19). Mintage: 86,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$350. NGC ID# 23UK, PCGS# 5476

7801 1873 Arrows AU50 PCGS. PCGS Population (15/197). NGC Census: (9/184). Mintage: 1,271,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$330. NGC ID# 23VU, PCGS# 5491

7802 1876-S MS61 PCGS. PCGS Population (11/206). NGC Census: (22/173). Mintage: 8,596,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$265. NGC ID# 23V4, PCGS# 5503

7803 1876-S MS62 PCGS. CAC. PCGS Population (47/159). NGC Census: (43/130). Mintage: 8,596,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$325. NGC ID# 23V4, PCGS# 5503

End of Session Six

SESSION SEVEN

HERITAGE Live!®, Internet, Fax, and Mail Only Session
Sunday, June 9, 2013 | 3:00 PM CT | Dallas, Texas | Lots 8418 - 9824

A 17.5% Buyer's Premium (\$14 minimum) Will Be Added To All Lots
To view full descriptions, enlargeable images and bid online, visit HA.com/1186

SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. Check the Time Remaining on individual lots for details. After Internet proxy bidding closes, live bidding will take place through HERITAGE Live!®, our bidding software that lets you bid live during the actual auction. Your secret maximum will compete against those bids, and win all ties. To maximize your chances of winning, enter realistic secret maximum bids before live bidding begins. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bidders could lose lots they would otherwise have won, so be sure to place your proxy bids in advance.)

EARLY DOLLARS

- 8418** 1795 Flowing Hair, Two Leaves, B-9, BB-13, R.4 — Holed — NGC Details. Good. NGC Census: (0/0). PCGS Population (0/3). PCGS# 39980
- 8419** 1798 Large Eagle, Pointed 9, B-11, BB-111, R.3 — Damaged — NGC Details. Good. NGC Census: (0/0). PCGS Population (0/5). PCGS# 40028

SEATED DOLLARS

- 8420** 1840 — Cleaned — PCGS Genuine. VF Details. NGC Census: (1/233). PCGS Population (6/291). Mintage: 61,005. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$350. NGC ID# 24YA, PCGS# 6926
- 8421** 1841 XF45 PCGS. PCGS Population (60/173). NGC Census: (23/151). Mintage: 173,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$668. NGC ID# 24YB, PCGS# 6927
- 8422** 1842 AU50 ANACS. NGC Census: (43/277). PCGS Population (76/215). Mintage: 184,618. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$750. NGC ID# 24YC, PCGS# 6928

- 8423** 1843 — Improperly Cleaned — NGC Details. AU. NGC Census: (47/218). PCGS Population (67/171). Mintage: 165,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$775. NGC ID# 24YD, PCGS# 6929
- 8424** 1843 — Obverse Scratched — NGC Details. AU. NGC Census: (47/218). PCGS Population (67/171). Mintage: 165,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$785. NGC ID# 24YD, PCGS# 6929
- 8425** 1846 XF45 PCGS. CAC. PCGS Population (104/310). NGC Census: (62/297). Mintage: 110,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$640. NGC ID# 24YG, PCGS# 6932
- 8426** 1846-O — Cleaned — PCGS Genuine. XF Details. NGC Census: (12/121). PCGS Population (38/146). Mintage: 59,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$800. NGC ID# 24YH, PCGS# 6933

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
- Nineteen and one-half percent (19.5%) on Americana & Political, Arms & Armor, Civil War & Militaria, Comic, Manuscript, Movie Poster, Space Exploration, Sports Collectibles, Texana, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, twenty-five percent (25%) on the first \$50,000 (minimum \$14), twenty percent (20%) of any amount between \$50,000 and \$1,000,000, and twelve percent (12%) of any amount over \$1,000,000.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature* Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature. Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at HA.com/common/howtobid.php.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-443-8425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments for Signature auctions; Internet-only auction bidding increments are approximately half of these amounts (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment	Current Bid	Bid Increment
< - \$10	\$1	\$10,000 - \$19,999	\$1,000
\$10 - \$29	\$2	\$20,000 - \$29,999	\$2,000
\$30 - \$49	\$3	\$30,000 - \$49,999	\$2,500
\$50 - \$99	\$5	\$50,000 - \$99,999	\$5,000
\$100 - \$199	\$10	\$100,000 - \$199,999	\$10,000
\$200 - \$299	\$20	\$200,000 - \$299,999	\$20,000
\$300 - \$499	\$25	\$300,000 - \$499,999	\$25,000
\$500 - \$999	\$50	\$500,000 - \$999,999	\$50,000
\$1,000 - \$1,999	\$100	\$1,000,000 - \$4,999,999	\$100,000
\$2,000 - \$2,999	\$200	\$5,000,000 - \$9,999,999	\$250,000
\$3,000 - \$4,999	\$250	>\$10,000,000	\$500,000
\$5,000 - \$9,999	\$500		

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature* Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot considered by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 1-800-872-6467.
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot.
25. Lots delivered to you, or your representative in the States of Texas, California, New York, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. (Note: Coins are only subject to sales tax in California on invoices under \$1500 and in Texas on invoices under \$1000. Check the Web site at: <http://coins.ha.com/c/ref/sales-tax.zx> for more details.) Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount or three percent (3%) of any installment that is past due. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 10% seller's commission, if assigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 10% seller's commissions, if sold at an Auctioneer's auction.

Terms and Conditions of Auction

29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale. In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping and handling. Please refer to Auctioneer's website www.HA.com/common/shipping.php for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.
35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.
- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.
- 36B. Auctioneer shall not be liable for any loss caused by or resulting from:
- Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
 - Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions.
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Dispute Resolution for Consumers and Non-Consumers: Any claim, dispute, or controversy in connection with, relating to and/or arising out of the Auction, participation in the Auction, award of lots, damages of claims to lots, descriptions, condition reports, provenance, estimates, return and warranty rights, any interpretation of these Terms and Conditions, any alleged verbal modification of these Terms and Conditions and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation shall or any other matter: a) if presented by a consumer, be exclusively heard by, and the parties consent to, exclusive in personam jurisdiction in the State District Courts of Dallas County, Texas. THE PARTIES EXPRESSLY WAIVE ANY RIGHT TO TRIAL BY JURY. Any appeals shall be solely pursued in the appellate courts of the State of Texas; or b) for any claimant other than a consumer, the claim shall be presented in confidential binding arbitration before a single arbitrator, that the parties may agree upon, selected from the JAMS list of Texas arbitrators. The case is not to be administered by JAMS; however, if the parties cannot agree on an arbitrator, then JAMS shall appoint the arbitrator and it shall be conducted under JAMS rules. The locale shall be Dallas Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. Any party on any claim involving the purchase or sale of numismatic or related items may elect arbitration through binding PNG arbitration. Any claim must be brought within one (1) year of the alleged breach, default or misrepresentation or the claim is waived. This agreement and any claims shall be determined and construed under Texas law. The prevailing party (party that is awarded substantial and material relief on its claim or defense) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions:

COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-8726467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (1-800-872-6467) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcgsguarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM M: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM N: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM O: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

For wiring instructions call the Credit department at 1-800-872-6467 or e-mail: CreditDept@HA.com

New York State Auctions Only

Notice as to an Auction in New York City. LUXURY REAL ESTATE AUCTIONS

Announcing

Heritage Auctions, the world's third largest auction house, specializing in fine art and collectibles, is now the only top tier auction company to offer luxury real estate auctions. Heritage offers you a powerful platform that reaches its client base of more than 750,000 members worldwide.

Working with Heritage's luxury real estate experts, sellers maintain control over the entire sale process, choosing the date, setting the terms and structuring the actual sale. Paired with our customized marketing campaigns, selling at auction accelerates the process, eliminates carrying costs and avoids long drawn-out negotiations. Best of all, Heritage conducts the sale in a transparent, competitive bidding environment – all within 60 to 90 days timeframe from beginning to closing!

If your property is valued at \$2 million or more, please call Heritage Luxury Real Estate Auctions to discover how we can help you find qualified, motivated buyers today.

LEGENDS OF THE WILD WEST III AUCTION FEATURES SIGNIFICANT CASINO CHIPS

1. Flamingo Hotel \$25 5th issue lavender. Possibly the finest of approximately five known undrilled examples.
Minimum bid \$6,000
2. Hotel Last Frontier \$25 4th issue. One of several known.
Minimum bid \$2,000
3. Desert Inn \$5 7th issue 1958. Very tough R-9 chip from this popular casino. Pleasing used example.
Minimum bid \$1,500
4. MGM Grand \$25 special issue with .999 fine silver center picturing Dean Martin on the obverse. R-10.
Minimum bid \$1,250
5. The Mint \$25 7th issue. An R-10 chip, cancelled with notches as are other examples. One of only two known, it was a sample retained in their offices.
Minimum bid \$4,000
6. Star Broiler \$25 2nd Issue. Another R-10 chip in spectacular condition.
Minimum bid \$3,000
7. Hotel Last Frontier \$5 3rd issue. An unlisted, unique example released in 1944.
Minimum bid \$5,000
8. Pioneer \$5 7th issue, an R-9 1050s issue. All of approximately 6 known specimens are holed as this one, but the hole has been expertly filled for cosmetic reasons.
Minimum bid \$1,000
9. Cactus Pete's \$25 Jackpot Nevada in unique light green shade.
Minimum bid \$3,000

Free catalog and The Collector's Handbook (\$65 value) for new clients. Please submit auction invoices of \$1,000+ in this category, from any source. Include your contact information and mail to Heritage, fax 214-409-1425, email CatalogOrders@HA.com, or call 866-835-3243. For more details, go to HA.com/FCO.

THE WORLD'S LARGEST COLLECTIBLES AUCTIONEER

HERITAGE AUCTIONS

[HA.com/FBHistorical](https://www.facebook.com/HAhistorical)

[HA.com/Twitter](https://twitter.com/HAcom)

When it's time to unwind or celebrate, Heritage Auctions makes quality wine purchases affordable – and fun.

Although we hold interactive live auctions featuring high-caliber, blue-chip wines, our monthly Internet-only auctions have seen great drinking wines and assorted collectibles sell for as little as \$15 a bottle.

And our state-of-the-art bidding platform is certain to make your purchase remarkably more interesting than a trip to your local wine store.

Bid. Drink. And be Merry.

Inquiries: Frank Martell • 310.492.8616 • 800.872.6467 ext. 1753 • FrankM@HA.com

In-house Wine Merchant

Heritage offers a range of in-stock wines at competitive prices, with bottles delivered directly to your home or office.
Call today for a list of wines available for immediate purchase.
